

Digest 178

A photograph of two men in a construction setting. Both are wearing white hard hats and orange safety vests over grey long-sleeved shirts. The man on the left is smiling and looking towards the man on the right. They are both leaning over a table, looking at a set of blueprints. The background is a blurred construction site with scaffolding and structural elements.

INNOVATION

Powering the digital economy

EcoStruxure is Schneider Electric's IoT-enabled, plug-and-play, open, interoperable architecture and platform, in Homes, Buildings, Data Centers, Infrastructure and Industries.

EcoStruxure delivers Innovation at Every Level from Connected Products to Edge Control, and Apps, Analytics and Services, on 6 domains of expertise – Power, IT, Building, Machine, Plant and Grid – delivering enhanced value around safety, reliability, operational efficiency, sustainability, and connectivity to our customers..

How to Use Digest 178

Welcome to the Schneider Electric Digest! Over a thousand pages of technical product information to help you specify and select Schneider Electric products.

A key element of the Digest 178 is its color-coded Table of Contents, shown at the right, and matching product section tabs throughout the Digest. This colorful approach aids navigation and helps you quickly find the major product categories.

A detailed Table of Contents is provided at the beginning of each product section and two indexes are available in the back of the book: an alphabetical listing and an alphanumeric listing. To ensure you have the latest pricing information, list prices are now available online only. This meets our customer and market driven demand to merge technical information with functionality.

Finally, the Supplemental and Obsolescence Digest 178 contains additional product information for our international product offer, our legacy products in the obsolescence process, and more.

DigestPLUS

DigestPLUS provides one location to access the most current Digest updates available in HTML5 and PDF formats, plus many links to additional technical product information to assist with specifying and selecting Schneider Electric products. DigestPLUS is a simple portal into all things Digest related.

Field Services for Every Step of the Lifecycle

From planning and inception to modernization and end-of-life, Schneider Electric helps you ensure optimal technical and business performance. Our services engineers combine decades of manufacturer-level experience with the latest technology to bring innovation to every level of our offer, and every step of your project.

With our IoT-enabled EcoStruxure™ Power solutions, we can help proactively empower facilities with system-health analyses and maintenance service recommendations to optimize performance and help deliver more reliable and efficient power.

QO Load Center

QO™ and Homeline™ Load Center EZ Selector - Selection Assistance

EZ Selector

Steps to select a load center.

1. Select product type:
 - Homeline™ 1 inch format (HOM)
 - QO™ 3/4 inch format with plug-on neutral (QO) (P)
 - QO™ 3/4 inch format (QO)
2. Select enclosure type: indoor or outdoor (RB = rainproof)
3. Select single phase (1) or three phase (3)
4. Select type of main:
 - Main circuit Breaker (M)
 - Main lugs (L)
 - Generator panel (GP)
5. Select main ampacity rating
6. Select pole spaces and max. number of 1-pole, single-phase circuits
7. Select cover style:
 - Surface (box mounted on surface)
 - Surface (box mounted on surface, hinged cover included)
 - Flush (box recessed, cover is flush to wall)
8. Value pack (VP)
9. Select ground bar option:
 - Ground bar factory installed (T)
 - Ground bar included, field installation (G)
10. Select special application:
 - Riser panel with gutter
 - Mfg housing, single phase 3-wire, convertible mains
 - Manufactured housing, single phase, 3-wire
 - Manufactured housing, single phase, 2-wire

QO™ and Homeline™ Load Centers — Catalog Number Construction

Additional Information

- See Circuits [1].
- Search “Load Centers” from our technical FAQs page: www.schneider-electric.us/en/faqs/home/
- Refer to catalog 1100CT0501.

[1] QO Plug-on neutral load center catalog numbers indicate the number of spaces only. The tables in this document containing QO plug-on neutral load centers list the maximum number of single-pole circuits when using tandem breakers.

QO Standard Plug-On Circuit Breakers

Square D brand QO miniature circuit breakers are plug-on products for use in QO load centers, NQOD and NQ panelboards, NQOD and NQ OEM interiors or Speed-D™ switchboard distribution panels. Bolt-on QOB circuit breakers are for use in NQOD and NQ panelboards or interiors. [1]

The Square D exclusive Qwik-Open™ mechanism, with a trip reaction within 1/60th of a second, is standard on all 1P 15 and 20 A QO circuit breakers.

Refer to [page](#) for Interrupting Ratings, Accessories, and Dimensions.

[1] See Digest Section 1 for load centers, and Section 9 for panelboards and interiors.

[2] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–125 A circuit breakers are suitable for use with 75°C conductors.

[3] UL Listed 5 k AIR on corner grounded Delta systems.

[4] UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[5] UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.

[6] Requires four spaces (1 AWG–300 kcmil Al/Cu.) Suitable for switching 120 Vac fluorescent lighting loads.

[7] Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

[8] UL Listed for use ahead of QO, QO-GFI, QO-EPD, QOT, QO-AFI, and QO-PL 10 k AIR circuit breakers to permit their application at 22 kA fault level.

[9] 100 A maximum branch mounted opposite.

[10] Order only. Contact your local Field Office.

QO-GFI

2P
QO-GFI

QO Ground-Fault Circuit Breakers (GFI)

Qwik-GardTM circuit breakers provide overload and short circuit protection, combined with Class A ground fault protection. Class A denotes a ground fault circuit interrupter that will trip when a fault current to ground is 6 mA or more, for people protection. Do not connect to more than 250 feet of load conductor for the total one-way run to prevent nuisance tripping.

Table 1.6: QO-GFI Circuit Breakers

Circuit Breaker Type	Ampere Rating [14]	Qwik-Gard Circuit Breakers With Ground Fault Circuit Interrupter

[14] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

[15] Suitable only for feeding 240 Vac and 208 Vac two-wire loads. Does not contain load neutral connection.

[16] New Plug-On Neutral

[17] UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[18] For 120/240 V only, not for 208Y/120 V.

 QO 1P
With Shunt Trip

QO-EPD/EPE Circuit Breakers

QO-EPD/EPE circuit breakers provide overload and short circuit protection combined with Class B ground fault protection. They are designed to provide ground fault protection of equipment at a 30 mA level (EPD) or 100 mA level (EPE). They are not designed to protect people from electrical shock.

Table 1.9: QO-EPD Circuit Breakers

QO High Intensity Discharge Circuit Breakers (QO-HID)

HID circuit breakers are for use on circuits feeding fluorescent and high intensity discharge (HID) lighting systems such as mercury vapor, metal halide, or high pressure sodium. These circuit breakers are physically interchangeable with QO circuit breakers.

Table 1.11: QO-HID Circuit Breakers

Ampere Rating [22]	1P 120/240 Vac 10 k AIR 1 Space Required	2P Common Trip 120/240 Vac 10 k AIR 2 Spaces Required	3P Common Trip 240 Vac 10 k AIR 3 Spaces Required

QO Key Operated Circuit Breakers (QO-K)

Key operated QO circuit breakers are available in single-pole construction and can be mounted in any single-pole space which will accept a standard QO circuit breaker. These circuit breakers can be turned ON or OFF or to RESET with a special key (catalog number QOK10) included with the circuit breaker. These circuit breakers are UL Listed and available as shown in the table.

QO-K Key Operated

[19] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

[20] See note in Instruction Bulletin when using in an enclosure with a QO403 or QON prefix.

[21] Suitable only for feeding 240 Vac and 208 Vac two-wire loads. Does not contain load neutral connection.

[22] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

QO High Magnetic Trip Circuit Breakers (QO-HM)

High magnetic trip circuit breakers are recommended for applications where high initial inrush may occur and for individual dimmer applications.

Table 1.13: QO-HM Circuit Breakers

20 A	QO120HM [24] [25]

Non-Automatic (Standard) Miniature Switches

Miniature non-automatic switches have the same physical packaging as miniature circuit breakers, but open only when the handle is switched to the OFF position.

Non-automatic switches provide no overcurrent protection or short circuit protection. They must not be used on systems that have an available fault current greater than the values listed in the table. Non-automatic switches are UL Listed per UL 1087 and are CSA certified.

Table 1.14: QO Non-Automatic Miniature Switches, 240 Vac 10 kA

Ampere Rating	2P	3P
60	QO200	QO300
100	QO200 ^{OBS}	QO300

^{OBS} This product is obsolete.

[23] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

[24] UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[25] UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.

[26] Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

Factory-Installed Accessories for QO and QOB Miniature Circuit Breakers

Factory-installed electrical accessories take up an additional pole space on QO, QO-GFI, QO-EPD, QO-SWN and QOU circuit breakers. All AC electrical accessories shown below are rated for 50/60 Hz. Accessories are not available for QOB-VH (2P 150 A and 3P 110–150 A) circuit breakers or QO, QOU molded case switches. QO circuit breakers will accept only one accessory per circuit breaker. Undervoltage trip is not available on miniature circuit breakers. Factory-installed accessories are not available for QO-AFI or QO-CAFI Arc Fault Circuit Breakers, QO-CAFI, QO-DF, or QO-PDF circuit breakers, or on QO2150, QO2175, or QO2200 circuit breakers.

Table 1.16: Factory-Installed Accessories for QO/QOB Circuit Breakers

Accessory	Description	Rated Voltage	Coil Burden	Cat. No. Suffix	Accessory	Description	Contact Comb.	Max. Voltage	Max.	Cat. No. Suffix
Shunt Trip	Trips the circuit breaker from a remote location by means of a trip coil energized from a separate circuit. A 120 Vac shunt trip will operate at 55% or more of rated voltage. All other shunt trips will operate at 75% or more of rated voltage. Application <ul style="list-style-type: none">For use with momentary or maintained push button.Not available on QO-GFI, QO-EPD, QO-AFI, QO-CAFI, QO-DF, or QO-PDF.Shunt trip terminals accept (2) 0.14–0.12 AWG Cu.	12 Vac/Vdc 24 Vac/Vdc	60 VA 168 VA	-1042	Auxiliary Switches	Monitors circuit breaker contact status and provides a remote signal indicating the circuit breaker contacts are OPEN or CLOSED. QO™ Plug-On Neutral Load Centers with Qwik-Grip™ (1Ø3W—120/240 Vac Indoor—UL Listed)

The Square D QO plug-on neutral load centers with Qwik-Grip simplify rough-in by eliminating the need to remove knockouts, install wire connectors, and blindly pull wire into the load center. A quick bend of the wire using the wire bend guide on the Qwik-Grip insert and the wire slides into the slot. Once inserted, the Qwik-Grip shield snaps on to keep the wire behind the router for a secure, code-compliant installation.

Table 1.27: Manual Power Transfer Accessories

	Description	Cat. No.	Schedule
Manual Transfer Equipment Kit	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be "ON" at a time.	QO2DTI	DE2E
	QO2DTI mechanical interlock attachment with retaining kits for securing two adjacent back-fed circuit breakers in dual power supply applications. Can be used with (2) 2P or (1) 2P and (1) 1P QO circuit breakers in QO816L100 load centers.	QO2DTIM	DE2E
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4LA	DE3A
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 150–225 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4HA	DE3A
	Secures two 2P circuit breakers to left side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4LAL	DE3A
Generator Circuit Breaker Interlock Kit	For use on "G" and "S" Series NEMA 1 and "G," "S1" and "S2" Series NEMA 3R load centers. Interlocks a QOM1 2P main circuit breaker of a load center (100–125 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QOCRBGK1C	DE3A
	For use on "G" and "S" Series NEMA 1 and "G" and "S1" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QOCGK2C	DE3A
	For use on "S2" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QORBGK2C	DE3A

[26] Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.

[27] See page 1-33 or page 1-35

Above listings through 200 A mains rating meet Federal Specification W-P-115C as Type 1, Class 2.

- [28] Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.
 [29] See page 1-33
 [30] UL short circuit current rating depends on lowest interrupting rating of circuit breaker installed.
 [31] Will not accept QO-EPD or Qwik-GardTM QO-GFI or QO-AFI circuit breakers.
 [32] Mains rated 25 A when Al wire is used.
 [33] Order F for flush device or S for surface device.
 [34] Use 10 AWG maximum size wire for GFI and AFI circuit breakers.
 [35] 70 A Max. branch circuit breaker and 100 A max. back fed main circuit breaker.
 [36] CU indicates copper bus.
 [37] Copper bus.
 [38] Factory-included.
 [39] See Table 1.74 Knockout Information, page 1-33
 [40] Mains rating 25 A when Al wire is used.
 [41] Will not accept Qwik-GardTM QO-GFI or QO-AFI circuit breaker.
 [42] Use 10 AWG maximum size wire for GFI and AFI circuit breakers.
 [43] Main circuit breaker is a field-installed standard QO single pole circuit breaker. Order separately from page 1-2, page 1-3.
 [44] 70 A max. branch circuit breaker and 70 A max. back fed main circuit breaker.
 [45] Interior only, order box separately.
 [46] PK27GTA includes a 6–2/0 AWG Al/Cu lug.
 [47] PE1A Discount Schedule.
 [48] UL Listed 5000 A short circuit current rating for corner grounded Delta systems. Use QO-H circuit breakers only.

**QO Standard Load Center Main Lugs, Fixed Mains

[57] UL short circuit current rating depends on lowest interrupting rating of circuit breaker installed.

[58] UL Listed 5000 A short circuit current rating for corner grounded Delta systems. Use QO-H circuit breakers only.

[59] Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.

[60] See page 1-33

[61] Available in gray and white. For white equivalencies, add the “W” suffix to the reference, or see page 1-29.

[62] Comes with 125 A main circuit breaker factory installed.

[63] Order catalog number PK4FL for field-installed lock kit.

[64] One tap kit required for each riser wire.

[65] When used with B300 bolt-on hubs.

[66] See page 1-33

[67] UL short circuit current rating depends on lowest interrupting rating of circuit breaker installed.

[68] For Certification to IEC 60439-1 contact the local Square D sales office; otherwise panels are **NOT** CE marked. (For use on 415Y/240 Vac 3-phase 4-wire, 3,000 Short Circuit Current Rating when QOXD...branch circuit breakers are used and 10,000 Short Circuit Current Rating when QO...VS branch circuit breakers are used).

[69] PK15GTA.

[70] PK23GTA and LK100AN.

[71] 25 kA short circuit current rating SCCR maximum with Square D Type QDL main circuit breaker, or 22 kA SCCR maximum with back-fed Type QO-VH main circuit breaker, feeding QO 10 k AIR branch circuit breakers.

[72] Includes factory-installed back fed QO3100VH main circuit breaker.

[73] 65 kA Short Circuit Current Rating maximum with field-installed Square D type QGL 65 k AIR minimum main circuit breaker feeding QO and Q1 10 k AIR minimum branch circuit breakers.

[74] Side hinge door device allow 1-1/4 in. on left side for door to open.

[75] When these 3P circuit breakers are used as the main circuit breaker of a 3Ø load center, the maximum AIR rating is 65 kA at 240 Vac and 100 kA at 208 Vac.

HomeLine Standard Plug-On Circuit Breakers

The Square D HomeLine circuit breakers are in a 1 in. wide format for 1-pole circuit breakers. They are designed to plug into Homeline load centers.

Table 1.39: Standard HOM Plug-on Circuit Breakers

HomeLine High Magnetic Circuit Breakers (HOM-HM)

High magnetic trip circuit breakers are recommended for applications where high initial inrush current may occur.

Table 1.40: HOM-HM Circuit Breakers

Ampere Rating	1P—120/240 Vac	2Ps
15 A	HOM115HM OBS	—
20 A	HOM120HM [2]	—

OBS This product is obsolete.

HomeLine Ground-Fault Circuit Breaker (HOM-GFI)

HOM-GFI circuit breakers provide overload and short circuit protection, combined with Class A ground fault protection. Class A denotes a ground fault circuit interrupter that will trip when a fault current to ground is 6 milliamperes or more.

Table 1.41: HOM-GFI Circuit Breakers

Circuit Breaker Type	Ampere Rating	AIR	1P—120 Vac 1 Space Required	2P—120/240 Vac Common Trip 2 Spaces Required

Above listings through 200 A mains rating meet Federal Specification W-P-115c as Type 1, Class 2.

Field-Installed Main Circuit Breaker Kits, 1Ø

Table 1.52: QOM1 Frame Size—Use with Convertible Main Load Centers Only

Main Circuit Breaker Rating [7]	Convertible Load Center Mains Rating	22 k AIR [8] Main Circuit Breaker	Lug Wire Size [9] AWG/kcmil
50 A	100–125	QOM50VH	12–2/0 Al or Cu
60 A	100–125	QOM60VH	
70 A	100–125	QOM70VH	
80 A	100–125	QOM80VH	
90 A	100–125	QOM90VH	
100 A	100–125	QOM100VH	
110 A	125	QOM110VH	
125 A	125	QOM125VH	

QOM1 Frame Size
50–125 Amperes

[1] Maximum single pole branch circuits utilizing HOM and/or HOMT circuit breakers.

[2] C at end of catalog number indicates combination flush/surface cover included with device.

[3] See page 1-33

[4] F/S at end of catalog number indicates to order F for flush device or S for surface device. The cover does not have a door.

[5] HOM-GFI and HOM-AFI branch circuit breakers are limited to number 10 maximum wire.

[6] 70 A maximum branch circuit breaker, 100 A maximum back feed main circuit breaker.

[7] Do not exceed the load center mains rating.

[8] 22 k AIR main circuit breaker UL Listed for use ahead of QO, QOT and QO-PL 10 k AIR branch circuit breakers to permit their application on systems with up to 22 kA available fault current.

[9] Wire range listed for QOM circuit breaker kits is the wire range of that circuit breaker. To find out maximum wire size permitted in a particular load center per UL, see Main Wire Size in that load center table.

QOM2 Frame Size
100–225 Amperes

Table 1.53: QOM2 Frame Size—Use with Convertible Main Load Centers Only

Main Circuit Breaker Rating [10]	Convertible Load Center Mains Rating	22 k AIR [11]	Lug Wire Size [12] AWG/kcmil
		Main Circuit Breaker [13]	
100 A	150–225	QOM2100VH	4–300 Al or Cu

HOM Plug-on Neutral Load Centers with Qwik-Grip (1Ø3W—120/240 Vac Indoor—UL Listed)

The Square D Homeline plug-on neutral load centers with Qwik-Grip simplify rough-in by eliminating the need to remove knockouts, install wire connectors, and blindly pull wire into the load center. A quick bend of the wire using the wire bend guide on the Qwik-Grip insert and the wire slides into the slot. Once inserted, the Qwik-Grip shield snaps on to keep the wire behind the router for a secure, code-compliant installation.

HOM Plug-on Neutral Load Center with Qwik-Grip

QO Load Center Accessories

Table 1.65: QO Load Center Accessories

Description			Cat. No.	Schedule
Circuit Identification Stickers	Circuit identification stickers for use on cover directory labels to identify branch circuits		PSDS	DE5
Cover Sealing Strap	Provides means of sealing trim mounting screws on QO load center covers		QO1SE	DE3A
Door Lock Kits	Use with QO612L100DF/S, QO612L100DFCU/SCU, QO612L100DTF/S, QO816L100DF/S, QO816L100DFCU/SCU, QO816L100DTF/S, QO48M30DSGP, or QO48M60DSGP		PK8FL [4]	DE3A
	Use with convertible mains, 1Ø and 3Ø 100–225 A, and fixed mains, 3Ø 125–225 A indoor load centers		PK6FL	DE3A
	Use with 300 and 400 ampere indoor load centers		PK4FL	PE1A
Filler Plates	Fills opening in covers if twistout is removed in error		QOFP	DE3A
	Fills main circuit breaker opening in convertible load center covers 100–125 A		QOM1FP	DE3A
	Fills main circuit breaker opening in convertible load center covers 150–225 A		QOM2FP	DE3A
	Fills main circuit breaker opening in 3Ø load center covers (S01 and S02 Series)		KFP	DE3A
Ground Bar Kits	Fills main circuit breaker opening in "Q" style 3Ø load center covers (S03 Series)		Q2FP	DE3A
	Ground Bar Assembly—3 connectors		PK3GTA1	DE3A
	Ground Bar Assembly—4 connectors		PK4GTA	DE3A
	Ground Bar Assembly—7 connectors		PK7GTA	DE3A
	Ground Bar Assembly—12 connectors		PK12GTA	DE3A
	Ground Bar Assembly—15 connectors		PK15GTA	DE3A
	Ground Bar Assembly—18 connectors		PK18GTA	DE3A
	Ground Bar Assembly—23 connectors		PK23GTA	DE3A
	Ground Bar Assembly—27 connectors		PK27GTA	DE3A
	Ground Bar Assembly—21 connectors. Use in high amperage load centers.		PK15GTA6	DE3A
	Standard PK15GTA with a 1–4/0 Al/Cu Lug		PK15GTAL	DE3A
	Standard PK18GTA with a 1–4/0 Al/Cu Lug		PK18GTAL	DE3A
	Standard PK23GTA with a 1–4/0 Al/Cu Lug		PK23GTAL	DE3A
	Ground Bar Pack— PK9GTA, PK9GTA, & LK100AN		PKGTALP1	DE3A
	Ground Bar Pack— PK9GTA, PK18GTA, & LK100AN		PKGTALP2	DE3A
Ground Bar Pack—PK15GTA, PK18GTA, & LK100AN		PKGTALP3	DE3A	
Insulator Kit for PK7GTA through PK27GTA		PKGTAB	DE3A	
Handle Padlock Attachments	For padlocking main circuit breakers in convertible load centers OFF	50A–125A	QOM1PA	DE2E
	For padlocking main circuit breakers in convertible load centers OFF	100A–225A	QOM2PA	DE2E
Neutral Bonding Screw	For use on all Homeline and QO 125A convertible main load centers	4028344850K		DE5
	For use on QO 150A–225A convertible main load centers	4028345850K		DE5
Neutral / Ground Lugs	Field-installed for 12– 2 Al or 14–4 Cu AWG wire		LK70AN	DE3A
	Field-installed for 6–2/0 Al/Cu AWG wire		LK100AN	DE3A
	Field-installed for 14–2/0 Al/Cu AWG wire		LK125AN	DE3A
	Field-installed for 2–3/0 Al/Cu AWG wire		LK150AN	DE3A
	Field-installed for 4 AWG to 300 kcmil Al/Cu wire. Use in Series S, 150–225A QO load center or S03 and below, 150–225A HOM load center		LK225AN	DE3A
Replacement Cover Directory Label	1 through 42 numbered universal replacement directory label for load center covers		LSDL	DE5
Retaining Kit for Breakers Used as Back-fed Mains	Secures circuit breaker to interior when used as a back-fed main. For QO612L100F/S, RB, QO612L100DF/S, QO816L100F/S, RB, QO816L100DF/S and QO148L125GF/S, GRB load centers		PK2MB	DE3A
	Secures 3P circuit breaker without accessories to left side of interior when used as a back-fed main. For 3Ø load centers		PK3MB	DE3A
	Secures circuit breaker to interior when used as a back-fed main for 2P QO 150–200 A circuit breakers		PK5RK OBS	DE3A
	Secures ONE circuit breaker with or without electrical accessories to right side of interior when used as a back-fed main For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02		PK4MB2LA	DE3A
	Secures ONE circuit breaker with or without electrical accessories to right side of interior when used as a back-fed main For 1Ø 150–225 ampere convertible main load centers. Series S01 and S02		PK4MB2HA	DE3A
Service Entrance Barriers	QO / Homeline 1Ø 100–125 A QOM1 convertible main load centers		PKSB1LA	DE3A
	QO / Homeline 1Ø 150–225 A QOM2 convertible main load centers		PKSB1HA	DE3A
	QO 3Ø convertible main load centers		PKSB3	DE3A
	QO 1Ø back-fed main breaker applications		PKSB1QOBF	DE3A
	QO 3Ø back-fed main breaker applications		PKSB3BF	DE3A
QO Load Center Manual Power Transfer Accessories				
Generator Circuit Breaker Interlock Kit	For use on "G" and "S" Series NEMA 1 and "G", "S1" and "S2" Series NEMA 3R load centers. Interlocks a QOM1 2P main circuit breaker of a load center (100–125 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.		QOCRBGK1C	DE3A
	For use on "G" and "S" Series NEMA 1 and "G" and "S1" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.		QOCGK2C	DE3A
	For use on "S2" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.		QORBGK2C	DE3A
Manual Transfer Equipment Kit	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be "ON" at a time.		QO2DTI	DE2E
	QO2DTI mechanical interlock attachment with retaining kits for securing two adjacent back-fed circuit breakers in dual power supply applications. Can be used with (2) 2P or (1) 2P and (1) 1P QO circuit breakers in QO816L100 load centers.		QO2DTIM	DE2E
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.		PK4DTIM4LA	DE3A
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 150–225 ampere convertible main load centers. Series S01 and S02.		PK4DTIM4HA	DE3A
	Secures two 2P circuit breakers to left side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.		PK4DTIM4LAL	DE3A

OBS This product is obsolete.

[4] QO403L60NF/S does not have provisions for a field-installed lock.

Bolt-On Hubs

Square D equipment with "R" or "RB" suffix, designated NEMA 3R rainproof construction, utilizes bolt-on hubs listed below. "RB" devices will accept 3/4 in. through 2-1/2 in. bolt-on hubs without the use of reducers. Off-center conduit thread openings and elongated mounting holes provide quick and easy adjustment to eliminate costly conduit offsets and bends. Catalog suffix "R" devices require 3 in. through 4 in. field cut opening. Hubs are suitable for use with conduit having ANSI standard taper pipe thread.

Table 1.78: Bolt-On Hubs UL Listed for Rainproof Devices

Conduit Size	3/4 in.	1 in.	1-1/4 in.	1-1/2 in.	2 in.	2-1/2 in.
Hub Cat. No.	B075	B100	B125	B150	B200	B250

NOTE: Closing cap (Cat. No. BCAP) is provided factory-installed on each device having "RB" suffix.

Table 1.79: Bolt-On Hubs UL Listed for Mounting in Field-Cut Opening

Conduit Size	3 in.	4 in.
Hub Cat. No.	B300	B400

Designed for mounting in field cut opening. Includes gasket and four mounting bolts and nuts.

[1] HOME250SPA and QO260NATR top endwall has no hub opening.

[1] To order branch circuit breakers, see QO Plug-On Circuit Breakers, page 1-3

[2] To order hubs, see Accessories and Hubs for CSEDs, page 1-47

[3] To order service disconnects, see Circuit Breakers for CSEDs, page — except as noted)

[4] Use only 15–110 A and 150–200 A breakers.

[5] Suitable for OH service with addition of tunnel kit (SCTK20). Order separately.

[6] Use only 15–100 A and 150–200 A circuit breakers.

[7] Supplied with load side feed-thru lugs, for 4 AWG–250 kcmil (Al/Cu) conductors.

[8] Convertible to semiflush with SC200F flange kit (order separately).

[9] Service disconnect supplied factory-installed.

[10] A 100 A circuit breaker can be installed in bottom position only, all other positions are limited to 70 A max.

[11] Device supplied with barrel lock provisions factory-installed.

[12] 5th jaw factory-installed.

[13] Use only 15–100 A and 150 A circuit breakers.

[14] Knockout provided in cover for use with barrel lock kit SCBRLOCK (see Accessories).

[15] 125 A HomeLine™ 2P circuit breaker can be installed in top position only. All other positions are limited to 100 A max.

OBS This product is obsolete.

[16] To order branch circuit breakers, see [QO Plug-On Circuit Breakers](#), page 1-3

[17] To order hubs, see [Accessories and Hubs for CSEDs](#), page 1-47

[18] To order service disconnects, see [Circuit Breakers for CSEDs](#), page 1-47 except as noted)

[19] Device supplied with barrel lock provisions factory-installed.

[20] Use only 15–100 A and 150–200 A circuit breakers.

[21] Supplied with load side feed-thru lugs, for 4 AWG–250 kcmil (Al/Cu) conductors.

[22] 5th jaw factory-installed.

[23] Service disconnect supplied factory-installed.

[24] Use only 15–100 A and 150 A circuit breakers.

[25] Suitable for load wires to exit top endwall with addition of Tunnel Kit OHBL, see [Table 1.89 Accessories](#), page 1-47, check with local utility for approval.

[26] Convertible to semiflush with SC200F flange kit (order separately).

[27] Knockout provided in cover for use with barrel lock kit SCBRLLOCK (see Accessories).

[28] A 100 A circuit breaker can be installed in bottom position only, all other positions are limited to 70 A max.

Meter Mains and All-In-Ones (100 to 225 A Maximum)

- Ring or ringless type meter socket designs available
- UL Listed, suitable only for use as service equipment
- Meets EUSERC standards
- Service disconnect(s) are supplied factory-installed, except where noted
- Semiflush-reverse design available, supplied with load center (indoor access)
- Supplied with 100% branch neutrals, all unused terminals may be used for equipment grounding wires.
- Meets Federal Specification W-P-115c as Type 1, Class 2

OBS This product is obsolete.

[29] To order branch circuit breakers, see QO Plug-On Circuit Breakers, page 1-3

[30] To order hubs, see Accessories and Hubs for CSEDs, page 1-47

[31] 125 A HomeLine™ 2P circuit breaker can be installed in top position only. All other positions are limited to 100 A max.

[32] Convertible to semiflush with SC200F flange kit (order separately).

[33] Device does not meet EUSERC Specifications.

[34] Use only 15–110 A and 150–200 A circuit breakers.

[35] Device supplied with barrel lock provisions factory-installed.

[36] 5th jaw factory-installed.

[37] Suitable for load wires to exit top endwall with addition of Tunnel Kit OHBL, (see Table 1.89 Accessories, page 1-47, check with local utility for approval.

[40] To order service disconnects, see [Circuit Breakers for CSEDs](#), page except as noted)

[41] One service disconnect with 2 — 110 A sub-main feeds.

[42] Nine spaces are used for factory-installed components, leaving 51 available spaces for branch circuits.

Meter Mains and All-in-Ones (300–400 A Devices)

Meter Mains and All-in-Ones

- Ring or ringless type meter socket designs available
- UL Listed, suitable **only** for use as service equipment
- Meets EUSERC standards where indicated.

- Service disconnects are supplied factory-installed, except where noted
- Supplied with 100% branch neutrals; all unused terminals may be used for equipment grounding wires
- Meets Federal Specification W-P-115c as Type 1, Class 2

Meter Mains: Meets Federal Specification W-P-115c as Type 1, Class 2, UL Listed, suitable only for use as service equipment, 120/240 Vac, 1Ø3W, NEMA 3R Enclosure

OBS This product is obsolete.

[43] UL short circuit current rating is equal to the lowest interrupting rating of any circuit breaker installed.

[44] To order branch circuit breakers, see [QO Plug-On Circuit Breakers, page 1-3](#)

[45] To order hubs, see [Accessories and Hubs for CSEDs, page 1-47](#)

[46] To order service disconnects, see [Circuit Breakers for CSEDs, page](#) except as noted)

[47] For use only on 120/240 Vac 1Ø3W system (4-jaw meter socket).

[48] Service disconnect supplied factory-installed.

[49] Device configuration is not included in EUSERC standards. Consult applicable utility for acceptance.

[50] Additional service disconnect for field-installation: order prefix QBL at 10 kA, QDL at 25 kA, QGL at 65 kA, or QJL at 100 kA. Order separately. For complete circuit breaker catalog number, see Digest Section 7.

[51] Order two pole circuit breakers for field installation: order catalog designation QO for 10 kA, QO-VH for 22 kA or QOH for 42 kA short circuit current rating. See [Table 1.1 Plug-On Circuit Breakers, page 1-3](#) or [Table 1.88 Circuit Breakers for use with Meter Mains and All-In-One Devices, page 1-46](#).

[52] QO panel is rated 200 A maximum.

[53] Supplied with load side feed-thru lugs for 6 AWG–250 kcmil (Al/Cu) conductors.

[54] Option for field installation of two Q-frame, 200 A max. 2-pole branch circuit breakers used as mains for two downstream load centers. Purchase installation kit BMK2Q400 and two Q-frame circuit breakers separately. Order QBL prefix at 10 kA, QDL prefix at 25 kA, or QGL prefix at 65 kA.

[55] Fifth jaw factory-installed.

[56] Device with suffix L has Class 320 lever bypass and device with suffix K has a K-4 bolt-on, no bypass.

[57] Knockout provided in cover for use with barrel lock kit SCBRLOCK (see [Table 1.89 Accessories, page 1-47](#)).

Symbol	A	B	C	D	E	F	G	H	I	J
Conduit Size (in.)	1/2	3/4	1	1-1/4	1-1/2	2	2-1/2	3	3-1/2	4

- ▲ Drip hood supplied factory-installed and is required for surface mount installation. For semi-flush installation, remove drip hood and install flange kit SC200F (order separately).
- Unit supplied with blank top endwall (factory-installed) for surface mount installation. For semi-flush installation, install flange kit FK400 (order separately). Kit includes replacement top endwall (with knockouts) and flanges.
- ◆ Unit supplied with semi-flush top endwall factory installed and semi-flush flanges factory included.

Solar Ready PoN CSEDs

- Ring or ringless type meter socket designs available
- UL Listed, suitable only for use as service equipment
- Service disconnect(s) are supplied factory-installed, except where noted
- Interiors accept plug-on neutral and pigtail style branch circuit breakers
- Supplied with a fully distributed neutral bar, all unused terminals may be used for equipment grounding wires
- Meets Federal Specification W-P-115c as Type 1, Class 2
- Solar ready kits for line side tap available, see accessories table
- All devices have a 3" KO in the bottom endwall
- Provisions for field installed CTs on All devices

Accessories and Hubs for CSEDs

Table 1.89: Accessories

Description		Cat. No.
Generator Kit: Interlocks main service disconnect and generator circuit breaker (order separately). For : Homeline™ CSED Devices RC816F-, RC2040M-, SO2040M- containing suffix -C or -CH QO CSED Devices QC816F-, QC2442M- containing suffix -C or -CH		RCGK2 QCGK3
Backfed inverter circuit breaker retaining kit for SC2636M225FPV		PK2SCPV OBS
Fifth Jaw Kit for:	Meter Main Types: C, RC, SC, QC All-In-One Types: SC, SU (100–225 A), QC, RC, SO	5J
Bypass (Horn Type) for Ringless Type Meter Mains and All-In-Ones (100–200 A) (except for RC8L125S, RC1624M100S and RC1624M125S—use RCHB).		MMHB
Lexan Meter Socket Cover Plate for: Ring and Ringless Type Meter Mains Ring and Ringless Type All-In-Ones		29007
Meter Socket Sealing Rings for Ring Type Meter Mains and All-In-Ones: Snap Type Aluminum (Std.) Screw Type Aluminum Snap Type Stainless Steel		2920910001 29008W ARP00026
Anti-Inversion Kit : For use ONLY on 400 A Meter Mains and All-In-Ones with lever bypass.		MMLRK
Trim Kit for 2 in. X 6 in. stud wall, used with Reverse All-In-Ones, SU3040M200R, and SU3040M225R		SU2X6TRIM
Barrel Lock Kit (Barrel Lock not included), supplied with bracket and mounting screw, refer to listings for where used.		SCBRLLOCK
Semiflush Flange Kit for:	Meter Mains: SC816D150/200C and RC816D200CH All-In-Ones: SC2040M200C	SC200F
Semiflush Flange Kit for ring- and ringless-type Meter Mains and All-In-Ones (400 A Only)		FK400
Lug Kit includes (4) lugs, for use with 2 AWG–600 kcmil Al/Cu conductors. Lugs are for standard 2-Hole mounting. Meter Main and All-In-One units supplied with (2) studs per phase and neutral will accept one lug per phase and neutral. Not for use on 400 A devices with "K" suffix.		CMELK4
Branch Circuit Breaker Field Installation Kit for two Q-Frame Circuit Breakers (QBL, QDL, or QGL, order separately). For CUM400CB, QUM400CL or QUM400CK - includes (2) mounting pans, (4) wires.		BMK2Q400
Overhead Feed Trough for 400 A ring- and ringless-type Meter Mains and All-In-Ones.		OCK400
Touch-Up Paint (ASA49 Gray)		PK49SP
Ground Bar Kit, Meter Mains and All-In-Ones QC, RC, and SC (100–225 A)		PK15GTA
Filler Plate for:	Meter Main Types: QC, CU All-In-One Types: QC	QOFF
Filler Plate for:	Meter Main Types: RC, SC All-In-One Types: SC, RC, SU	HOMFP
Neutral Lug (6-2/0 AWG) for:	Meter Main Types: RC, SC, QC All-In-One Types: SC, SU, QC, RC	LK100AN
Overhead Barrier Tunnel Kit for Ringless & Horn Bypass in RC/QC Devices		OHBS OBS
Overhead Barrier Tunnel Kit for Lever Bypass RC/QC Devices		OHBL
Solar Ready Kit for Type SC Semiflush Mounted Solar Ready Devices (includes lugs and replacement UL67 barrier)		SR69064AF
Solar Ready Kit for Type SC Surface Mounted Solar Ready Devices (includes lugs and replacement UL67 barrier)		SR69064AS
Energy Center Manual Transfer Kit		QO2DTEC
Energy Center Hold-Down Bracket Kit		QOCRBGK2EC
Solar Ready Kit for UG 200 A Max Meter Mains		SRKUGMM
Generator Kit for RU- SU- 200 A Max Meter Mains		RUSUGK
Generator Kit for QU- CU- 200 A Max Meter Mains		QUCUGK

Wiser Energy™ Home Power Monitor

Wiser Energy from Square D is an integral part of any smart home. With Wiser Energy, you can give your home a voice. It helps you keep tabs on your home by notifying you when devices are on or off in the home, and monitors home energy usage in real time, for a safer and more efficient home.

- Keep tabs on your home activity from anywhere
- Save money on your electric bill with live energy tracking
- Get notified with instant alerts of appliances left on or off
- Take control of your energy through smart device integration

More information can be found at: [Wiser Energy](https://www.se.com/us/en/home/offers/connected-home/wiser-energy/)

Dimmers, Switches, and Outlets

Square D™ wiring devices continue to raise the bar on aesthetics, ease of installation, and connectivity.

Square D X Series Wiring Devices

The X Series connected products include wall switches and dimmers, socket outlets (receptacles), occupancy and humidity sensors, and media and network devices.

View the X Series products at <https://www.se.com/us/en/product-range/26420638>.

Square D XD Series Cover Plates

XD Series consists of a premium range of screwless wall cover plates and frames that mount easily on X Series switches and receptacles.

View the XD Series products at <https://www.se.com/us/en/product-range/38326871>.

Power Outlet Panels for Construction Sites

- Provide temporary power at construction sites.
- Each receptacle protected by QO-GFI circuit breaker in compliance with NEC® requirements.
- Each enclosure is rainproof.
- 10 kA short circuit current rating.
- UL Listed as suitable for use as temporary site service equipment.
- Provided with neutral bonding provisions.
- Boxes have provisions for type "B" hubs to be field-installed.

OBS This product is obsolete.

[1] (1Ø2W 120 Vac) (1Ø3W 120/240 Vac)

[2] Devices have a bolt-on factory-installed closing cap. Order type "B" bolt-on hub separately from page 1-18.

[3] Equipment ground terminal suitable for (2) 14 or 12 AWG Cu or (2) 12 or 10 AWG Al.

[4] Receptacles in this device are in bottom endwall and are accessible with outer door padlocked. "Order Only" from Lexington—Minimum order quantity is 50 devices.

A		20 A 125 V 2W and Grd. NEMA 5-20R
B		30 A 125 V 2W and Grd ANSI 73.13

E		30 A 125/250 V 3W and Grd. NEMA 14-30R
F		50 A 250 V 2W and Grd. NEMA 6-50R

All non-pedestal devices have provisions to field-install a Type "B" hub on the bottom endwall for bottom feed from a conduit riser. Order Type "B" bolt-on hub (B250 Max.) and two mounting screws (Cat. No. 8002505501) and two hex nuts (Cat. No. 2340102000).

Power Outlet Panels for Recreational Vehicle Parks

- Provide electrical power to individual recreational vehicle park sites.
- Each receptacle protected by appropriate GFI or Standard QOTM circuit breaker.
- All receptacles and circuit breakers included.
- 10 kA short circuit current rating.
- UL Listed.
- All enclosures are rainproof.
- No neutral bonding provisions.
- Loop-feed provisions.

Individual Meter Sockets

This metering is generally utility specific. Always check with local utility company before installing. Contact your nearest Field Sales Office for additional catalog numbers, if required by utility.

- Available single or three phase, 600 Vac max., with and without horn or lever bypass, overhead and underground service feed.
- 10 kA short circuit current rating (or higher with utility approval).
- UL Listed, NEMA 3R enclosure.
- Units supplied with bonded neutral.
- Units supplied with hub opening in top endwall require the use of a bolt-on hub, or closing plate.
- Units supplied with solid top are for underground feed only.
- For accessories, refer to [page 2-3](#).

[1] Rating is continuous.

[2] Device requires approval from the serving utility, consult your nearest Schneider Electric sales office.

[3] For box dimensions, see [page 2-4](#).

[4] Order appropriate bolt-on hub or closing plate separately and install on TOP endwall.

[5] Device supplied with solid top endwall (without hub opening).

[6] When unit is installed for underground feed, the appropriate closing plate must be ordered separately and installed over hub opening in TOP endwall of device.

[7] Device supplied with two closing plates ACP mounted in TOP endwall.

[8] Device supplied with 1-1/4 in. bolt-on hub (Cat. No. A125) mounted on TOP endwall.

[9] Contains "Duquesne Light Co." approved label.

[10] Device supplied with closing plate ACP mounted on TOP endwall.

[11] Order lugs separately, see [page 2-3](#).

UT2R1121B

Horizontal Ganged Meter Sockets

- 1Ø, 600 Vac max., main lugs only, 2 through 6 meter positions, with and without horn or lever bypass, end or center feed, overhead and underground service feeds.
- 10 kA short circuit current rating (or higher with utility approval).
- UL Listed, NEMA 3R enclosure.
- Supplied with ground lugs.
- Supplied with hub opening in top endwall, requires the use of a bolt-on hub, or closing plate.

This metering is generally utility specific. Always check with local utility company before installing. Contact your nearest Field Sales Office for additional catalog numbers, if required by utility.

MP44125

Ring and Ringless Type Devices

- Consult local utility for approval before installation.
- 120/240 Vac 1Ø3W.
- Main lugs only—two to six meter sockets.
- Enclosures are indoor/rainproof NEMA 3R construction.
- Suitable only for use as service equipment.
- Swingable mounting feet supplied at bottom of device.
- Factory-installed mechanical lugs, alternate lugs and NEMA/EUSERC lug landing kits available.
- Surface mount, convertible to semi-flush with field installed flange kit.
- Ring type devices supplied with 4-jaw meter sockets (5th jaw kits available, order separately).
- Ringless type devices supplied with 5-jaw meter sockets, available with and without horn or lever bypass.
- Provisions for mounting 2-pole circuit breaker for each meter socket position (order circuit breakers separately).
- Mounting channel supplied, except for box 1R (125 A, 2-position).
- Combination overhead/underground feed.

NOTE: UL Listed short circuit current rating depends on lowest interrupting rating of circuit breaker installed.

[1] See page 2-7 for alternate lugs.
 [2] For A and A-L Hubs see page 2-3, for B Hubs see Digest Section 3.
 [3] Meets EUSERC standards.
 [4] Meets EUSERC standards with addition of lug landing kit, MMSK2.
 [5] See page 2-7
 [6] Requires use of EZM125QOA adapter (order separately).

NEMA/EUSERC Lug Landing Kit:	For 3 through 6 position 125 A and 200 A devices. Each pad rated 600 A maximum and includes (2) 1/2-13 studs and mounting hardware.	MMSK2 [13]
NEMA Lug Landing Kit:	For use ONLY on MPL43225, MPL53225 and MPL64225 with optional lugs. See wiring diagram of each device for optional lugs.	MMSK4
MP Meter-Pak Wireway: (Wall Mount Pedestal)	125 A 2 Position ONLY 125 A 3–6 Position 200 A 2–6 Position MPL32-225 MPL53-225 MPL64-225	MP43X8PED MP43X11PED MP43X11PED MP35X11PED [14] MP43X11PED MP35X11PED [14]
MP Meter-Pak Wireway Extensions:	Used ONLY with MP43X8PED Used with MP43X11PED and MP35X11PED	MP12X8PEDEXT [14] MP12X11PEDEXT [14]

[7] Order only. Not stocked in PDS. Order Point: Lincoln.

[8] Requires use of EZM125QOA adapter (order separately).

[9] QO-VH tenant circuit breakers are rated 22 kAIR at 120/240 Vac.

[10] QOH tenant circuit breakers are rated 42 k AIR at 120/240 Vac.

[11] The meter center short circuit current rating is 10 kA when manual circuit closing is used. Not rated for continuous duty.

[12] Standard lug for 3 through 6 position 125 A and 2 through 4 position 200 A devices.

[13] Cannot be installed on 2 position 125 A device.

[14] Order only. Not stocked in PDS. Order point: Lexington.

For hubs and closing plates, see page 2-3.

EZM General Information

NEMA 3R Construction

240 Vac Maximum, for use on AC systems, suitable for use as Service Equipment.

Utility Company Requirements Review local utility requirements to ensure that metering equipment meets their standards.

EZ Meter-Pak meter center enclosures meet NEC wire bending requirements, and are designed for wall mounting only (not suitable for floor mounting). All unmetered conductor compartments may be sealed by the utility company.

EZ Meter-Pak meter centers have UL Listed short circuit current ratings up to 100 kA at 240 Vac when properly applied. For three-tier series ratings refer to Data Bulletin 4100DB0301 and Instruction Bulletin 80043-303-22.

Suitable incoming services for an EZM main device and available outgoing feeder(s) to downstream panelboards from EZM branch section(s)—

Incoming Service to Main Device 120/240 Vac, 1Ø3W

Available outgoing feeder(s) to downstream panelboards:

- 120/240 Vac, 1Ø3W (4-jaw ring type meter sockets, two-pole circuit breakers), (5-jaw ringless meter sockets, two-pole circuit breakers).

Incoming Service to Main Device 240/120 Vac, 3Ø4W Delta

Available outgoing feeder(s) to downstream panelboards:

- 120/240 Vac, 1Ø3W (Fed from transformer's "A-Phase" and "C-Phase" only.) NOTE: Connection to High-Leg "B-Phase" not permitted for this service (4-jaw ring type meter sockets, two-pole circuit breakers) (5-jaw ringless meter sockets, two-pole circuit breakers) Standard 3Ø IN/1Ø OUT branch units **are not suitable for use on this Delta System**. Special branch units are available for this System by adding suffix: "CA" to catalog number (Typical Examples: EZM313125CA, EZM313125XCA, EZM313125CUXCA, EZM314225CA, EZM314225XCA, EZM314225CUXCA, EZM315225CA, EZM314225CUCU, etc.).

- 240/120 Vac, 3Ø4W Delta (7-jaw meter sockets, three-pole circuit breakers).

Incoming Service to Main Device 208Y/120 Vac, 3Ø4W

Available outgoing feeder(s) to downstream panelboards:

- 120/208 Vac, 1Ø3W (5-jaw meter sockets, two-pole circuit breakers)
- 208Y/120 Vac, 3Ø4W (7-jaw meter sockets, three-pole circuit breakers).

Main Devices

- 400, 600 and 800 A main disconnects may be end-mounted with branch units having 800 A or 1200 A continuous horizontal cross bus.
- 1000 and 1200 A main disconnect or terminal box **must be center mounted** when used with branch devices with main bus rated 800 A continuous.
- 1600 A main disconnect or terminal box **must be center mounted**.
- 2000 A main disconnect **must be center mounted** and requires use of branch units having 1200 A continuous horizontal cross bus.
- 400, 800 and 1200 A Type EZM-TBU terminal boxes supplied with lug landings to meet EUSERC requirements.

Main Circuit Breaker ratings: 400, 600, 800, 1000, 1200, 1600 and 2000 A

Main Fusible Switch ratings: 400, 600, 800, and 1200 A (1Ø3W only)

Main Lugs Terminal Box ratings: 225, 400, 600, 800, 1200, 1600, and 2000 A

Branch Units

- **125 and 225 A residential branch units** are available in ring type or ringless type construction and are supplied with 800 A continuous aluminum horizontal cross bus as standard (Example: EZM314125). For optional 1200 A continuous copper horizontal cross bus with aluminum vertical connectors, add suffix "X" to catalog number (Example: EZM314125X). For optional 1200 A continuous all-copper bussing, add suffix "CUX" to catalog number (Example: EZM314125CUX). NOTE: 5-gang 225 A EZM, EZMR and EZMH residential branch units are supplied with 1200 A continuous Cross Bus as standard, do not add suffix "X" or "CUX" to these units (Examples: EZMR315225 or EZMR315225CU). Plug-in style residential meter sockets are available as ring type **EZM** without bypass, ringless type **EZMR** without bypass, and ringless type **EZMH** with horn bypass. Tenant circuit breakers must be ordered separately for these branch units. 125 A max. units make use of Type QO, QO-VH or QO-H two-pole tenant circuit breakers (40–125 A). 225 A max. units make use of Type QDP-TM, QBP-TM, QGP-TM and QJP-TM two-pole tenant circuit breakers (70–225 A), and may also make use of two-pole Type QO (40–125 A at 10 kA max.), two-pole Type QO-VH (40–60 A at 100 kA max.), or two-pole Type QO-H (40–60 A at 100 kA max.) tenant circuit breakers.
- **225 A commercial branch units** are available in ring type or ringless type construction and are supplied with 1200 A copper horizontal cross bus with aluminum vertical connectors as standard (Example: EZML314225). For optional 1200 A continuous all-copper bussing, add suffix "CU" to catalog number (Example: EZML314225CU). Plug-in style commercial meter sockets are available as ring type **EZMT** with test block bypass (meets EUSERC requirements), ringless type **EZMR** without bypass, and ringless type **EZML** with lever bypass.

225 A max. units make use of type QDP-TM, QBP-TM, QGP-TM and QJP-TM two-pole or three-pole tenant circuit breakers (70–225 A), and may also make use of two-pole type QO (40–125 A at 10 kA max.), two-pole type QO-VH (40–60 A at 100 kA max.), or two-pole type QO-H (40–60 A at 100 kA max.) tenant circuit breakers.

Note: QO, QO-VH and QO-H tenant circuit breakers used in 225 A branch units require the use of adapter **EZM125QOA** (purchased separately).

- **400 A branch units** are available in ringless type construction only, and are supplied with 1200 A continuous all-copper bussing as standard (Example: EZML332400). These branch units are supplied with factory-installed type LJI tenant circuit breakers that have a field adjustable ampere rating trip setting from 125 A min. to 400 A max. A tamper-evident seal kit is available where needed, order seal kit **MICROTUSEAL** (refer to NEC 240-6 [c]). 400 A branch units are available as Type **EZML** with plug-in style lever bypass type meter sockets, or Type **EZMK** with bolt-on style with manual bypass type meter sockets.
- Units having **800 A continuous horizontal cross bus** WILL CONNECT with units having **1200 A continuous horizontal cross bus**.
- **Single phase units** (three bus bars in horizontal cross bus) WILL NOT CONNECT with **three phase units** (four bus bars in horizontal cross bus).

For Load Center Three-Tiered Series Ratings used downstream from Metering Equipment, refer to Data Bulletins: 4100DB0301 and 2700DB9901.

Selection Information

- Review local utility requirements to ensure that metering equipment meets their standards.
- Check local utility to determine available fault current at the meter center.
- Using the SCCR table:
 - Select meter center configuration, main lugs only (Six Disconnect Rule), or remote main, main circuit breaker, or main fusible switch.
 - Read down to select SCCR equal to, or greater than desired rating.
 - Read across to select branch unit tenant circuit breaker type.
 - Continue reading across to select EZM main device type.

[1] Tenant circuit breakers of same frame size having higher AIR values may replace tenant circuit breakers as listed in this table and maintain the series rating.
 [2] Meter center short circuit current rating is equal to the lowest short circuit current rating given in table for any circuit breaker installed in any meter panelboard in the meter center.
 [3] Short circuit current rating is measured at the LINE SIDE terminals of the integral mounted or remote mounted main providing overcurrent protection for the EZM metering equipment lineup.
 [4] For three-tier ratings refer to Data Bulletin 4100DB0301 and Instruction Bulletin 80043-303-22.
 [5] Requires use of EZM125QOA adapter (order separately).
 [6] 3P only tenant circuit breaker(s) are limited to: 100 kA Max. at 208Y/120 Vac or 65 kA Max at 240/120 Vac.
 [7] Supplied with factory-installed circuit breaker(s), with an adjustable trip range of 125–400 A.

1Ø 3W 120/240 Vac EZ Meter-Pak Meter Centers— 1Ø, Indoor/Rainproof, UL Listed

1200 A Main CB/Fusible Switch Devices come Standard with 2-STEP Removable Service Entrance Endwalls

Select EZM meter center short circuit current rating from [Table 2.16 UL Listed Meter Center Short Circuit Current Ratings \(SCCR\)](#), [page 2-11](#). Using this table as a reference, make the following selections:

1. Select EZM 1Ø main device from [Table 2.17](#) or [Table 2.18](#), with an equal or higher short circuit rating than the application.
2. Select EZM 1Ø branch units from [Table 2.20](#) or [Table 2.21](#).
3. Select proper 2P type QO, QO-VH, QOH, QBP-TM, QDP-TM, QGP-TM or QJP-TM branch circuit breakers for use as tenant mains in branch unit from [Table 2.33](#) and [Table 2.34](#).
4. Select accessories as required from [Table 2.35](#).
5. Dimensions; see [page 2-22](#) and [page 2-23](#).

EZM11200FST

EZM11200FST

[8] Does not meet EUSERC requirements.

[9] Ampere rating of the circuit breaker supplied with this device can be changed to a LOWER value in the field by changing the setting on the circuit breaker.

[10] For field installed Lug Landing Kit, order catalog number EZM1200ULL. Order lugs separately.

[11] Supplied with copper horizontal bus bars and aluminum vertical bus bars.

[12] 225 A terminal box supplied with isolated neutral that cannot be bonded NOT suitable for use on the LINE side of service equipment.

[13] Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to [page 2-11](#) for appropriate short circuit current ratings.

[14] Feed-thru lug kit available, see [page 2-21](#).

[15] For mechanical lugs (3/0 AWG–600 kcmil) order kit CMEK4. Kit includes 4 lugs only. Multiple kits may be required, consult factory. For crimp-type lugs refer to Anderson Electrical Connector Products Catalog AEC-40R.

[16] Available by special order with main circuit breaker supplied with other standard ampere ratings, consult local Field Office (allow 6 weeks for delivery).

[17] Supplied with copper horizontal bus bars and aluminum vertical bus bars.

[18] Ampere rating of the circuit breaker supplied with this device can be changed to a LOWER value in the field by changing the setting on the circuit breaker.

[19] Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to page 2-11 for appropriate short circuit current ratings.

[20] Snap-on aluminum sealing rings supplied as standard.

[21] Supplied with removable drip hood and equipped with an indoor top endwall with knockouts provided.

[22] Compatible with a branch terminal box accommodating a maximum conductor size of 300 kcmil when voltage drop calculations require sizes over 2/0, see Table 1.35: Accessories, page 2-21.

[23] For 1200 A main cross bus add suffix "X" to catalog number (Example: EZM314125X). Allow 6 weeks for delivery.

[24] Type QO, QO-VH and QOH branch circuit breakers (40–60 A) may be installed with use of EZM125QOA adapter kits, see page 2-21.

[25] 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QO-H (40–60 A, 100 kA max. meter center SCCR) may be installed using EZM125QOA adapter kit, see page 2-21.

[26] Supplied with bondable neutral, suitable for use as service equipment. Use main lugs terminal box type EZM-TBU for Six Disconnect Rule applications to feed this device. Supplied with copper horizontal bus bars and aluminum vertical bus bars.

[27] Supplied with removable drip hood and equipped with an indoor top endwall with knockouts provided.

[28] Does not meet EUSERC 48 in. minimum / 75 in. maximum meter height requirements for outdoor installations. The bottom meter socket is 37 inches above ground when the device is mounted with the top meter socket at 75 inches above ground. EUSERC indoor requirements are 36 in. minimum / 75 in. maximum.

[29] Supplied with Class 320 lever bypass meter socket. Utilizes anti-inversion clip kit MMLRK, if required, refer to page 2-21.

[30] L.J.L. circuit breaker has adjustable trip settings from 125–400 A. Use seal kit MICROTUSEAL, if required. L.J.L. circuit breaker terminal lug kit factory-installed and accommodates (2) 2/0–500 kcmil Cu-Al per phase. Alternate lug kit AL400L61K3 for L.J.L. circuit breaker is available, see page 2-21.

[31] Does not meet EUSERC requirements.
 [32] Ampere rating of the circuit breaker supplied with this device can be changed to a LOWER value in the field by changing the setting on the circuit breaker.
 [33] For field installed Lug Landing Kit order catalog number EZM1200ULL.
 [34] Supplied with copper horizontal bus bars and aluminum vertical bus bars.
 [35] 225 A terminal box supplied with isolated neutral that cannot be bonded.
 [36] Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to [page 2-11](#) for appropriate short circuit current ratings.
 [37] Feed-thru lug kit available, see [Table 2.35](#)

[38] For mechanical lugs (3/0 AWG–600 kcmil) order kit CMEK4. Kit includes 4 lugs only. Multiple kits may be required, consult factory. For crimp-type lugs refer to Anderson Electrical Connector Products Catalog AEC-40R.

[39] Available by special order with main circuit breaker supplied with other standard ampere ratings, consult your nearest Field Sales Office (allow 6 weeks for delivery).

[40] Ampere rating of the circuit breaker supplied with this device can be changed to a LOWER value in the field by changing the setting on the circuit breaker.

[41] Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to page 2-11 for appropriate short circuit current ratings.

EZMT311225

EZML313225

EZMT311225 Without Cover

[42] For 1200 A main cross bus, add suffix "X" to catalog number. Example: EZMR313125X.. Allow 6 weeks for delivery.
 [43] Snap-On aluminum sealing rings supplied as standard.
 [44] Supplied with removable drip hood and equipped with an indoor top endwall with knockouts provided.
 [45] Compatible with a branch terminal box accommodating a maximum conductor size of 300 kcmil when voltage drop calculations require sizes over 2/0, see Table 1.35: Accessories, page 2-21.
 [46] Distance between meter sockets as measured from centerline to centerline is 10 inches.
 [47] 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QO-H (40–60 A, 100 kA max. meter center SCCR) may be installed using EZM125QOA adapter kit, see page 2-21.
 [48] For 240/120 Vac Delta Systems add Suffix "CA" to catalog number (Example: EZM314125CA). All meter sockets are phased A and C only. Price remains the same as the base catalog number. Order only branch units, not stocked in PDS (6-week delivery).
 [49] 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QO-H (40–60 A, 100 kA max. meter center SCCR) may be installed using EZM125QOA adapter kit, refer to .
 [50] Supplied with bondable neutral, suitable for use as service equipment. Use main lugs terminal box type EZM-TBU for Six Disconnect Rule applications to feed this device. Supplied with copper horizontal bus bars and aluminum vertical bus bars.
 [51] Does not meet EUSERC 48 in. minimum / 75 in. maximum meter height requirements for outdoor installations. The bottom meter socket is 37 inches above ground when the device is mounted with the top meter socket at 75 inches above ground. EUSERC indoor requirements are 36 in. minimum / 75 in. maximum.
 For 400 A maximum Commercial Branch Units, see page 2-18.

EZMK311400

3Ø–1Ø OUT EZM Branch Unit Phase Balancing Flexibility

The major benefit of factory phase balancing is that most jobs will not require field phase balancing. To see if meter socket phase balancing in the field is required (refer to wiring diagram for complete instructions):

A. Determine if the load in amperes on each phase of the transformer using handle rating of tenant circuit breakers installed at each number of meter sockets. Use Phase Balancing Chart to determine total number of connections each meter socket makes on each phase of transformer.

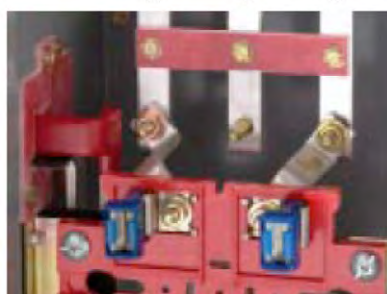

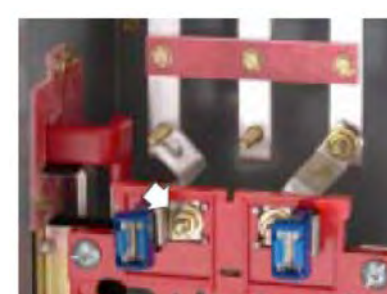

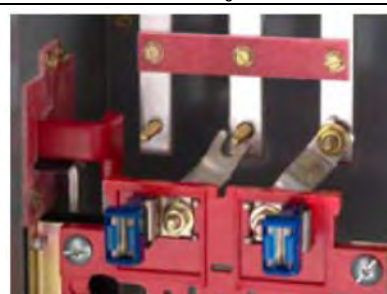

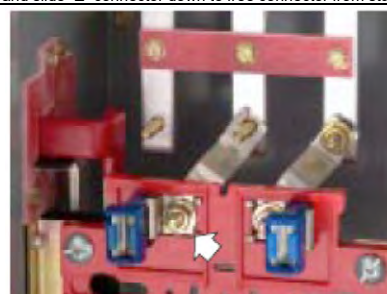

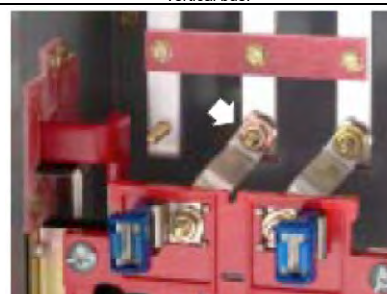

B. If phase balancing is required, determine which meter sockets should be changed to properly phase balance metering equipment lineup.

C. Once meter socket(s) is selected to be phase balanced, remove individual meter socket cover from each meter socket to be phase balanced. The vertical bus bars running top to bottom in the branch unit behind each meter socket are phased: **AØ, BØ, CØ, left to right**.

D. By moving only the line side meter socket “Z” shaped connectors per meter socket to be changed, phase balancing can easily be accomplished on-site:

Starting Position	Possible Ending Position (By moving only one “Z” connector)
AØ and BØ	can be changed to AØ and CØ
AØ and CØ	can be changed to AØ and BØ or BØ and CØ
BØ and CØ	can be changed to AØ and CØ

Table 2.27: Example: To change an AØ and CØ meter socket to a BØ and CØ socket

 <p>Starting Position Meter Socket Phasing: AØ and CØ</p>	 <p>Step 2: Loosen hex nut from AØ line side meter socket jaw and slide “Z” connector down to free connector from stud.</p>	 <p>Step 1: Remove hex nut from AØ line side connection to vertical bus.</p>
 <p>Step 3: Rotate “Z” connector to right and align with stud on BØ vertical bus.</p>	 <p>Step 4: Slide “Z” connector up to engage stud on BØ vertical bus. Torque hex nut of meter socket jaw to 75 lb-in (8 N·m).</p>	 <p>Step 6: Replace hex nut (removed in Step 1) onto stud of BØ vertical bus and torque to 75 lb-in (9 N·m). Phase balancing of meter socket is complete: BØ and CØ.</p>

[52] Supplied with Class 320 lever bypass meter socket. Use anti-inversion clip kit, catalog number MMLRK, if required. See page 2-21.

[53] LJL circuit breaker has adjustable trip settings from 125-400 A. Use seal kit MICROTUSEAL, if required. LJL circuit breaker terminal lug kit factory-installed and accommodates (2) 2/0-500 kcmil Cu-Al per phase. Alternate lug kit AL400L61K3 for LJL circuit breaker is available, see page 2-21.

[54] For 240/120 Vac Delta Systems add Suffix “CA” to catalog number (Example: EZML312400CA). All meter sockets are phased A and C only. Price remains the same as the base catalog number. “Order only” branch units, not stocked in PDS (4–6 week delivery). Order point Lexington.

EZM Main with Busway Side Tap

EZ Meter-Pak metering equipment is available for use in high rise applications for connection to 800–5000 A I-Line™ or I-Line II plug-in busway installed as a vertical riser. Three phase only EZM main devices in the form of a main circuit breaker or main fusible switch are available with an integral busway tap extending from the right or left side of the main device and phased to align with the busway for either neutral front or neutral back installations.

Busway Mains, 3Ø only (Indoor only) ordering instructions:

- Step 1: Determine height to center line of busway plug-in opening, check local utility requirements for minimum and maximum meter socket heights.
- Step 2: Determine side of EZM main section for busway tap to extend from (busway tap is an integral part of the main and extends to the left or right on the EZM device as viewed from the front).
- Step 3: Check phasing of busway riser to insure that it matches phasing of busway tap on main section (indicated as neutral front or neutral back as viewed from the front).
- Step 4: Select Cat. No. from tables below.
- Step 5: Busway main devices are build to order specials and require 4 to 6 weeks for delivery.

NOTE: Dimensions shown position the centerline of top meter socket of a 125 A, 5-Gang or 6-Gang branch unit at 72" above floor level. Check with utility to meet local requirements.

Busway Transition Section

EZM busway transition section provides no overcurrent protection for the downstream EZM branch units.

Tenant main circuit breakers in these branch units must be selected as "fully rated" equipment. (Examples: QO for 10 kA, QO-VH for 22 kA or QOH for 42 kA.)

Table 2.30: EZM Busway Transition Sections (3Ø only)

Ampere Rating	I-Line™ Busway location	Neutral Front	Neutral Back	Width (in.)
1200	RIGHT of EZM Transition Section	EZM3BUSRF	EZM3BUSRB	12.00
1200	LEFT of EZM Transition Section	EZM3BUSLF	EZM3BUSLB	12.00

[55] Requires use of branch units supplied with 1200 A horizontal cross bus.

EZM Main with Center-Mounted Busway Tap

The EZM Main with center-mounted busway tap is a space-saving design for high rise applications that is installed as an integral component of the vertical riser busway and allows standard EZM branches to be mounted from both sides. See online digest updates for availability or contact your local field sales office for additional information.

EZM Busway Center Tap Mains

The EZM Busway Center Tap mains offer provides a convenient space saving method for connecting EZM Branch Meter sections to I-Line II Busway in vertical riser applications. The mains are connected "inline" with the Busway column conserving precious electrical room space.

1. The Part Number Coding Table is to be used for interpreting existing part numbers only. All possible combinations are not available. Please contact product support for additional references needed.
2. Outgoing Feeder Bus Joint-Pak is included with each EZM CTM Section.
3. EZM Horizontal Cross Bus is 1200 A Copper Only
4. Busway Center Tap Mains are fully NEMA 3R Rated.
5. Mains Devices are fully sealable by utility.
6. EZM Branch units are installed using the mounting kit - EZMCTMKIT.
7. Short circuit current rating = 150,000 symmetrical amps.
8. EZM CTM is configured for neutral front only (G-> N-> C-> B->A-> G) as viewed front to rear.
9. Compatible with I-LINE II Busway rated 2000–5000 A.
10. Includes factory installed PowerPact M- and P-frame Circuit Breakers and Switches (Rated 600–1200 A.)
11. Fully compatible with all standard EZ Meter-Pak Branch Devices and Extenders.

Mounting Channel	72" long	EZM72MC
Secondary Surge Arrester Mounting kit	For use with 1 or 2-SDSA1175 or 1-SDSA3650 (order surge arrester separately)	MMSAMK [60]
Stud Kit for EZM-TB 400–600 A terminal box	Includes (2) 1/2 in.-13 studs per pad and mounting hardware. Four pads per kit.	EZMSK2
Al/Cu Lug Kits (Each kit includes three, 2-barrel lugs.)	(1) 1/0–600 kcmil or (2) 1/0–250 kcmil per lug (2) 3/0–500 kcmil per lug (2) 2–600 kcmil per lug	MMLK250 MMLK500 MMLK600
Feed-Thru for EZM-TB 800 A Terminal Box	(4) 750 kcmil Al/Cu lugs per phase and neutral. Al wire 600 A max. Cu wire 800 A max.	EZM600FTLK3
Feed-Thru for EZM-TB 1600 A Terminal Box	(24) additional lugs, 600 kcmil Al/Cu, (6) per phase and neutral.	EZM1600FTLK3
EZM Mains Right Side Closure Cap	Replacement right side end cap for EZM Cross Bus Opening	EZMSCAP
EZM Mains Left Side Closure Cap	Replacement left side end cap for EZM Cross Bus Opening	EZMCAP
Fifth Jaw Kit	1 per kit	5J [61]
Horn Bypass Kit	Use with Type EZMR 1Ø meter socket only	MMHB
Slider Type Manual Circuit Closer	For (1) 125–225 A ring-type socket only—indoor/outdoor	MM200MB [62] [63]
Anti-inversion Clip	Rejects 100 A and 200 A watt-hour meters in Class 320 meter sockets in Type EZML branch units.	MMLRK
QO Adapter for bolt-on Q-frame tenant circuit breakers	For 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QOH (40–60 A, 100 kA max. meter center)	EZM125QOA
LJL Circuit Breaker Alternate Lug (DE2)	Kit includes (3) separate lugs for (1) #2 AWG - 500 kcmil Al or (1) #2 AWG - 600 kcmil Cu per lug.	AL400L61K3
LJL Circuit Breaker Seal Kit	Tamper-evident kit to seal LJL trip dial cover, (1) per circuit breaker, if required. Meets NEC 240-6 [c]	MICROTUSEAL
Meter Socket Closing Plates	Lexan Closing Plate—EZM, EZMR, EZMH, EZMT Metal Closing plate—EZMR, EZMH, EZML	29007 RSG4
Sealing Rings	Snap-on (Stainless Steel) Screw-Type (Aluminum) Latch-Type (Aluminum)—standard	ARP00026 29008W 2920910001
Barrel Lock Kit	For use on ringless EZM or MP branch unit covers, includes 6 each of head protectors, lock nuts and sealing caps. (Barrel lock not included)	MMBLC
Tenant Circuit Breaker Filler Plates	125 A Branches—2P Type QO (2 per opening) 225 A Branches—2P and 3P Q-Frame	QOFP

[56] Must use EZM125QOA adapter.

[57] QO-VH tenant circuit breaker is rated 22 k AIR max.

[58] QOH tenant circuit breaker is rated 42 k AIR max.

[59] 3-pole QJP tenant circuit breaker is rated 65 k AIR max. at 240/120 Vac, 3Ø4W High Leg Delta, or 100 k AIR max. at 208Y/120 Vac, 3Ø4W.

[60] Consult your nearest Schneider Electric sales office for details.

[61] All sockets include 5th Jaw factory-installed except EZM11__ devices.

[62] Meter center short circuit current rating is 10,000 RMS symmetrical amperes with manual circuit closers installed (bypass is not designed for use as continuous duty).

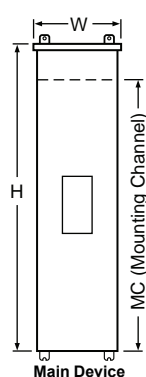

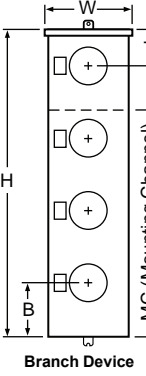

[63] For use on ring type meter sockets only.

Table 2.35 Accessories (cont'd.)

Accessory	Description	Cat. No.
Lug Landing Kit	For use with EZM 1200 A Mains suffix -CBU or -FSB. Order lugs separately	EZM1200ULL
Branch Section Mounting Kit for Riser Applications	This kit is needed when installing and connecting meter center branch sections to EZ-Meter Pak busway center tap mains in multi-floor riser applications (1 per branch section)	EZMCTMKIT
Branch Terminal Box	This device accommodates a maximum conductor size of 300 kcmil when voltage drop calculations require sizes over 2/0. The EZM3BTB accommodates oversizing conductors of up to 3 circuits, mounts above or below a 125 A EZM branch, and is rated NEMA 3R when below device, NEMA 1 when above device. The EZM6BTB accommodates oversizing conductors of up to 6 circuits, mounts above a 125 A EZM branch, and is rated NEMA 1.	EZM3BTB EZM6BTB
Load Center Main Lug Kit 125 A	125 A main lug kit for load centers, supporting larger wire sizes 6-4/0.	QOL125VD

[64] Indoor only.

[65] Each leg of elbow section measures 6.17 in. corner of wall to start of next enclosure.

[66] Device supplied without mounting channel, secure to wall by use of swingable mounting feet.

[67] Each leg of this corner section measures 14.72 in. from wall to start of next enclosure.

[68] Outdoor when mounted below branch device. Indoor only when mounted above branch device.

Lock-On Provisions

Lock-off provisions are standard on all NEMA Type 4, 4X, 5 stainless steel and NEMA Type 12, 12K circuit breaker enclosures. Provision for one inch hasp padlock is available factory installed. This modification will allow the circuit breaker to be locked in the ON position. When locked in the ON position, the external operator will not indicate if circuit breaker is tripped. UL Listed.

Table 2.41: Enclosure

Enclosure Prefix	Suffix for Lock-On Provision
FA, J, LA, L, M, P	SPLO

Lock-On Provision

Pilot Light—Selector Switch—Push Button

Pilot lights, push buttons or selector switches are available factory installed in the cover of NEMA Type 4, 4X, 5 stainless steel or NEMA Type 12, 12K circuit breaker enclosures. Wiring to contact blocks is not available. Customer must furnish catalog number of device desired. Price = circuit breaker + enclosure + neutral + ground + pilot light, push button and/or selector switch + factory-installed adder. Order by description. L600 enclosures are UL Listed, other enclosures are not UL Listed.

Phenolic Legend Plate

Available engraved and mounted on most circuit breaker enclosures. Legend engraved in 1/4-inch high white letters on black background. Customer must provide legend. UL Listed. Not available on NEMA Type 7 or 9 enclosures.

To order, add suffix NP to standard catalog number (i.e. LA400SNP).

Stainless Steel Front Enclosure

The FA100F NEMA Type 1, flush-mount circuit breaker enclosure is available with a stainless steel front. This modification is desirable in food handling areas such as cafeterias and restaurants. Not UL Listed.

Table 2.42: Stainless Steel Front Enclosure

Cat. No.
FA100FSS

[1] Add suffix S or F for NEMA 1 surface mounted or NEMA 1 flush mounted, respectively. Add suffix RB for NEMA 3R with bolt-on hub provision (FHE prefix only) or suffix R for NEMA 3R with a blank top endwall (LHE prefix only), respectively. Add suffix AWK for NEMA 12. Add suffix DS for NEMA 4/4X/5 stainless steel.

Key Interlock Systems for Circuit Breaker Enclosures

(Factory installed only.)

Interlocks are used to prevent the authorized operator from making an unauthorized operation. Available only on NEMA 4, 4X, 5, 12K, and 12/3R circuit breaker enclosures.

The key interlock system is a simple and easy method of applying individual key interlock units and assemblies to the above equipment so as to require operation in a predetermined sequence. UL Listed.

Quoting

Contact local Field Sales office for catalog number, availability and pricing prior to quoting a job.

Ordering

Order cannot be released for production until the following information has been provided:

- End User—Company name, address
- Function of each lock (e.g., circuit breaker to be locked open with key removed, key held when circuit breaker is closed)
- Existing Equipment—if circuit breaker is to be interlocked with equipment already on site, provide brand of existing lock and key number
- Other New Equipment—if circuit breaker is to be interlocked with new equipment not yet installed at the site, then provide contact person and phone number so that locks may be coordinated
- Additional information may be required upon order entry

Diagram Symbols

Sample Application—1 (See Figure 1)

To prevent two devices from being closed simultaneously.

Figure 1

Two devices are shown in Figure 1. In operation they are not closed at the same time. With the interlocks arranged as shown only one key is required in the interlocking system. Both devices are shown open, therefore, the key is free. To close any one device the key is inserted and turned in that particular lock, the key is held in this lock until the device is again locked open. This simple interlocking sequence lends itself to a multitude of applications. The procedure is the same for two devices, neither of which is to be opened at the same time.

Sample Application—2 (See Figure 2)

To prevent opening of switch A when circuit breaker B is closed.

Figure 2

Switch A and circuit breaker B are in closed position. Key A-1 is held in circuit breaker B interlock.

- Open circuit breaker.
- Turn key A-1 in L-O-R interlock on circuit breaker B to lock open. Key A-1 is now free.
- Insert key A-1 in L-C-R interlock on switch A and turn to unlock.
- Open switch A. Key A-1 is now held. Reverse sequence to restore service.

Figure 3

Sample Application—3 (See Figure 3)

To prevent operation of switch A when circuit breaker B is closed. Permits reclosing of circuit breaker for servicing when switch is locked open.

Switch A and circuit breaker B are in closed position. Key A-1 is held in circuit breaker interlock.

- Open circuit breaker.
- Turn key A-1 in L-O-R interlock on circuit breaker B to lock open. Key A-1 is now free.
- Insert key A-1 in L-O-C-R interlock on switch A and turn to unlock.
- Open switch A.
- Turn key A-1 in L-O-C-R interlock on switch A to lock open. Key A-1 is now free.
- Return key A-1 to circuit breaker interlock and unlock for operation during servicing period.

Reverse sequence to restore service.

Sample Application—4 (Main-Tie-Main) (See Figure 4)

To prevent paralleling of lines A and B.—Two loads, fed from either source.

Circuit breaker A is closed to supply load M. Circuit breaker B is closed to supply load N. Tie-circuit breaker C is open. Keys A-1 are held in interlocks on both circuit breakers A and B. Tie-circuit breaker C cannot be closed unless either A or B is locked open.

To transfer load N to circuit breaker A, proceed as follows:

- Open circuit breaker B.
- Turn key A-1 in L-O-R interlock on circuit breaker B to lock open. Key A-1 is now free.
- Insert Key A-1 in L-O-R interlock on tie-circuit breaker C and turn to unlock. Key A-1 is now held.
- Close tie-circuit breaker C.

Reverse sequence to restore service.

Load M can be supplied through circuit breaker B in a similar manner.

Safety Switches EZ Selector - Selection Assistance
Safety Switches EZ Selector - Selection Assistance**EZ Selector****Steps to select a safety switch.**

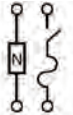

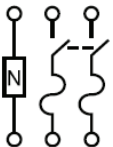

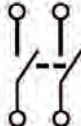

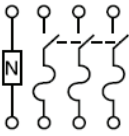

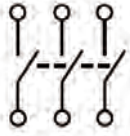

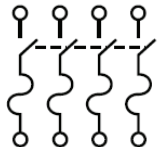

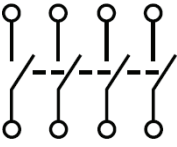

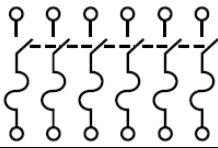

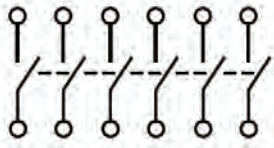

1. Select product type:
 - General duty safety switch
 - Heavy duty safety switch
 - Double throw safety switch
2. Select switch type.
3. Select fuse type: fused, non-fused, cartridge, class T or plug
4. Select maximum voltage: 240 Vac, 600 Vac
5. Select amperes:
 - General/light duty – 30 A, 60 A, 100 A, 200 A, 400 A, 800 A
 - Heavy duty – 30 A, 60 A, 100 A, 200 A, 225 A, 400 A, 600 A, 800 A, 1200 A
 - Double throw – 30 A, 60 A, 100 A, 200 A, 600 A
6. Select number of poles:
 - General/light duty – 1, 2 or 3
 - Heavy duty – 2, 3, 4 or 6
 - Double Throw– 2, 3, 4 or 6
7. Select if neutral is needed.
8. Select enclosure type:
 - General/light duty – NEMA 1, NEMA 3R
 - Heavy duty – NEMA1, NEMA 12K, NEMA 3R, 5, 12, NEMA 4, 4X, 5 (stainless steel 304), NEMA 4, 4X, 5 (stainless steel 316)
 - Double throw – NEMA1, NEMA 12K, NEMA 3R, 5, 12, NEMA 4, 4X, 5 (stainless steel 304)
 - Optional enclosure types for special heavy duty applications.

Additional Information

- Search “[Safety Switches](#)” from our technical FAQs page: www.schneider-electric.us/en/faqs/home/
- Refer to catalog [3100CT1602](#).

L221N

General Duty—Up To 100 kA Short Circuit Current Rating

General duty safety switches are designed for residential and commercial applications where durability and economy are prime considerations. Typical loads are lighting, air conditioning, and appliances. They are suitable for use as service equipment when equipped with a factory or field-installed neutral assembly or a field-installed service grounding kit, (see page 3-7) as applicable. General duty safety switches are UL Listed, File E2875, and meet or exceed the NEMA Standard KS1.

UL Listed Maximum Short Circuit Current Ratings — AC Only

Table 3.4: Fusible Safety Switch Short Circuit Current Rating

Fuse Class	UL Listed Short Circuit Rating
Plug	10 kA
H, K	10 kA

[1] Bolt-on hubs —Refer to Rainproof Bolt-On Hubs, Table 1.27, page 3-16.

[2] When properly installed, the Class R Fuse Kit rejects all but Class R fuses.

[3] Factory included to prevent inadvertent contact with live parts per UL 869A and NEC Service entrance barrier requirements.

[4] For corner grounded delta systems, use switching poles for ungrounded conductors. See data bulletin 2700DB0202 for additional information.

[5] For 200% neutral, order (1) additional neutral kit SN20A and (1) neutral jumper kit SN20NI.

[6] Order Class J Fuse Kit GDJK600 if using Class J fuses.

[7] If corner grounded delta system, use outer switching poles for ungrounded conductors.

[8] D325NT, D325NTR, D326NT, D326NTR, T327N and T327NR accept only 300Vac Class T fuses.

[9] Bolt-on hubs —Refer to Hubs, page 3-16.

[10] Factory included to prevent inadvertent contact with live parts per UL 869A and NEC Service entrance barrier requirements.

[11] Enclosed molded case switch—Refer to Section 1.

[12] Includes factory-installed grounding kit.

[13] Not service entrance rated—Refer to Table 3.34 for more information.

[14] If a neutral assembly is required, order and field install SN0610.

[15] If a neutral assembly is required, order and field install a SN20A Neutral Assembly Kit. For a 200% neutral application, order and field install (2) SN20A Neutral Assembly Kits and (1) SN20NI Neutral Jumper Kit.

[16] If a neutral assembly is required, order and field install D600SN.

Table 3.4 Fusible Safety Switch Short Circuit Current Rating (cont'd.)

Fuse Class	UL Listed Short Circuit Rating
J [17], R	100 kA
T [18]	100 kA

Non-Fusible Safety Switches

Systems equal or less than 10 kAIR SCCR—Any brand of circuit breaker or fuse not exceeding the ampere rating of the switch may be used in conjunction with a non-fusible safety switch.

Systems above 10 kAIR SCCR—The UL Listed short circuit current rating for Square D non-fusible switches is based upon the switch being used in conjunction with fuses or Square D circuit breakers or Mag-Gard motor circuit protectors.

Table 3.5: Non-Fusible Safety Switch Short Circuit Current Rating

Fuse Class or Circuit Breaker Type [19]	UL Listed Short Circuit Rating
Any Brand Circuit Breaker	10 kA
H or J PowerPact Circuit Breaker	Up to 65 kA [20]
H, K	10 kA
J, R	100 kA [21]
T	100 kA [22]

[17] Only applicable to 200 A - 600 A except D325NT, D325NTR, D326NT and D326NTR.

[18] Only applicable to D325NT, D325NTR, D326NT, D326NTR, T327N and T327NR.

[19] Ampere rating of fuse or circuit breaker not to exceed switch ampere rating.

[20] Only applicable to DU324 and DU324RB. HD, JD = 25 kA maximum.

[21] SCCR = 50 kA, applicable to DU222RB, DU322 and DU322RB.

[22] Only applicable to DU323, DU323RB, DU325 and DU326.

Field-Installed Fuse Puller Kits

Kit consists of three fuse pullers as required for a 3P, fusible, 60 or 100 A general duty switch. Kits can be installed only in 60 or 100 A Series F fusible switches.

Table 3.6: Fuse Puller Kits

Switch Ampere Rating	Series No.	Cat. No.
60	F	FPK03
100	F	FPK0610

Fuse Puller Kit
Series F Fusible Switches
Only

Field-Installed Electrical Interlock Kits

Electrical interlocks for Series F 100–200 A general duty safety switches & Series F 60 A fusible general duty safety switches are available in kit form for field installation. Each kit contains instructions for proper field mounting. A pivot arm operates from switch mechanism, breaking the control circuit before the main switch blades break. Switches with electrical interlocks installed are UL Listed.

Table 3.7: Electrical Interlock Kit

Switch Amperes Rating	Electrical Interlock Kit Cat. No. [23]

Heavy Duty Safety Switches

Visible blade heavy duty safety switches are designed for application where maximum performance and continuity of service are required. All heavy duty safety switches feature quick-make, quick-break operating mechanism, a dual cover interlock and a color coded indicator handle. They are suitable for use as service equipment when equipped with a field- or factory-installed neutral assembly or equipment grounding kit, unless a 600Y/347 V or 480 Y/277 V, 1000 A or greater, solidly grounded WYE system is used, per NEC 230-95. Heavy duty safety switches are UL Listed (except as noted). Files E2875 and E154828 meet or exceed the NEMA Standard KS1. For UL Listed short circuit current ratings, see

UL Listed Maximum Short Circuit Current Ratings-AC only, page 3-12.

4-Wire (4 Blades and Fuseholders)Use 600 Vac devices. See 600 Volt—Single Throw Fusible Switches, page 1–10.												

Accessories: see page 3-16

Dimensions: NEMA Type 1 and 3R, see page 3-22

Dimensions: NEMA Type 4, 4X and 5 Stainless and NEMA Type 12, see page 3-23

- [1] For Rainproof Bolt-On Hubs and Watertight Hubs see Hubs, page 3-16.
 [2] Complete rating is NEMA Type 3, 3R, 4, 4X, 5 and 12. For NEMA Type 3R applications, remove drain screw from bottom endwall.
 [3] See 316 Grade Stainless Steel—NEMA Type 3, 3R, 4, 4X, 5, 12, page 3-13.
 [4] Also suitable for NEMA Type 3R application by removing drain screw from bottom endwall.
 [5] Factory included to prevent inadvertent contact with live parts per .UL 869A and NEC Service entrance barrier requirements.
 [6] For switching dc, use two outside switching poles.
 [7] For corner grounded delta systems, use switching poles for ungrounded conductors. See data bulletin 2700DB0202 for additional information.
 [8] 60 ampere switch with 30 ampere fuse spacing and clips. Must use 60 A enclosure accessories including electrical interlocks.
 [9] For corner grounded delta systems, use switching poles for ungrounded conductors.
 [10] Suitable for NEMA Type 5 applications with drain screw installed.

Dimensions: NEMA Type 4, 4X and 5 Stainless and NEMA Type 12, see page 3-23

[11] For Rainproof Bolt-On Hubs and Watertight Hubs see Hubs, page 3-16.

[12] Complete rating is NEMA Type 3, 3R, 4, 4X, 5 and 12..

[13] See 316 Grade Stainless Steel 3 Pole 600 Vac, 600 Vdc, page .

[14] Also suitable for NEMA Type 3R application by removing drain screw from bottom endwall.

[15] Factory included to prevent inadvertent contact with live parts per UL 869A and NEC Service entrance barrier requirements.

[16] For switching dc, use two outside switching poles.

[17] For corner grounded delta systems, use switching poles for ungrounded conductors. See data bulletin 2700DB0202 for additional information.

[18] Suitable for NEMA Type 5 applications with drain screw installed.

[19] 60 A switch with 30 A fuse spacing and clips. Must use 60 A enclosure accessories including electrical interlocks.

[20] Not suitable for use as service equipment.

Class R Fuse

Class H, R, J, and L Fuse Provisions:

Class H or K Fuse Provisions: Fusible Square D 30–600 A heavy duty safety switches accept Class H or K fuses as standard. With Class H or K fuses installed, the switch is UL Listed for use on systems with up to 10 kA available fault current.

Class R Fuse Provisions: Fusible Square D 30–600 A heavy duty safety switches will accept Class R fuses as standard. A field-installed rejection kit is available which, when installed, rejects all but Class R fuses. With the installation of the rejection kit and Class R fuses, the switch is UL Listed for use on systems with up to 200 kA available fault current. See [Class R Fuse Kits, page 3-17](#).

Class J Fuse Provisions: Provisions for installing Class J fuses are included in 30–400 A 600 Volt, and 100–400 A 240 Volt, fusible heavy duty safety switches. Conversion to Class J fuse spacing requires relocating the load side fuse base assembly from the standard Class H fuse location to an alternate position as marked in the enclosure. With Class J fuses installed, the switch is UL Listed for use on systems with up to 200 kA available fault current. Switches rated 600 A, 240 or 600 Volt, require the addition of an adapter kit, H600J. One kit per three-pole switch.

Class L Fuse Provisions: Fusible 800 A and 1200 A safety switches use Class L bolt-in fuses and are rated for use on systems with up to 200 kA at 600 Vac maximum. 1200 A switches accept class L fuses from 601–1200 A, 800 A switches accept class L fuses from 601–800 A.

[21] For Rainproof Bolt-On Hubs and Watertight Hubs see [Hubs, page 3-16](#).

[22] Complete rating is NEMA Type 3, 3R, 4, 4X, 5 and 12.

[23] For 316 stainless, see [316 Grade Stainless Steel—NEMA Type 3, 3R, 4, 4X, 5, 12, page 3-13](#).

[24] Also suitable for NEMA Type 3R application by removing drain screw from bottom endwall.

[25] Factory Included to prevent inadvertent contact with live parts per UL 869A and NEC service entrance barrier requirements.

[26] For switching dc, use two outside switching poles.

[27] Suitable for NEMA Type 5 applications with drain screw installed.

[28] Switches with EI suffix are stocked with factory-installed electrical interlocks with one normally-open and one normally-closed contact.

[29] Use 60 A enclosure accessories, including electrical interlocks.

[30] Not suitable for use as service equipment.

[31] No knockouts are provided.

[32] Requires 60 A accessories. See [NEMA Type 4, 4X, 5, 7, 9, and 12, page 3-23](#) for series rating.

[33] HU461AWK (Series F6) is rated 5 hp@250 Vdc, 15 hp@600 Vdc.

[34] Factory Included to prevent inadvertent contact with live parts. UL 869A and NEC service entrance barrier requirements.

UL Listed Maximum Short Circuit Current Ratings—AC only

Table 3.16: Fusible Safety Switches

Heavy Duty Safety Switch Type	UL Listed Fuse Class	UL Listed Short Circuit Current Ratings
Fusible	H, K	10 kA
	R, J, L	200 kA [35]

Non-Fusible Safety Switches

Systems equal or less than 10 kAIR SCCR—Any brand of circuit breaker or fuse not exceeding the ampere rating of the switch may be used in conjunction with a non-fusible safety switch.

Systems above 10 kAIR SCCR—The UL Listed short circuit current rating for Square D non-fusible switches is based upon the switch being used in conjunction with fuses or Square D circuit breakers or Mag-Gard motor circuit protectors.

Table 3.17: Non-Fusible Safety Switches [36] [37]

Switch Rating (A)	Fuse or Circuit Breaker Type [38]	3-Phase			250 Vdc / 600 Vdc

H363DF

H361DX

316 Grade Stainless Steel—NEMA Type 3, 3R, 4, 4X, 5, 12

316 stainless steel enclosure safety switches offer superior corrosion resistance to a wider range of chemicals than 304 stainless switches. 316 better resists chloride and is often used in marine, waste treatment and transportation applications. Use watertight hubs, see [Hubs, page 3-16](#). Equipment grounding lugs are supplied as standard through 200 A. See [Table 3.40 Terminal Lug Data, page 3-21](#) for wire Termination data for grounding lugs. (For 304 stainless switches, see [240 Volt, page 3-9](#) and [600 Volt, page 3-10](#).)

Fiberglass Reinforced Polyester Enclosures—NEMA Type 4X

Fiberglass reinforced polyester enclosures are watertight, corrosion resistant, and impervious to windblown dust, rain, and splashing liquid. The molded fiberglass is extremely stable in a wide range of operating temperatures and can withstand heavy impact. Switches are furnished with hubs, conduit provisions [Table 3.41](#), and equipment grounding lugs. See CAD drawings of the switch to verify the UL listed short circuit current rating or the enclosed safety switch catalog. UL Listed.

^[39] Factory included to prevent inadvertent contact with live parts per UL 869A and NEC service entrance barrier requirements.

^[40] Std.—Using fast acting, one time fuses. Max.—Using dual element time delay fuses.

^[41] For switching dc use two switching poles.

^[42] Two hubs and hub drilling template are provided for field installation.

^[43] Std.—Using fast acting, one time fuses. Max.—Using dual element time delay fuses.

^[44] For switching dc use two switching poles.

Krydon™ Enclosures—NEMA Type 4X

Krydon enclosures are compression molded of fiberglass reinforced polyester, specially formulated to withstand attack from almost any corrosive atmosphere found in the toughest industrial application. Switches are furnished with watertight hubs and equipment grounding lugs. See CAD drawing of the switch to verify the UL listed short circuit current rating or the enclosed safety switch catalog. UL Listed.

[45] Factory included to prevent inadvertent contact with live parts per UL 869A and NEC service entrance barrier requirements.

[46] Two hubs and hub drilling template are provided for field installation.

[47] Std.—Using fast acting one time fuses. Max.—Using dual element time delay fuses.

[48] For switching dc, use two outside switching poles.

Interlocked Receptacle Switches

Interlocked Receptacle Switches [49] are furnished with a factory-installed three-phase four-wire Appleton PowertiteTM, Crouse-Hinds Style 2 ArktypeTM, or HubbellTM receptacle. The fourth wire is connected to the switch equipment grounding terminal and is not a solid neutral termination. Interlocking linkage between the receptacle and switch mechanism prevents insertion or removal of the plug while the switch is in the "ON" position or insertion of any plug other than specified. Grounding lugs are included. See wiring diagram of the switch to verify the UL listed short circuit current rating or the enclosed safety switch catalog.

Appleton Powertite Receptacle

- UL Listed and CSA Certified
- Available in 30 - 100 A, 600 Vac/250 Vdc, fused or non-fused, NEMA Type 1, NEMA Type 4/4X/5 stainless steel and NEMA Type 12/3R
- Suitable for use as service equipment (USA only)
- Receptacles are epoxy powder coated over copper-free cast aluminum

Square D by Schneider Electric brand heavy duty safety switches are UL listed for use with the following accessories:

Rainproof Bolt-On Hubs

- UL Listed for indoor or rainproof applications
- Suitable for use with conduit having ANSI standard taper pipe thread
- NEMA Type 3R switches with catalog number ending in RB have a bolt-on closing cap factory installed
 - Accepts 3/4 in. through 2-1/2 in. bolt-on hubs
 - No gaskets required
- NEMA Type 3R switches with R suffix have blank top endwalls
 - Accepts 3 in. through 4 in. bolt on hubs
 - Gaskets provided
 - Conduit entry holes must be cut in the field

Table 3.26: Rainproof Bolt-On Hubs [61]

[55] Std.—Using fast acting one time fuses. Max.—Using dual element time delay fuses.

[56] Std.—Using fast acting one time fuses. Max.—Using dual element time delay fuses.

[57] For switching dc, use two outside switching poles.

[58] SCCR when using 60 Amp Max fuse.

[59] Receptacle only rated for NEMA Type 1 and 12 applications.

[60] Hubbell plug is furnished with a Kellems grip for 1-1/2 in. to 1-21/64 in. cable diameter.

[61] Gaskets are provided on 3 in. and larger hubs.

Watertight Hubs

Watertight Hubs

- UL Listed for dusttight and watertight applications
- Suitable for use with conduit having ANSI standard taper pipe thread
- Watertight hubs are field installed on NEMA Type 4/4X/5 stainless steel and NEMA Type 12/3R and 12K enclosures
- Watertight hubs are available in zinc or chrome plated finish
- Gaskets provided

Table 3.27: Watertight Hubs [62]

Electrical Interlock Kits

Electrical interlocks for heavy duty safety switches 30 A through 1200 A are available as field installed kits, or on Type 12 or Type 4X enclosure factory installed. A pivot arm operates from the switch mechanism, breaking the control circuit before the main switch blades break. See supplemental digest section 2 for contact ratings. UL Listed for factory or field installation. For factory installation catalog numbers available on Type 12 or 4X enclosures use the product configurator.

EIK2 Electrical Interlock Kit

100	F5-F7	RFK10
200	F5-F6	HRK1020
400-600	E4-E5	HRK4060

[62] Gaskets are provided.

[63] For series not shown in table refer to the switch wiring diagram.

[64] Electrical interlocks for NEMA Type 4X fiberglass reinforced polyester and Krydon™ see Table 3.19 and Table 3.20 respectively.

[65] See page 3-22 and page 3-23 for safety switch series.

[66] Electrical interlock kit catalog numbers ending in 1 indicates one normally open and one normally closed contact. These kits use a 9007A01 industrial snap switch. Electrical interlock kit catalog numbers ending in 2 indicates two normally open and two normally closed contacts. These kits use a 9007C03 industrial snap switch.

[67] For series not shown in the table, refer to the switch wiring diagram.

[68] Class R Fuse Kits for Fiberglass Reinforced Polyester enclosures and Krydon™ enclosures see Table 3, page 3-13 and Table 5, page 3-14 respectively.

[69] H361-2, H361-2A, H361-2AWK and H361-2RB use RFK06.

Line Side Barrier Kit

The field instable line side barrier kits are required to meet the code for service entrance applications. Barrier kits prevent accidental contact with line side, un-insulated, ungrounded or service terminal live parts.

Table 3.31: Line Side Barrier Kit

Catalog	Description	Blades / Fuses	Safety Switch Application
LSBD202	Line Side Barriers for General Duty and Heavy Duty	2 or 3	240 V — 30 A 240 V — 60 A

LSBF602	Line Side Barriers for Heavy Duty	2 or 3	600 V — 800 A 600 V — 1200 A

Internal Barrier Kits

Internal barrier kits provide an additional barrier that helps prevent accidental contact with live parts. Field-installed transparent barriers do not restrict visual inspection of the switch. Barrier provides IEC529 IP2X “finger safe” protection when door of enclosed disconnect switch is open. Designed with convenient door for accessing fuses for replacement without removing barrier, and allows use of test probes.

Table 3.32: Internal Barrier Kits

Cat. No.	Description	Blades / Fuses	Safety Switch Application
SS03 [70]	Barriers for Heavy Duty	2 or 3	240 / 600 V — 30 A 240 V — 60 A

SS80120LO [72]	Barriers Load Side for Heavy Duty	2 or 3	240 V — 800 A 240 V — 1200 A 600 V — 800 A 600 V — 1200 A

Fuse Puller Kits

Fuse Puller Kits

Fuse Puller Kits are standard equipment on the following 30 A - 100 A switches: NEMA Type 12 and 12K, NEMA Type 4/4X/5 stainless steel, NEMA Type 4X fiberglass reinforced polyester and Krydon™. Fuse Puller Kit available for field installation on NEMA Type 1 and NEMA Type 3R, 30 A – 100 A switches. One Fuse Puller Kit required for a 3 pole fusible 240 V or 600 V heavy duty switch. Fuse Puller Kits can be field installed on switches manufactured since February 1980.

Amperes	Series Number [73]	Fuse Puller Kit Cat. No.
30	F5–F7	FPK03 [74]
60	F5–F7 (600 V) F5 (240 V)	FPK0610 FPK03
100	F5–F7	FPK0610

[70] Can only be applied to F series.

[71] Can only be applied to F series.

[72] Must buy line side also

[73] For series not shown in chart refer to the switch wiring diagram.

[74] 30 A 4 pole, H361-2 and H361-2RB Series F5, H361WA and H361WC Series F6 use FPK0610.

Solid Neutral Assembly Kits

Table 3.33: Solid Neutral Assembly Kits [75] [76] [77] [78]

Amperes	Series Number [79]	Standard Neutral Kit Cat. No.	Terminal Data AWG/kcmil	Optional Copper Only Neutral Kit Cat. No.	Terminal Data AWG/kcmil

1200	E4	PKOGTA8	(8) 4-350 Al/Cu	—	—

Touch-Up Paint

Description	Cat. No.
12 oz. Aerosol Paint Can, Square D ANSI-49 Gray Touch-Up Paint	PK49SP

NOTE: Standard package quantity is 6 cans.

Lock OFF / Lock ON

Lock off provisions are standard on all Heavy Duty Switches

Lock-on is also available as a factory modification on Type 12 and 304 Stainless Steel Type 4X enclosures. Obtain by selecting on product configurator.

Lock Off Guard Kits

For field installed kits, the lock off guard works by covering the lockout tagout openings whenever the switch is in the ON POSITION. This prevents a padlock from being inadvertently inserted into the switch lockplate. Available ONLY for use on Type 1, Type 3R, Type 12, Heavy Duty Safety Switches.

Table 3.35: Lock-Off Guard Kits

Switch Rating	Cat. No.
30 A	LOGK1
60 A 240 V	
60 A 600 V	
100 and 200 A	LOGK2

Optional Lock-OFF Guard Kit Installed

[75] For series not shown in chart refer to the switch wiring diagram.

[76] For solid Neutral Assembly Kits for KrydonTM enclosure see Table 3.20.

[77] For Solid Neutral Assembly Kits for Fiberglass Reinforced Ployester enclosures see Table 3.19.

[78] Neutrals cannot be installed in 4 or 6 pole switches or receptacle switches.

[79] See page 3-22 and page 3-23 for safety switch series.

[80] The following 30 A Series F5-F6 switches use SN0610 or SN0610C: H3612, H3612RB, H3612A, H3612AWK, HU3612, HU3612RB, HU3612A and HU3612AWK.

[81] For 200% neutral, order (2) SN20A Neutral Kits and (1) SN20NI Neutral Jumper Kit.

[82] For series not shown in table refer to the switch wiring diagram.

[83] Equipment Ground Kits (Al/Cu) are factory installed standard in 30-200 A Series F NEMA Type 4/4X/5 (stainless steel), 12 and 12K. Equipment Ground Kits are standard factory installed on all receptacle switches and all Series F 30-200 A, 4 and 6 pole switches.

[84] H2212AWK accepts GTK03 or GTK03C. H3612A or AWK accepts GTK03C. H3612 and H3612RB accepts GTK0610 HU3612AWK accepts GTK03C. HU3612A accepts GTK0610C. HU3612RB accepts GTK0610 or GTK0610C.

[85] Optional copper equipment grounding kit for the 4 and 6 pole 30 A F Series: H461DS, H461AWK, HU461DS, HU661DS and HU661AWK accepts GTK03C HU461AWK accepts GTK0610C.

[86] Two required if equipment grounding conductors are run in parallel.

Key Interlock Systems

Key Interlock System

Key Interlock Systems

Factory installed only on heavy duty safety switches and double throw safety switches, from 30 amp to 1200 amp, Type 12 and 304 stainless steel Type 4X.

The key interlock system is a simple and easy method of applying individual key interlock units and assemblies to the above equipment so as to require operation in a predetermined sequence. UL Listed.

Quoting: Contact Schneider Electric for catalog number, availability, and pricing prior to quoting a job. Detailed information is required before an order can be processed. Please see Supplemental Digest Section 2 for further information.

Use these suffixes on switch catalog numbers:

- KI = 1 lock per switch
- KI2 = 1 lock with 2 cylinders (2 keys) per switch
- KIKI = 2 separate locks per switch

Cover Viewing Window

Optional cover viewing window is positioned over the blades to allow visual verification of "ON-OFF" status. Available on 30 through 1200 A heavy duty switches, NEMA Type 1, 3R, 4/4X/5 Stainless Steel, 12 and 12K. (Not available on NEMA Type 4X, Fiberglass, Krydon or NEMA Type 7 and 9 switches). Add VW suffix to the catalog number for factory installation.

Voltage Monitors

Voltage monitors installed on safety switches indicate when voltage is present, helping to prevent arc-flash hazards and electric shocks during maintenance work. Voltage monitors can be combined with other safety features such as Key Interlock, Viewing Windows or Lock-ON provisions.

- UL Listed
- Factory installed only
- Order the voltage monitors by adding the appropriate suffix shown in the table below to the switch catalog number
- Not available on NEMA Type 7 and 9 and NEMA Type 4X Fiberglass and Krydon™ switches

Table 3.36: Voltage Monitors [87] [88] [89]

Description	Suffix [90]
Line Side Monitor	SI
Load Side Monitor	LI
Line and Load Side Monitors	LI2

Copper Lug Kits

Lug kits that accept only copper wire are available for field or factory installation:

- UL Listed
- UL Marine Listed
 - UL Marine listing is applicable ONLY to 30 - 200 A, NEMA Type 12/3R, NEMA Type 12K and NEMA Type 4/4X/5 stainless steel, safety switches
 - When copper only lugs kits are factory installed the switch will bear the UL Marine mark and be suitable for use on vessels over 65 feet long
 - When the copper only lugs kits are field installed the switch will not bear the UL Marine mark and would not be suitable for use on vessels over 65 feet long
- Not available for use on NEMA Type 4X Fiberglass, Krydon or NEMA Type 7 and 9 switches
- For field installation, order copper lug kits. See Table below
- For factory installation of copper lugs, add the suffix SLC to the standard catalog number

Al/Cu to Cu Only

Table 3.37: Copper Lug Kits [91]

Amperes	Lug Kit Cat. No.	Lug Wire Range AWG/kcmil
30–60	CL0306F	(1) 14-8 Cu solid or 14-4 Cu stranded
100	CL10F	(1) 14-8 Cu solid or 14-1/0 Cu stranded
200	CL20F	(1) 6-250 Cu
400	CL40F	(1) 1-600 Cu plus (1) 6-250 Cu
600	CL60F	(1) 4-350 Cu
800	—	—
1200	—	—

[87] Available on 30–1200 A Heavy Duty Safety Switches.

[88] Order 600 Vac Heavy Duty Safety Switch for all 30–60 A 240 Vac applications.

[89] Available on 30–200 A Double Throw Safety Switches. Two and three-pole, 200 A Type 3R switches are not available with these voltage monitors.

[90] In addition to the suffix shown in the table above, a 3 must be added to the switch catalog number for all 30 and 60 A switches, i.e. H361AWK becomes H3613AWKLI. 30 and 60 A switches require 100 A enclosure accessories. Double Throw Safety Switches are exempt from this requirement.

[91] One kit includes all phase line/load lugs for a 3-pole switch. CL0306F, CL10F and CL20F includes six lugs. CL40F and CL60F includes twelve lugs.

Double Lug Kits

200 A heavy duty F-series switches are supplied standard with lugs suitable for one wire per phase. For two wires per phase and neutral, order the Double Lug Kit. Not UL Listed. Not listed on switch's wiring diagram as an accessory.

Table 3.38: Double Lug Kits

Amperes	Cat. No. [92]	Lug Wire Range per Phase and Neutral AWG/kcmil	Wire Range Wire Bending Space per NEC Table 312.6 AWG/kcmil
200	AL20DTF	(2) 6–300 Cu/Al	(2) 6–250 Cu/Al

Compression Lug Kits — 800 A and 1200 A Safety Switches

- UL Listed.
- Compression Lug Kits available for field installation
- Compression Lug Kits available for factory installation; Add suffix LK to standard catalog number
- Compression Lug Kits contain VCEL07512H1 Versa-Crimp™ compression lugs
- Order one Compression Lug Kit per switching pole and/or neutral (see Table below)

Table 3.39: Compression Lug Kits

Amperes	Lug Kit Cat. No.	Conductors per Phase	Lug Wire Range kcmil
800	H8LKE2	(3) Line and (3) Load	500-750 kcmil (Al) or 500 kcmil (CU)
1200	H12LKE2	(4) Line and (4) Load	500-750 kcmil (Al) or 500 kcmil (CU)

1200	4	3/0–750 (Al/Cu)	3/0–750 (Al/Cu)	H12LKE2 [103]	—

Table 3.41: Conduit Provisions

Amperes	Top and Bottom Endwall	
	NEMA Type 4X Fiberglass Reinforced Polyester and Krydon [104]	NEMA Type 7 and 9 [105]
30	3/4 in.	—
60	1-1/4 in.	3/4 in.
100	2 in.	1-1/4 in.
200	2-1/2 in.	2-1/2 in.

[92] Kit contains 3 lugs. Order two kits for line and load lugs.

[93] 30–100 A switches suitable for 60°C or 75°C conductors. 200–1200 A switches suitable for 75°C conductors.

[94] Hubbell Versa-Crimp™ unless otherwise noted.

[95] For NEMA Type 1, 12/3R, 12K and 4/4X/5 stainless steel switches only.

[96] Order from Thomas and Betts.

[97] H60XFA and H60XFA1212 — use 75°C copper wire only. #6 AWG copper wire required for 60 A rating.

[98] H100XFA and H100XFA1212 — use 75°C copper wire only. #3 AWG copper wire required for 100 A rating.

[99] H225XJG and H225XJGAA — use 75°C copper wire only. Lug wire range is #3 AWG – 350 kcmil. Not UL Listed due to inadequate wire bending space (5" on ON end, 6" on OFF end).

[100] Maximum wire bending space allows for (1) 600 kcmil or (2) 300 kcmil Al/Cu on NEMA Type 4/4X/5 stainless steel and NEMA Type 12 switches.

[101] Order two PK516KN mounting kits when installing VCEL030516H1 lugs. Only one kit is required on 2 pole switches. PK516KN consists of (4) 5/16-18 Keps Nuts.

[102] Order two PK516KN mounting kits when installing VCEL030516H1 or VCELC030516H1 lugs. Only one kit is required on 2 pole switches. PK516KN consists of (4) 5/16-18 Keps Nuts.

[103] For 800 and 1200 A compression lug kits see Table 3.39 for additional information.

[104] Hubs and hub drilling templates are provided for field-installation.

[105] Threaded conduit opening.

NEMA Type 1 and 3R

See Table 3.40 Terminal Lug Data, page 3-21 for terminal lug data for the series switches listed in the dimension table below.

30–100 A DT, DTU (Series F)
NEMA Type 1

30–100 A Types DT, DTU (Series F)

- Fusible (DT) and non-fusible (DTU) switches available
- Manually-operated switch suitable for use in accordance with article 702 of the NEC, ANSI/NFPA 70
- Standards: UL 98, Type KS1, CSA, and NOM
- Modular design—switch handle, lock-plate, switch mechanism; line and load bases are field replaceable
- UL Listed short circuit current ratings up to 200 kA (using with (fusible) or protected by (non-fusible) Class R, J, or T fuses—see table for rating)
- Load make/break rated
- Horsepower rated
- Dual cover interlock
- May be padlocked ON (I) or OFF (O)
- Lock-off accepts up to three padlocks
- Side-opening door
- Quick make / quick break mechanism
- Meets NEMA requirements as heavy duty switch
- Field-installed electrical interlock kits
- Field-installed neutral assembly kits (2P and 3P switches)
- UL Listed as suitable for use as service equipment
- Supplied as standard for switching one load between two power sources, and may be field-converted to switch one power source between two loads.

82,000 Line
NEMA Type 1

30 (Series T4), 200–600 A Types 82,000 and 200 A DTU (Series E, A)

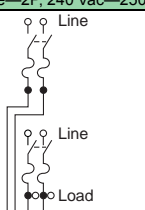

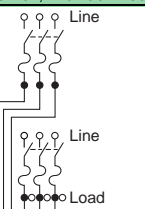

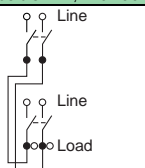

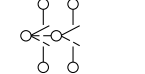

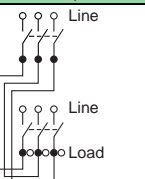

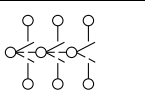

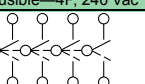

- Non-fusible
- Designed for manual transfer of one load between two power sources
- UL Listed switches are suitable for use in accordance with Article 702 of the National Electrical Code, ANSI / NFPA 70
- All 82,000 and DTU double throw switches are continuous duty rated for their nameplate ampere rating
- The 82,000 and DTU (Series E, A) switches are load make/break rated
- UL Listed as suitable for use as service equipment
- Horsepower rated only as footnoted

Field-Installable Accessories

- Neutral
- Electrical Interlock
- Grounding Terminals

Double-Throw Safety Switches

[1] The starting current of motors or more than standard horsepower may require the use of fuses with appropriate time delay characteristics.

[2] Std.—Using fast acting one time fuses. Max.—Using dual element time delay fuses.

[3] For switching dc, use two switching poles.

[4] If used on corner grounded delta systems, install neutral and use outer switching pole for ungrounded conductors. See data bulletin 2700DB0202 for additional information.

[5] Use outer switching poles.

[6] Maximum rating.

[7] 240 Vac only. Not Vdc rated.

[8] Neutral included with device.

[9] 240 Vac, 250 Vdc.

[10] Hp rating applies only to H82454.

[11] The starting current of motors of more than standard horsepower may require the use of fuses with appropriate time delay characteristics.

[12] Std.—Using fast acting one time fuses. Max.—Using dual element time delay fuses. (Non-fusible switches have max rating unless noted.)

[13] Use outer switching poles.

[14] If used on corner grounded delta systems, install neutral and use outer switching pole for ungrounded conductors. See data bulletin 2700DB0202 for additional information.

[15] 480 Vac 1 Phase HP = 3 Std, 7.5 Max

[16] 10 Std, 15 Max

[17] 480 Vac 1 Phase HP = 5 Std, 20 Max

[18] 25 Std, 30 Max

[19] 480 Vac 1 Phase HP = 10 Std, 30 Max

[20] 40 Std, 50 Max

[21] Maximum HP

[22] Complete rating on switch is NEMA Type 3R, 5 or 12. For 3R applications, remove drain screw from bottom endwall.

[23] Maximum HP is 15 for corner grounded delta systems.

[24] Maximum HP is 30 for corner grounded delta systems.

[25] Use 75°C #4 Cu or #2 Al conductors only on DTU362 and DTU362RB.

[26] Use 75°C #1 Cu conductors only.

[27] 480 Vac, 250 Vdc maximum

[28] Not UL Listed.

[29] Standard Hp rating.

[30] 250 Vdc maximum.

[31] Not suitable for use as service equipment.

[32] 480 Vac, 250 Vdc maximum.

200 A Type 82000 and DTU (Series E)	DT100SG	(3) 14–1/0 Al/Cu
400–600 A Type DTU (Series A)	DS468GKD	(2) 6–250 Al/Cu [40]

Table 3.49: Class R Fuse Kits

When properly installed, this kit rejects all but Class R fuses. Kits are available for field installation. For factory installation add suffix CLR to the switch catalog number.		
Switch	Series Number	Class R Fuse Kit Cat. No.
Class R Fuse Kits—240 V (two kits per 3P switch)		
30 A	F5	RFK03
60 A	F5	RFK06
100 A	F5	RFK10
Class R Fuse Kits—600 V (two kits per 3P switch)		
30 A	F5	RFK06
60 A	F5	RFK06H
100 A	F5	RFK10

Viewing Windows: Accessory available on 30–100 A DT and DTU Series F switches only. Add the suffix VW to the catalog number.

Key Interlock Systems: For factory-installed key interlocks, refer to page 3-20.

Lock-On Provisions: Standard feature on 30–100 A type DT and DTU (Series F), and type 92,000 switches.

Feature available as factory installed option for Type 82,000 (200 A only) and 200 A DTU (Series E) switches. Add the suffix SPLO to the catalog number.

[33] Electrical interlock kit catalog numbers with “1” suffix indicate one normally open and normally closed contact; “2” indicates two normally open and two normally closed contacts. See [Electrical Interlock Kit](#), page for electrical interlock ratings.

[34] 30–100 and 600 A Type DT, DTU (Series F) switches contain (2) separate switching mechanisms. Each mechanism will accept an electrical interlock. Some applications may therefore require (2) electrical interlocks.

[35] Double throw switches 92251, 92351, and 92451 are not available with factory or field installed electrical interlocks.

[36] Electrical interlock EK400DTU2 can be added to 200 A, 4-pole Type 82000 switches in the field.

[37] Type 82000 and DTU switches are available with electrical interlock factory-installed only. Not UL listed. Electrical interlocks are furnished with 2 N.O./N.C. contacts and are installed in both “ON” positions. To order, add suffix EI to standard switch catalog number.

[38] Neutral assembly catalog number DT200N can be added to 4P, 200 A, Type 82000 switches in the field.

[39] For 200 A Type 82000, a neutral assembly is available factory installed on 2P and 3P switches. Not UL Listed. To order, add suffix N to the standard catalog number. Neutral terminal lug data = (3) #4 - 250 kcmil Al/Cu wire and (1) #4 - 250 kcmil Al/Cu service ground.

[40] (3) 6-250 ground lugs are provided as standard. DS468GKD provides an additional (2) 6-250 ground lugs.

- UL Listed for indoor or rainproof applications
- Suitable for use with conduit having ANSI standard taper pipe thread
- NEMA Type 3R switches with catalog number ending in RB have a bolt-on closing cap factory installed
 - Accepts 3/4 in. through 2-1/2 in. bolt-on hubs
 - No gaskets required
- NEMA Type 3R switches with R suffix have blank top endwalls
 - Accepts 3 in. through 4 in. bolt on hubs
 - Gaskets provided
 - Conduit entry holes must be cut in the field

Application Data for Double Throw Safety Switches

**Situations Requiring Fuses**

30–100 A Type DT (Series F):

Select DT switches from 240 Volt Double-Throw Safety Switches, page 3-26 and 600 Volt Double Throw Safety Switches, page 3-27 which have provisions for accepting fuses.

30 A, 200–600 A Type 82,000 (Series E, T4, A), all DTU devices:

Use the non-fusible double throw switches from 240 Volt Double-Throw Safety Switches, page 3-26 and 600 Volt Double Throw Safety Switches, page 3-27 in conjunction with standard fusible devices, and install them according to diagram 1 or 2, below.

Table 3.51: UL Listed Short Circuit Current Ratings

Switch Type	Amperes	Voltage Rating	UL Listed Fuse Class	Short Circuit Current Rating [42] (A)
Type 92000	30 A	240 V	H, K	10,000 [43]
Type DT (Series F)	30–100 A	240 V or 600 V	H, K	10,000
			R, J	200,000
Type DTU [44] (Series F)	30–100 A	240 V or 600 V	H or K	10,000 [43]
			R, J or T	200,000
DTU224NRB and DTU324NRB (Series E)	200 A	240 V	H, K	10,000 [43]
DTU324N (Series E)	200 A	240 V	H, K	10,000 [43]
			R, J	100,000
Type 82,000	All	240 V or 600 V	H, J	10,000 [43]
Type DTU (Series A)	400–600 A	240 V or 600 V	H, K	10,000
			R, J, T	100,000

[42] Rating applies to AC only. The UL Listed short circuit current rating for non-fusible switches is based on the switch being used in conjunction with the corresponding fuse type. Evaluation of non-fusible switches in conjunction with molded case circuit breakers has not been performed.

[43] Any brand of circuit breaker or fuse not exceeding the ampere rating of the switch may be used ahead of a non-fusible safety switch when there is up to 10 kA short circuit current available.

[44] The DTU361 and DTU361RB are also suitable for use on a circuit capable of delivering not more than

(A) 18 kA, 600 Vac maximum when protected by Type FH circuit breaker rated 30 A maximum or

(B) 14 kA, 600 Vac maximum when protected by Type FA circuit breaker rated 30 A maximum.

Join the Next Generation of Power and Energy Management

More performance. More intelligence. More integration.

Our industry-leading systems offer the latest in technological advancements to help you simultaneously maximize reliability, availability, and quality, as well as improve operational and cost efficiency for your entire enterprise. You'll benefit from:

- **Holistic approach**
Our solutions aggregate data from all your energy assets, including power, building, and process systems, into one user-friendly view so you can make more informed decisions and address problems efficiently.
- **Actionable intelligence**
Our solutions provide real-time and historical information to multiple stakeholders anywhere in the world, including easy-to-use analytics, alarms and controls, as well as regulatory compliance and financial reporting.
- **Proactive capabilities**
Our sophisticated products help you analyze and identify future needs so you can develop a long-term plan for things like energy purchasing, demand response, load changes, and equipment maintenance or replacement.

Advanced Power Management

Delivers power quality, availability, and reliability

- Maximize facility uptime by reducing power outages and ensuring back-up power generation
- Verify reliable power equipment operation and proactively optimize power networks
- Improve power reliability, availability, and quality through proactive analytics and diagnostics
- Optimize existing infrastructure capacity and avoid over-building
- Prolong asset life with proactive maintenance and optimization
- Reduce peak demand and power factor penalties with monitoring, alerts, and corrective actions
- Deliver enhanced network protection and control with data integration and automation

Superior Energy Management

Delivers cost and operational efficiencies

- Identify, prioritize, and verify savings through automated load management, benchmarking, and progress reporting
- Improve sustainability performance with greenhouse gas emissions tracking and industry compliance reporting
- Improve rates with energy suppliers through demand response programming
- Confirm ROI for system improvements with advanced reporting and analysis
- Identify billing discrepancies and avoid contract penalties by validating utility bills and confirming onsite generation benefits
- Encourage conservation among tenants, departments, and processes through cost allocation reporting

Don't settle for fragmented views and unreliable data

Maximize performance with a fully integrated power management solution

You'll benefit from our decades of expertise in electrical system management, hardware and software development, and integration. Our solutions are designed for compatibility so your installation is both optimized and more efficient. Our systems are modular and interoperable for better continuity of supply, enhanced safety for people and equipment, and more effective monitoring and control. Plus, our full range of in-person and remote services keep your system operating at peak performance.

Power System Assessments						

- Manage power quality, availability, and reliability
- Optimize use of your electrical and infrastructure assets
- Drive energy efficiency initiatives and improve financial performance

EcoStruxure Power Monitoring Expert Software

EcoStruxure Power Monitoring Expert

EcoStruxure™ Power Monitoring Expert is an integrated power & energy management software platform that enables you to optimize your power distribution infrastructure, maximize operational efficiency, and improve your bottom-line performance. This complete, interoperable, and scalable solution will help you

- Maximize facility uptime and reliability
- Analyze and mitigate power quality related issues
- Track and optimize equipment performance
- Analyze energy consumption, uncover savings opportunities and accurately allocate energy related costs
- Enable compliance with power quality and energy standards such as ANSI/IEEE and ISO50001

Typical Applications

- Monitor the facility electrical network to verify reliable operation and proactively optimize performance
- Maximize facility uptime by improving response to power-related events and restore operations quickly
- Perform root cause analysis to power-related disturbances through sequence of events reporting
- Analyze and isolate the source of power quality problems
- Analyze total energy use from all electrical and piped utilities identify waste and reduce cost
- Improve sustainability performance with greenhouse gas emissions tracking and industry compliance reporting
- Identify billing discrepancies and avoid contract penalties by validating utility bills to verify accuracy
- Allocate energy costs to departments to drive accountability, awareness and support energy action programs like ISO50001
- Reduce peak demand and power factor penalties with monitoring, alerts, and corrective actions
- Negotiate rates with energy suppliers and enable participation in demand response programs
- Confirm return on investment for infrastructure improvements with advanced reporting and analysis
- Optimize existing infrastructure capacity and avoid over-building
- Prolong asset life with proactive maintenance and optimization

Functional Components:

- Power quality analytics
 - Monitor events and waveform plotting system-wide
 - Monitor harmonics, K-factor, crest factor, symmetrical components
 - Diagnose and isolate PQ problems to increase reliability
 - Automatically detect and report on voltage disturbances
 - Quickly evaluate PQ events plotted on standard ITIC curve
- Customized real-time monitoring
 - Access real-time status of sensitive power distribution components
 - Trend chart tools with customized views to reveal patterns and anomalies quickly
- Data analytics and visualization
 - Smart dashboards with configurable presentation widgets and kiosk options
 - Powerful graphics templates and libraries
 - Automated power quality reports and waveform analysis tools
 - Comprehensive templates for energy and power reporting, with flexible report distribution options
- Alarm and event management
 - Powerful alarm triggering, notification, and analysis tools
 - Accurate time-stamped sequence of events reporting for power system event root cause analyses
- Robust technical infrastructure
 - Solid data acquisition architecture including ready-to-use communications drivers with many electrical distribution devices
 - Fully compatible with current operating systems and databases
 - Interoperable with integration to other systems and devices through open data and protocol standards (ODBC, OPC, XML, Modbus, Web/SOAP Services)
 - Scalable to thousands of metered points through flexible deployment options

Modular Design:

Power Monitoring Expert also features many application modules that add specific functionality to extend the base platform. Available modules include

- Energy Analysis
- UPS Performance
- Breaker Performance
- Energy Cost Allocation & Billing
- Automated Generator Testing

Segment Editions:

Power Monitoring Expert also features segment-specific solutions for data centers, healthcare, industry and buildings, delivering pre-engineered functionality customized to meet your needs.

EcoStruxure Power Monitoring Expert Data Center Edition

- Decrease the number and duration of unplanned outages
- Manage power capacity and redundancy
- Improve effectiveness of maintenance activities
- Improve power distribution efficiency
- Support energy cost allocation and billing

EcoStruxure Power Monitoring Expert Data Healthcare Edition

- Improve energy availability
- Manage power system reliability
- Perform power quality analysis and management
- Support energy efficiency initiatives to improve financial performance

EcoStruxure Power Monitoring Expert Data Buildings Edition

- Ensure electrical system health
- Optimize operational efficiency
- Gain energy insight
- Improve energy accountability

EcoStruxure PowerSCADA Operation

- Increase uptime of power systems
- Provides accurate and actionable information in real time
- Highlights issues, remediation, and their impacts

EcoStruxure™ PowerSCADA Operation is electrical distribution network monitoring and control software that provides vital tools to enhance your power system reliability and operational efficiency. Its powerful architecture combines our proven expertise in electrical distribution with the speed and control of high-performance SCADA to reduce outages while increasing power system efficiency. An excellent fit for virtually every industry and application, PowerSCADA Operation delivers exceptional scalability so that it can grow to match your changing business requirements while driving down the total cost of ownership. Components interact seamlessly across Schneider Electric's extensive product portfolio and third party suppliers.

- Dynamic electrical network view to improve production, reduce costs and boost safety
- Highly reliable monitoring and control tailored to unique electrical network needs
- Detailed electrical information across the multi-vendor network
- Fast issue resolution and reporting to improve electrical network quality and energy use
- Report KPIs, energy costs, and filtered alarming
- Real-time visualization of the network
- Disturbance waveform views for analysis and control for remediation

For quoting and pricing, please contact PowerLogic Sales at 615-287-3535.

NOTE:

- The ION8650 is two times more accurate than the 0.2 IEC/ANSI accuracy classes according to the same conditions used to specify the 0.2 accuracy class.
- ION8800, ION8650, ION8600, PM8000 also offer Modbus Master capabilities.

[1] Specifications represent maximum capabilities with all options installed. Some options are not available concurrently. This is not a complete feature list, please refer to detailed product specifications.

New!

ION9000 Series Advanced Power Quality Meters

Web enabled PowerLogic ION9000 series meters are used to monitor electric distribution networks, service entrances and substations. It enables businesses to manage complex energy supply contracts that include power quality guarantees. Low-range current accuracy makes it ideal for independent power producers and cogeneration applications that require the accurate bi-directional measurement of energy. It is well suited to load curtailment, equipment monitoring and control and energy pulsing and totalization applications. Integrate it with Power Management Software applications. The ION9000T captures extremely fast voltage events that are missed by most other power meters, enabling advanced diagnostics and high-resolution event associations for fast, conclusive diagnosis and resolution to transient voltages.

ION9000 Power and Energy Meter Features

PQ compliance reporting and basic PQ analysis:

- Monitors and logs parameters in support of international PQ standards
 - IEC 61000-4-30 Class A (test methods as per IEC 62586-2)
- High resolution waveform capture: triggered manually or by alarm. Captured waveforms available directly from the meter via FTP in a COMTRADE format, and viewable in the meter's web interface.
- Generates PQ compliance reports accessible via onboard web pages:
- Harmonic analysis:
 - THD and TDD per phase, min/max, custom alarming
 - Individual harmonic magnitudes and angles on voltage and current, up to the 63rd harmonic
- Disturbance detection and capture: sag/swell on any current and voltage channel, alarm on disturbance event, waveform capture with per-event information
- Patented disturbance direction detection: provides indication of the captured disturbance occurring upstream or downstream of the meter; timestamped results provided in the event log, with degree of certainty of disturbance direction
- Transient capture of events 20 microseconds or longer in duration on any voltage channel with waveform capture and per-event information
- PowerLogic ION9000T provides high-speed transient capture (HSTC) of voltage events 100 nanoseconds or longer in duration and up to 10,000 V in magnitude on voltage channels and with an alarm on the event, the ION9000T provides high-speed and disturbance waveform captures, as well as per-event statistics on each transient.

Metering precision:

- IEC 61557-12 PMD/SD/K70/0.2 and PMD/SS/K70/0.2 3000m (performance measuring and monitoring devices (PMD))
- Class 0.1S accuracy IEC 62053-22, ANSI C12.20 Class 0.1 (active energy)
- Industry leading Class 0.5S accuracy for reactive energy (IEC 62053-24)
- Cycle-by-cycle RMS measurements updated every cycle
- Full 'multi-utility' WAGES metering support
- Net metering
- Anti-tamper protection seals and hardware metrology lock

Cybersecurity:

- Security events logging with Syslog protocol support
- HTTPS secure protocol
- Ability to enable or disable any communication port and any protocol per port
- Anti-tamper protection seals and hardware metrology lock
- User accounts with strong passwords
- Used with Schneider Electric's advanced software tools, provides detailed PQ reporting across entire network:
- EN 50160 compliance report
- IEEE 519 harmonic compliance report
- IEC 61000-4-30 report
- Power quality compliance summary
- Energy reports for consumption analysis and cost management
- WAGES dashboards and reports
- Display of waveforms and PQ data from all connected meters
- Onboard web-based waveform viewer
- EcoStruxure Power Events Analysis, including alarm management, sequency of events, and root cause analysis

Data and event logging:

- Onboard data and event logging
- 2 GB of standard non-volatile memory
- No data gaps due to network outages or server downtime
- Min/max log for standard values
- 100 user-definable data logs, recording up to 16 parameters on a cycle-by-cycle or other user definable interval
- Continuous logging or snapshot, triggered by setpoint and stopped after defined duration

- Trend energy, demand and other measured parameters
- Forecasting via web pages: average, minimum and maximum for the next four hours and next four days
- Advanced time-of-use capability
- Security/event log: alarm conditions, metering configuration changes, power outages, firmware download, and user login/logout all timestamped to ±1 millisecond

Alarming and control:

- 50+ definable alarms to log critical event data, trigger waveform recording, or perform control function
- Trigger on any condition, with 1/2-cycle and 1-second response time
- Combine alarms using Boolean logic enabling customization of alarms
- Alarm notification via email
- In conjunction with Schneider Electric's EcoStruxure software, alarms, software alarms, and alarm frequency are categorized and trended enabling sequence of events and root cause analyses

ION8650 Power and Energy Meters

The web-enabled PowerLogic ION8650 is used to monitor electric distribution networks, service entrances and substations. It enables businesses to manage complex energy supply contracts that include power quality guarantees. Low-range current accuracy makes it ideal for independent power producers and cogeneration applications that require the accurate bi-directional measurement of energy. It is well suited to load curtailment, equipment monitoring and control and energy pulsing and totalization applications. Integrate it with Power Management Software applications to get the most out of the meter's capabilities and data produced.

Applications

- Revenue metering
- Cogeneration and IPP monitoring
- Power Quality Compliance monitoring
- Power quality analysis
- Demand and power factor control
- Load curtailment
- Equipment monitoring and control
- Energy pulsing and totalization
- Instrument transformer correction
- Outage Notification

ION8650 Power and Energy Meter Features

Feature set C includes:

- 9S, 35S, 36S socket and switchboard cases
- True RMS 3-phase voltage, current, power and meets stringent ANSI revenue metering standards including ANSI C12.20 0.2 and Class 2, 10, & 20
- Power quality: sag/swell, individual, even, odd, total harmonics to the 31st and symmetrical components
- 32 Mb log/event memory, min/max for any parameter, historical logs up to 80 channels, timestamp resolution to 0.001 seconds and GPS time synchronization
- Transformer/line loss compensation and Instrument transformer correction
- Communications: Ethernet, Serial, Modem, Internet and Ethernet to serial gateway and ION, DNP 3.0, Modbus RTU, Modbus TCP, MV-90 protocols, IEC 61850
- C model limited to IR + 2 other ports at one time. Ports can be enabled/disabled by user
- Dial-out capability when memory is near full
- Multi-user, multi-level security with control and customized access to sensitive data for up to 50 users
- Data push capability through SMTP (email)
- 65 setpoints — math, logic, trig, log, linearization formulas
- Password protection and anti-tamper seal protection
- Built-in I/O: 4 KYZ digital outs and 3 form A digital ins, 4 KYZ digital outs and 1 form A digital out and 1 form A digital in, an optional external I/O expander provides additional I/O
- Optional Outage Notification Card for JSON outage notification message over ethernet

Feature set B adds the following to feature set C:

- Harmonics—individual, total even, total odd up to the 63rd
- 64 Mb standard memory
- Historical logs up to 320 channels
- Modbus RTU Master on serial ports
- Cycle setpoint minimum response time

Feature set A adds the following to feature sets C and B:

- Waveform capture up to 1024 samples/cycle, PQ compliance monitoring, flicker to EN50160 Ed2, IEC 61000-4-7/4-15 (also configurable to IEEE519 2014, IEEE159, SEMI) CBEMA/ITIC
- Transient detection to 17µs at 60 Hz
- Harmonics: magnitude, phase and inter-harmonics to the 50th
- 128 Mb standard memory
- Max 96 cycles of waveform logs and 800 channels of historical logs

Table 4.2: Typical PowerLogic ION8650 Power and Energy Meter Ordering Configurations

Description	Catalog Number
ION8650, feature set A, 9S socket base, 5 A nominal current inputs, 10 MB memory, 127–177 Vac, 60 Hz, communications card with: 10BaseT, RS-232/485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650A0C0E6E1B0A
ION 8650; feature set A, 9S socket base, 5 A nominal current inputs, 128 MB memory, 120–277 VAC, 60 Hz, comms card with: 10/100BaseT, RS-232/485 port, RS-485, 56k internal modem (RJ11), Infrared Optical Port; No I/O, Password Protected, no security lock	S8650A0C0E6C7A0A
ION8650, feature set C, 9S socket base, 5 A nominal current inputs, 2 MB memory, 120–277 Vac, 60 Hz, communications card with: RS-232/ 485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650C0C0E6A0B0A
ION 8650; feature set C, 9S socket base, 5 A nominal current inputs, 32 MB memory, 120–277 VAC, 60 Hz, comms card with 10/100BaseT, RS-232/485 port, RS-485 port, Infrared Optical Port, No I/O, Password Protected, no security lock	S8650C0C0H6E1A0A

		1	Password protected with security lock enabled									
		7	Password protected, no security lock (available in US only)									
		8	Password protected with security lock enabled (available in US only)									
Special Order Options		A	None									

[3] In addition to Infrared Optical port Feature Set C can use any two ports (configurable).

PowerLogic ION7400

PowerLogic ION7400 Utility Feeder Meter

The PowerLogic ION7400 utility feeder meter is a highly accurate, extremely reliable power and energy meter with unmatched flexibility and usability. The meter combines accurate 3-phase energy and power measurements with data logging, power quality analysis, alarming and I/O capabilities not typically available in such a compact meter. The panel or DIN mounted ION7400 meter is flexible enough to fit into a utility's existing billing or SCADA system, providing industry leading cost management (Class 0.2) and network management (Class S PQ) data. It is compliant with stringent international standards that guarantee their metering accuracy and power quality measurements. Ideal for installations that are responsible for maintaining the operation and profitability of a facility.

Applications and benefits

- Maximize profits by providing the highest output possible with the least amount of risk to availability.
- Optimize availability and reliability of electrical systems and equipment.
- Monitor power quality (PQ) for compliance and to prevent problems.
- Meters fully supported by EcoStruxure Power Monitoring Expert and PowerSCADA Operation Software.

Main Characteristics

- Precision metering
- PQ compliance reporting and basic PQ analysis
- Used with EcoStruxure Power Monitoring Expert software, provides detailed PQ reporting across entire network
- Onboard data and event logging
- Alarming and control
- Excellent quality: ISO 9001 and ISO 14000 certified manufacturing.

[4] All the communication ports may be used simultaneously.

Address power issues before they cause problems

- Monitor harmonics to mitigate excessive heating and premature failure of transformers
- Use trending and alarming to detect fluctuations in current pull of critical equipment to prevent motor failure
- Utilize millisecond time stamping to analyze sequence of events
- Identify root cause by analyzing electrical faults with patented disturbance direction detection
- Identify power quality issues per EN 50160, including frequency inconsistency, voltage fluctuations and unbalance, and harmonic contribution
- Allocate costs for water, air, gas, electricity, and steam (WAGES) across departments, phases of industrial process, or cost centers
- Utilize time-of-use calendar to capture electrical consumption for specific times, including on/off peak and holidays

PowerLogic PM8000 Advance Power Quality Meters

These compact meters help ensure the reliability and efficiency of your facility by making the management of power quality, availability, and reliability easy. Measure, understand, and act on insightful power and energy data gathered from your entire system.

The best choice for power management

PM8000 meters combine accurate 3-phase energy and power measurements with data logging, power quality analysis, alarming and I/O capabilities not typically available in such compact meters. Four-metered current inputs allow direct measurement of 3-phase currents and neutral current for enhanced view of harmonics. Dual Ethernet ports support daisy-chaining, removing need for an Ethernet switch inside power equipment, while redundant ring topology provides enhanced availability. Modular, field installable I/O provides expandable scalability. Patented ION technology combines convenient, pre-configured functionality with the ability to customize the meter configuration to meet unique requirements. This embedded capability can save the expense and complexity of additional equipment, both today and tomorrow. Plus, simple installation and networking make energy information quickly accessible, while integration with EcoStruxure™ software and your energy management system make it immediately actionable.

PM5000 Series Power Meter

Series 5000 Power Meters

The PowerLogic PM5000 series power meters are the new benchmark in affordable, precision metering. It is the ideal fit for high-end cost management applications, providing measurement capabilities needed to allocate energy usage, perform tenant metering and sub-billing, pin-point energy savings, optimize equipment efficiency and utilization, and perform a high level assessment of the power quality in electrical networks.

All meters provide Modbus serial communications. PM5500 level meters are also capable of simultaneous Modbus TCP and BTL-certified BACnet IP communications over Ethernet.

- Panel instrumentation (OEMs)
- Sub-billing and cost allocation
- Remote monitoring of an electrical installation
- Harmonic monitoring (THD)

PM2100 Series LED Display Meter

PM2200 Series LCD Display Meter

Series PM2000 Power Meters

The PM2000 series meter is a next-generation energy and power meter that offers all the measurement capabilities required to monitor an electrical installation in a single 96 x 96 mm unit. The PM2000 series offers simplicity and reliability for basic energy cost and network management applications at a value price. PM2000 meters are available in LED and LCD display variants:

- LED display type (PM2100 series): Intuitive navigation with self-guided, three buttons, bright red color LEDs of 14.2 mm height. Two columns of LEDs indicate the parameter name chosen for display.
- LCD display type (PM2200 series): Monochrome graphical LCD of 128 x 128 resolution lets users read all three phase values simultaneously. The bright display enables easy reading even in extreme lighting conditions and viewing angles with intuitive menus, multi-language text, icons and graphics.

PM2130 and PM2230 meter models have provisions to attach one input/output expansion module. Choose from: two digital inputs, two digital outputs; two analog inputs, two analog outputs; or two digital inputs, two relay outputs.

EM3500 Series
Energy and Power Meter

Series 3500 Energy and Power Meter

The EM3500 series Energy and Power Meter combines exceptional performance and easy installation to deliver a cost-effective solution for power monitoring applications. The EM3500 series can be installed on standard DIN rail or surface mounted, and has bi-directional monitoring designed expressly for renewable energy applications.

- Pulse output and phase alarms
- Data logging capability in some models
- Modbus and BACnet output options

METSECTR Series Rope-Style Current Transformers

The METSECTR series works with the EM3500A, EM4236, and iEM35xx series power and energy meters. These meters have a built in power supply and integrator, so CT connecton is fast and simple. The coil opens at the connector junction for fast and easy installation onto an existing cable or bus-bar. The flexible core makes it easy to fit in tight enclosure.

- Agency Approvals cURus, ANSI/IEEE 57.13, CE, RoHS
- Accuracy $\pm 1\%$ from 50 A to 5000 A
- Insulation up to 600 Vac

LVCT Series Current Transformers

LVCT current transducers provide a 0.333 V output for use with EM3500, EM4236, iEM34xx, and EM4900 series energy meters. Available in both solid and split core styles.

- Solid core accuracy ± 0.5 of reading from 5% to 120% of rated current
- Split core accuracy 1% from 10% to 100% of rated current
- Leads 22 AWG, 600 Vac, UL 1015 bonded pair, 6 ft. (1.8 m) standard length

PM3000 Series Power Meter

PowerLogic PM3000 Power and Energy Meters

PM3000 series power meters are a cost-attractive, feature-rich range of DIN rail-mounted power meters that offers all the measurement capabilities required to monitor an electrical installation. Ideal for power metering and network monitoring applications that seek to improve the availability and reliability of your electrical distribution system, the meters are also fully capable of supporting sub billing and cost allocation applications. Four different models are available. Choose from models that provide Display Only, Display + Pulse Output, Display + Modbus, and Display + Modbus + DI/DO + Logging. All models use 1A/5A CTs.

iEM3000 Series Energy Meter

NOTE:

- For meter part number replace “i” in model name with “A9M”. (Example: iEM3150 = A9MEM3150)
- DIN rail housing size is 18mm x 5 width. (iEM33xx is 18mm x 7 width.)
- Digital input is selectable for Tariff control or WAGES
- Digital output is selectable for kWh pulse or kWh alarm. (iEM3x10 is kWh pulse only.)

iEM3000 Energy Meters

The economical iEM3000 energy meters are ideal for helping facilities become more energy efficient. These feature-rich meters reduce installation and commissioning costs thanks to their efficient design and include native support for a variety of protocols, including Modbus, BACnet, LON, and M-Bus, for seamless integration into networks. Choose from models supporting a variety of current-sensing methods, including standard 1A/5A current transformers, 0.333 V low-voltage CTs, and METSECTR Rogowski coils. There are also direct connect models with internal current sensors that save installation time. The compact size is ideal for new and retrofit installations. Whether metering for energy awareness, billing, or advanced energy programs requiring full-featured, multi-tariff energy meters, there is an iEM3000 meter that fits the application.

Digital I/O								
Number of inputs/outputs		-1	1/1		1/1	1/1	1/1	

Measurement parameters

- Total and partial kWh shows consumption behavior
- Four-quadrant metering differentiates energy consumption
- Target green technologies (delivered/received)
- Reduce utility penalties (active/reactive)
- Additional parameters (P, Q, S, 3xI, V, PF, F) to monitor network balance and overload behavior

Smart Alarm

- kW overload alarm helps prevent utility demand charges

Multiple Tariffs

- Save up to four different time slots to manage multiple tariffs (peak/off-peak, weekday/weekend)
- Control tariffs via digital inputs, internal clock, or communication

Digital Inputs

- Use the meter as a pulse counter for another meter (WAGES monitoring)
- Manage double-source applications (e.g., utility main plus on-site generator)
- Monitor circuit breaker status or cabinet door opening

Digital Outputs

- Use to trip a light or sound an alarm
- Configure as a pulse output

Multiple Meter Unit Enclosures for iEM3000 Energy Meters

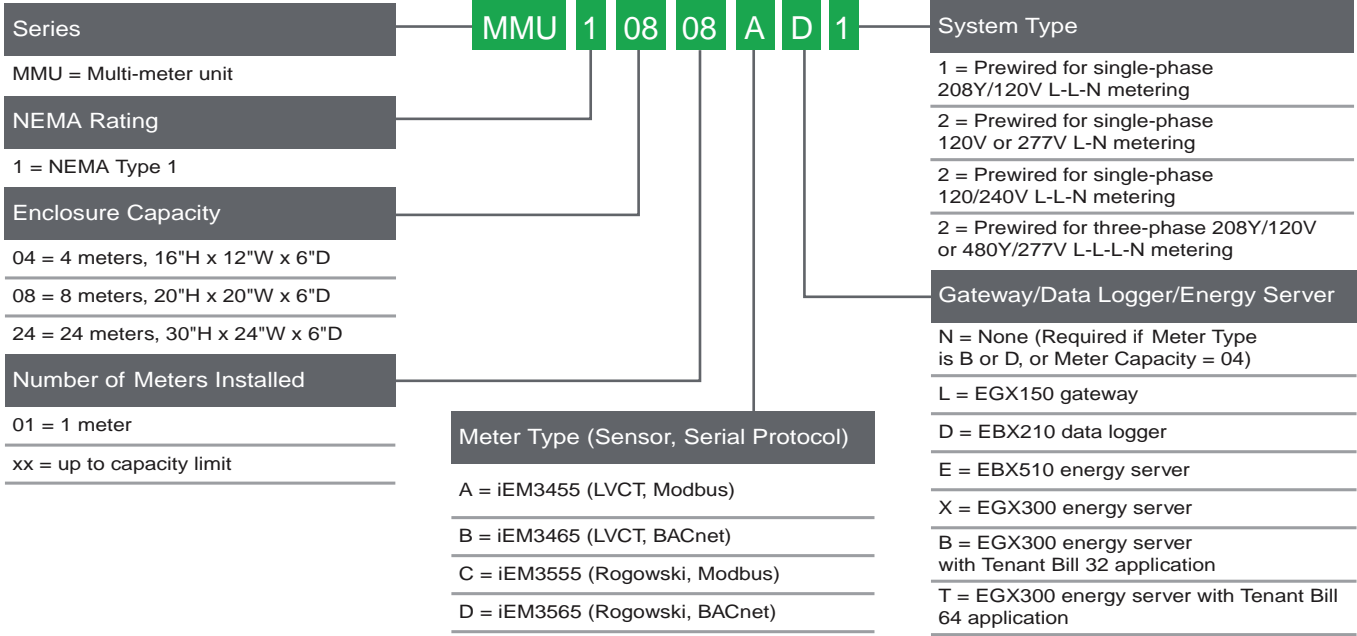

Schneider Electric's Multi-Meter Unit (MMU) enclosures are the ideal complement for the iEM3000 Series of energy meters. This compact solution saves wall space and is scalable for the exact number of meters required. Factory-assembled, pre-wired, and tested enclosures can speed installation, reduce the amount of field wiring, and save time troubleshooting.

Multi-meter unit enclosures and iEM3000 meters provide the highest quality, best value hardware for tenant sub-metering, and are designed for contractor convenience and simplicity.

MMU enclosures are available in three sizes:

- Small MMU enclosures with capacity for up to 4 iEM3000 meters.
- Medium size MMU enclosures with capacity for up to 8 iEM3000 meters, plus one gateway/data logger/energy server.
- Extra-large MMU enclosures with capacity for up to 24 iEM3000 meters, plus one gateway/ data logger/energy server.

Multi meter units are configured to order as described below.

Energy Meter

PowerLogic Energy Meter

The Energy Meter is ideal for stand-alone and systems-based submetering applications. It is easy to install and provides exceptional metering accuracy. Available in Basic and Extended Range models. The Basic model is designed for metering of 120/240 and 208Y/120 volt services. The Extended Range model will meter 120/240 volt up to 480 volt Wye connected services. Extended Range meters come with pulse output and phase loss output not available on the Basic unit. Optional Modbus™ RS-485 serial communications are provided with the Energy Meter Comms Board, EMCB. Optional kW demand is also provided by the EMCB.

Meter up to 3 individual services with one Energy Meter. The Energy Meter will allow the addition of up to 3 sets of parallel CTs for metering multiple electric loads. Additional sets of CTs can be ordered separately. Please refer to the multiple CT application notes in the Energy Meter instruction bulletin for the proper installation procedures.

1600 A, 2.45" x 5.50" ID, 1 CT	EMCT164

NOTE: CT quantity and amperage must match meter model. Total of combined loads must not exceed rating of meter. All additional CTs shipped with 6 ft. white and black color-coded wire leads.

PowerLogic EM4200 Enercept Meter

Next generation Enercept meters provide a unique solution for measuring energy data. The small form factor enables retrofit installation in existing panels to save wall space, installation time, and material cost.

Designed to simplify the ordering process, the meter is available in two major options:

- **System calibrated Enercept** offers the simplest way to order. The meter comes with pre-mounted low voltage (LVCT) or Rogowski coil current transducers, as well as pre-mounted fuse packs. Ordering one part number provides a system calibrated 1% overall accuracy metering system for 100 A, 200 A, 400 A, or 5,000 A range applications.
- **Enercept Flex** offers the flexibility required for many sites where selecting the type and size of current transducer is desired. The Enercept Flex is compatible with the current transducers on . Choose split core or solid core LCVTs from [Table 4.13 LVCT Series Current Transformers, page 4-16](#), or rope style current transducers from [Table 4.12 METSECTR Series Rope-Style Current Transformers, page 4-16](#). Choose fuse packs from [Table 4.19 Energy Meter Accessories, page 4-21](#).

Features

- Uni- and bi-directional metering to support to power generation application
- Data logging
- Modbus and BACnet serial communication with auto-protocol and baud rate detection.
- Configurable with or without power
- Compact size for easy in-panel mounting, DIN rail or screw mount options, includes mounting brackets for easy installation
- Seamless integration with EcoStruxure™ Power Management software products.
- Wide 90 to 480 Vac input range
- High reliability with ANSI C12.20 0.2% accuracy, IEC 62053-22 Class 0.2S (EM4236)

EM4200 Flex Power Meter

EM4200 System Calibrated with Calibrated Rogowski Coils

[8] Energy Meter communication board (EMCB) can be used with all models of the Energy Meter. Order one EMCB for each Energy Meter where either kW demand and/or communication is specified.

System calibrated Enercept power meter, Modbus/BACnet RS485, ANSI wire code, includes LVCT current transducers for up to 400 A and fuse packs	METSEEM4236B401

Multi Circuit Energy Meters

The PowerLogic EM4800 and EM4000 multi-circuit energy meters combine accurate electricity sub-metering with advanced communications technology. They are ideal for multi-tenant or departmental metering and M&V applications within office towers, condominiums, apartment buildings, shopping centers and other multipoint environments, or small footprint retail. This meter is available separately or as part of a Square D integrated power center (IPC) for use in building retrofits or new construction.

Each compact multipoint meter provides energy measurement for up to 24 (1CT) or 12 (2CT) single-phase circuits or 8 (3CT) 3-phase circuits. Select a model to match the desired CT type. The 0.333 V output CT option does not require shorting blocks, making it the ideal choice for retrofit installations.

All meters have an accuracy of Class 0.5%, have onboard interval logging, and feature flexible communication options with an Ethernet port that supports multiple protocols: Modbus TCP/IP, HTTP, BACnet/IP, FTP, and SNMP. EM4800 series meters have a V.90 modem while EM4000 series meters provide Modbus RTU over RS-485.

PowerLogic Branch Circuit Power Meter

The ideal solution for data center managers, energy or facility managers, engineers and operational executives who are responsible for delivering power to critical applications. In corporate and hosted data center facilities, this technology helps you plan and optimize the critical power infrastructure to meet the demands of continuous availability.

The PowerLogic BCPM is a highly accurate, full-featured metering product designed for the unique, multi-circuit and minimal space requirements of a high performance power distribution unit (PDU) or remote power panel (RPP). It offers class 1 (1%) power and energy system accuracy (including 50 A or 100 A CTs) on all branch channels.

The BCPM monitors up to 84 branch circuits with a single device and also monitors the incoming power mains to provide information on a complete PDU. It also offers multi-phase measurement totals with flexible support for any configuration of multi-phase breakers. Full alarming capabilities ensure that potential issues are dealt with before they become problems.

Unlike products designed for specific hardware, the flexible BCPM will fit any PDU or RPP design and supports both new and retrofit installations. It has exceptional dynamic range and accuracy, and optional feature sets to meet the energy challenges of mission critical data centers.

Key Features:

- Integrated Ethernet with advanced SNMP, BACnet, and Modbus TCP support on BCPME models
- Class 1% system accuracy (including 50 A or 100 A branch CTs)
- Flexible configuration of Logical Meters for multi-phase loads
- Full PDU monitoring
- Flexible configuration
- Split core version for retrofit installations
- Wide monitoring range
- Low current monitoring
- Advanced alarming
- Easily integrates into a PowerLogic system or other existing networks using Modbus™ communications

New!

PowerLogic EM4900 Series Multi-Circuit Meters

The PowerLogic EM4900 Series Multi-Circuit Meters make it easy to add many metering points without having to purchase, mount, wire and commission individual energy meters. Simply add a single device with common voltage inputs and communication interface that can measure the current, voltage, power, energy consumption, and Total harmonic Distortion (THD) of up to (14) 3-phase circuits with a single board or up to (28) 3-phase circuits with a two board configuration. Save on both equipment cost and installation.

Applications

- Commercial and residential subtenant billing
- Load-based cost allocation
- Measuring for load balancing and demand response
- Overload protection

EM49xxE Main Unit

Table 4.29: EM4900 Series Part Numbers - BCPM with Solid Core CTs

Item	Code	Description
1 Model	METSEEM49	Multi-Circuit Meter
2 Number of 3-phase Meters	04	Up to (4) 3-phase Meters (see Table 4.31 for variations)
	08	Up to (8) 3-phase Meters (see Table 4.31 for variations)
	14	Up to (14) 3-phase Meters (see Table 4.31 for variations)
	28	Up to (28) 3-phase Meters (see Table 4.31 for variations)
3 Communication Interfaces & Protocols	A	RS-485 Serial with Modbus RTU (add E8951 for other protocols)
	E	Ethernet with Modbus TCP, BACnet IP and SNMP protocols and RS-485 Serial with Modbus RTU or BACnet IP

Table 4.30: Part Number Example

1 2 3
METSEEM49 14 E

- 1: Model
2: Number of 3-phase meters (without neutral current)
3: Communication interfaces & protocols.

Number of Meters Supported

EM4900 models are all factory-configured as all 3-phase meters (w/o neutral). They can be easily re-configured to any combination of 1-ph, 2-ph, or 3-ph meters (with ION setup). Any unused channels can be used to measure neutral current. Label overlays (to re-number CT connections) are provided for 1-ph/2-ph applications.

EM49xxA Main Board

Com'X 510 Energy Server

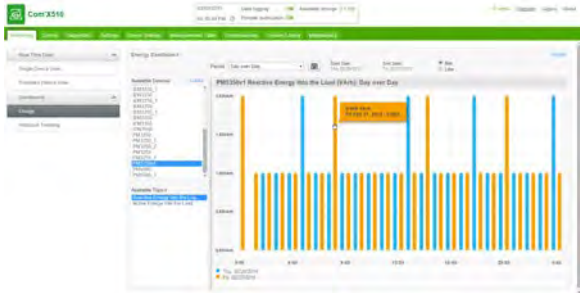

Com'X Data Loggers and Energy Servers

Powerful data logging with flexible communication options

Connect your entire power system with Com'X data loggers and energy servers. Com'X surpasses conventional gateways and data loggers by incorporating multiple capabilities into one compact device. In addition to being a real-time gateway to downstream devices, Com'x logs all essential WAGES and environmental readings through a broad range of downstream data feeds and local I/O. Logged data can be automatically pushed to a hosted platform or downloaded for report generation. Ethernet and Wi-Fi ready, Com'x leverages on the building's existing IT infrastructure to reduce cost. Its GPRS capability makes it ideal for sites with no access to IT networks.

Easy configuration and commissioning

Configuration and commissioning is made easy by automatic device detection, and IP address setting and allocation. No additional software is needed for the intuitive, web-based configuration pages. A device library enables quick configuration for more than 70 Modbus devices and also provides for custom configuration of additional devices. Configuration via Wi-Fi lets technicians use tablets or notebooks to work comfortably away from switchboard rooms.

Com'X 510 Energy Dashboard

Embedded energy management software

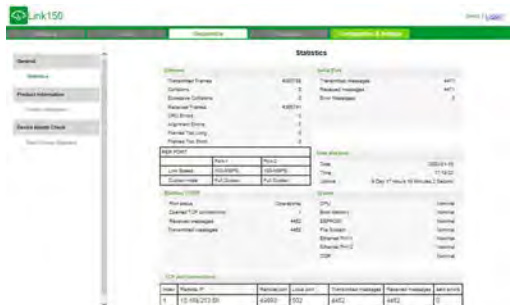

The Com'X 510 Energy Server further includes embedded web pages that display data in a meaningful way so you can make informed decisions about your energy usage. Web pages display real-time data in easy to understand tabular and summary formats. In addition, you can access simple analysis of historical data in bar graph or trending formats. Pages are accessible via any standard web browser without plug-ins or additional components.

Table 4.34: Com'X Data Loggers, Energy Services, and Accessories

Description	Catalog Number
Com'X210 Data logger, requires 24 VDC power supply	EBX210
Com'X510 Energy server, requires 24 VDC power supply	EBX510
Wi-Fi USB stick	EBXAUSBWIFI
Zigbee USB stick	EXBAUSBZIGBEE
GPRS modem with SIM card	EBXAGPRSSIM
GPRS modem without SIM card	EBXAGPRS
External GPRS antenna	EBXAANT5M

Link150 Ethernet Gateway

Link150 has embedded web pages for easy setup and maintenance

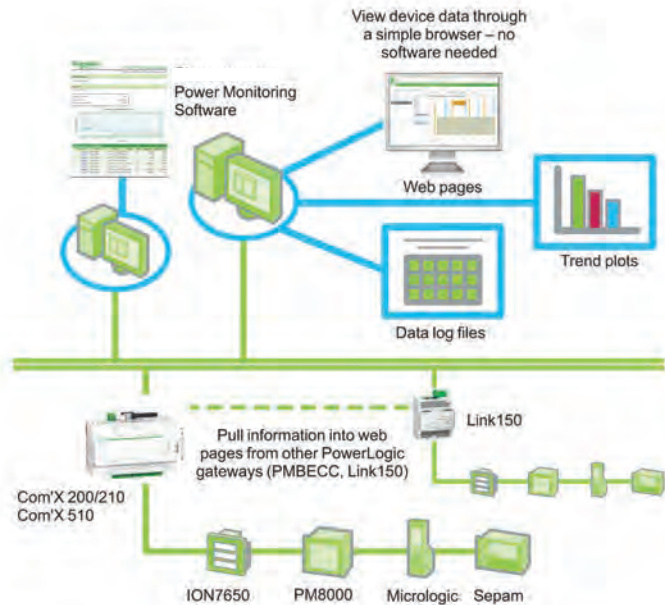

Link150 Ethernet Gateway

Communications for high-speed access to critical information

The Link150 gateway provides fast, reliable Ethernet connectivity in the most demanding applications, from a single building to a multi-site enterprise. This gateway supports meters, monitors, protective relays, trip units, motor controls and other devices that need to communicate data quickly and efficiently. It is your simple, cost-effective serial line to full Ethernet connectivity.

Applications

- Energy management
- Power distribution
- Building automation
- Factory automation

Security

- Secure user interface including user's name and password for login
- Advanced security features to allow users to specify which Modbus TCP/IP master devices may access attached serial slave devices
 - Modbus TCP/IP filtering feature
 - Allows user to specify the level of access for each master device as Read-only or Full access
- Web pages provide easy configuration and setup

Advantages

- Easy to install and setup
- Easy to maintain
- Compatible with Schneider Electric software offerings (EcoStruxure Power Monitoring Expert, EcoStruxure PowerSCADA Operation, etc.)
- Compatible with Com'X 200/210 and Com'X 510 Energy Servers
- Reliable Modbus to Ethernet protocol conversion

Engineered Solutions

Schneider Electric provides an engineered solution approach to your specific power system applications. Our total solutions for power monitoring and power system controls allow greater safety, reliability, and energy efficiency of your power systems. As a long standing industry leader in Power Monitoring and Control Systems, we understand your power system requirements and needs.

All of our Engineered Solutions are tailored to your specific system requirements. Schneider Electric is your total solution provider.

The Basics of a Comprehensive Power and Energy Management System

Measure: Gather energy and power data throughout your facility. Stand-alone or embedded meters measure, collect, and deliver essential data from key distribution points across your entire electrical network.

Understand: Turn data into actionable information. Power management software brings intelligent analytics and visualization to power and energy data.

Act: Use actionable information to make intelligent decisions and operational shifts to create change or correct issues.

The Benefits of Power and Energy Management

- Reduce energy and operational costs
- Improve power and equipment reliability
- Optimize operations
- Increase system capacity
- Minimize expensive downtime
- Meet sustainability goals
- Improve productivity

Power System Control Applications

Automated solutions for increased Reliability and Energy Efficiency: Schneider Electric engineers provide Power System Control Applications with automated solutions for addressing your system reliability and efficiency control needs. Our offer covers Automatic Throwover Schemes, Load Shedding/Peak Shaving, and Load Preservation and Microgrids.

- **Automatic Throwover Systems** – Automatic selection of available utility or generator sources to maintain service continuity to connected loads.
- **Load Shedding/Peak Shaving** – Control peak demand levels or ensure service continuity to critical load or operate breakers in accordance with user specified sequences and time delays such as bringing large motors online across several billing kw demand periods to avoid demand penalties.
- **Load Preservation** – Fast acting sophisticated control systems designed to stabilize critical power systems to the greatest extent possible by monitoring frequency and power sources from utility plus generator capacity versus total circuit load.

Power System Engineering

The Square D Power System Engineering team offers a wide range of engineering services to improve the safety, efficiency and reliability of your power distribution system. The team is comprised of registered professional engineers, safety trained and equipped, to perform a variety of engineering functions.

Power System Studies

The Square D Power System Engineering Team provides expertise for a variety of electrical power system studies. Some of the more common system studies include:

- Short-circuit analysis
- Time-current coordination
- Motor starting/voltage drop
- Motor starting/torque-speed
- Safe motor re-energization
- Harmonic analysis
- Transient analysis
- Power factor correction analysis
- Other system specific analysis

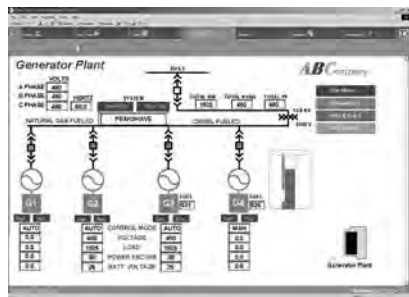

Arc Flash Analysis

Square D offers on-site services to perform arc flash analysis for a facility, complex, office, or campus. An Arc flash analysis is used to determine:

- Flash Protection Boundary
- Incident Energy Value
- Hazard/Risk Category
- Appropriate Personal Protective Equipment (PPE)
- Low cost arc flash reduction methods

Features of Square D arc flash analysis include:

- Time current coordination analysis showing both existing and recommended over/current device settings
- Short-circuit study to ensure adequacy of equipment
- Onsite verification and documentation of equipment
- Arc flash labels (populated with the results of the arc flash analysis)
- Arc flash label affixation
- NFPA 70E—Safe Workplace Practices Training provided by OSHA authorized outreach instructors
- Recommendations and solutions to reduce potential arc flash hazards

PowerLogic Engineers provide graphic solutions for realtime monitoring of power systems.

Power Quality Studies

Square D offers onsite power quality engineering studies and solutions to eliminate process disruptions, power system shutdowns, and equipment damage due to electrical power system disturbances. A power quality study is used to:

- Determine compliance with the IEEE 519-Recommended Practices and Requirements for Harmonic Control in Electrical Power Systems guidelines
- Identify most cost-effective solution to power quality problems
- Solve process disruptions due to power disturbances
- Reduce economic effects of poor power quality
- Identify disturbances originating on electric utility system and improvements to reduce the number and severity

Power System Assessment

Square D offers engineering services to meet a variety of power system needs:

- Basic codes and standards compliance
- Protective coordination assessment
- Maintenance program review
- Recommendations for power system optimization
- Power quality troubleshooting and analysis
- Power factor and harmonics analysis
- Electrical safety hazards
- Short-circuit withstand overview
- Single-line documentation of power system
- Power monitoring recommendations
- Loading measurements

Power System Design Services

Schneider Electric Engineering Services offers three levels of design services based on the customer need:

- Design Assurance
- Design Assistance
- Primary Design Agent

Other areas of expertise include:

- New equipment installation
- Existing equipment modification
- Protection Control Automation
- Ground Fault Systems
- Generator Control Systems

Square D professional engineers - safety trained and equipped - will listen to your concerns and goals, define the problem or enhancement, and engineer the solution that best satisfies your needs.

For additional information on power system engineering services and pricing, contact your nearest Square D/Schneider Electric office.

Advanced Microgrid Solutions and Distributed Energy Resource Management

With our custom solutions and proven expertise, we deliver advanced microgrids that offer the advantages of grid independence – without forfeiting the benefits of being part of the central grid. Our flexible microgrid architecture features a scalable set of grid components designed to efficiently manage your entire energy infrastructure, including distributed generation, energy storage, and load demand, while giving you the ability to easily adapt the system to your changing needs. **Learn more at** www.schneider-electric.us/en/work/solutions/microgrids/

Total Energy Control

Schneider Electric Certified Energy Managers (CEM's) work on-site with knowledgeable plant personnel to develop a long-term, comprehensive, "Energy Action Plan", that serves as the blueprint for energy savings. Unlike performance contracts or one-time energy audits, the Total Energy ControlSM program offers a strategic partnership for energy-intensive industrials who want to improve energy efficiency.

Total Energy Control

- **Utility Analysis:** evaluating both the commodity supply side and the demand side areas of the operation.
- **Demand Side Usage:** profiling facility loads and consumption patterns.
- **Opportunity Identification / Prioritization:** projects that make sense today and those that should be considered in the future as energy prices change.
- **Project Implementation:** Client can choose which projects to implement or Square D can provide turn-key implementation.
- **Supply Management:** forecasting and making adjustments to reflect current conditions.
- **On-Going Accountability:** accountable along with you for the ongoing success of your energy plan.

Leverage in-person and remote services

Take advantage of EcoStruxure Power Advisor Digital Service Plans to increase the reliability of your critical systems, extend the life of your equipment, and improve your energy performance. You won't believe what your power management system can do with our help! Easily manage your electrical system and keep your operations running smoothly without needing extra time or main-power to do it.

Access the benefits of EcoStruxure Power Advisor, a key component of Digital Service Plans that is the analytical engine that turns your data into information. Using data from your power monitoring software, it combines advanced algorithms with expert analysis, and provides the insight that you need to make the right decisions.

Power Management University (PMU)

Attending a PMU sponsored course will enable attendees to better utilize their Schneider-Electric power monitoring solution thus enabling them to realize energy savings as quickly as possible. PMU offers a variety of options with instructor led options being 80% hands-on, with each student having their own lab workstation. Below is a list of the different training options offered by PMU.

Course	Course Number	Length
Factory Courses: Software Solutions		
PME 8.x Fundamentals Bundle (with 12 mo. On-Demand Campus access)	3000PMUFUNDSPMCR	4 Days
PME 8.x Fundamentals Bundle (without 12 mo. On-Demand Campus access)	3000PMUFUNDSPM	4 Days

PowerLogic Engineers design power control systems that meet your operational requirements

System Integration

System Design and Engineering

Our Power Solutions specialists can work with you to design or upgrade your existing system to best achieve your energy and power management objectives and informational needs. With expertise in electrical systems, communications, and automatic control systems, we can integrate, install, and commission your system for optimal performance.

- System Design and Bill of Material Recommendations
- Power Monitoring and Control
- WAGES (Water, Air, Gas, Electric, Steam)
- Enterprise web-based monitoring
- Specification development, drawings, documentation
- Enclosure panel design and build
- Metering Connection Verification/Testing
- Power distribution automation
- On-Site Installation Assistance, Component Configuration & Startup
- Turn-key project management
- Third Party Device and communication interfaces
- Configured Workstations, User Software Interfaces
- Interactive Graphic Design to mimic facility layout, one-lines, equipment status
- Custom Software, Reports & Applications – Billing and Event Notification

PowerLogic Engineers specialize in the design and setup of Emergency Power Supply Systems (EPSS).

For additional information, contact your nearest Square D / Schneider Electric office.

Factory Assembled Equipment

Square D™ PowerLogic™ Factory Assembled Equipment offers a wide range of designs for metering, communications, and control applications to simplify retrofit installations. Our equipment is designed to order as a free-standing or wallmounted system. With PowerLogic™ Factory Assembled Equipment, you'll receive professionally crafted, factory tested, pre-wired equipment that will greatly improve the speed of your system startup. All backed by the Square D™ quality standard of excellence.

- Assemblies include meters & devices wired to terminal blocks, disconnects, and shunting blocks or test switches
- Tailored to any system voltage :
 - 208/120 V, 480/277 V & 600/347 V Wye
 - 240 V, 480 V & 600 V Delta
 - Utilization of PT's required for higher voltage levels
- Wall mountable and easy to install using concealed holes in the back of the enclosure.
- Complete with necessary documentation and mounting hardware for quick and easy installation
- Carbon steel construction, with industry standard ANSI 61 gray powder coat finish
- Equipped with concealed hinged door, and universal pad-lockable latch.
- Custom engraved nameplates available for all units.

Table 4.37: Industrial Enclosure Types 12 & 4, UL & CUL 508A Listed

Available Meter Types	Digital Inputs	Digital Outputs	Analog Inputs	Analog Outputs
ION6200	N/A	Up to 2 / Meter	N/A	N/A
PM5563RD	Up to 4 / Meter	Up to 2 / Meter	N/A	N/A
PM8244	Up to 15 / Meter	Up to 5 / Meter	Up to 4 / Meter	Up to 2 / Meter

- Supports Single or Multiple Voltage Sources for Indoor (Types 1 and 12) & Outdoor (Type 4) applications
- Available with 1–4 meters per panel. Serial & Ethernet Communications are options for all units
- EGX & ION RTU Communication Enclosures with 1–4 devices per panel also available

Light Industrial Enclosure Type 1, UL & CUL 508A Listed

- Available for the following meter types: PM8244, PM5563RD, and ION6200
- Supports Single Voltage Source only for Indoor (Type 1) applications.
- Available with 1–12 meters per panel. Serial Communications are standard for all units.
- No Digital or Analog I/O is available for this option.

Service Entrance/Utility Socket Enclosure Type 3R, UL & CUL 508A Listed

- Available for ION8650 only, with up to 3 Digital Inputs and 4 Digital Outputs.
- Supports Single Voltage Source only for Indoor & Outdoor (Type 3R) applications.
- Units are Ring Type with removable cover.
- Available with 1 meter per panel. Serial & Ethernet Communications options available.
- Supports Form 9S, 35S, 36S, 39S and 76S configurations for ION8600 and forms 9S and 36S for E5600.
- Options available for remote mounted CTs
- Options available for integrated, bar type CTs
- Optional Test Switch.

Additional engineered to order products are available for a wide variety of design solutions.

- Switchgear Transfer Control Panels
- Generator Control Panels
- Load Shed Control Panels
- Sequence of Events Recording (SER) Panels
- Control System Mimic Panels
- Lighting Control Interface Panels
- Programmable Logic Controller (PLC) Control Panels (Hot Standby, Relay Control, Data Concentration etc. ...)
- Emergency Power Supply Systems (EPSS) Control Panels
- Water, Air, Gas, Electrical, and Steam (WAGES) Monitoring Panels
- Input Status Monitoring & Alarming Panels
- Remote Annunciator Control Panels
- Remote Operator Control Panels
- Serial, Ethernet, and Cellular Wireless Systems
- Server Rack and Network Equipment (Servers, Switches, UPS's) for Energy Management Systems.
- Industrialized PC's, Touch Screens (Magelis), and Human Machine Interfaces (HMI's) with Custom System Graphics.
- Designed to fit any environment – Indoor (Type 1 & 12) & Outdoor (Type 3R & 4) applications

For additional information and pricing please contact your local PowerLogic sales specialist or PowerLogic Inside Sales Support at 615-287-3535. Equipment pricing and literature available for download on our website at www.powerlogic.com/products/enclosures.

To better serve you please have the following information on hand when calling.

- Enclosure type (Indoor or Outdoor) and Environment details (Corrosive or Non-Corrosive)
- Power System Voltage Level and Type (Direct Current (DC) or Alternating Current (AC))
- Digital & Analog Input and Output requirements
- Device Type and Quantity per enclosure
- Ethernet and Serial Communication Requirements
- For Drawout Retrofits, need existing cradle type (i.e. GE, Westinghouse, etc.)

PowerLogic High Density Metering

High Density Metering (HDM) is engineered to answer the metering and billing needs of multi-tenant properties:

Features and Benefits

- HDM comes standard with PowerLogic PM5000 series.
- Lockable, 16 gauge NEMA Type 1 enclosure provides tamper-resistant security.
- NEMA Type 3R also available. Please consult factory.
- Mounting channel and surface-mount flanges simplify installation.
- Factory installed cover plates are included to cover empty meter spaces.
- Factory installed wiring harness simplifies installation of additional meters and provides future system expansion.
- Each High Density Metering cabinet is provided with RS485 Modbus® or Modbus Ethernet TCP communications. For wireless communications, please consult factory.
- Supports 120/208V & 277/480V WYE, and 240V & 480V Delta System Types, 1Ph or 3Ph
- CTs required. Must select separately.

High Density Meter System Includes:

- Enclosure
- Power Meters, installed
- Installation bulletin for Enclosure
- Wall hanging bracket
- Installation bulletin for Meters

High Density Metering factory assembled enclosure for multi-tenant properties

Table 4.38: High Density Metering Cabinet

Category	Meter	Enclosure Size	Number of Meters [11]	Enclosure Rating	Description
HDM	PM5110	1, 4 or 8	1–8	Type 1 or Type 3R	High Density Meter Enclosure with PM5110 meters; Modbus RTU serial communications; Ideal for single or three phase indoor commercial building applications
HDM	PM5330	1, 4 or 8	1–8	Type 1 or Type 3R	High Density Meter Enclosure with PM5330 meters; Modbus RTU serial communications; Ideal for single or three phase indoor commercial building applications
HDM	PM5340	1	1	Type 1 or Type 3R	High Density Meter Enclosure with PM5340 meters; Modbus TCP Ethernet communications; Ideal for single or three phase indoor commercial building applications
HDM	PM5560	1, 4 or 8	1–8	Type 1 or Type 3R	High Density Meter Enclosure with PM5560 meters; Dual wiring for both Modbus RTU serial and Modbus TCP Ethernet communications; Ideal for single or three phase indoor commercial building applications

[11] Meters Ordering Notes: Please indicate the number of meters to be pre-installed when placing your order. You may order any number of meters in the enclosure between one and the maximum number of meters each cabinet will hold.

Reactive Power Compensation and Harmonic Mitigation Solutions

How can reactive power compensation and harmonic mitigation solutions be part of your energy efficiency programs?

Power factor is a measure of how efficiently you are using electricity. In an electric power system, a load with low power factor draws more current than a load with a high power factor for the same amount of real power transferred. Utility customers with a low power factor could realize an increase or penalty in their electric bill. Over time, these penalties may reach into thousands of dollars, depending upon the utility's rate structure.

Harmonics may disrupt normal operation of other devices and increase operating costs. Symptoms of problematic harmonic levels include overheating of transformers, motors and cables, thermal tripping of protective devices, logic faults of digital devices and drives. Harmonics can cause vibrations and noise in electrical machines (motors, transformers, reactors). The life span of many devices can be reduced by elevated operating temperature.

As a leader in the field of power quality, Schneider Electric offers the products and services needed to ensure that the most reliable and cost effective solution is applied within your facility. We can help you select the right solution for your application, for greenfield or brownfield projects. Please visit us at <https://www.se.com/us/powerandenergy>.

Table 4.40: Descriptions, Applications, and Features

Product Description	Application	Product Features
VarSet Standard	Power Factor Correction	Suited for centralized power factor correction in applications where plant loading is constantly changing, resulting in the need for varying amounts of reactive power. Designed for electrical networks with little or no harmonic content.
VarSet Detuned	Power Factor Correction	Suited for centralized power factor correction in applications containing harmonic energies that would otherwise damage standard automatic capacitor banks
VarSet Fast	Power Factor Correction	Contains enhanced technology utilizing solid state switching elements that replace standard electromechanical contactors. Provides quicker response to load fluctuations with transient free capacitor switching.
VarSet Hybrid	Power Factor Correction and Harmonic Filtering	Provides instantaneous and infinitely variable reactive power compensation for industrial networks containing highly transient or unstable loads, as well as system compensation for large AC motor inrush current. It integrates conventional power factor correction systems and the latest IGBT-based solutions to provide ultra rapid response and infinitely variable kVAR control.
AccuSine PFV+	Power Factor Correction	Provides reactive current compensation for specific and high performance systems. It can eliminate leading or lagging power factor, reduce voltage fluctuations, enhance equipment operating life, and improve system power capacity.
AccuSine PCS+ and PCSn	Power Factor Correction and Harmonic Filtering	It is a flexible, high performance, cost-effective solution to stabilize electrical networks by providing harmonic mitigation, power factor correction, and load balancing. It monitors a distorted electrical signal and determines the frequency and magnitude of harmonics in the signal. It cancels the harmonic content with the dynamic injection of opposing phase current in the distribution system or individual load.

VarSet Standard Capacitor Banks

The VarSet™ standard automatic capacitor banks provide an easy way to maintain your facility's power factor at an ideal level for maximum system efficiency and savings. Designed for easy installation, this series of wall-mounted capacitor banks has a small footprint, provides you with power factor improvement and improved reliability while saving valuable space.

VarSet Detuned Capacitor Banks

The VarSet Detuned automatic capacitor banks provide power factor correction in electrical distribution networks with moderate levels of harmonic content. The series capacitor and reactor combination is tuned below the first dominant harmonic order (usually the 5th). This prevents resonance and harmonic amplification.

VarSet Fast Capacitor Banks

The VarSet Fast detuned automatic capacitor banks are suitable for nearly all electrical networks and are ideal for correcting poor power factor in electrical networks with a high concentration of electronic loads. Instead of traditional electromechanical contactor switching, it uses an advanced controller to precisely activate electronic switching elements to connect capacitor stages and avoid the creation of transients.

VarSet Current Transformers

A current transformer is required for automatic control and must be ordered in addition to the VarSet capacitor bank.

CT must be sized to your network and have a secondary rating of 5 A. When selecting a CT be sure to use proper rating factors for ambient temperature conditions.

For more information, please refer to the VarSet catalog.

AccuSine PFV+ Electronic VAR Control

AccuSine PFV+ is a very simple and effective means to eliminate leading or lagging power factor, reduce voltage fluctuations, enhance equipment operating life, and improve system power capacity. AccuSine PFV+ offers many features in one package that others require multiple models to accomplish.

AccuSine PFV+ can help you solve:

- Power factor
- Imbalance (specifically important for motor applications)
- Voltage stability (such as localized photovoltaic networks)
- Flicker
- AccuSine PFV+ integrates with EcoStruxureTM Power's edge control power management and control software and analytics services that scale to your demands and adapt to your needs.

AccuSine PFV+ Sizing

For proper sizing of AccuSine units, contact the Schneider Electric sales office or visit us at <https://www.se.com/us/powerandenergy>. To expedite the product selection process, please have a single line diagram and/or details of the application including sizes of transformers, non-linear and linear loads, and any existing filters and capacitors.

AccuSine Current Transformers

Split-Core Design

Construction

Directional silicon steel is used for the flexible core. Secondary windings are of copper. Unit is encapsulated in silicone rubber, which protects against moisture, dirt, oil, and corona.

Table 4.51: Specifications

Description		Specification
Insulation Level		0.72 kV BIL 10 kV Full Wave
Frequency		50-400 Hz
Thermal Factor		1.25 at 30 °C; 1.0 at 55 °C
Operating Temp Range		-45 °C to +55 °C
Altitude		Up to 4000 Meters
Accuracy (Primary rating)	200 through 300	4 %
	400 through 500	3 %
	600 through 800	2 %
	1000 through 6000	1 %
Secondary Leads		3.65 m with spade connectors
Color		Transformer (red) - Leads (yellow)
Remains flexible from -45° to +200 °C		

Twisting motion opens to CT diameter of round CT and smaller distance of rectangular CT.
NOTE: Open split-core with a twisting motion only.

VarSet Hybrid

Rebranded!

Topology (Typical)

Main Features:

- Ultra fast reactive current compensation for transient or cyclical loads
- Infinitely variable control
- Instantaneous response for inrush support
- Independently compensates each phase
- Heavy duty dry capacitors provide no risk of fluid leakage, no environmental pollution, and no need for drip pans
- Detuned iron core reactors prevent resonance
- IGBT based power electronic technology
- Stepless power factor correction
- Best-in-class harmonic cancellation up to 50th harmonic and less than 3% THDi
- Energy efficient 3-level IGBT inverter technology
- All major components from Schneider Electric

Power quality issues like harmonics and reactive power can cause problems including equipment damage and reduced reliability. In industrial networks, highly fluctuating loads like spot welders can cause voltage fluctuations and/or flicker that can lead to process malfunctions. The detrimental effects are increased operating expenses, expensive downtime, overheating equipment or poor quality on manufactured parts.

VarSet Hybrid systems provide instantaneous and infinitely variable power factor correction for industrial networks containing highly transient or unstable loads, as well as system compensation for large AC motor inrush current.

The VarSet Hybrid system integrates conventional power factor correction systems and the latest IGBT-based solutions to provide ultra rapid response and infinitely variable kVAR control never before seen in a power factor correction product. Specifically designed for the instantaneous support required by welding equipment, the VarSet Hybrid eliminates voltage sags and voltage flicker while increasing system capacity, providing energy savings and improving weld quality. It also provides current inrush support for applications such as large horsepower motor starting. The VarSet Hybrid is comprised of a Detuned Capacitor Bank with either an Active Harmonic Filter or an Electronic Var Compensator.

Active Harmonic Filters (AHF) are static power electronic products that employ digital logic and IGBT semiconductors to synthesize a current waveform that is injected into the electrical network to cancel harmonic currents caused by nonlinear loads. AHF employ current transformers to measure the load current to determine the content of harmonic current present. By injecting the synthesized current, network harmonic currents are greatly mitigated, thus reducing the heating effects of harmonic current and reducing voltage distortion.

AHF also have the ability to correct for poor displacement power factor (DPF) and provide for mains current balancing. DPF correction can be provided for either leading (capacitive) or lagging (inductive) loads. Mains current balancing is achieved by measuring the negative sequence current present and injecting the inverse negative sequence current to balance the current for the upstream network.

An Electronic Var Compensator (EVC) is a power electronic device consisting of insulated gate bipolar transistors (IGBT) that switch into the AC lines to modulate the output to correct the displaced reactive current (leading or lagging) and balance the current for the power source (also known as negative sequence current).

Detuned Capacitor Banks are automatic capacitor banks made of several capacitor steps controlled by a power factor (PF) controller. They are able to adjust PF to any value between 0.8 lagging and unity. When the PF differs from the target setting for more than 1 second, the capacitor switching modules switch stages as needed to bring the PF as close as possible to the target PF. Switching can be accomplished by electro-mechanical contactors or solid state switches.

The VarSet Hybrid is a custom solution that is engineered to order. Your local Schneider Electric representative can help you select the correct hybrid solution for your specific needs. To learn more, visit us at <https://www.se.com/us/powerandenergy>.

AccuSine PCS+ Active Harmonic Filter (AHF)

AccuSine PCS+ Active Harmonic Filter (AHF) injects harmonic current to cancel harmonic current in the electrical distribution system. This reduced harmonic level results in improved electrical network reliability and reduced operating cost. AccuSine PCS+ is simple to size, install, set up and operate. In addition, AccuSine PCS+ eliminates the complex harmonic compliance limit calculations and removes nuisance harmonics from the electrical network.

The Problem: Power electronic devices that have rapid and frequent load variations have become abundant today due to their many process control related and energy saving benefits. However, they also bring a few major drawbacks to electrical distribution systems; harmonics and rapid change of reactive power requirement. Harmonics may disrupt normal operation of other devices and increase operating costs. Symptoms of problematic harmonic levels include overheating of transformers, motors, drives, cables, thermal tripping of protective devices and logic faults of digital devices. In addition, the life span of many devices can be reduced by elevated operating temperature.

The Solution: The AccuSine PCS+ AHF provides the simplest and most effective means to mitigate harmonics, to reduce process related voltage fluctuations. The AccuSine PCS+ AHF actively injects opposite harmonics current on the source side of the load and it:

- Decreases harmonic related overheating of cables, switchgear and transformers
- Reduces downtime caused by nuisance thermal tripping of protective devices
- Increases electrical network reliability and reduces operating costs
- Corrects to the 51st harmonic, reduce harmonics level to meet IEEE 519, IEC 61000 3-4, and UK G5/4-1 standards.
- Compensates entire network or specific loads depending on installation point

Standard Features:

- Real-time dynamic current injection for harmonic cancellation and VAR compensation (lead or lag power factor)
- Load balancing capability
- Parallel connection allows for easy retrofit and installation of multiple units for large networks
- Response to load fluctuations within 2 cycles for harmonics, 1/4 cycle for power factor or load balancing
- Full color touch screen HMI (Human Machine Interface)
- UL Type 1, UL Type 2, UL Type 12, IP31, and IP54 enclosures
- Seismic rated per ICC IBC and ASCE 7
- UL, CE, ABS, and CSA certified
- AccuSine PCS+ integrates with EcoStruxure™ Power's edge control power management and control software and analytics services that scale to your demands and adapt to your needs.

AccuSine PCS+ Sizing: For proper sizing of AccuSine units, contact your local Schneider Electric representative or visit us at <https://www.se.com/us/powerandenergy>. To expedite the product selection process, please have a single line diagram and/or details of the application including sizes of transformers, non-linear and linear loads, and any existing filters and capacitors.

		PCSP300D5IP54	IP54				

[5] 60 A IP20/UL Type 1 configuration requires ordering two items: PCSP060D5IP00 and PCSPWMKIT60A; adds 9.13 in (232 mm) to IP00 length and 19.18 lb (8.7 kg).

[6] 120 A IP20/UL Type 1 configuration requires ordering two items: PCSP120D5IP00 and PCSPWMKIT120A; adds 9.13 in (232 mm) to IP00 length and 20.5 lb (9.3 kg).

[7] 200 A IP20/UL Type 1 configuration requires ordering two items: PCSP200D5IP00 and PCSPWMKIT300A; adds 10.75 in (273 mm) to IP00 length and 19 lb (8.6 kg).

[8] 300 A IP20/UL Type 1 configuration requires ordering two items: PCSP300D5IP00 and PCSPWMKIT300A; adds 10.75 in (273 mm) to IP00 length and 19 lb (8.6 kg).

AccuSine PCSn Active Harmonic Filter (AHF)

Part of the AccuSine+ family, the AccuSine PCSn is the ideal solution for harmonic mitigation in commercial buildings, light industry, and other less-harsh environments. In addition to 3-phase mitigation, AccuSine PCSn can compensate for neutral harmonic currents, typically present in building and commercial environments where single-phase non-linear loads are present.

- Configurable: One solution for multiple needs, AccuSine PCSn can be configured for Harmonic Mitigation + PF Improvement + Mains Load Balancing.
- Best-in-class performance to reduce THDi < 3%: Built on award winning AccuSine+ technology, this guarantees a harmonic-free system, improving system reliability, and increasing operational efficiency and uptime.
- Power Factor ($\cos\phi$), THDi, and THDv setpoint features provide system-level visibility and control, ensuring that you comply with utility code, and that your system is running at optimal efficiency.
- Harmonic mitigation eliminates harmonic current in the neutral. In a 3-phase system, unbalanced loads introduce a current in the neutral. Applying the mains load balancing function reduces the neutral current to zero, resulting in a perfectly stable system.
- Smart commissioning: Automatic CT polarity detection and correction, intelligent paralleling algorithm saves you time through unit self-identification, system view allows commissioning of the entire system from any one unit.
- Simple Scalability: Add more AccuSine modules as your harmonic mitigation needs change with your load requirements, easily integrating new modules through intelligent paralleling capabilities.
- With conventional power quality solutions you need high capital investment, incur large operating costs and may find it difficult to comply with IEEE 519 guidelines. The PCSn is the perfect alternative to conventional solutions like Harmonic Mitigation Transformers, Isolation Transformers, Passive Filters, Dual winding transformers.
- AccuSine PCSn integrates with EcoStruxure™ Power's edge control power management and control software and analytics services that scale to your demands and adapt to your needs.
- CE and cULus certified.

AccuSine PCSn Sizing: For proper sizing of AccuSine units, contact your local Schneider Electric representative or visit us at <https://www.se.com/us/powerandenergy>. To expedite the product selection process, please have a single line diagram and/or details of the application including sizes of transformers, non-linear and linear loads, and any existing filters and capacitors.

Introduction — Schneider Electric Energy Automation Solutions

Schneider Electric has proven solutions for the protection, monitoring and control of any critical infrastructure power system, whether large or small. Starting with a full range of Protective Relays for Medium or Low voltage distribution systems that provide dependability and reliability, Schneider Electric fits the bill. Sepam, MiCOM and ECOFIT are the front line of protection. Add the V125 for Arc Flash protection and you have a robust system for equipment protection. Let Schneider Electric's Energy Automation Solutions provide the Protection, Monitoring, and Control you need!

Schneider Electric's ranges for Remote Terminal Units (RTU) includes SAGE and T300. SAGE is a rack mount solution offering IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library.

T300 is a modular form factor feeder RTU for Medium Voltage and Low Voltage public distribution network management.

System Protection Solutions

Schneider Electric's family of protective relays have been protecting power systems world wide for over 100 years. From electric utilities to commercial buildings and data centers, customers know that Schneider Electric has the right relay solution for them. Today's modern relays are much more than simple overcurrent devices. They provide power system protection as well as arc flash protection in one device all while communicating to SCADA or DCS systems seamlessly. Whether it is a new installation or a retrofit opportunity, Schneider Electric has the answer.

V125 Arc Flash Module

Arc flash incidents are very real and very dangerous. The Schneider Electric V125 arc flash module provides detection in as low as 2 milliseconds to help mitigate equipment damage. Up to four (4) point sensors are brought into the V125 from different compartments in switchgear, such as the cable, breaker and bus compartments. The module is set with simple DIP switches and can be set up to deliver zones of arc flash protection. Installation is easy with a DIN rail or a door mount option.

V125 Arc Flash Module

ECOFIT 50/51

The ECOFIT 50/51 Plug and Protect numerical relay is a direct replacement for many GE IAC and IFC relays that are still in service today. No re-wiring is required. Remove the old relay and install the ECOFIT 50/51 and its cover. The relay has 31 different overcurrent curves built in and features an instantaneous element that can trip in as little as 1.5 cycles. Gain the benefits of waveform capture, sequence of events and metering that were not possible with the older electromechanical relays.

ECOFIT 50/51

Sepam™ Digital Relays

Sepam relays feature outstanding modularity and are ideal for a myriad of applications, including industrial and commercial feeder, motor, transformer, generator, busbar, and capacitor applications. Built-in breaker control, automatic throwover, and zone selective interlocking logic makes Sepam easy to configure and test. The family consists of three (3) ranges, Series 20, Series 40 and Series 80, allowing customers to purchase the right amount of relay for their particular application.

Sepam Digital Relays

MiCOM Relays

MiCOM relays provide utility grade protection with deep cyber security features. Large or small power systems; simple or complex applications are all covered in the MiCOM line of products.

MiCOM Relays

V125 Arc Flash Protection Solutions

Critical infrastructure depends heavily on an uninterrupted supply of electric power. Arc flash protection devices help accomplish this and are used to improve safety and mitigate equipment damage. Schneider Electric is the pioneer in the field of arc flash protection with close to 50,000 arc flash systems and 600,000 sensors in service worldwide. The V125 arc flash protection module can detect an arc flash event in as little as 2 milliseconds and send a control command to an interrupting device. It can accommodate up to four (4) point sensors and has a wide range 24 to 240 volt ac or dc power supply. It can be DIN rail mounted or door mounted and is easily set via DIP switches.

ECOFIT 50/51 Retrofit Relays

The Schneider Electric ECOFIT 50/51 single phase or ground time overcurrent relays are direct plug and protect replacements for many GE IAC or GE IFC electromechanical, GE DIAC and Basler BE1-50/51B replacements for GE IAC relays. The relays are self-powered from 50 or 60 Hz systems and are designed to be one to one replacements for existing electromechanical or digital relays. The relays are equipped with 31 built-in protection curves. ECOFIT 50/51 provides information that was not available in the E/M relays: (1) Twenty (20) overcurrent fault records time-tagged to the millisecond; (2) 200 events records time stamped to the millisecond; (3) Ten (10) Disturbance records up to 4 seconds per record at a sample rate of 32 samples per cycle. Plug and Protect reduces costs in installation time because it saves existing wiring and reduces engineering costs over other options. A 10-year warranty is standard.

Also refer to ECOFIT 50/51 on the www.schneider-electric.us website.

The Sepam™ Range

Sepam protection relays are time-tested, high-performance devices that ensure dependability. This range of products was designed with a simple idea in mind: All users should be able to find a solution corresponding exactly to their needs with the right balance between performance, simplicity and cost. With Series 20, 40 and 80, the Sepam range does just this. This family of relays offers a solution for every application need, specifically targeting industrial installations. These multi-functional protection devices allow an easy and hassle-free startup with simple-to-use programming software. Sepam relays also comply with the latest communication protocols on the market, including IEC61850, DNP3 and Modbus. In addition, all relays within this range come with a standard 10-year warranty and conformal coating for protection against harsh environments.

Features and Benefits

- Compact devices with clearly defined connection terminals for easy installation
- Predefined control logic for circuit breaker control or contactor control
- Predefined control logic for Zone Selective Interlocking applications
- Predefined control logic for Automatic Transfer applications
- User-friendly software (SFT2841) with built-in manuals for every relay
- Support for offline programming
- Application-specific design ensuring appropriate protection for any given application
- Low power CT options for the use of relays on new installations where the load is low
- Field-upgradable technology to stay up-to-date on the latest hardware and software

Sepam Series 20

The Series 20 consists of high-performing solutions suited for standard applications requiring current or voltage protection.

Applications Covered:

- Substation (feeder)
- Transformer
- Motor
- Busbar

Sepam Series 40

The Series 40 family of protection relays are designed for demanding applications requiring current, voltage and/or frequency protection.

- Substation (feeder)
- Transformer
- Motor
- Generator

Sepam Series 80

The Series 80 relays are for custom applications requiring enhanced protection of electrical distribution networks.

Applications Covered:

- Substation (feeder)
- Transformer
- Motor
- Generator
- Busbar
- Capacitor

Sepam Series 20 and 40

Sepam Series 80

Sepam Protection Configurations

Three relay series with increasing protection capabilities for six types of applications to provide all possible protection configurations

Sepam Substation / Feeder Applications

Substation/Feeder protection is broken into three sections Basic, Standard, and Advanced. The Basic protection is covered with our Sepam S24 protection relay and handles overcurrent (50/51) and ground faults (50G/51G or 50N/51N). The Standard protection is covered with the Sepam S42 protection relay and covers a host of current, voltage, and frequency protection elements. The Advanced protection is covered with the Sepam S84 and covers current, voltage, frequency, and synchro check protection functions.

Basic Protection Relay S24

Typical Catalog Number: **SQ1S24A1B1A0A0** Series 20 Substation/Feeder Protection S24 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Standard Protection Relay S42

Typical Catalog Number: **SQ1S42A1B1A0A0** Series 40 - Substation/Feeder Protection S42 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Advanced Protection Relay S84

Typical Catalog Number: **SQ1S84P1J5A0B0** Series 80 - Substation/Feeder Protection S84 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

M20/M41

M87/M88

Sepam Motor Applications

Motor protection is broken into three sections Basic, Standard, and Advanced. The Basic protection is covered with our Sepam M20 protection relay and handles overcurrent (50/51) and ground faults (50G/51G or 50N/51N). The Standard protection is covered with the Sepam M41 protection relay and covers a host of current, voltage, and frequency protection elements. The Advanced protection is covered with the Sepam M87/M88 and covers current, voltage, frequency, and differential protection functions.

Basic Protection Relay (M20 - Sepam 20 Series)

Typical Part Number: **SQ1M20A1B1A0A0** Series 20 - Motor Protection M20 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Standard Protection Relay (M41 – Sepam 40 Series)

Typical Part Number: **SQ1M41A1B1A0A0** Series 40 - Motor Protection M41 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Advanced Protection Relay (M87/M88 – Sepam 80 Series)

Typical Part Number: **SQ1M87P1J5A0B0** Series 80 - Motor Protection S84 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/ mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

Sepam Transformer Applications

Transformer protection is broken into three sections Basic, Standard, and Advanced. The Basic protection is covered with our Sepam T24 protection relay and handles overcurrent (50/51) and ground faults (50G/51G or 50N/51N). The Standard protection is covered with the Sepam T42 protection relay and covers a host of current, voltage, and frequency protection elements. The Advanced protection is covered with the Sepam T87 and covers current, voltage, frequency, differential, and synchro check protection functions.

Basic Protection Relay (T24 - Sepam 20 Series)

Typical Part Number: **SQ1T24A1B1A0A0** Series 20 - Transformer Protection T24 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Standard Protection Relay (T42 – Sepam 40 Series)

Typical Part Number: **SQ1T42A1B1A0A0** Series 40 - Transformer Protection T42 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Advanced Protection Relay (T87 – Sepam 80 Series)

Typical Part Number: **SQ1T87P1J5A0B0** Series 80 - Transformer Protection S84 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

G40

G87/G88

Sepam Generator Applications

Generator protection is broken into two sections Standard and Advanced. The Standard protection is covered with the Sepam G40 protection relay and covers a host of current, voltage, and frequency protection elements. The Advanced protection is covered with the Sepam G87/G88 and covers current, voltage, frequency, differential, and synchro check protection functions.

Standard Protection Relay (G40 – Sepam 40 Series)

Typical Part Number: **SQ1G40A1B1A0A0** Series 40 - Generator Protection G40 (24-250Vdc & 120-240Vac), 1/5A CT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Advanced Protection Relay (G87/G88 – Sepam 80 Series)

Typical Part Number: **SQ1G87P1J5A0B0** Series 80 – Generator Protection G87 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

Sepam Busbar Applications

Busbar protection is broken into two sections Basic and Advanced. The Basic protection is covered with our Sepam B22 protection relay and handles voltage and frequency protection. The Advanced protection is covered with the Sepam B80/B83 and covers current, voltage, frequency, and synchro check protection functions.

Basic Protection Relay (B22 - Sepam 20 Series)

Typical Part Number: **SQ1G40A1B1A0A0** Series 20 - Busbar Protection B22 (24-250Vdc & 120-240Vac), VT inputs, 10In/8Out (110-125 Vdc, 110Vac), RS485

Advanced Protection Relay (B80/B83 – Sepam 80 Series)

Typical Part Number: **SQ1B83P1J5A0B0** Series 80 - Busbar Protection S84 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

Sepam Capacitor Applications

Busbar protection is broken into two sections Basic and Advanced. The Basic protection is covered with our Sepam B22 protection relay and handles voltage and frequency protection. The Advanced protection is covered with the Sepam B80/B83 and covers current, voltage, frequency, and synchro check protection functions. .

Advanced Protection Relay (C86 – Sepam 80 Series)

Typical Part Number: **SQ1C86P1J5A0B0** Series 80 - Transformer Protection S84 (24-250Vdc), mimicBus Graphical Display, 1/5A CT inputs, 14In/11Out Digital Module (110-125Vdc/mid p.u.), 2 x RJ-45 ports (Modbus or IEC61850 with GOOSE), ladder logic firmware (PLC base).

The MiCOM Range

The MiCOM protection relay range provides capability for a wide variety of protection, control, measurement, monitoring, and communication. MiCOM protection relays offer scalable levels of functionality and hardware options to best suit your protection requirements and allows you to choose the most cost-effective solution for your application. The versatile hardware and common relay management software (Easergy Studio) allows simple configuration and installation in different applications.

Features and Benefits

- Advanced communications capabilities including IEC61850 with PRP and HSR
- Self-powered options on the MiCOM 10 series
- Native cyber security including IEEE 1686 and NERC-CIP
- Wide range of frequency protections including 16.5, 16.67, 25, 50, and 60Hz
- User-friendly programmable scheme logic for custom programming
- Application-specific design ensuring appropriate protection for any given application

MiCOM Characteristics

MiCOM 10 Series
P11x Self-Powered or Dual Powered
P115 and P116

MiCOM Self-Powered Applications

Self-powered applications are special and require specific hardware to handle the necessary protection of equipment. Schneider Electric offers the MiCOM P116 relay for this application. The P116 provides a number of advantages including dual power options, communications, withdrawable case, and electromagnetic flag indicators.

- Current Protection
- Electromagnetic flag indicators
- Withdrawable case
- Waveform captures
- Event records
- Communications options:
 - Modbus RTU
 - Event records

MiCOM Substation / Feeder Applications

The MiCOM range of relays offers varying levels of functionality and hardware options to best suit the protection requirements and allows the customer to choose the most cost effective solution for their application.

The versatile hardware allows for application in many installations and a common relay management software (MiCOM S1 Studio) makes for easy configuration and application.

Basic Feeder Protection Relays — MiCOM 10 and 20 Series

The 10 and 20 series hardware platforms are the building blocks of the MiCOM protection relay range providing the capability for a wide variety of protection, control, measurement, monitoring and communication functions.

The MiCOM P11x relays are suitable for all the applications where overcurrent and/or ground fault protection are required. P11x can be applied to medium and low voltage electrical systems as an optimized and cost-efficient solution tailored to user's needs.

MiCOM P120, P121, P122 and P123 relays provide comprehensive overcurrent phase and ground fault protection for utilities networks, industrial plants and networks as well as for other applications where overcurrent protection is required. The ground fault protection is sensitive enough to be applied in electrical networks where the ground fault current is low.

Standard and Advanced Feeder Protection Relays — MiCOM 30 and 40 Series

- Easergy MiCOM P132 offers a flexible and powerful feeder management device housed in a 4U case in 24TE, 40TE or 84TE widths. Easergy MiCOM P132 offers bay control for up to 3 devices and a library of 80 pre-engineered templates to reduce engineering time.
- Easergy MiCOM P139 one-box solution is the most advanced in the range. It's available in 40TE or 84TE width, 4U case sizes. It offers bay control for up to 10 devices. It uses a pre-engineered library of up to 300 templates for efficient engineering and commissioning.
- Easergy MiCOM P14x Feeder Management and Overcurrent Protective Relays are especially suitable where a complete or advanced power system protection scheme solution is required.

MiCOM P11x

MiCOM P12x

The following models are available:

- Easergy MiCOM P141 – Feeder management relay
- Easergy MiCOM P142 – Feeder management with integrated Autoreclose
- Easergy MiCOM P143 – Feeder management, integrated Autoreclose and Check Synchronism
- Easergy MiCOM P145 – Feeder management, Autoreclose, Check Synchronism and Enhanced operator control functions

MiCOM Motor Applications

The MiCOM 10, 20, 30 and 40 series protection relays are designed for various motor protection applications.

Basic Motor Protection Relay (MiCOM P 10 and 20 Series Relays)

The MiCOM P211 and P22x protection relay range are particularly adapted to oil refinery, chemical plant, metallurgy, glass and cement manufacturing, paper mills, electrical and mechanical engineering, food production, mining etc. It is also suitable for water treatment and in pumping stations as well as in steam power plants.

MiCOM P22x range of protection relays is designed for motor protection applications and includes a complete set of protection functions. Models available: MiCOM P220 MiCOM P225

A complete set of protection functions is performed on the measurement of current, voltage and temperature.

In addition to above basic functions, the relay carries out a large number of other functions that enable it to protect and run the motor more effectively.

Advanced Motor Protection Relay (MiCOM P 30 and 40 Series Relays)

Easergy™ MiCOM P24x relays offer advanced protection, control and monitoring of motors and rotating machines. Models available: MiCOM P241, MiCOM P242, MiCOM P243

Easergy™ MiCOM P24x comprehensive protection package includes 87 differential protection and optimization of thermal image monitoring for machines.

These relays not only improve monitoring conditions, but they also facilitate machine maintenance and save on wiring costs.

MiCOM Transformer Applications

Easergy™ MiCOM P63x and P64x Transformer Differential Protection and Control Devices are designed for fast, selective, short-circuit protection of transformers, motors, generators and other installations.

Models available:

- Easergy MiCOM P631
- Easergy MiCOM P632
- Easergy MiCOM P633
- Easergy MiCOM P634
- Easergy MiCOM P642
- Easergy MiCOM P643
- Easergy MiCOM P645

These devices also incorporate many supplementary protective backup functions.

MiCOM Generator Applications

The Easergy™ MiCOM P34x generator protection relays provide flexible and reliable integration of protection, control, monitoring and measurement functions for small, medium and large generators.

Models available:

- MiCOM P342
- MiCOM P343
- MiCOM P344
- MiCOM P345

P34x range covers small generators with all necessary industry standard protection and increasing through larger or more important generators with 100% stator ground fault protection via a 3rd harmonic measuring technique, pole slipping and unintentional energization at standstill protection.

Advanced models in the range offer leading techniques for large generators including second neutral voltage inputs for ground fault/inter-turn protection and 100% stator ground fault protection via a low frequency injection technique.

MiCOM Busbar Differential Applications

High Impedance Differential Protection Relays

MiCOM P72x high impedance differential protection series provides high impedance differential protection for generators, reactors, motor and busbar applications.

Models available:

- MiCOM P721
- MiCOM P723

P721 / P723

MiCOM P72x apart from offering the same application benefits as traditional high impedance electromechanical protection schemes, it combines the added benefits of numerical technology to provide advanced communications, event records, fault records, disturbance records and ancillary protection features.

Combined with the MiCOM P79x, a standalone metrosil and resistor unit, it provides simplified scheme engineering for single or three-phase differential applications.

Numerical Busbar Protection Relay Scheme (Centralized)

Easergy™ MiCOM P746 numerical busbar protection provides centralized complete protection for all voltages level up to extra high voltage busbar configurations.

Models available:

- MiCOM P746

Simple configuration for centralized architecture. The Easergy MiCOM P746 differential busbar protection provides a centralized one box or three boxes architecture and is very simple to use.

It does not need to be deeply engineered and supports easy operation and maintenance of the busbar.

P741 / P742 / P743 / P746

Numerical Busbar Protection Relay Scheme (Distributed)

The Easergy MiCOM P740 numerical busbar protection scheme provides scalable and complete protection for all voltage levels, from low to extra or ultra high-voltage busbar configurations.

Models available:

- MiCOM 741
- MiCOM 742
- MiCOM 743

Easergy MiCOM P740 is one of the fastest and complete in its class, providing secure and sensitive protection for all types of voltage busbar configurations. It is easily adapted to any configuration and can operate with different types of CT.

MiCOM Distance Applications

Easergy™ MiCOM P43x distance protection and One-Box devices

Applied for selective short circuit, ground fault and overload protection in all kinds of medium, high and extra-high voltage systems.

Easergy MiCOM P43x offers a comprehensive range of protection functions as standard with optional hardware and software features available to satisfy customer needs.

Easergy MiCOM P439 One-Box solution includes Bay Control up to 10 devices, including a library of more than 300 pre-engineered bay templates, to reduce engineering time.

Table 5.42: Easergy™ MiCOM P43x Models Available:

Easergy MiCOM P437	

Easergy MiCOM P44x - High Performance Relay Distance Protection

Easergy MiCOM P44x provides high speed and high performance distance protection for all overhead lines and cable applications and offers a comprehensive range of protection functions as standard.

Easergy MiCOM P44x is complemented by various serial and Ethernet communication protocols including IEC61850. Protection is further enhanced by the use of Programmable Scheme Logic within the device.

The range offers quadrilateral (polygon) or mho characteristics with a long history of high performance, load blinding areas, comprehensive range of teleprotection schemes, Power swing alarm and blocking and Multishot autoreclosure with check synchronism.

P521 / P532

MiCOM Line Differential Applications

MiCOM P521 - Feeder Differential Protection Relays

MiCOM P521 provides high speed, two ended current differential unit protection of overhead lines and underground cables in applications such as ring mains and parallel feeders.

Models available: MiCOM P521

MiCOM P521 relay provides fast, efficient current differential protection. It is very flexible and can be applied to a wide range of power systems. Offering a variety of communications interface options, MiCOM P521 provides valuable local and remote back-up protection

Easergy™ MiCOM P532 - Line Differential Protection and Bay Control Device

Easergy MiCOM P532 provides a two-ended line differential protection function with all of the necessary protection communication interfaces.

Easergy MiCOM P532 is an inexpensive line differential protection device that features optional control functions for rapid and selective short-circuit and overload protection of cables and power lines.

It provides a rapid three-stage differential protection system using a tripping characteristic with multiple knee points amongst the numerous supplementary functions. The optional control functions enable Easergy MiCOM P532 to control up to six switchgear units fitted to a bay panel, and to monitor their contact positions.

Easergy MiCOM P54x - Line Differential Protection Relays

Easergy MiCOM P54x is designed for high performance overhead line and cable applications, it interfaces readily with the longitudinal (end to end) communications channels and has optional distance backup protection.

Models available:

- MiCOM P541, P542, P543, P544, P545, P546

Easergy MiCOM P541-P546 series provides high-speed current differential unit protection. The P54x is designed for all overhead line and cable applications, as it interfaces readily with the longitudinal (end to end) communications channel between line terminals.

A full range of back-up protection is integrated. This enhances the dependability of the protection, as hot-standby elements (such as distance zones and overcurrent) can be brought into service whenever a signaling channel outage may occur.

MiCOM Railway Applications

Easergy™ MiCOM P138 - Overcurrent Protection Device for Rail Applications

The Easergy MiCOM 30 series rail devices are dedicated to railway catenary protection. The Easergy MiCOM P138 specifically provides directional overcurrent protection for rail applications

The Easergy MiCOM P138 enables a wide range of applications to protect supplies and catenaries in classic and autotransformer-fed (AT) systems. With easy connection to virtually all substation and catenary network management systems, it is enhanced by a complete range of backup protection and automation functions

Easergy MiCOM P638 - Transformer Protection Device for Rail Applications

Easergy MiCOM Px30 rail devices are dedicated to railway catenary protection. The Easergy MiCOM P638 provides transformer differential protection

Easergy MiCOM P638 enables a wide range of applications to protect supplies and catenaries in classic and autotransformer-fed (AT) systems. With easy connection to virtually all substation and catenary network management systems, Easergy MiCOM P638 is enhanced by a complete range of backup protection and automation functions

Easergy MiCOM P436 and P438 - Distance Protection Devices for Rail Applications

Easergy MiCOM 30 series rail devices are dedicated to railway catenary protection. The Easergy MiCOM P436 provides catenary protection for classic and two-phase AT feeders.

Easergy MiCOM P436 and Easergy MiCOM P438 enable a wide range of applications to protect supplies and catenaries in classic and autotransformer-fed (AT) systems. With easy connection to virtually all substation and catenary network management systems, the two models are enhanced by a complete range of backup protection and automation functions.

SAGE RTUs — Introduction

A variety of SAGE RTU models allow you to choose the right solution for your application. You can deploy the hardware that meets the requirements of each installation. Important distinctions such as physical size, physical I/O quantities, and communications port medium allow you to choose the RTU meeting each application's requirements — no more and no less. Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library. Each RTU uses the same CPU, firmware, and configuration files, which simplifies spare parts stocking and engineering effort, saving time and money.

Schneider Electric has many years of experience offering custom designed retrofit solutions that provide improved functionality over obsolete RTUs while minimizing the field installation and commissioning time required for the change out of equipment. Each retrofit RTU is specifically designed to make use of as much of the existing equipment as possible. Special interface cards are delivered to connect to the existing termination boards. Terminations are left in place, eliminating the need for field personnel to buzz-out field wiring. Retrofits for Westinghouse Redac, GE Getac, CDC 44-500, CDC 44-550, Harris 5000, L&G 8000/9000, and Tasnet are already available [1]

Features and Benefits

- Time Saving
- Easy Upgrade
- Scalable I/O
- Excellent Support
- Made in America
- Cyber-Secure
- Intuitive Configuration
- All Protocols & Apps Included
- Extensive Protocol Suite
- Math and Logic Apps
- Alarming & Annunciation
- SEL Relay Integration
- Grid Automation Apps
- Custom Retrofit Solutions
- Common CPU and Firmware

- First # indicates built-in capacity, second # indicates maximum expansion capacity
- All units have the same software functionality (Protocols, Applications, User Interface)
- SAGE 1450 Analogs are AC Input type and allow 3 Current and 3 Voltage Inputs. All other models represent milliamp transducer DC Analog Input
- SAGE 4400 has capacity for 128 SBO type Trip / Close pairs and up to 256 Digital Output Points, all on scalable XT Boards
- All Inputs and Outputs in this table are Hardware wired points. Does not include points from IED's.

[1] Visit our website at www.sage-rtu.com for more details.

SAGE 2400

SAGE 2400 RTU

In the SAGE RTU family, the SAGE 2400 RTU offers the most comprehensive physical I/O capabilities and versatile application. Designed for traditional RTU applications, it can accommodate hundreds of analog, digital, and control I/Os along with the easy configuration, protocols, and applications from all SAGE RTUs.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library. [2]

Applications

- Large Substation RTU
- Automation Controller
- Protocol Converter
- NERC CIP Cybersecure IED Gateway

Features Onboard

- Size: 12 x 15 Inches
- AMD LX-800 500 MHz CPU with 1 GB flash memory (Common to all SAGE RTU)
- 4x RS232 Serial Ports: Options up to 8 additional RS-232 Serial Ports [3] (12 total serial ports)
- 2x 10/100 Fast Ethernet: Optional 4 Port Switch Available [3]
- 10-33 VDC Power Input
- LEDs for visual indications of communications, digital ins & outs, and other functions
- -40 C to +85 C operating temperature range for reliability in the harshest environments.
- All field connections designed to pass:
 - ANSI C37.90-1979 (R1982)
 - ANSI C37.90.1-1989
 - IEEE 472-1974
- Removable I/O terminal blocks
- Full three-year warranty standard

Baseboard I/O

- 16 Digital Input / Accumulator Points
- 8 DC Analog Inputs (± 5 VDC, 0-5 VDC, ± 1 mA, 0-1 mA, 4-20 mA, 10-50 mA)
- 4x SBO or 8x DO Control points (Configurable)
- 2x Alarm Contact points

I/O Expansion Capabilities

- Up to 240 Digital Input Points (5 ms)
- Up to 232 DC Analog Input Points (Several Variances Available)
- Up to 128 SBO Trip Close Pairs / 256 Digital Output Points
- Up to 512 1ms SOE Digital Input Points [3]
- Up to 12 Analog Output Points [4]
- A combination of Special Function Bus Cards
 - ACI [4]
 - 1MS SOE [4]
 - Digital Output
- IRIG-B [3]
- GPS [3]

Same Firmware Capabilities in all SAGE RTUs

- Intuitive config@WEB Browser Based User Interface: No proprietary Software Required
- Extensive Protocol Suite included with every unit
- Configurable Math, Logic, and Automation Applications
- IEC 61131 Compliant IsaGRAF Programming Interface
- NERC CIP Cybersecurity
- Advanced Logging with Syslog Client
- Force Point Data
- SEL IED Management (AutoConfig, EVE File Storing, Config Change Management)
- Detailed Comm Diagnostics and Counters: PCAP, Protocol Captures
- Secure Ethernet Protocols
 - IPSec / IKE
 - HTTPS
 - SSL / SSH
 - SFTP
 - Embedded Firewall

[4] On Discontinued Cards

SAGE 3030

Designed for Substation Gateway applications, the SAGE 3030 Magnum can accommodate many vendor agnostic IED's via Serial and Ethernet communications. The SAGE 3030M RTU offers the most communications ports while allowing traditional hardwire I/O options from other SAGE models.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library. [5]

SAGE 4400

The SAGE 4400 combines the best features of the SAGE 3030M and the SAGE 2400. The 4400 is a rack mounted RTU with all the communications capabilities of the 3030M and the I/O flexibility of the SAGE 2400. The 4400 uses the same I/O cards as the other SAGE products for maximum retrofit capability and is designed for applications that require a significant capability for discrete I/O. It includes enough processor power for integration of many IED's as well as intelligent embedded applications and logic functions.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library. [5]

SAGE 1410

Smart and compact data concentrator / protocol converter / gateway solution.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library.

SAGE 1430

Compact status and control module with powerful IED integration capabilities.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library.

SAGE 1410 RTU

Applications

- Substation Data Concentrator
- Automation Controller
- Protocol Converter
- Flexible Communications Interfaces

Features

- Compact Footprint 8 x 5 x 2 (W x L x H) Inches
- 40° to +85° C Operating Temperature
- Two — Built-in 10/100 Mbps Ethernet® ports (independent IPs) : Optional four port Ethernet switch [7]
- Two RS232 w/LEDs for DCD, RX, RTS, CTS and TX (Expands to 10 [7])
- One RS485 w/LEDs for RX and TX (2 wire operation)
- One Fiber Optic communications w/LEDs for RX and TX
- AMD LX-800 500 MHz CPU with 1 GB flash memory (Common to all SAGE RTU)
- PC/104™ bus architecture for easy future upgrades
- Optional 125 VDC/20-60 VDC/120 VAC power supply
- Separate PPP port for serial dial-up
- Non-Windows® OS (VxWorks)
- Designed for Electric Utility applications
 - Meet IEEE 472, ANSI C37.90 SWC
 - Meet C37.90.1 standards
- Optional on board GPS Receiver
- Optional IIRIG-B Input/Output
- On board LEDs show operational status: Power / Full Comm Status indications
- Full three Year Warranty Standard
- Accepts 12-33VDC Input Power directly

Same Firmware Capabilities in all SAGE RTUs

- Intuitive config@WEB Browser Based User Interface. No proprietary Software Required
- [Extensive Protocol Suite included with every unit](#)
- Configurable Math, Logic, and Automation Applications
- IEC 61131 Compliant IsaGRAF Programming Interface
- NERC CIP Cybersecurity
- Advanced Logging with Syslog Client
- SEL IED Management (AutoConfig, EVE File Storing, Config Change Management)
- Force Point Data
- Detailed Comm Diagnostics and Counters
- PCAP, Protocol Captures
- Secure Ethernet Protocols
 - IPSec / IKE
 - HTTPS
 - SSL / SSH
 - SFTP
 - Embedded Firewall

SAGE 1430 RTU

Applications

- Feeder RTU with built in Status and Control
- Automation Controller
- Protocol Converter
- Flexible Communications Interfaces

Features

- Compact Footprint: 8 x 12.5 x 4 (W x L x H) Inches
- 40° to +85° C Operating Temperature
- 2 - Built-in 10/100 Mbps Ethernet® ports (independent IPs)
- Optional – 4 port Ethernet switch
- 2 RS232 w/LEDs for DCD, RX, RTS, CTS and TX (Expandable to 10)
- 2 RS485 w/LEDs for RX and TX (2 wire operation)
- Separate PPP port for serial dial-up
- AMD LX-800 500 MHz CPU with 1 GB flash memory (Common to all SAGE RTU)
- Non Windows® OS (VxWorks)
- PC/104™ bus architecture

Hardware I/O

- 16 Digital Inputs (Status/Accumulator/SOE)
- 4 T/C Momentary Controls (8 relays)
- Easy to connect removable Phoenix® type terminal blocks
- Designed for Electric Utility applications
 - Meet IEEE 472, ANSI C37.90 SWC
 - Meet C37.90.1 standards
- Optional on board GPS Receiver
- Optional IIRIG-B Input/Output
- Optional DC Analog Input Module
- On board LEDs show operational status (Power / Full Comm Status indications)
- Full 3 Year Warranty Standard
- Built-in 125 VDC/20-60 VDC/120 VAC power supply

Same Firmware Capabilities in all SAGE RTUs

- Intuitive config@WEB Browser Based User Interface. No proprietary Software Required
- [Extensive Protocol Suite included with every unit](#)
- Configurable Math, Logic, and Automation Applications
- IEC 61131 Compliant IsaGRAF Programming Interface
- NERC CIP Cybersecurity
- Advanced Logging with Syslog Client
- Force Point Data
- SEL IED Management (AutoConfig, EVE File Storing, Config Change Management)
- Detailed Comm Diagnostics and Counters
- PCAP, Protocol Captures
- Secure Ethernet Protocols
 - IPSec / IKE
 - HTTPS
 - SSL / SSH
 - SFTP
 - Embedded Firewall

SAGE 1450

SAGE 1450 RTU

A powerful pole-top distribution automation platform with all the functionality of a gateway. AC Input (ACI) option provides an advanced transducer-less AC analog input capability. The SAGE 1450 can be used for interfacing to conventional PTs and CTs as well as standard current/voltage linepost sensors such as the Square D LSCV Line Post Sensors or Lindsey CVM linepost sensors. These terminations include custom instrument-grade transformers, designed for high linearity and ultra low phase shift, which provide the high impedance inputs required for the linepost sensor resistor divider voltage outputs.

Each SAGE RTU provides the same browser-based user interface for easy configuration and setup. Each RTU offers IED integration, NERC CIP security, IEC 61131-based logic functions, communications protocols, and a custom applications library.

Applications

- Feeder RTU with built in AC Analog Inputs
- Automation Controller
- Protocol Converter
- Sectionalizer
- Cap Bank Controller

Features

- Compact Footprint: 11 x 11 x 4 Inches
- 40° to +85° C Operating Temperature
- Two Built-in independent Ethernet Ports
- Optional 4 Port Ethernet switch [8]
- Four Built-in serial ports (expands to 12 [8])
- Separate PPP port for serial dial-up
- AMD LX800 500 Mhz CPU w/ 1 GB Flash Memory
- Built-in Battery Charger w/low voltage disconnect
- On Board I/O with removable terminal blocks
 - 8 Digital Inputs (Sts/Accum/SOE)
 - 4 T/C Mom Pairs (8 relays - 2A@30VDC)
 - 6 Transducerless Als (3 current & 3 voltage)
 - 2 DC Analog Inputs (Input Voltage and Battery Voltage)
- On board LEDs show operational status
 - Power, status, control indications
 - Full Comm Status indications
- Accepts 9-33 VDC Input Power directly
- Optional 125 VDC/20-60 VDC/120 VAC on-board power supply
- Designed for Electric Utility applications
 - Meet IEEE 472, ANSI C37.90 SWC
 - Meet C37.90.1 standards
- Optional On-Board GPS Receiver [8]
- Optional IRIG-B Input/Output [8]
- Full 3 Year Warranty Standard

Same Firmware Capabilities in all SAGE RTUs

- Intuitive config@WEB Browser Based User Interface. No proprietary Software Required
- Extensive Protocol Suite included with every unit
- Configurable Math, Logic, and Automation Applications
- IEC 61131 Compliant IsaGRAF Programming Interface
- NERC CIP Cybersecurity
- Advanced Logging with Syslog Client
- SEL IED Management (AutoConfig, EVE File Storing, Config Change Management)
- Force Point Data
- Detailed Comm Diagnostics and Counters
- PCAP, Protocol Captures
- Secure Ethernet Protocols
 - IPSec / IKE
 - HTTPS
 - SSL / SSH
 - SFTP
 - Embedded Firewall

SAGE Sales and Support

New RTU Sales

Email:	USUtilityQuotes@schneider-electric.com
Tips:	Tips: Power Input Requirements, Hard wired I/O Requirements, Communications Ports Needed, Mounting, Other options needed will expedite the quotation process.

Spares and Upgrades

Phone:	(713) 920-6897
Email:	USUtilityQuotes@schneider-electric.com
Tips:	Having the Part Number from the Baseboard or CPU will help choose the right spare for your application.

Technical Support

Phone:	(713) 920-6832
Email:	sagertu_support@schneider-electric.com
Tips:	Generally a copy of the configuration, data traps, and the firmware version will help us diagnose any problems.

Repairs

Email:	USUtilityQuotes@schneider-electric.com
Tips:	Have the Tag numbers from the affected products, and the Serial Number. Remove known good parts to minimize any repair costs.

Easergy™ T300 RTUs — Introduction

The Easergy T300 is a single, powerful feeder RTU designed to prepare your business for the future. It helps you evolve with the grid, improve downtime tolerance, and manage increasing energy demand. It also helps you meet increased quality and performance requirements, optimize costs, and improve the efficiency of your electrical distribution network. Easergy T300 Remote Terminal Unit (RTU) is a modular platform of hardware and firmware, and an application building block for Medium Voltage and Low Voltage public distribution network management. It offers a single solution for control and monitoring from a simple pole-top device to a large MV/MV or MV/LV substation. [1]

Features and Benefits

- Reduce MV and LV outage durations (SAIDI)
- Centralized and decentralized MV and LV distribution network management: fault location, isolation, and service restoration
- Private network management (MV loops): Self-healing network management – Automatic Transfer Switch
- Volt/VAR optimization support for distributed generation integration
- MV and LV power and quality measurement according to standard EN 50160
- Synchronize voltage measurements on the feeder in order to facilitate distributed generation integration
- Asset management efficiency. Reduce CAPEX with a single, multi-application, modular offer
- Strong Cybersecurity Management

Table 5.51: Easergy T300 RTUs — Overview

HU250

Easergy HU250 Communication Gateway

Easergy™ HU250 is a powerful and flexible communication gateway for all Easergy T300 configurations. [2]

- Easergy HU250 can also be used as a standalone gateway for third-party IEDs
- Open to any communication system and protocol
- Compliant with cyber security standards
- Advanced configuration tools
- Open to IEC 61131 applications
- Web server for easy commissioning and maintenance
- Easy remote and local firmware updates
- Secure Wi-Fi connectivity

Table 5.53: Easergy HU250

Description	Catalog Number
Easergy HU250: head unit communication gateway with cyber security management	EMS59000

SC150

Easergy SC150 Medium Voltage Switch Controller

All advanced functions for MV line and switchgear management in a compact box. [2]

- Switchgear control and monitor
- Advanced fault detection
- Power measurement
- Power quality
- Sectionalizer automation
- Embedded operator HMI
- Automation systems
 - Automatic Transfer Source (ATS), self healing, etc., are hosted in HU250 and are designed in a IEC 61131-3 PLC workbench.
 - The sectionalizer automation (SEC) concerning one switchgear is managed by the SC150 module. This automation is factory predefined but configurable on site. This automation provides the autonomous ability to open the MV switch following detection of a number of fault currents.

Table 5.54: Easergy SC150

Description	Catalog Number
SC150 Medium Voltage Switch Controller CT-LPVT/VT, 1/5 A - LPVT/VT sensors	EMS59201
SC150 Medium Voltage Switch Controller CT-CAPA, 1/5 A - VPIS/VDS/PPACS sensors	EMS59202

LV150

Easergy LV150 Low Voltage Transformer Monitor

The Easergy LV150 is an unmatched low voltage monitoring module designed for the public MV/LV substation. It combines accurate 3-phase energy and power measurements with data logging, power quality analysis, alarming and temperature capabilities not typically available in such a compact RTU. The Easergy LV150 is compliant with stringent international standards that enhance its metering accuracy and power quality measurements, as specified by the safety standard requirement for the MV/LV substation. Easergy LV150 gives you the energy intelligence and control needed to track performance, stay informed in real time of critical conditions and empower you to make strategic decisions. It will help you increase reliability, maximize the use of resources and improve service. [2]

Applications

- Transformer temperature monitoring
- LV incomer power monitoring
- LV incomer power quality monitoring
- LV network voltage fault detection (loss of neutral at transformer level)

Table 5.55: Easergy LV150

Description	Catalog Number
Low Voltage Transformer Monitor	EMS59300

[2] Refer to catalog (document number NRJED314621EN) or the Easergy T300 product range for more information.

Easergy PS50 and PS25 Backup Power Supplies

The Easergy T300 PS50 and PS25 backup power supplies are designed for long power supply interruption and to maintain control and monitoring of the entire MV substation during outages. Designed to supply all components in the substation including switchgear mechanics and motors. The Easergy PS50 is ideal for isolated sites that are regularly struck by lightning. [3]

- 10 kV insulation and 20 kV surge
- Protected against neutral cutout
- High temperature range: -40° C to 70° C and easy maintenance
- Only a unique battery (PS50 and PS25-12) for easy maintenance and robust lifespan (> 10 years)
- Battery end-of-life monitoring for preventive maintenance

Applications

- Designed for severe environments with a high level of insulation
- Designed for very long outage times
- Easy maintenance with only one battery

Table 5.56: Easergy T300 PS50 and PS25 Backup Power Supplies

Description	Catalog Numbers
Easergy PS25-12V: Power supply and battery charger single 12V 48W output	EMS58585

Easergy PS50-24V: Power supply and battery charger 12V and 24V outputs	EMS58587
Easergy PS50-48V: Power supply and battery charger 12V and 48V outputs	EMS58588

[3] Refer to catalog (document number NRJED314621EN) or the Easergy T300 product range for more information.

Easergy P Series — Introduction

Easergy protective relays are a complete range of devices for medium voltage applications, including feeder, motor, transformer, line, and generator protection. Built on more than 100 years of experience in medium-voltage protection relays with MiCOM, SEPAM, and Vamp, the new Easergy protective relays have been designed to meet the most demanding needs for electrical protection, connectivity, and safety, while taking a step forward in efficiency.

The Easergy P3 Range

Features and Benefits

- Simplified configuration with the new eSetup Easergy Pro setting tool
- Faster delivery with on-the-shelf availability of standard configurations
- Simpler operation and maintenance with the Schneider Electric Power Device App
- Native support for a wide range of communication protocols: IEC 61850, Modbus TCP/IP, Modbus RTU, DNP 3.0, SPA-bus, IEC 60870-5-101, IEC 60870-5-103, ProfibusDP, and DeviceNet
- Embedded arc protection
- Built-in virtual injection testing
- Compliant with international standards

Refer to catalog [NRJCAT17764EN](#) for the Easergy P3 Series.

Externally Mounted Surge Protective Devices
SurgeLogic™ Type EMA

EMA Series SPDs

Remote Monitor

SurgeLogic™ Type EMA series SPDs offer a full range of externally mounted surge suppression solutions. These units are designed to provide surge suppression from service entrance panels to point-of-use equipment. US and Canadian UL® Listed to the UL 1449 standard. Complies with requirements of NEC® Article 285 and CSA 22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

- 10 year product warranty
- 10 modes of protection
- 200 kA SCCR
- EMI/RFI filtering
- Audible alarm with enable/disable switch, dry contacts and surge counter standard
- Indicator LEDs; normal (green) and fault condition (red) for each phase
- UL 1449 Type 1 to be used in both Type 1 and Type 2 applications

- **Standard.** UL 1449 Type 1 SPDs can be located at any point in the electrical system, on the line or load side of the equipment overcurrent device.
- **Remote Monitor.** This option displays the alarm status of the surge protective device up to 1000 feet from the unit.

EMA SPD products feature a design based on replaceable modules for a flexible, cost effective way to achieve superior surge suppression at every level of the electrical distribution system. Modularity results in lower life cycle costs and fast, easy service or replacement.

SurgeLogic™ Type EMA Series SPD

EMA SPD Options:

- **Enhanced Filtering Module.** Sine wave tracking circuitry provides enhanced EMI/RFI filtering of -54 dB at 100 kHz and establishes the power surge clamping window relative to the sine wave voltage to increase performance at distribution and branch panel applications.
- **Disconnect Switch.** The integral switch provides a mechanical means to electrically isolate the entire surge suppressor before opening the enclosure door to facilitate servicing of the unit's components.

External Modular Options ()

(D) [1]	Disconnect Switch
(F)	Enhanced Filtering Module (not applicable for Delta, HRG or HLD)
(DF) [1]	Disconnect Switch and Enhanced Filtering Module (not applicable for Delta, HRG or HLD)

Accessory Description	Cat. No.

New!
SurgeLogic™ Type XDSE Surge Protective Devices

XDSE Series

SurgeLogic™ XDSE surge protective devices feature a compact design that allows surge suppression to be externally installed adjacent to electrical distribution equipment. XDSE systems are designed to provide high-quality surge suppression for a wide variety of commercial, industrial or institutional applications. XDSEs incorporate patented overvoltage technology innovations that provide superior overvoltage withstand capability for systems with unstable power, without compromising transient clamping performance. US and Canadian UL Listed to the UL 1449 standard. Complies with requirements of NEC Article 285 and CSA 22.2 269.1 and 269.2 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems

- LED light indicates operation status
- Short circuit current rating up to 200 kA
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Convenient lug connection inside enclosure
- -50db EMI/RFI filtering
- Audible alarm
- Dry contacts
- Optional flush mount kit: XDSEMKF

() For a Type 1 SPD, add a "1" suffix to the catalog number.

SDSA1175, SDSA 3-Phase, and Model 420 Surge Protective Devices

SurgeLogic™ SDSA1175 surge protective devices are designed and listed for indoor or outdoor installation and surge suppression for single-phase three-wire 120/240 Vac or two-wire 120 Vac 60 Hz electrical services. This product is ideal for panel builders as well as manufacturers and integrators of instrumentation cabinets for industrial and commercial applications for single-phase power systems. Two SDSA1175 surge protection devices can be installed to provide suppression for 208Y/120 Vac three-phase four-wire services.

SurgeLogic™ SDSA 3-Phase surge protective devices are designed and listed for indoor or outdoor installation and surge suppression for three-phase electrical services up to 600 Vac. The SDSA 3-Phase series is used extensively in service entrance panels to provide an efficient and economical means of surge suppression and also ideal for point of use applications for that added level of protection.

US and Canadian UL® Listed as Type 1 SPD to the UL 1449 standard. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- LED indicates operational status
- Short circuit current rating 25 kA (SDSA1175), 200 kA (SDSA 3-Phase)
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Convenient back-nipple mounting
- Optional mounting bracket QOSAMK (for SDSA1175 / SDSA1175T)

[12] 600 V Delta series also applies to the following voltages 600Y/347V HRG.

[13] 208Y/120 series also applies to the following voltage 220Y/127.

[14] HLD= High-leg delta.

[15] 480Y/277 series also applies to the following voltages 380Y/220, 400Y/230, and 415Y/240.

[16] 480V Delta series also applies to the following voltage 480Y/277V HRG.

MA Replacement Module

SurgeLogic™ MA Replacement Modules

All module assemblies are US and Canadian UL® Recognized to UL 1449 standards. Complies with requirements of NEC® Article 285 and CSA C22.2 No. 8-M1986 as appropriate.

Table 6.4: MA Replacement Modules

System Voltage	Peak Surge Current Rating (kA)	Catalog Numbers [17]

Internally Mounted Surge Protective Devices

SurgeLogic™ Type IMA

Internally mounted surge protective devices are installed integrally to systems for service entrance and branch panel surge suppression. Internally mounted SPDs installed next to the supply bus provide maximum performance inside Square D™ systems. Built-in performance is the best way to ensure cost effective power quality and continuous operation (especially important for critical power facilities).

US and Canadian UL® Recognized as a Type 2 (or 1 with optional suffix in catalog number) SPD Component Assembly to UL 1449 and UL 1283 standards. Complies with requirements of NEC® Article 285 and CSA C22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

Internally Mounted—New Construction / Factory Assembled

Factory installed integral/internal SurgeLogic™ SPD products make adding surge suppression to new construction projects easy. Refer to the sections listed below to identify the correct product for your application or contact SurgeLogic™ TAG at 1-800-577-7353 for assistance.

[17] For UL 1449 Type 1 Modules, add suffix (1). Example: MA11MA121
 [18] 208Y/120 series also applies to the following voltage 220Y/127.
 [19] High-leg delta (Phase B modules are different than Phase A and Phase C modules).
 [20] 480Y/277 series applies to the following voltages 380Y/220, 400Y/230, and 415Y/240.
 [21] 480 V Delta series also applies to the following voltage 480Y/277V HRG.
 [22] 600 V Delta series also applies to the following voltage 600Y/347V HRG.

I-Line™ SurgeLogic™
SPD Unit

Internally Mounted—Field Installable

To ensure high-performance surge suppression at critical power locations, a variety of SurgeLogic™ products have been designed specifically for retrofitting into commonly used Square D™ systems. The I-Line plug-on units and the SurgeLoc for the NQ panelboards come ready to install. Retrofitting SPD units into I-Line, and NQ Panelboard applications is simple.

- Audible alarm with enable/disable switch, dry contacts and surge counter standard
- 200 kA SCCR
- Indicator LEDs
- EMI/RFI filtering

Table 6.5: Internally Mounted—Retrofit / Ready To Install

Voltage	Surge Current Rating	I-Line Branch Units [1]	
		Cat. No.	Cat. No.

	240 kA	—	HR8IMA24C()
600V, 3-phase, 3-wire + ground, [6] Delta	120 kA	—	—
	160 kA	—	—
	180 kA	—	—

[1] Requires 13.5-inch mounting height. HL circuit breakers are 125kAIC SCCR (240 V and below), 100kAIC SCCR (480 V), 50kAIC SCCR (600 V)

[2] Can be used on 4-wire or 3-wire grounded wye systems with or without neutral.

[3] 208Y/120 series also applies to the following voltage 220Y/127.

[4] 480Y/277 series applies to the following voltages 380Y/220, 400Y/230, and 415Y/240. HR circuit breakers are 200kAIC SCCR (480 V and below), 100kAIC SCCR (600 V)

[5] 480 V Delta series also applies to the following voltage: 480Y/277V HRG.

[6] 600 V Delta series also applies to the following voltage: 600Y/347V HRG.

SurgeLogic™ SurgeLoc

SurgeLogic™ SurgeLoc for NQ Panelboards

SurgeLogic™ SurgeLoc is the industry's first Field Installable Internally Mounted SPD in NQ panelboards - fully installed in approximately 2 minutes. SurgeLogic (TM) SurgeLoc can be ordered as factory assembled in NQ Panelboards or can be ordered from your local Schneider Electric distributor for retrofit opportunities for NQ panelboards.

US and Canadian UL® Recognized to UL 1449 and UL 1283 standards. Complies with requirements of NEC® Article 285 and CSA 22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

- Retrofit into existing NQ Panelboards
- 10 year product warranty
- 10 modes of protection
- 200 kA SCCR
- Audible alarm with enable/disable switch, dry contacts and surge counter standard
- Indicator LEDs; normal (green) and fault condition (red) for each phase

Table 6.6: Internally Mounted—Retrofit / Ready to Install

Voltage	Surge Current Rating	NQ Panelboard Units—SurgLoc [7]
		Cat. No.
120/240 V, 1-phase, 3-wire + ground	80 kA	SSP01SBA08D
	100 kA	SSP01SBA10D
	120 kA	SSP01SBA12D
	160 kA	SSP01SBA16D
	200 kA	SSP01SBA20D
	240 kA	SSP01SBA24D
208Y/120 V, 3-phase, 4-wire + ground [8] [9] Wye	80 kA	SSP02SBA08D
	100 kA	SSP02SBA10D
	120 kA	SSP02SBA12D
	160 kA	SSP02SBA16D
	200 kA	SSP02SBA20D
	240 kA	SSP02SBA24D
240Y/120 V, 3-phase, 4-wire + ground High-leg Delta	240 kA	SSP03SBA24D

[7] Requires 12 circuit positions (6 adjacent mounting spaces per side).

[8] Can be used on 4-wire or 3-wire grounded neutral system.

[9] 208/120 series also applies to the following voltage 220Y/127.

OEM Kit

OEM/Assembler Kits

SurgeLogic™ OEM/assembler kits allow manufacturers to add industry-leading surge suppression directly to customized equipment. Manufacturers benefit from shorter wire lengths that optimize the clamping voltage of the SPD. Products come with a backplane-mounted SPD, mounting hardware and diagnostic display with 36-inch cables. Audible alarm, silence switch, remote monitoring contacts, and surge counter are standard. Available as UL 1449 Type 2 (or 1 with optional suffix in catalog number).

US and Canadian UL® Recognized to UL 1449 and UL 1283 standards. Complies with requirements of NEC® Article 285 and CSA 22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

Table 6.7: OEM/Assembler Kits

Service Voltage	Peak Surge Current Rating per Phase (kA)	Cat. No. [10]
120/240 V, 1-phase, 3-wire + ground	120	TVS11MA120()

	180	TVS91MA180()

() For a Type 1 SPD, add a "1" suffix to the catalog number.

Surgebreaker Plus Whole House Surge Protective Device

The Surgebreaker Plus Whole House device is designed to deliver surge suppression that addresses the entire home. AC modules are connected to the circuit breaker load center and provide suppression for all equipment connected to the power system. This Whole House system incorporates AC modules as well as modules for other metallic lines coming into the home including telephone/DSL and coaxial video/data.

US and Canadian UL® Listed as Type 2 SPD to the UL 1449 standard. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate. Telephone and coaxial video modules US and Canadian UL® Recognized to UL 497A 4th Edition and UL 497B 4th Edition.

- 120/240 Vac, 80 kA/phase AC surge suppression
- LED status indicators for AC surge suppression
- Telephone surge suppression module supports one RJ45 cable up to four lines.
- Coaxial surge suppression module supports one line of video/data
- Network suppression module supports one RJ45 modem/fax/DSL

SDSB80111

Table 6.8: Whole House Surge Protective Devices

Description	Included Modules	Cat. No.
Whole House NEMA 1	AC, Telephone, Coax, Network	SDSB80111

Table 6.9: SDSB80111 Replacement Modules

Description	Cat. No.
Telephone Suppression Module	PTL2R
Video Suppression Module	PVR
Network Suppression Module	PNETR6
Home Electronics Protective Device	HEPD80

[10] Note the last character of the catalog number is the letter "O", not a zero.

[11] Can be used on 4-wire or 3-wire grounded wye systems with or without neutral.

[12] 208Y/120 series also applies to the following voltage 220Y/127.

[13] 480Y/277 series applies to the following voltages 380Y/220, 400Y/230, and 415Y/240.

[14] 480 V Delta series also applies to the following voltage: 480Y/277V HRG.

[15] 600 V Delta series also applies to the following voltage: 600Y/347V HRG.

Whole Home Surge Protection

HEPD Whole House devices are designed to deliver superior AC surge protection for the entire AC power system in a home. HEPDs are compact in size and are designed to protect AC wires in the home from surges that could affect home electronics and appliances not connected to surge strips.

cULus Listed to the latest UL 1449 standard, UL Type 1 SPD, CSA C22.2 No. *-M1986, C233.1-87.

- 120/240 Vac
- Max surge current ratings available: 50 and 80 kA
- NEMA 4X rate for indoor or outdoor applications
- LED status indicators
- Compatible with all brands of load centers
- Flush Mount Kit sold separately - see table below
- HEPD25: 3 year/\$30,000 connected equipment warranty
- HEPD50: 3 year/\$50,000 connected equipment warranty
- HEPD80: 5 year/\$75,000 connected equipment warranty

Plug on Neutral QO™ and Homeline™ Load Center SPDs

Plug-on Neutral QO™ and HomeLine™ Load Center Surge Protective Devices

The industry's first exclusive Plug on Neutral (PoN) Surge Protective Device (SPD). Square D™ load center PoN SPDs are a simple and quick installation. It's as easy as snap, click, done! PoN SPDs are easier to install than a standard circuit breaker. No wires are needed for installation. The PoN SPD simply plugs on to the bus and neutral bar. The surge suppressors use two-pole spaces in a QO™ or HomeLine™ load center.

US and Canadian UL® Listed as Type 2 SPD to the UL 1449 standard. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- Industry First: No wires or tools required for installation
- Installation Flexibility: Works on Plug-on Neutral design QO or HOM loadcenters using two-pole spaces
- Whole House Protection: 50 kA surge current capacity per phase
- LED indicates operational status
- Peace of mind: 5 year/ \$50,000 connected equipment warranty

Table 6.11: QO™, NQ, and HomeLine™ Load Center Surge Protective Device

Description	Cat. No.
Plug on Neutral QO™ Surgebreaker	QO250PSPD

UPS

Battery String

Modular Battery Cabinet

The **Square D Easy UPS 3S** is an easy-to-install, easy-to-use and easy-to-service **10-40 kVA** 3-phase 208 V UPS ideal for non-IT applications. Easy UPS 3S combines power stability with robust electrical specifications and long-lasting performance to ensure your business continuity.

- **US listed to the UL 1778 standard**
- **Complies with the requirements of CSA C22.2 No. 107.3-14 + G11**
- **IP20 rated**
- **Optimize efficiency**
 - Double Conversion Mode (up to 94%)
 - ECO Mode (98% efficiency)
- **1.0 power factor kVA = kW**
- **Parallel up to 4 units for 10-30 kVA. Parallel 3 units for 40 kVA.**
- **Robustness against harsh environment**
 - Conformal coating on PCBA
 - Replaceable dust filter
 - 60s @ 150% overload, 10 min. @ 125% overload.
 - Operating temperature: 32 - 104°F
- **Flexibility for wider application**
 - Modular battery cabinet for longer runtime
 - SNMP / Modbus TCP/IP / dry contact for connectivity
 - 5 years lifespan battery module
- **Connectivity**
 - Startup service included with every UPS
 - EcoStruxure™ ready
 - Network management card to remotely monitor and control

Please Note: Batteries are not included with the UPS. Use the selection tables below to determine number of batteries.

Using the selection table, choose what percentage of the total kVA will be backed up. Then, choose the runtime.

Example: A 20 kVA UPS backing up 75% of its kVA for a runtime of 1 hour will require (1) **E3SUPS20KFBS**, (1) **E3SXR7**, and (12) **E3SFBTH2**. Then, choose accessories if needed.

The maximum number of battery strings that can be installed in a modular battery cabinet (E3SXR7) is 12.

Square D Easy UPS 3S is configurable in SE Advantage. Access via MySE homepage.

[17] 2P 150–200 A requires 4P width.

[18] HOMT tandem is 30 A maximum. HOMT quad tandem has 20 A maximum on outside poles, and 50 A maximum on the inside poles.

[19] See the Supplemental Digest, Section 3 for 3Ø corner grounded systems.

[20] See the Supplemental Digest Section 10 for circuit breakers with IEC ratings.

[21] HACR on HOM 1P 15–50 A and 2P 15–100 A.

[22] Factory-installed option only.

[23] Handle padlock attachment available for HOMT quad tandem only.

NOTE: All circuit breakers on this chart are UL Listed and CSA Certified unless otherwise noted.

[33] 2P in a 3P module.

[34] 70–250 A with electronic trip system

[35] Not available with electronic trip units

[36] 1P Available at 125 Vdc

[37] Dual UL and IEC ratings and CE markings on circuit breakers. For additional IEC ratings, see the Supplemental Digest, Section 10.

[38] Not available in HD and HG 2P rating (2P module).

[39] 3P only.

[40] Not UL Listed due to wire bending space.

QO Standard Plug-On Circuit Breakers

Square D brand QO miniature circuit breakers are plug-on products for use in QO load centers, NQOD and NQ panelboards, NQOD and NQ OEM interiors or Speed-D™ switchboard distribution panels. Bolt-on QOB circuit breakers are for use in NQOD and NQ panelboards or interiors. [1]

The Square D exclusive Qwik-Open™ mechanism, with a trip reaction within 1/60th of a second, is standard on all 1P 15 and 20 A QO circuit breakers.

Refer to [page 7-2](#) for Interrupting Ratings, Accessories, and Dimensions.

- [1] See Digest Section 1 for load centers, and Section 9 for panelboards and interiors.
 [2] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–125 A circuit breakers are suitable for use with 75°C conductors.
 [3] UL Listed 5 k AIR on corner grounded Delta systems.
 [4] UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.
 [5] UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.
 [6] Requires four spaces (1 AWG–300 kcmil Al/Cu.) Suitable for switching 120 Vac fluorescent lighting loads.
 [7] Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.
 [8] UL Listed for use ahead of QO, QO-GFI, QO-EPD, QOT, QO-AFI, and QO-PL 10 k AIR circuit breakers to permit their application at 22 kA fault level.
 [9] 100 A maximum branch mounted opposite.
 [10] Order only. Contact your local Field Office.

QOT and QO Tandem Circuit Breakers

QOT tandem circuit breakers have a mounting cam as shown. Installation into a QO load center can only be made in those positions having a mounting pan rail slot. Meets Paragraph 408.54 of the NEC®. UL Listed as Class CTL.

Table 7.5: QOT Tandem Circuit Breakers (CTL)—Not Compatible with Plug-on Neutral Systems

QO Ground-Fault Circuit Breakers (GFI)

Qwik-GardTM circuit breakers provide overload and short circuit protection, combined with Class A ground fault protection. Class A denotes a ground fault circuit interrupter that will trip when a fault current to ground is 6 mA or more, for people protection. Do not connect to more than 250 feet of load conductor for the total one-way run to prevent nuisance tripping.

QO-EPD/EPE Circuit Breakers

QO-EPD/EPE circuit breakers provide overload and short circuit protection combined with Class B ground fault protection. They are designed to provide ground fault protection of equipment at a 30 mA level (EPD) or 100 mA level (EPE). They are not designed to protect people from electrical shock.

QO Key Operated Circuit Breakers (QO-K)

Key operated QO circuit breakers are available in single-pole construction and can be mounted in any single-pole space which will accept a standard QO circuit breaker. These circuit breakers can be turned ON or OFF or to RESET with a special key (catalog number QOK10) included with the circuit breaker. These circuit breakers are UL Listed and available as shown in the table.

Factory-Installed Accessories for QO and QOB Miniature Circuit Breakers

Factory-installed electrical accessories take up an additional pole space on QO, QO-GFI, QO-EPD, QO-SWN and QOU circuit breakers. All AC electrical accessories shown below are rated for 50/60 Hz. Accessories are not available for QOB-VH (2P 150 A and 3P 110–150 A) circuit breakers or QO, QOU molded case switches. QO circuit breakers will accept only one accessory per circuit breaker. Undervoltage trip is not available on

[26] Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

miniature circuit breakers. Factory-installed accessories are not available for QO-AFI or QO-CAFI Arc Fault Circuit Breakers, QO-CAFI, QO-DF, or QO-PDF circuit breakers, or on QO2150, QO2175, or QO2200 circuit breakers.

Low Ampere QOU

Low Ampere QOU Miniature Circuit Breakers

QOU unit mount miniature circuit breakers (cable-in/cable-out) are ideal for OEM applications. They have the Square D™ circuit breaker's unique Visi-Trip™ feature and can be DIN rail-mounted or surface- or flush-mounted using mounting feet. Mounting feet not provided [28].

General Specifications Common to All Low Ampere QOU Circuit Breakers

- For convenient flush mount, surface mount or DIN mount (symmetrical rail 35 x 7.5 DIN/EN 50 022)
- Single handle with internal common trip
- Terminal lug wire size (1) 14–2 AWG Cu or Al
- Reversible line and load lugs
- Field-installable quick connectors
- UL Listed 48 Vdc (5 k AIR)
- UL Listed as HACR Type: 10–70 A
- High magnetic trip circuit breakers (QOU-HM) are recommended for applications where high initial inrush may occur and for individual dimmer applications.
- For DIN mounting rails, see IEC Starters and Relays, Section 18.

High Ampere QOU Circuit Breakers
General Specifications Common to All High Ampere QOU Circuit Breakers

High Ampere QOU

- Flush mount, surface mount, and DIN rail mount.
- Internal common trip.
- Non-reversible line and load lugs.
- Terminal lug wire size (1) 12– 2/0 AWG Cu or Al.
- UL Listed 60 Vdc per pole (5 k AIR). (**Note:** except switches)
- UL Listed as HACR type, 80–125 A.
- Non-automatic switches have the same physical packaging as miniature circuit breakers, but provide no overcurrent or short circuit protection. They are UL Listed per UL1087 and are CSA certified.

Packaged with circuit breaker		Suffix -3100
Individually packaged	1	QOUMFS1
Bulk packed	80	QOUMFS1B ^{OBS}
Mechanical interlock attachment: Used to interlock two circuit breakers mounted side-by-side so that only one circuit breaker can be ON at a time. A 1P or 2P circuit breaker can be mounted on the left and interlocked with a 2P or 3P circuit breaker on the right.	1	QOU2DTILA [31]

^{OBS} This product is obsolete.

QOUQ Low Ampere Circuit Breakers

QOUQ low ampere circuit breakers with four-point quick-connect terminals are provided with permanent factory-installed terminals which are affixed to the Load or OFF end of the circuit breaker. This special terminal will accommodate up to four 1/4-inch insulated female quick connect wire terminations. Total ampacity of these connections must not exceed the rating of the circuit breaker.

Table 7.27: QOUQ Four-Point Quick-Connect Terminals

	Poles	Order Qty.	Cat. No.
Four-Point Quick-Connect Terminals	1	1	Change QOU to QOUQ
	2	1	
	3	1	

The QOU uses the same electrical accessories as the QO. See the QO information for available electrical accessories.

[30] For use on low and high ampere QOU.
[31] 10–70 A 1P and 2P, 10–60 A 3P.

HomeLine Standard Plug-On Circuit Breakers

The Square D HomeLine circuit breakers are in a 1 in. wide format for 1-pole circuit breakers. They are designed to plug into HomeLine load centers.

[1] UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.

[2] UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[3] Requires four spaces (1 AWG–300 kcmil Al/Cu). Use only in 1Ø panel rated 150 A or greater.

[4] For 120/240 V only, not for 208Y/120 V.

Accessories for HomeLine Circuit Breakers

Table 7.38: Accessories for Use with HomeLine Circuit Breakers

Description	Cat. No.
Handle Attachments	
Handle Tie: Converts any two adjacent 120/240 Vac single HOM circuit breakers to independent trip 2P	HOM1HT
Handle Tie: Converts any two adjacent 120/240 Vac 1P side-by-side HOMT circuit breakers to independent trip 2P	HOMTHT
Handle Clamp: Clamp for holding HOM 1P handle in the ON or OFF position	QO1LO
Handle Blocking Device: Attaches to standard HOM 2P circuit breakers for holding the handle in the OFF position	HOM2HBD
Handle Padlock Attachment: For padlocking 1P Standard HOM breakers in the ON or OFF position	HOM1PA
Handle Padlock Attachment: For padlocking 2P Standard HOM circuit breakers in ON or OFF position	15–70 A HOM2PALA
	80–125 A HOM2PAHA
	150–200 A HOM2PAVHA
Handle Padlock Attachment: For padlocking 1P CAFI, DF, GFI, and EPD HOM breakers in ON or OFF position	HOMLEC1PA
Handle Padlock Attachment: For padlocking 2P CAFI, GFI, and EPD HOM breakers in ON or OFF position	HOMLEC2PALA
Handle Padlock Attachment: For padlocking center poles of HomeLine Quad breakers in the OFF position	HOMQPA
Handle Padlock Attachment: For padlocking main circuit breakers in convertible load center in OFF position	50–125 A QOM1PA [10]
	100–225 A QOM2PA [10]
Sub-Feed Lugs	
125 A 2P plug-on—2 spaces required	HOML2125
225 A 2P plug-on—4 spaces required	HOML2225 [11]

[8] 15–20 A tandem or quad tandem circuit breakers are suitable for use with 60°C or 75°C conductors. 25–50 A tandem or quad tandem circuit breakers are suitable for use with 75°C conductors only.

[9] 15–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 40–125 A circuit breakers are suitable for use with 75°C conductors.

[10] 50–125 A QOM1 frame size; 100–225 A QOM2 frame size.

[11] Requires four spaces (1 AWG–300 kcmil Al/Cu). Use only in 1Ø panel rated 150 A or greater.

Multi 9 C60_{BP} and C60_{BPR} Miniature Circuit Breakers

C60_{BP} and C60_{BPR} are multi-standard miniature circuit breakers and branch circuit protection as defined by UL489. They combine the following functions:

- circuit protection against short-circuit curves
- circuit protection against overload currents
- tripping and fault indication by the addition of auxiliary accessories

Multi 9 GFP Ground Fault Protectors

UL 1053 residual current circuit breakers already protected upstream by a short circuit and overload protection device are used for:

- control and disconnection of electric circuits
- protection of people against electric shock by direct and indirect contacts
- protection of installations against insulation faults
- enhanced continuity of supply, during a series of close lightning strokes, IT earthing system, equipment including interference suppression filters, variable speed controllers, frequency converters, electronic ballasts for lighting
- enhanced earth leakage protection: in presence of harmonics or high frequency ejections.

A-SI type GFPs are ideal for operation in environments with a humid atmosphere and/or polluted by aggressive agents: swimming pools, marinas, agri-food industries, water treatment stations, industrial sites, etc.

[1] Left-side mounted padlocking device cannot be used in conjunction with accessories SD, OF, MX or MN. Use right-side mounted padlocking device when accessories are required.
[2] Right-side mounted padlocking device cannot be used in conjunction with VIGI module. Use left-side mounted padlocking device when VIGI Module is required.

The PowerPacT Advantage

- **Proven Performance:** Industry-leading circuit breaker innovation and protection for heavy-duty commercial and industrial applications.
- **Smart:** Integrated metering options provide a cost-effective solution to reduce energy consumption, optimize energy costs, and improve energy availability for your facilities.
- **Flexible:** Full range of thermal-magnetic and electronic trip molded case circuit breakers from 15 to 3000 A, delivering the ratings, configurations, and operators for your unique applications.
- **Simple:** Common catalog numbers, standardized ratings, and a full range of field-installable accessories make product selection, installation and maintenance easier than ever.
- **Common Design Features:** Mounting holes, door trim, and handle accessories

[1] B-frame K interrupting rating is 100 kA at 240 Vac

[2] P-frame K interrupting is 50 kA at 480 and 600 Vac.

[3] P-frame L interrupting is 25 kA at 600 Vac.

[4] For amperage of M-, P- or R-frame circuit breakers, add a zero to the three amperage digits; for example, 120 = 1200 A.

B-Frame Thermal-Magnetic Trip Unit

With EverLink Lug Technology

PowerPacT B-Frame Molded Case Circuit Breakers (125 A)

PowerPacT B-frame circuit breakers provides economical thermal-magnetic circuit protection in a compact size.

- Fixed 15-125 A thermal-magnetic protection up to 600Y/347 Vac and 250 Vdc
- 1- to 4-pole unit mount construction; 1- to 3-pole I-Line construction
- UL listed interrupting ratings from 18 kA to 65 kA at 480 Vac
- EverLink lugs, a cable connection method that helps maintain low resistance connections
- UL, CSA, NOM, IEC, CCC certified and CE marked for global acceptance

Table 7.50: B-Frame Termination Options

Termination Letter and Description	Example
A I-Line (See Section 9, Panelboards)	B D L 3 6 1 0 0 For factory-installed termination, place termination letter in the third block of the circuit breaker catalog number. In this example "L" indicates EverLink Lugs for both ON and OFF ends.
F No Lugs (includes terminal nut kit on both ends)	
L ON end: EverLink Lugs OFF end: EverLink Lugs	
M ON end: EverLink Lugs OFF end: Terminal Nut Kit	
P ON end: Terminal Nut Kit OFF end: EverLink Lugs	

Table 7.52: B-Frame Lug Options

Lug Option Suffix	
No Suffix = EverLink Lugs both ends	B D L 3 6 1 0 0 L U
LU = EverLink Lug with Control Wire Terminal ON end; EverLink Lug OFF end	For factory-installed lug option, place suffix after the amperage in the circuit breaker catalog number.
LV = EverLink Lug ON end; EverLink Lug with Control Wire Terminal OFF end	
LW = EverLink Lug with Control Wire Terminal both ends	
LC = Copper Mechanical Lugs both ends	
LH = Aluminum Mechanical Lugs both ends

PowerPacT H- and J-Frame Molded-Case Circuit Breakers (150 A and 250 A)

A flexible, high performance offer certified to global standards.

- Thermal magnetic or MicroLogicTM trip protection from 15–250 A up to 600 Vac and 250 Vdc
- 2 and 3-pole unit mount and I-Line constructions^[5]
- High performance UL listed interrupting ratings from 18 to 200 kA at 480 Vac
- H- and J-Frame have common mounting holes, handle locations and trim dimensions with many shared accessories and auxiliaries.
- UL, CSA, NOM, IEC, CCC certified and CE marked for global acceptance.

JJ, JL and JR are UL certified as current limiting circuit breakers.

[7] Circuit breakers with J and L interrupting ratings are UL certified as current limiting.

[8] Standard lug kit: AL150HD. Terminal wire range: 14–3/0 AWG Al or Cu.

[9] See Supplemental Digest Section 3 for circuit breakers with field interchangeable trip units.

[10] HD and HG circuit breakers are true two-pole construction.

[11] Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.

[12] 2P in a 3P module

Accessories see page 7-51
Optional Lugs see page 7-56
Dimensions see page 7-86
Enclosures see page 7-87

[13] Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.

[14] See Supplemental Digest Section 3 for circuit breakers with field interchangeable trip units.

[15] For applications requiring communications see page 7-64.

[16] 3P circuit breakers with this trip unit can be used for 2P applications.

[17] Fixed ST and LT delays.

[18] 3P circuit breakers with this trip unit can be used for 2P applications requiring ground fault protection. Additional metering capabilities will not work properly on the unconnected phase.

[19] 3-pole PowerPacT H- and J-frame circuit breakers can be used for 2-pole applications. (For such instances, MicroLogic 6.2 Ammeter and Energy trip units can be used for ground fault protection. Additional metering capabilities are not guaranteed when using MicroLogic Ammeter and Energy trip units for this type of application.)

Q-Frame Molded Case Circuit Breakers (250 A)

PowerPacT Q-frame circuit breakers are used for overcurrent protection and switching on 240 Vac applications.^[20]

- Fixed thermal magnetic protection from 70–250 A at 240 Vac
- 2- and 3-pole unit mount and I-Line constructions^[21]
- UL listed interruption ratings from 10 kA to 100 kA at 240 Vac
- Available in standard (80%) rating only
- UL 489 Listed, CSA, NOM and IEC certified

Table 7.63: Q-Frame Termination Options

Termination Letter	
A = I-Line (See Section 9—Panelboards)	Q G L 3 2 2 0 0 For factory-installed termination, place termination letter in the third block of the circuit breaker catalog number.
E = Bolt-on I-Line (See Section 9)	
F = No lugs	
L = Lugs both ends	
M = Lugs ON end, studs on OFF end	
P = Lugs OFF end, studs on ON end	

Dimension see page 7-86

Enclosures see page 7-87

[20] Replacement lugs and electrical accessories are not available for PowerPacT Q-frame circuit breakers.

[21] Q-frame can be used as main or sub-feed circuit breaker in a NQ panelboard.

[22] 250 A lugs are suitable for copper conductors only.

[23] 250 A circuit breakers are suitable for copper conductors only.

[24] 3P QJ circuit breakers are rated at 208Y/120 Vac only.

Q4-Frame Molded Case Circuit Breaker (400 A)

- Thermal magnetic protection from 250 A up to 400 A at 240 Vac
- 2- and 3-pole unit mount and I-Line constructions
- 25 kA at 240 Vac UL interrupting rating
- UL, CSA and IEC certified

NOTE: Consider using PowerPacT™ circuit breakers for situations requiring circuit breaker accessories. See [PowerPacT Accessories](#), page 7-51 for more information.

LAL/LH-Frame Molded Case Circuit Breaker (600 A)

- Thermal magnetic protection from 125-400 A up to 600 Vac and 250 Vdc
- 2- and 3-pole unit mount and I-Line constructions
- UL listed interrupting ratings from 30 kA to 35 kA at 480 Vac
- UL, CSA and IEC certified

NOTE: Consider using PowerPacT™ circuit breakers for situations requiring circuit breaker accessories. See [PowerPacT Accessories](#), page 7-51 for more information.

Accessories see [PowerPacT Accessories](#), page 7-51 through [Plug-In and Drawout Mountings](#), page 7-60

Optional Lugs see [Mechanical Lug Information](#), page Supplemental Digest Section 3.

Dimensions see [Dimensions and Shipping Weights](#), page 7-85

Enclosures see [Circuit Breaker Enclosures](#), page 7-87

[25] UL magnetic trip setting tolerances are $\pm 25\%$ for low and $\pm 20\%$ for high from nominal value shown.

PowerPacT L-Frame with MicroLogic™ Trip Unit

PowerPacT L-Frame Molded Case Circuit Breakers (600 A)

A flexible, high performance offer certified to global standards.

- Basic Electronic and MicroLogic trip protection from 250–600 Vac
- 2-, 3- and 4-pole design; wide range of trip units to protect most applications
- High performance UL listed interrupting ratings from 35 kA to 200 kA at 480 Vac
- Standard (80%) or 100% rating
- UL, CSA, NOM, IEC, CCC certified and CE marked for global acceptance

Table 7.67: PowerPacT L-Frame 600 A, (80% Rated) UL Current-Limiting [26] Circuit Breakers (600 Vac) with Lugs and Factory-Sealed Electronic Trip Units Suitable for Reverse Connection [27]

[26] Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.

[27] For applications requiring communications see page 7-64.

[28] See Supplemental Digest Section 3 for circuit breakers with field interchangeable trip units.

[29] 3P circuit breakers with this trip unit can be used for 2P applications.

[30] AL600LS52K3 terminal wire range is (2) 2/0 AWG 500 kcmil Al/Cu

[31] Fixed ST and LT delays.

[32] AL400L61K3 terminal wire ranges are (1) 2 AWG–600 kcmil Cu or (1) 2 AWG–500 kcmil Al.

[33] 3-pole circuit breakers can be used for 2-pole applications. (For such instances, MicroLogic 6.2 Ammeter and Energy trip units can be used for ground fault protection. Additional metering capabilities are not guaranteed when using MicroLogic Ammeter and Energy trip units for this type of application.)

Dimensions see page 7-86
Enclosures see page 7-87

[34] Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.
[35] See Supplemental Digest Section 3 for circuit breakers with field interchangeable trip units.
[36] For applications requiring communications see page 7-64.
[37] 3P circuit breakers with this trip unit can be used for 2P applications.
[38] Fixed ST and LT delays.
[39] 3-pole circuit breakers can be used for 2-pole applications. (For such instances, MicroLogic 6.2 Ammeter and Energy trip units can be used for ground fault protection. Additional metering capabilities are not guaranteed when using MicroLogic Ammeter and Energy trip units for this type of application.)

PowerPacT M-Frame Circuit Breaker with Basic Electronic Trip Unit

PowerPacT M-Frame Molded Case Circuit Breakers (800 A)

PowerPacT M-frame circuit breakers use an electronic trip system with the simplicity of a thermal magnetic breaker.

- Basic electronic trip protection from 300 to 800 A up to 600 Vac
- 2- and 3-pole unit mount and I-line construction
- UL listed interrupting ratings from 35 to 65 kA at 480 Vac
- Common mounting holes, handle locations and trim dimensions with shared auxiliaries and accessories with P-frame devices
- Available in standard (80%) rating only
- UL, CSA, NOM, CCC and IEC certified and CE marked for global acceptance

[42] For 2P and 4P information see Catalog 0612CT0101.

[43] To complete the catalog number:

Replace the ■ with the appropriate interrupting rating (G, J, K or L).

For all L interrupting ratings, change the 5th character (voltage rating) from a 6 (600 V) to a 4 (480V). The 480 V AIR is standard 100 kA.

For 100% rated circuit breakers, add a "C" in the 9th character place. For example, the catalog number for a 100% rated trip unit with LI trip functions at 250 A would be PBL36025CU31A.

R-Frame Unit-Mount

Table 7.80: R-Frame Interrupting Ratings

Voltage	R-Frame Interrupting Rating			
	G	J	K	L

PowerPacT R-Frame Molded Case Circuit Breakers (3000 A)

- MicroLogic electronic trip protection from 600–3000A up to 600 Vac
- 2-, 3- and 4-pole construction
- UL listed interrupting ratings from 35 to 100 kA at 480Vac
- Built-in Modbus protocol
- Standard (80%) and 100% rating
- UL, CSA, NOM, CCC and IEC certified and CE marked for global acceptance

RTLB Terminal Pad Kit

Unit-Mount R-Frame Standard Bus Connection

R-frame circuit breakers can be bus- or cable-connected.

- For cable connections, an optional terminal pad kit RLTB or equivalent bus structure is required.
- RLTB kits comes standard with bus bar connections.

RTLB / RT3B Kits

- RLTB kits are included with 2500 A 100% rated circuit breakers.
- Each kit contains terminal pads for one end of the circuit breaker only
- Has provisions for mounting a maximum of 8 lugs per phase (9 lugs for 3000 A).
- RL3TB kits are included with the 3000 A, 80% and 100% rated circuit breakers.

R-Frame I-Line circuit breakers come with lugs on the load side. (See Panelboards—Section 9).

For other circuit breakers, order terminal pad kit (RLTB) and optional lugs separately. See [Terminal Nuts](#), [Terminal Pads](#), [Terminal Shields and Accessories](#), page 7-59 and [Mechanical Lugs](#), page 7-56.

[46] For 2P and 4P information see Catalog **0612CT0101**.

[47] To complete the catalog number: Replace the ■ with the appropriate interrupting rating (G, J, K or L.); For 100% rated circuit breakers, add a "C" in the 9th character place. For example, the catalog number for a 100% rated trip unit with LI trip functions at 2500 A would be RGF36025CU31A.

PowerPacT J-Frame

PowerPacT Mission Critical Circuit Breakers

Delivering high levels of selective coordination in a flexible design that can be easily configured for a variety of applications.

- Adjustable long-time settings in three sensor sizes provide coverage from 70-600 A on 120-240, 208Y/120, 240, and 480Y/277 Vac systems
- Undergone rigorous testing procedures to certify the coordination with downstream circuit breakers
- Available in J-Frame (250A) and L-Frame (600A)
- UL 489 listed, CSA Certified Voltage: 480Y/277V

JGL37125D81—Place termination letter in third block of circuit breaker catalog number.	

PowerPacT 500 Vdc Circuit Breakers

Designed for use on ungrounded dc systems having a maximum short-circuit voltage of 500 Vdc or a maximum floating (unloaded) voltage of 600 Vdc. Suitable for use only with UPS (ungrounded uninterruptible power supplies systems).

This two-level voltage rating allows these circuit breakers to be applied to battery sources having a short-circuit availability of 20,000 amperes or 50,000 amperes for PowerPacT H-, J-, and L-frame DC circuit breakers at 500 Vdc. IEC 500 Vdc rating is available on PowerPacT J-frame circuit breakers.

PowerPacT H-frame DC circuit breakers have a fixed magnetic trip system. PowerPacT J- and L-frame DC circuit breakers are provided with an adjustable magnetic trip that is readily accessible by means of a single adjustment on the face of the circuit breaker.

PowerPacT H- and J-frame circuit breakers are UL Listed for the interrupting ratings shown only if applied with three poles connected in series (series connection is external to circuit breaker). (See figure for example of diagram.)

PowerPacT L-frame circuit breakers are UL Listed for the interrupting ratings shown with two or three poles connected in series (series connection is external to circuit breaker).

NOTE: Due to external series connection, I-Line™ circuit breakers are not available for this application.

PowerPacT Automatic Switches

Automatic molded case switches open instantaneously at a factory preset magnetic trip point. Calibrated to protect only the molded case switch itself, when it is subjected to high fault currents. The trip point is nonadjustable and provides no overload or low level fault protection.

- PowerPacT™ H-, J-, and L-frame automatic switches are available in unit mount, I-Line™, plug-in and drawout versions.
- Accept the same lugs and accessories as equivalent thermal-magnetic circuit breakers^[1].
- May be interlocked with another switch or circuit breaker to form a source-changeover system
- UL Listed per UL 489 and CSA Certified.

R-frame circuit breakers can be bus-connected or cable-connected. For cable connections, RLTB kit or equivalent bus structure is required. Kit is included with 3000 A switches. For all others, see page 7-59.

Enclosures see page 7-87

[1] Q-frame switches do not have electrical accessories available.

[2] True 2P device. Others are a 2P in a 3P module.

[3] UL magnetic trip tolerances are -20% / +30% from the nominal values shown.

[4] P-frame L-interrupting is available in 480 Vac only.

[5] Withstand rating of 10 kA at 240 Vac.

[6] The withstand rating is the fault current at rated voltage that the molded case switch will withstand without damage when protected by a circuit breaker with an equal continuous current rating.

[7] B- and R-frame withstand is 65 kA.

Instantaneous Trip Circuit Breakers for Motor Protection Applications

Adjustable instantaneous-trip circuit breakers are intended for use in combination with motor starters with overload relays for the protection of motor circuits from short circuits.

Other specific applications include rectifiers and resistance welders. These circuit breakers contain a magnetic trip element in each pole with the trip point adjustable from the front. Interrupting ratings are determined by testing the instantaneous-trip circuit breakers in combination with a contactor and overload relay.

Select instantaneous-trip circuit breakers as follows:

This selection table is suitable for motors, other than NEMA Design E, with locked-rotor indicating code letters per NEC® Table 430.7 (b) as follows:

Table 7.96: Locked-Rotor Indicating Codes

Horsepower	Motor Code Letter
1/2 or less	A-L
3/4 to 1-1/2	A-K
2 to 3	A-J
5 to 25	A-H
30 to 125	A-G
150 or more	A-F

- For other motors order a special thermal-magnetic circuit breaker with magnetic trip settings for the specific motor— specify motor horsepower, voltage, frequency, full-load current and code letter or locked rotor current.
- Determine motor hp rating from the motor nameplate.
- Refer to the tables and select an instantaneous-trip circuit breaker with an ampere rating recommended for the hp and voltage involved.
- Select an adjustable trip setting of at least 800%, not to exceed 1300%, of the motor full-load amperes (FLA) for other than Design E motors. For Design E motors, select an adjustable trip setting of at least 1100% not to exceed 1700% of FLA.
- The NEC 1300% maximum setting may be inadequate for instantaneous-trip circuit breakers to withstand current surges typical of the magnetization current of autotransformer type reduced voltage starters, or open transition wye-delta starters during transfer from “start” to “run,” constant hp multi-speed motors, and motors labeled “high efficiency.” Select thermal-magnetic circuit breakers for those applications.
- Part-winding motors, per NEC 430.4, should have two circuit breakers selected from the above at not more than one half the allowable trip setting for the horsepower rating. The two circuit breakers should operate simultaneously as a disconnecting means per NEC 430.103.
- Based on NEC 430.52 and NEC Table 430.250.

Table 7.97: Selection Tables for Conductors, Safety Switches and Thermal-Magnetic Circuit Breakers

									446.0 A	8250 A												

- [1] Motor full load currents thru 200 hp are taken from NEC Tables 430.247, 248 and 250. Above 200 hp from UL 98. Select wire size, circuit breakers, or fuses on basis of hp rather than nameplate full load current per NEC 430.6. Do not use these values to select overload relay thermal units. See Digest pages 16-129—16152 for selection of thermal units when actual full load current is not known. Voltages listed are rated motor voltages. Corresponding nominal system voltages are 110–120 V, 200–208 V, 220–240 V, 440–480 V and 550–600 V
- [2] Thermal-magnetic circuit breaker ampere ratings recommended are approximate for average conditions, based on trip characteristics of Square D circuit breakers and NEC Table 430.52. Under some conditions, the next size larger switch or circuit breaker rating may be necessary to accommodate the motor starting current and is permitted by NEC 430.52(C)(1) Exception 2. High starting currents are anticipated with Design E and other energy efficient motors. For explanation of Code letter markings, see NEC 430.7(B). For Busway Plug-in units, see page 9-7.
- [3] Switch size only is shown in table. Selected fuses should not exceed maximum percent of full-load current as given in NEC Table 430.52. Above 50 hp dc switches are not hp rated by UL as Motor Circuit Switches, but as General Use Switches only and are not necessarily capable of interrupting the max. operating overload current of a motor. See NEC 100 for definition of General Use Switch. When protecting a 3Ø, Design E energy efficient motor, the switch is required by NEC 430.109 to have a hp rating of not less than 1.4 times that of a motor rated 3–100 hp, or not less than 1.3 times that of a motor rated over 100 hp. Switches shown in this table do not necessarily comply with that requirement.
- [4] NEC 430.22 for Single Motor. Smaller conductors may be permitted for light duty-cycle service per 430.22 (B) Exception No. 1. DC motors operating from rectified 1Ø power supply will require larger conductors per 430.22 (A) Exception No. 1. For motor-generator arc welders, see 630.11
- [5] Thermal-magnetic breaker ampere ratings recommended are approximate for average conditions and based on trip characteristics of Square D circuit breakers and NEC Tables 430.7(B) and 430.52.
- [6] Ordinary service for normal starting duty only, acceleration time of 10 sec. or less.
- [7] Heavy service is jogging or plugging duty or cycling load with over 25 starts per hour or over 5 starts per minute. Energy efficient motors are polyphase motors defined in NEMA Standard MG1 and exhibit high starting current.
- [8] 200 V motors are commonly used on 208 V services.
- [9] 8 XHHW requires 3/4 in. conduit for 3W.

PowerPacT Motor Protector Circuit Breakers—Two Device Solutions

MicroLogic 2.2M and 2.3M trip units provide built-in thermal and magnetic protections. Use PowerPacT Motor Protect Circuit Breakers in two-device motor feeder solutions to provide protection against short-circuits, overloads, and phase unbalance.

- Protection settings are made using a rotary switch.
- Accept the same accessories and terminals as equivalent PowerPacT circuit breakers.
- UL, CSA, IEC certified and CE marked for global acceptance.

HJL36100M38X
Motor Circuit Protector

MicroLogic 2.2M and 2.3M Trip Units

Ii=4800A

[10] Two-device solutions (these electronic motor protector circuit breakers include short circuit and overload protection)

- 1 electronic motor circuit protector with a MicroLogic 2.2 M plus
- 1 contactor

[11] The standard trip unit offers Class 5, 10 and 20 and phase unbalance or phase loss protection.

[12] Motor full-load currents are taken from NEC Table 430.250. Select wire and circuit breakers on basis of horsepower rather than nameplate full-load current per NEC 430.6 (A) for general motor applications. Do not use these values to select overload relay thermal units. See Digest Section 14 for selection of thermal units when actual full load current is not known. The voltages listed are rated motor voltages. Corresponding nominal system voltages are 200–208, 220–240, 440–480 and 550–600 V.

[13] To complete catalog number, replace the blank with the appropriate rating (G, J, L or R).

[14] Only MIN and MAX settings are shown, intermediate settings are available on all circuit breakers.

[1] P-frame drawout circuit breaker only.
 [2] Not available on electrically operated P-frame.
 [3] SDE Adapter used for H- and J-frame only.
 [4] Field-installable kit includes time delay module only. Order undervoltage trip separately.

Motor Operators

Motor Operators for H-, J-, and L-Frame Circuit Breakers

- Circuit-breaker indications and information remain visible and accessible, including trip-unit settings and indications
- Suitability for isolation is maintained and padlocking remains possible
- All termination connection (fixed, plug-in/withdrawable) possibilities are maintained
- Double insulation of the front face

Description		Rated Voltage		Factory Installed Cat. No. Suffix	Field-Installable Kit

Spring-Charging Motors for Electrically-Operated P-Frame Circuit Breakers

Automatically charges the spring mechanism for closing the P-frame circuit breaker and also recharges the spring mechanism when the circuit breaker is in the ON position. Instantaneous reclosing of the circuit breaker is thus possible following circuit breaker opening.

Description		Rated Voltage		Factory Installed Cat. No. Suffix	P-Frame (For Field Replacement Only) Spring Charging Motor Cat. No.	Replacement Coils Opening/Closing Coil Cat. No.

			200–250	NS	S47393	S33036

[5] Not available in H-frame 2P modules.

[6] Factory and field-installed standard motor operators for H- and J-frame circuit breakers require the SDE switch and SDE adapter (both included).

Factory and field-installed standard motor operators for L-frame circuit breakers require the SDE switch (included).

[7] Installation requires BSCM with NSX Cord. For ordering information see page 7-64.

[17] For terminal nuts/bus bar connections see page 7-59.

[18] LU = ON end only, LV = OFF end only, LW = BOTH ends

[19] Lug kits for Legacy L-frame circuit breakers can be found in Supplemental Digest Section 11 (i.e. LA, LH circuit breakers).

[20] For lug with a tapped hole for control wire, add a "T" before the "K" in the catalog number (for example, AL800P6TK).

[21] Does not fit onto ON end of unit-mount P-frame circuit breakers.

[22] For unit-mount circuit breaker only.

[23] All unit-mount R-frame circuit breakers require terminal pads for mounting lugs of any type. See page 7-59.

[24] Not available with tapped hole for control wire.

[25] This lug can only be used on low amp PJ frame breakers where the Instantaneous setting must not be turned OFF. The cables must be laced with rope per lug instructions.

[26] Not for use on I-Line™ circuit breakers unless wire bending space is adequate.

[27] All unit-mount R-frame circuit breakers require terminal pads for mounting lugs of any type. See page 7-59.

[28] 9 lugs for 3000 A circuit breakers

Crimp lugs or PDC connectors extension "A" past end of circuit breaker

Power Distribution Connectors

Power distribution connectors (PDCs) can be used for multiple load wire connections on one circuit breaker in place of standard distribution block to save space and time.

The connectors are attached to circuit breaker terminals equipped with separately provided terminal nut connectors.^[29]

Applications:

- For use on load end of circuit breaker only
- For use in UL 508 Industrial Control applications
- For use in UL 1995/CSA C22.2 No. 236 heating and cooling equipment
- For copper wire only

Table 7.110: Power Distribution Connectors for B-Frame, H-Frame, J-Frame and L-Frame Circuit Breakers ^[30]

Use with Circuit Breaker Type	Ampere Rating	(Wires Per Terminal) Wire Range	Dimension A (in.)	Cat. No.	Qty. Per Kit	Kit Contents

PowerPacT H-, J-, and L-Frame MicroLogic Trip Units

MicroLogic Trip Units ^[1]

MicroLogic Standard 3.2/3.3 Trip Units

PowerPacT™ H-, J-, and L-frame molded case circuit breakers may be specified with any of the following MicroLogic Electronic Trip Units.

- True RMS sensing
- LI, LSI trip configurations
- Field-interchangeable trip units
- LED long-time pickup and trip indication
- Test kits available
- Thermal imaging

MicroLogic Ammeter 5.2A/5.3A/6.2A/6.3A Trip Units

Includes all features listed for MicroLogic standard trip unit, as well as:

- Advanced user interface
- Neutral protection
- Incremental fine tuning of settings
- Up to 12 alarms
- Digital ammeter—phase and neutral (4-pole only)
- Phase loading bar graph
- Maintenance indicators including contact wear, number of operations, operating hours, and load profiles
- Cause of trip information for troubleshooting assistance
- LCD Display
- Zone-selective interlocking (ZSI) (short-time & ground-fault)
- Optional Modbus™ communications—PowerLogic™ compatible

MicroLogic Energy 5.2E/5.3E/6.2E/6.3E Trip Units

Includes all features listed for MicroLogic ammeter trip unit, as well as:

- Ground-fault trip with programmable ground fault alarm (available on 6.2E/6.3E only)
- Power and energy measurement
- Power quality measurements
- Current demand and power demand measurements

Rating Plug

MicroLogic (Standard) 3.0 and 5.0 Trip Units

PowerPacT™ P- and R-frame molded case circuit breakers may be specified with any of the following MicroLogic Electronic Trip Units.

- True RMS sensing
- LI, LSI trip configurations
- Field-interchangeable long-time rating plugs
- LED long-time pickup indication
- Test kits available
- Thermal imaging

MicroLogic (Ammeter) 3.0A, 5.0A and 6.0A Trip Units

Includes all features listed for MicroLogic standard trip unit, as well as:

- LSIG trip configurations
- Digital ammeter—phase and neutral (4-pole only)
- Phase loading bar graph
- LED trip indication
- Zone-selective interlocking (ZSI) (short-time & ground-fault)
- Optional Modbus™ communications—PowerLogic™ compatible

MicroLogic (Power) 5.0P and 6.0P Trip Units

Power measurement and advanced protection features includes all features listed for MicroLogic ammeter trip unit, as well as:

- LSI trip configuration with programmable ground fault alarm
- LSIG (Ground-fault trip) with programmable ground fault alarm
- Incremental “fine tuning” of L, S, I, and G pickup and delay settings
- LCD dot matrix display and LED trip indication
- Advanced user interface
- Advanced protection IDMTL—selectable long-time delay bands
- Neutral protection
- Power measurement
- Contact wear indication
- Modbus communications—PowerLogic compatible
- Local and remote settings

MicroLogic (Harmonic) 5.0H and 6.0H Trip Units

Power quality measurement and advanced protection features. Includes all features listed for the MicroLogic power trip unit, as well as:

- Enhanced power measurements functions
- Power quality measurements

Adjustable Rating Plugs for PowerPacT™ P-Frame and R-Frame and MasterPacT™ NT and NW Circuit Breakers—Selection

To provide maximum design flexibility, system protection, and field upgradeability, each MicroLogic™ trip unit is equipped with an interchangeable long-time rating plug. Each trip unit requires an adjustable rating plug to determine the long-time pickup range of the circuit breaker. These plugs are factory installed on new trip units, or can be ordered separately for field-installable upgrades.

Adjustable rating plugs are offered in eight different ranges of long-time pickup adjustments. The following chart show the ranges of adjustments. Each adjustment times the sensor rating ($I_r \times I_n$) of the circuit breaker sets the long-time pickup value of the circuit breaker.

Table 7.126: Special Options

Description	Factory-Installed Suffix	Field-Installable Cat. No.
Ship circuit breaker in closed position	YK	N/A
CT Characterization (Calibrated trip system)	Q	N/A
Alternate Maintenance Setting (AMS) kit (use with 5.0/6.0 A, P or H and 5.3/6.3 A or E MicroLogic trip units)	—	84957
Energy Reduction Maintenance Setting (ERMS) kit (use with 5.0/6.0 P or H MicroLogic trip units)	—	84956
Maintenance Mode Setting Switch kit	120 Vac	LV429659
	24 Vdc	LV429658

- [2] The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative adjustable rating plug, please add the letter designation to the end of the catalog number. Please refer to page 7-64 for a complete listing of adjustable settings available with each plug. (Example: S143B would specify a "B" rating plug instead of the standard "A" plug.) Use suffix "N" if no rating plug is required, deduct.
- [3] When replacing a standard trip unit with Type A (Ammeter), P (Power metering) or H (Harmonic analysis) trip unit, order the 12-pin connector kit S33101 for the MasterPacT NW and NT and the PowerPacT P-frame drawout circuit breakers or kit S33100 for PowerPacT P-frame and R-frame unit-mount and I-Line circuit breakers. See page 7-64.
- [4] Requires Circuit Breaker Communications Module.
- [5] Requires neutral current transformer in 3Ø4W systems.
- [6] Alarm history is available through the trip unit display and communications. Local indication of an alarm requires an M2C Programmable Contact Module.

Trip Unit Seal

Sensor Plug

Trip Unit Accessories

Adjustable rating plug "A" is installed as standard on all MicroLogic trip unit orders. However, an alternative selection may be specified from the "Assembled" table below, and factory installed with your trip unit order at no additional charge. To order, please attach the appropriate catalog suffix to the end of the trip unit Cat. No. (after specifying trip unit options). Adjustable rating plugs may also be purchased as field-installable components from the table below.

For Enerlin'X accessory information, see [Enerlin'X Digital Solutions](#), page 7-80

[7] Long-time pickup amperes (Ir) = Sensor Rating (In) X Setting of rating plug. "Fine adjustment tuning" is included on MicroLogic Power and Harmonic trip units, allowing for incremental settings of 1 A between the plug setting and .40 X Sensor Rating.

[8] Includes NCTWIRING kit.

[9] Service Interface Test Kit can be ordered through SE Services only. Service Interface Test kit replaces obsoleted Full Function Test Kit.

[10] Used for testing MicroLogic trip units. Included in the price of the Hand-held/Full-function Test Kits. Kit for replacement only.

[11] Used for testing STR trip units. Included in the price of the Hand-held/Full-function Test Kits. Kit for replacement only.

[12] Required for Arc Energy Reduction Performance Testing for Instantaneous setting or Maintenance Mode Switch when using a Full Function Test Kit

[13] Included with the Full-function Test Kit. Kit for replacement only.

[14] For use only with circuit breakers with date codes later than 07011. For long-time pickup range, See rating plug information at page 7-61.

[15] IEC Only.

[16] Wire harness is required for I-Line applications, optional for unit-mount applications

YH1 = all installed accessories but ZSI and ENCT

YH2 = ENCT and all installed accessories

YH3 = ZSI and all installed accessories

YH4 = ZSI, ENCT and all installed accessories

[17] For proper selection, see catalog 0611CT1001.

[18] Installation requires IFM (LV434000) for Modbus communication and/or FDM (STRV00121) for external display.

[19] If using with motor operator requires communicating motor operator (suffix NC).

[20] Remote indication relay for motor applications

[21] Remote indication relay

[22] I-Line wire harness is included for communication network accessories.

Optional wire harness for unit mount requires YH1 suffix.

[23] Compatible with MicroLogic P and H only.

New!

MasterPacT MTZ Circuit Breakers

MasterPacT MTZ continues the performance and reliability of the MasterPacT line.

MasterPacT MTZ circuit breakers bring innovation and upgradability throughout the entire lifecycle, for improved power uptime, business performance, and cost control.

- Customize MicroLogic X control unit anytime
- Purchase optional Digital Modules for additional protection, measurement and maintenance & diagnostic
- Easy installation using established architectures
- Demonstrated compliance with standards
- Smartphone connectivity for wireless alerts and maintenance
- Built in power meter with Class 1 precision for smart energy metering

[6] For 2000 A N/H/L/LF devices, the endurance rating is 10,000 for mechanical and 1000 for electric.

New!

MicroLogic X Control Unit for MasterPacT MTZ Circuit Breakers

The MicroLogic X control unit protection functions include overcurrent, short-circuit, and ground-fault protection. Along with the standard protection functions LI, LSI, and LSIg, new features enhance the overall performance of a system: dual settings, fine settings, fast tripping.

MicroLogic X measures electrical parameters of a power system: currents, voltages, frequency, power, energy, power factor, current and power demand. Min/Max and average values are calculated for most of the parameters.

MicroLogic X capability for maintenance & diagnostics simplifies circuit breaker service and operations. Relevant indicators and messages are powerful tools that can help the user scheduling both preventive and predictive maintenance, and device replacement.

MasterPacT MTZ Digital Modules Options for Advanced Functions

Optional Digital Modules can be purchased and downloaded to enhance the performance of MicroLogic X control units. They are dedicated to advanced protection, measurement, and maintenance & diagnostics, and are available through Go Digital on the Schneider Electric website.

Module (Available on the Schneider Electric GoDigital Website)		Part Number
Protection		
ANSI 27/59—Under/Over Voltage Protection	Monitors the circuit breaker voltages and trips when the voltage exceeds the settings.	LV850012
ANSI 32P—Reverse Active Power Protection	Monitors the active power.	LV850011
ANSI 51N/51G—Ground-Fault Alarm	Provides an integrated ground fault alarm.	LV850007
ERMS—Energy Reducing Maintenance Settings	Used to lower the protection settings in order for the MasterPacT MTZ circuit breaker to trip faster, reducing arc energy.	LV850009
Metering		
Energy per Phase Digital Module	Calculates and displays the active, reactive and apparent energy per phase of the power system and provides total active, reactive and apparent energy per phase.	LV850002
Individual Harmonics Analysis	Provide harmonics of voltage and current to the 40th harmonic.	LV850006
Maintenance & Diagnostic		
Power Restoration Assistant,	Displays available circuit breaker information to help determine potential causes of an event and also provides guidance for potential solutions to restore power.	LV850004
MasterPacT Operation Assistant	Assists in closing or opening the circuit breaker remotely with Bluetooth by delivering applicable instructions. Requires Comm & Diag accessories.	LV850005
Waveform Capture on Trip Event	Automatically logs five cycles of phase and neutral currents.	LV850003
Modbus Legacy Dataset	Allows easy integration in existing Modbus installations where modification of supervision software for MTZ circuit breakers is not desired.	LV850045

New generation MicroLogic X control units incorporate wireless technology (Bluetooth and NFC) that allows the transfer of a wide selection of critical information (protection, measurements, maintenance & diagnostics) to your mobile device, by means of the EcoStruxure Power Device App.

Alternatively, MasterPacT MTZ can be equipped with ETHERNET communication through either the IFE module or the new embedded EIFE that includes webpages. Modbus SL communication is available through the IFM interface module.

Motor Circuit Protection Selection

PowerPacT H- and J-frame electronic Motor Circuit Protectors (MCP) are magnetic-only instantaneous-trip circuit breakers. They are designed to offer short circuit protection and are National Electrical Code (NEC) compliant when installed as part of a combination controller having motor overload protection. MCP circuit breakers accept the same accessories and terminals as the equivalent thermal-magnetic circuit breakers.

Determine the hp rating from the nameplate of the motor. Select a MCP with an ampere rating recommended for the hp and voltage involved. When using the automatic settings the MCP microprocessor automatically adjusts the trip settings for both current and time to align with the start-up characteristic for the motor type, whether it is a standard or energy-efficient motor. This includes a dampening means to accommodate a transient motor in-rush current without nuisance tripping of the circuit breaker.

Table 7.145: H- and J-Frame Electronic Motor Circuit Protectors (MCP)

Frame	Sensor Rating	Full Load Amperes Range	Adjustable Instantaneous Trip Range	Suffix	J (See SCCR Cat. No. Table Below)	L (See SCCR Cat. No. Table Below)	R (See SCCR Cat. No. Table Below)
H-Frame	30 A	1.5–25 A	9–325 A	M71	HJL36030-M71	HLL36030-M71	HRL36030M71
	50 A	14–42 A	84–546 A	M72	HJL36050-M72	HLL36050-M72	HRL36050M72
	100 A	30–80 A	180–1040 A	M73	HJL36100-M73	HJL36100-M73	HRL36100M73
	150 A	58–130 A	348–1690 A	M74	HJL36150-M74	HLL36150-M74	HRL36150M74
J-Frame	250 A	114–217 A	684–2500 A	M75	JJL36250-M75	JLL36250-M75	JRL36250M75

Table 7.146: Maximum Rating or Setting of Motor Protective Devices [7]

Type of Motor		Percentage of Full-load Current	
		Setting	Not to Exceed[8]
A, B, C, D	Standard	800%	1300%
B, E	Energy Efficient	1100%	1700%

Table 7.147: MCP Selection by HP Ratings [9] of Induction-type Squirrel-Cage and Wound-Rotor Motors [10]

3Ø60 Hz Voltages [11]				Full-Load Amperes	Suffix
200 Vac	230 Vac	460 Vac	575 Vac		
5–5	5–7.5	7.5–15	1–20	1.5–25	M71
5–10	5–15	10–30	15–40	14–42	M72
10–25	15–30	25–60	30–75	30–80	M73
20–40	25–50	50–100	60–125	58–130	M74
40–60	50–75	100–150	125–200	114–217	M75

Short Circuit Current Rating (SCCR)

Tested to meet NEC and UL508A requirements for short circuit current ratings as part of an approved combination controller.

Table 7.148: Short Circuit Current Ratings (SCCR)

Contactor/Starter	Interrupting Rating					
	J			L		
	200–240 Vac	480 Vac	600 Vac	200–240 Vac	480 Vac	600 Vac
Tesys D-line and F-line	100 kA	65 kA	25 kA	125 kA	100 kA	50 kA
NEMA Type S	100 kA	65 kA	25 kA	125 kA	100 kA	50 kA

See www.us.schneider-electric.us for specific ratings and combination ID numbers.

To select combination starters and motor controllers using MCP's Meeting NEC Article 430, refer to Section 16.

Accessories see [page 7-51](#)

Lugs see [page 7-56](#)

Dimensions see [page 7-86](#)

Enclosures see [page 7-87](#)

[7] Based on 2015 NEC Table 430.52.

[8] See NEC Exception No. 1 to Table 430.52. The NEC 1300% maximum setting may be inadequate for instantaneous trip circuit breakers to withstand current surges typical of the magnetization current of autotransformer type reduced voltage starters, or open transition wye-delta starters during transfer from "start" to "run," constant hp multi-speed motors, and motors labeled "high efficiency."

[9] Based on 2005 NEC Table 430.250.

[10] Per NEC 430.3, part-winding motors should select two circuit breakers, each at not more than one-half the allowable trip setting for the horsepower rating. The two circuit breakers should operate simultaneously as a disconnecting means per NEC 430.103.

[11] Listed voltages are rated motor voltages. Corresponding system voltages are 200 Vac, 220–240 Vac, 440–480 Vac and 550–600 Vac. Select wire and circuit breakers based on horsepower rather than nameplate full-load current per NEC 430.6 (A) for general motor applications.

Vigirex™ Ground-Fault Relay System

The Vigirex ground-fault relays, with associated sensors (current transformers), measure the residual current in an electrical installation to detect levels which may be damaging. When used for protection, they cause an associated circuit breaker or switch to interrupt the supply of power to the protected system. They may also be used for monitoring only, with output to an alarm. The product line includes fixed sensitivities from 30 mA to 1 A and adjustable sensitivities up to 30 A.

The Vigirex relays may be easily mounted on DIN rail or may be panel mounted in a meter cutout. Sensors for conductors range from a little more than an inch diameter toroids, to large rectangular sensors measuring 6 x 18 inches. The compact size of the relay and its sensor make it ideal for protection of OEM equipment as well as branch circuits.

Table 7.150: Vigirex Ground-Fault Relays (UL 1053 Listed)

MasterPacT NT

MasterPacT NW

MasterPacT NT and NW Circuit Breakers

The MasterPacT NT and NW universal power circuit breakers offer a family of circuit protection products meeting the most common world standards, ANSI, UL and IEC. The basic design platform for each is common. The final result is UL, ANSI and IEC circuit breakers with the same basic external dimensions, features and accessories.

- Complete product offering up to 200 k AIR without fuses
- Circuit breakers tested to show arc flash hazard risk category as referenced by NFPA70E
- 800 A to 6000 A frames, fixed and draw-out
- Rated for AC voltage systems through 600 V (635 V ANSI)
- Short-time withstand ratings up to 100 kA
- Cradle position indicator: connected, test and disconnected
- Simple, visual contact wear indicators
- Full complement of field-installable accessories common to all standards
- Four interchangeable MicroLogic trip units to choose from
- Available PowerLogic™ based power metering and monitoring capabilities
- Available protective relay functions as defined by ANSI C37.2 and C37.90

The following charts show the MasterPacT NW and NT ratings for ANSI and UL 489. See Pricing Guide 0613PL0001 and Catalog 0613CT0001.

Enerlin'X System for MicroLogic Trip Units

Enerlin'X Systems enable network connectivity for MasterPacT and PowerPacT circuit breakers to provide remote monitoring, control & alarming features which is central to the Smart Systems Architecture with Square D low voltage distribution equipment.

Enerlin'X interface modules support Smart System Applications by facilitating access to circuit breaker data that provides performance information, circuit breaker status, metering measurements and various maintenance alert indicators such as contact wear, operation counters, load profile etc.

Recommended 24 Vdc Power Supplies

Available 24 Vdc power supplies include the range of Phaseo ABL8 modules and the AD modules:

- Schneider Electric Phaseo ABL8 power supplies (3 to 10 A, overvoltage category II) are recommended for large installations.
- Schneider Electric AD power supplies (1 A, overvoltage category IV) are recommended in the following cases:
 - For installations limited to a few IMUs.
 - As a power supply of MicroLogic trip units in MasterPacT NT/NW or PowerPacT P- and R-frame circuit breakers.

Table 7.157: Power Supply Modules for MicroLogic Trip Units and Enerlin'X Modules

Power Supply	Rating	Input-Output Voltage	Catalog No.
Schneider Electric AD Power Supply Primary overvoltage category IV Temperature: -25°C tp +70°C (-13°F to +158°F)	1A	24/30 Vac, 24 Vdc	LV454440
		48/60 Vac, 24 Vdc	LV454441

Micrologic E circuit breaker control unit for PowerPact H, J, L

GFM250 with Optional GFM25CT

MicroLogic™ Add-on Ground-Fault Module (GFM)

The MicroLogic Ground-Fault Module (GFM) is a UL Listed/CSA Certified circuit breaker accessory which protects equipment from damage caused by ground faults. It is an add-on module which, when connected to a PowerPacT H- or J-frame thermal-magnetic circuit breaker only, provides ground-fault sensing and ground-fault relay functions.

HD/JD ground-fault modules feature:

- Adjustable ground-fault pickup levels
- Adjustable ground-fault time delays
- Integral ground fault push-to-test feature
- Ground-fault indicator (mechanical for local, contacts for remote)
- All GFMs are supplied for I-Line™ mounting as standard, easily convertible to unit mount by removing the I-Line bracket
- Fault-powered (through the sensing current transformer) for electronics, shunt trip, and integral test feature. Meets NEC 230.95(C)
- A 12 Vdc shunt trip module (Catalog No. [P29382](#)) is required in the circuit breaker. This may be field installed or factory installed when the circuit breaker is ordered with an -SN suffix.
- UL 1053 — Ground-fault Sensing and Relaying Equipment

The GFM system requires the following:

- H-frame (15–150 A) or J-frame (150–250 A) molded case circuit breaker
- Shunt trip is required for the function of the GFM (may be factory-installed or field-installed)
- Bus bar connection (terminal nut inserts) for OFF end of circuit breaker
- Optional neutral current transformer, catalog number GFM25CT (must be ordered for 4-wire applications). NOTE: Ground-fault modules cannot be used for alarming only.

Table 7.158: Module/Enclosure Selection Chart [1]

Companion Circuit Breaker Prefix	Cat. No. [2]	I-Line Switchboard	Ground-fault Pickup Adjustment Range
HD, HG, HJ, HL	GFM150HD	LA	20–100 A
JD, JG, JJ, JL	GFM250JD	LA	40–200 A
Accessories			
H & J	GFM25CT	Optional Neutral Current Transformer (required for 4-wire loads)	

Earth Leakage Module (ELM) for PowerPacT H- and J-Frame MCCBs

The Earth Leakage Module (ELM) is an add-on module which, when connected to a PowerPacT H- or J-frame MCCB, provides low-level ground-fault sensing and ground-fault relay functions.

Because these ELMs are highly sensitive (30 mA to 3 A), they provide much greater protection than GFMs (20 to 200 A sensitivity). The ELMs provide greater protection of control circuits and other sensitive equipment. The associated circuit breaker must have a 48 Vdc shunt trip, which may be field-installed (kit [P29392](#)) or factory-installed (suffix – SP) in the H- or J-Frame circuit breaker.

Add-on Earth Leakage Module (ELM) Features:

- Adjustable ground-fault pickup levels as low as 30 mA
- Adjustable ground-fault time delays from instantaneous to 500 msec (Time delay can be applied to the 30 mA setting)
- Integral ground fault push-to-test feature
- Ground-fault indicator; pop-up button for local status and contacts for remote indication (to be used only with the tripping option)
- All ELMs are supplied for I-Line™ mounting and are easily convertible to unit-mount by removing the I-Line brackets
- Three poles; 240 to 600 Vac maximum: 3-wire applications only (no neutral)
- Line-power obtained through internal bus to provide power for electronics, shunt trip, and integral test feature.
- A shunt trip is required in the circuit breaker; it may be field-installed or factory-installed in the PowerPacT H and J circuit breakers.
- UL 1053 – Ground-fault Sensing and Relaying Equipment

Table 7.159: ELM Selection Chart [3]

Companion Circuit Breaker [4]		Enclosure Space Required I-Line Switchboard	Pick-Up Adjustment Range	Catalog Number
Prefix	Size			
HD, HG, HJ, HL	15–150 A	LA	30 mA–3 A	ELM150HD
JD, JG, JJ, JL	150–250 A	LA	30 mA–3 A	ELM250JD

I-Line J-Frame with ELM Installed

[1] At 250 A, the GFM250JD can be used with 80% rated circuit breakers only.

[2] See Supplemental Digest Section 3 for additional GFMs.

[3] At 250 A, the ELM250JD can be used with 80% rated circuit breakers only.

[4] For Factory Installation of ELM Module: For termination designation (3rd letter of catalog number) use ONLY "M". Add factory installed 48 Vdc shunt trip (suffix SP) to breaker plus suffix VL or VM.

[9] All weights are for 3P circuit breakers unless otherwise noted.

PowerPacT Circuit Breaker Enclosures

- The enclosures for the family of PowerPacT circuit breakers B- through Q-frame are cULus listed unless otherwise noted.
- The enclosures are suitable for service entrance equipment when neutral assembly is installed.
- The short circuit current rating of the enclosed circuit breakers is equal to the rating of the circuit breaker installed unless otherwise noted.
- All enclosures will accept 100% rated circuit breakers unless otherwise noted.

PowerPacT B-Frame Circuit Breaker Enclosures

- The enclosures' maximum short circuit ratings are 65 kA at 600V, 65 kA at 480 Vac, 100 kA at 240 Vac and 50 kA at 250 Vdc unless otherwise noted.
- Enclosures accept 100% rated circuit breakers [8].

Table 7.167: PowerPacT B-Frame Circuit Breaker Enclosures

Circuit Breaker			Enclosure Catalog Number			Accessory Catalog Number	
Cat. No. Prefix	Rating	Poles				Neutral Assembly Kit	Service Ground Kit
			NEMA 1 Flush	NEMA 1 Surface	NEMA 3R

BKL	15–30 A	2				SN100FA	

PowerPacT H- and J-Frame Circuit Breaker Enclosures

The enclosures' maximum short circuit ratings are 25 kAIR at 600 Vac, 65 kAIR at 480 Vac, 125 kAIR at 240 Vac and 20 kA at 250 Vdc unless otherwise noted. Enclosures accept 100% rated circuit breakers [2]. The enclosures are not compatible with earth-leakage or ground-fault modules.

H- and J-frame circuit breakers with MicroLogic trip units can be used with these enclosures, but have the following limitations:

- No communication accessories can be mounted in the enclosure (no IFM or Front Display Module, IFE, etc).
- The trip unit will not be accessible or visible without the removal of the cover (except J250F and J250S).
- For LSIG, there is no room for the NCT to mount in the enclosure.

[1] For NEMA 3R applications, remove drain screw from bottom end well.

[2] Use only 90°C (minimum) rated wire sized per ampacity of 75°C rated conductors for 100% rated circuit breakers.

[3] Rated for 240 Vac maximum. Short circuit current rating is 25 kAIR at 240 Vac.

[4] Accepts standard 80% rated circuit breakers only. Not rated for 100% rated circuit breakers.

[5] Use copper conductors only.

[6] Rated 480 Vac maximum. Short circuit current rating is 18 kAIR at 480 V.

[7] For conduit entry through the top end wall use one of the following Square D conduit hubs: A200L for 2.00 in., A250L for 2.50 in., A300L for 3.00 in., A350L for 3.50 in. or A400L for 4.00 in.

[8] Add suffix BE if no knockouts are required on the end walls.

[9] For access to the circuit breaker's standard, ammeter or energy trip unit panel/LCD, add suffix T.

[10] For 200% neutral use copper wire only.

[11] Complete rating is NEMA 3, 3R, 4, 4X, 5, and 12.

[12] For NEMA 3R applications, remove drain screw from bottom endwall.

[13] Add suffix VW for visibility to the standard, ammeter or energy trip unit of the PowerPacT circuit breaker.

PowerPacT L-Frame Circuit Breaker and Molded Case Switch Enclosures

All enclosures accept 80% rated circuit breakers. The enclosures will also accept 100% rated circuit breakers to 400 amps. The enclosures have a blank top end wall and require field-cut openings. For details and hub catalog numbers see page 3–10.

Table 7.169: PowerPacT L-Frame Circuit Breaker Enclosures

	400–600 A			SN1000MA	SNC800LX	

PowerPacT Q-Frame Circuit Breaker Enclosures

The enclosures for the PowerPacT Q Frame Circuit Breaker are UL listed. The short circuit ratings of these enclosed circuit breakers are equal to the interrupter ratings, at the supply voltage marked on the circuit breaker installed, unless otherwise noted.

Table 7.170: PowerPacT Q-Frame Circuit Breaker Enclosures

Circuit Breaker			Enclosure Cat. No.			Neutral Assembly Kit Cat. No.	Service Ground Kit Cat. No.

		2, 3	Q23225NF	Q23225NS	Q23225NRB		

PowerPacT M- and P-Frame Circuit Breaker Enclosures

All enclosures will accept 80% rated circuit breakers. The P1200 enclosures will accept 100% rated circuit breakers to 800 A. If a CT neutral is required, the enclosure will no longer accept a 200% neutral. The M800R and the P1200R enclosures have a blank top end wall and require field-cut openings. For details and hub catalog numbers see page 3–10.

Table 7.171: PowerPacT M- and P-Frame Circuit Breaker Enclosures

PowerPacT L-Frame 500 Vdc Circuit Breaker Enclosures

The PowerPacT L-frame circuit breaker enclosure's maximum short circuit rating is 20 kAIR at 250 Vdc and 50 kAIR at 500 Vdc.

Listed for use ONLY on UPS systems.

Table 7.172: DC Circuit Breaker Enclosures for LG and LL DC-Rated Circuit Breakers

Circuit Breaker [23]			Cat. No.		
Cat. No. Prefix	Ampere Rating	Poles	NEMA 1 Surface Enclosure	Replacement Ground Lugs	Service Ground Kit
LGL, LLL	300–600 A	3	L1200S	8010440301	Standard
	700–1200 A	4	L1200S		

[14] Will accept PowerPacT L-frame circuit breakers and Motor Protectors with suffixes M38X

[15] For NEMA 3R applications, remove drain screw from bottom endwall.

[16] Add suffix VW for visibility to the standard, ammeter or energy trip unit of the PowerPacT circuit breaker.

[17] Will accept PowerPacT L-frame Molded Case Switches.

[18] When the QJL circuit breaker is installed in the enclosure, the enclosure is limited to Short Circuit Current ratings of 65 kAIR at 240 V and 100 kAIR at 208 V.

[19] Limited to 200 A.

[20] Order current transformer kit S33576 separately.

[21] Current transformers applicable only on PowerPacT P circuit breakers. Current limitations are 400–800 A and 400–1200 A respectively for the M800 and P1200 family of enclosures.

[22] Complete rating is NEMA 3, 3R, 4, 4X, 5, and 12.

[23] Use 500 Vdc or 250 Vdc rated circuit breakers only.

LA/LH/Q4 Circuit Breaker Enclosures

LA/LH/Q4 Thermal-Magnetic Circuit Breaker Enclosures

The enclosures for the LA/LH/Q4 thermal-magnetic circuit breakers are UL listed and CSA certified. The enclosures are suitable for service entrance equipment when neutral assembly is installed. The short circuit ratings of these enclosed circuit breakers are equal to the interrupter rating, at the supply voltage marked on the circuit breaker installed.

The LA400R enclosure has a blank top end wall and requires field cut openings. For details and hub catalog numbers see Digest Section 3.

Table 7.173: LA/LH/Q4 Thermal-Magnetic Circuit Breaker Enclosures

Enclosures for Special Applications

Hazardous Locations: NEMA 7 And NEMA 9 Circuit Breaker Enclosures

The NEMA 7 and 9 enclosures are cULus listed unless otherwise noted. They are rated for use in hazardous locations as defined in NEC Article 500. The short circuit current rating of the enclosed circuit breakers is equal to the rating of the circuit breaker installed unless otherwise noted. They are suitable for use as service entrance equipment when neutral is installed. Enclosures require the use of 75°C copper wire only. The NEMA 7 enclosures are suitable for rainproof applications when the included PKDB1 breather and drain kit is installed.

Table 7.174: NEMA 7 and NEMA 9 Circuit Breaker Enclosures; Thermal-Magnetic B-Frame and PowerPacT J-Frame Circuit Breakers

Circuit Breaker			Enclosure Catalog Number		Neutral Assembly Kit Cat. No.	Service Ground Kit Cat. No.	Threaded Conduit Provisions, Inches
Cat. No. Prefix	Rating	Poles	NEMA 7/9 Cast Aluminum [31] [32]	NEMA 9 Cast Aluminum [32]			
BKL	15–30 A	2	B100X	—	100SNA	Included	1 1/4 in.
BDL, BGL, BJL	15–100 A	2, 3					
JDL, JGL	150–225 A	2, 3	J225X [33] [34]	J225Y [33] [34]	225SNA	Included	2 1/2 in.

Enclosed Molded Case Switches

For information on enclosed molded case switches, see Supplemental Digest Section 3.

[24] Enclosures are provided with the Handle Padlock Attachment (HPALM) for field installation to lock the circuit breaker in the "ON" or "OFF" positions.
 [25] Use copper conductors only.
 [26] Maximum short circuit and voltage is 30 kAIR at 480 Vac.
 [27] LAL or LHL circuit breakers with an MB or MT suffix are not compatible with these enclosures: LA400DS, LA400AWK, and LA400LS.
 [28] Enclosure cover has an integral padlock provision to provide a means to lock the circuit breaker in the "ON" or "OFF" position.
 [29] Complete rating is NEMA 3, 3R, 4, 4X, 5, and 12.
 [30] For NEMA 3R applications, remove drain screw from bottom endwall.
 [31] NEMA 7 — Indoor Hazardous Locations — Division 1 and 2, Class I, Groups C and D; Class II, Groups E, F and G; Class III
 [32] NEMA 9 — Indoor Hazardous Locations — Division 1 and 2, Class ii, Groups E, F and G; Class iii
 [33] Short circuit current rating: 65 kAIR at 240 Vac, 25 kAIR at 480 Vac, and 18 kAIR at 600 Vac
 [34] Not cULus listed due to wire bending space.

Identification System

Mini-Vario and Vario rotary manual motor-control switches from 12–175 A are suitable for on-load making and breaking of resistive or mixed resistive inductive circuits where frequent operation is required. They can also be used for direct switching of motors in utilization categories AC-3 and DC-3 specific to motors. Vario manual motor-control switches are suitable for isolator applications with fully visible indication (since the handle cannot be in the open position unless all the contacts are actually open and separated by the appropriate isolating distance), and the handles are padlockable.

The Mini-Vario and Vario catalog numbers are described in [Table 8.1](#).

Vario Non-Metallic Enclosed Switches

The Vario Motor Disconnect Switch is also offered as an enclosed switch. The three-pole version makes the Vario switch ideal for manual motor control applications. They are compact, easy to wire and connect, and come undrilled to allow cable entry positions.

NOTE: VC•GUN enclosures are UL approved.

[3] Complete switch includes handle operator, shaft, door interlock plate, and line terminal shroud.

[4] Assembled, includes switches mounted in enclosure with handle.

[5] Refer to Table 8.11 and Table 8.12 for horsepower ratings.

Vario Metallic Enclosed Switches

Vario switches meet UL508 requirements as both enclosed and open manual motor controllers. They are also marked "Suitable as Motor Disconnect" allowing installation on the load side of the motor branch circuit short-circuit and ground-fault protection. If motor branch circuit short-circuit and ground-fault protection is needed, use a GS1 or 9422 fusible switch or circuit breaker meeting NEC 430.52 requirements.

Vario Manual Motor Control Switches

The V1 and V2 come in metallic enclosures (NEMA Type 1, 4, 4X, and 12). The NEMA 1 enclosure comes with conduit knockouts top and bottom. To factory install a VZ7 auxiliary contact in these metallic enclosures, add Form X11 to the end of the catalog number (for example, 9421V1G30X11). To factory install a VZ20 auxiliary contact in these enclosures, add Form X20 to the end of the catalog number (for example, 9421V1W30X20).

MD Motor Disconnect Switch

MD Motor Disconnect Switches

The MD motor disconnect switch is listed UL 508 Suitable for Motor Control (UL File E164864) and conforms to IEC standard 60947-3. It is in a compact NEMA 4X enclosure suitable for use in NEMA 1, 3, 3R, 4, 4X, and 12 applications. The MD's key benefits are an extremely small footprint, a more economically efficient NEMA 4X solution, and a handle interlock preventing cover removal when the switch is in the ON position.

Switch features:

- Suitable for NEMA 1, 3R, 4, 4X, and 12 enclosure applications.
- Complies with OSHA lockout/tagout requirements—accepts up to three 8 mm padlocks.
- For accessories, see [Table 8.20](#).

VLS3P063R1

Product Overview

Compact Size

The three-pole 16–63 A disconnect switches are made up of a single unit body, a mere 36 mm (1.4 in.) wide, while those rated 63–125 A are only 70 mm (2.8 in.) wide.

Accessory Flexibility

Mounting and removal of the fourth pole and add-on blocks are simple and quick operations with no need for tools.

Certifications

All VLS disconnect switches are certified by cCSAus and are UL Listed for Canada and USA:

- 16–63 A types: certified according to UL 60947-4-1 / CSA 22.2 n° 60947-4-1-14 standards
- 63–125 A types: certified according to UL 98 / CSA 22.2 n° 4 standards

Rotary Handles

Table 8.45: Selection—Rotary Handles (NEMA 1, 12, 3R, 4, and 4X. IEC IP65 unless otherwise specified)

Catalog number	Specifications
Door Mounting and Rear Mounting Handles, Padlock-ready ^[11]	
Red/yellow, rotating	
VLSH1S5R	For VLS3P***R• and VLS3P***D•. Screw mounting. Recessed selector. □ 5 mm (0.2 in.). ^[12]
VLSH2S5R	For VLS3P***R• and VLS3P***D•. Screw mounting. Protruding selector. □ 5 mm (0.2 in.). ^[12]
VLSH2H5R	For VLS3P***R• and VLS3P016D1–VLS3P040D1. Ring mounting. Protruding selector. □ 5 mm (0.2 in.). ^[12] ^[13]
VLSH2H5RD	For VLS3P***R•. Ring mounting. Protruding selector with release, defeatable per UL 60947-4-1; □ 5 mm (0.2 in.). ^[12]
VLSH2H5RL	For VLS3P***R•, VLS3P063R1, VLS3P016D1–VLS3P040D1. Ring mounting. Low-profile protruding selector. □ 5 mm (0.2 in.).
VLSH3S7RD	For VLS3P063R2–VLS3P125R2, and VLS8M2. Screw mounting. Pistol grip with release, defeatable per 60947-4-1; □ 7 mm (0.3 in.). IEC IP66. ^[14]
VLSH4S5R	For VLS3P***R• and VLS3P***D•. Screw mounting. Protruding selector. 48 mm square. □ 5 mm (0.2 in.). ^[12]
Black, rotating	
VLSH1S5B	For VLS3P***R• and VLS3P***D•. Screw mounting. Recessed selector. □ 5 mm (0.2 in.). ^[12]
VLSH2S5B	For VLS3P***R• and VLS3P***D•. Screw mounting. Protruding selector. □ 5 mm (0.2 in.). ^[12]
VLSH2H5B	For VLS3P***R•, VLS3P063R1, VLS3P016D1–VLS3P040D1. Ring mounting. Protruding selector. □ 5 mm (0.2 in.). ^[12] ^[13]
VLSH2H5BD	For VLS3P***R•. Ring mounting. Protruding selector with release, defeatable per 60947-4-1. □ 5 mm (0.2 in.). ^[12]
VLSH2H5BL	For VLS3P***R•, VLS3P063R1, VLS3P016D1–VLS3P040D1. Ring mounting. Low profile protruding selector. □ 5 mm (0.2 in.).
VLSH2H5BPO	For VLS3P***R•, VLS3P063R1, VLS3P016D1–VLS3P040D1. Ring mounting. Lock On protruding selector. □ 5 mm (0.2 in.).
VLSH3S7BD	For VLS3P063R2–VLS3P125R2, and VLS8M2. Screw mounting. Pistol grip with release, defeatable per UL 60947-4-1; □ 7 mm (0.3 in.). ^[14]
VLSH2S5BC	For VLS8C• mechanical interlock mechanism (I-O-II). □ 5 mm (0.2 in.). ^[12]
VLSH4S5B	For VLS3P***R• and VLS3P***D•. Screw mounting. Protruding selector. □ 5 mm (0.2 in.). ^[12]
Accessories for Rear Mounting Control For VLSH3S7RD and VLSH3S7BD handles.	
VLSHA7	Adapter, □ 7 mm (0.3 in.) for VLS3P063R2–VLS3P125R2.

LK4 and GS2 Disconnect Switches

Table 8.59: Building a Complete GS or LK Switch

To build a complete GS or LK switch, order the following parts:

Choose a Switch

+

Shaft

+

Handle Assembly

+

Lugs if needed

600 A, LK4SU3N

Shaft 320 mm, GS2AE6

Black Handle, GS2AH150

Lugs Kit, GS1AW503

Example:

LK4SU3N (600 A non-fusible switch) + GS2AE6 (320 mm Style D shaft) + GS2AH150 (black/black, locking)

To add auxiliary contacts:

For front-mounted contacts order LK4AD30N (front-mounted auxiliary contact holder) + GS2AM110.

LK4 Nonfusible Disconnect Switches

NOTE: Switches in the shaded area are now available as kits. See Table 8.61.

Table 8.60: LK Nonfusible IEC Style Disconnect Switches

Disconnect Switches

The 9422 disconnect switches are the ideal selections for the PV String Combiner Box internal disconnect switch and control panel applications. These switches are designed for variable depth, flange mounting, traditional side mounting and bracket mounting applications providing complete flexibility in the PV string combiner box designs. The switches are compatible with 9422A handle operators and 9423 door mechanisms and are UL 98 recognized (E52369 Vol. 1, Sec. 18) and CSA certified. See [page 8-34](#), [page 8-37](#), and [page 8-38](#) for dimensional information.

Bracket Mounted Disconnect Switch

The 9422 Bracket Mount Disconnect Switch is designed for combiner boxes and control panel applications. The Bracket Mount Disconnect Switch is shipped with the switch and external handle assembled to a bracket, ready for quick installation. A protective trim plate is provided to prevent any mounting screws from being accessible from the front. The trim plate also provides an attractive installation feature. The switches are fully compatible with the 9423 closing mechanisms.

Table 8.76: 9422 Bracket Mounted Disconnect Switches

[1] See for ordering information for the cable operator.

[2] Variable depth only — no cable operator.

[3] 9422 R2 will extend maximum mounting depth 7 inches, see [Table 8.86](#) for information.

[4] Accommodates Class J fuses only.

[5] Switches are fixed-depth or adjustable depending on handle selection.

[6] Commercially available enclosures may not accept 9422TG1 and 2 operating mechanisms. Contact enclosure manufacturer for availability of enclosures for use with these switches.

[7] Right hand flange mounting only and requires a special enclosure.

[8] Variable in increments of 0.63 inches.

[9] Space saving design—Type J fuses mounted on the non-fused bracket.

Type A1

Handle Mechanisms

NOTE: Type 9422A1Y is a 6-in. yellow base with gray handle and red knob.

Handle Mechanisms

Handle Information for 9422 Disconnect Switches

The Handle Mechanism Kit contains all parts needed to mount the handle to the flange of the enclosure. Two flange mounting methods are offered. For right or left hand flange mounting use Types A1–A4 and Types A9–A10 kits. For right-hand mounting only, use Type A5–A8 handles. The type AP1 and AP2 handles are used on the PowerPact™ M and P operating mechanisms, 9422 RM1 and 9422 CMP. The dimensions are identical to 9422 A1.

9422 A1, A2, A3, A4, A9, and A10 Handles

Rod used only on the variable-depth mechanism

Handle Mechanisms

These handle mechanism kits are used with the circuit breaker variable depth and cable operating mechanisms. The kits contain all parts necessary for mounting the handle to the flange of the enclosure. Types A1–A4, A1Y, and AP1 are suitable for right or left-hand flange mounting.

NOTE: See Handle Information, page 8-34 for dimensional information.

Accessories

Class R Fuse Kits

When installed, this kit rejects all fuses except Class R. The kits are available for field installation. With rejection kit and Class R fuses installed, the switch is UL component recognized for use on systems with fault current up to 200,000 RMS symmetrical amperes.

Table 8.78: Class R Fuse Kits

Disconnect Switch Type	Switch Type	Fuse Clip Rating		Class R Kit Cat No.
		250 V	600 V	
30 A	TCF30	30	—	RFK03
	TCF33	60	30	RFK06
60 A	TDF60	60	30	RFK06

400 A	TG	9999R35 [16]
	TG	9999R36 [17]

Internal Barrier Kits

Provides an additional barrier that helps prevent accidental contact with live parts. Field-installed transparent barriers do not restrict visual inspection of the switch. Barriers provide IEC529 IP2X “finger safe” protection when door of enclosed disconnect switch is open. A convenient door allows use of test probes without accessing fuses and replacement of fuses without removing barrier. Barrier must be used with the skirt kit to enclose a panel mounted 9422 disconnect.

Disconnect Switches—400 A Type TG

Outline Dimensions and General Location

400 A Disconnect Switches Nonfusible and Non-Interchangeable Fuse Clip Type Fusible Switches

Table 8.87: Handle Mechanism—Types A7 and A8

NOTE: Commercially available enclosures may not accept type TG operating mechanisms. Contact the enclosure manufacturer for availability of enclosures for use with these switches.

Switch Type	B	X
TG1, 2	11.28 286	16.06 408

NOTE: B and X = Minimum to wall or barrier to ensure adequate wire bending space to lug surface when maximum wire size is used. Refer to NEC Article 430.10.

Table 8.88: Nonfusible and Fusible Switches

Dimension D = Distance from outside of flange to disconnect switch mounting surface.

For Type TG1 or TG2 with:

Type A7 or A8 adjustable depth handle mechanism	D =	15.87 403	to	19 483
In steps of		0.63 16		

NOTE: Copper lugs are standard on all Type TG disconnect switches.

* D = Mounting depth measured from the switch mounting surface to the surface of flange.

Dim. = $\frac{\text{in.}}{\text{mm}}$

9421 Type L
Circuit Breaker Operating Mechanism

Type L Circuit Breaker Mechanisms

Type L door-mounted, variable depth operating mechanisms feature heavy duty, all metal construction with trip indication. All mechanisms can be padlocked in the Off position when the enclosure door is open. Further, the handle assemblies can be locked Off with up to three padlocks, which also locks the enclosure when the door is closed. (The 3 in. handle accepts one padlock.) Complete kits are rated for NEMA 1, 3R, and 12 enclosures. They include a handle assembly, operating mechanism, and shaft assembly.

Table 8.92: Auxiliary and Alarm Switches for PowerPact™ Circuit Breakers

Description	B-Frame	H- and J-Frame	D- and L-Frame	D- and L-Frame
1 Auxiliary Switch 1a 1b	LV26950	S29450	S29450	S29450
2 Auxiliary Switch 2a 2b	—	2 x S29450	2 x S29450	2 x S29450
3 Auxiliary Switch 3a 3b	—	—	3 x S29450	3 x S29450

NOTE: The location of the accessory in the circuit breaker determines its function.

[1] Mounting depth measured in inches from circuit breaker mounting surface (control panel) to outside of enclosure door.

[2] These circuit breaker operating mechanisms must use the 9421LHP** or LCP** handles only.

[3] Type LW1 and LW4 include an 8 in. handle (9421LHP8) rather than a 6 in. handle.

[4] For a red handle and yellow bezel, add suffix RY to catalog number, e.g., 9421LH6RY.

[5] 3 in. handles are not recommended for use with these circuit breakers.

Dimensions for Type L Operating Mechanisms

Panel Drilling for PowerPact™ H and J Circuit Breaker
Operating Mechanisms: 9421LJ1, 9421LJ4, and 9421LJ7

Panel Drilling for PowerPact™ D and L Circuit Breaker
Operating Mechanisms: 9421LD1, 9421LD4, and 9421LD7

X: Minimum to wall or barrier to insure adequate wire bending space to lug surface when the maximum wire size is used. Refer to NEC 430-10.

Panel Drilling for PowerPact™ M and P Circuit Breaker
Operating Mechanisms: 9421LW1, 9421LW4, and 9421LW7

Door Drilling Dimensions

Table 8.93: Shaft Cutting Dimensions

Class	Type	Shaft Length Formula	H = Standard Shaft		H = Long Shaft	
			Min.	Max.	Min.	Max.
9421	LJ1, LJ4, LJ7	$L = H - 3.00$ (76)	5.5 (138)	10.75 (273)	5.5 (138)	21.63 (543)
9421	LD1, LD4, LD7	$L = H - 4.25$ (108)	7.25 (184)	12.06 (306)	7.25 (184)	22.63 (575)
9421	LW1, LW4, LW7	$L = H - 4.89$ (124)	7.19 (183)	11.63 (295)	7.19 (183)	22.25 (565)

**Flexible Cable Mechanism
9422CSJ30**

Flexible Cable Mechanisms

- For use with Class 9422 handle operators (you must select a 9422A• handle to complete the operating mechanism)
- Specially designed for tall, deep enclosures where placement flexibility is required

Table 8.94: Flexible Cable Mechanisms for use with Schneider Electric™ (formerly Merlin Gerin™) Circuit Breakers and PowerPact™ 3-Pole Circuit Breakers

Circuit Breaker Type	No. of Poles	Frame Size (A)	Cable Mechanism	
			Length	Catalog No.

			60 in.	9422CSF504
			120 in.	9422CSF104
MG-NSJ PowerPact D- and L-Frame	3	600	36 in.	9422CSJ30
			60 in.	9422CSJ50
			120 in.	9422CSJ10
MG-NSJ PowerPact D- and L-Frame	4	600	36 in.	9422CSJ304
			60 in.	9422CSJ504
			120 in.	9422CSJ104
			120 in.	9422CSJ104
PowerPact M- and P-Frame [6]	3	1200	48 in.	9422CMP40
			50 in.	9422CMP50
			120 in.	9422CMP10

NOTE: Refer to NEC Article 430-10 for minimum dimension X from circuit breaker top mounting hole to wall or barrier to ensure adequate wire bending space.
NOTE: Bend radius in cable must never be less than 6 inches. Electrical clearances must be maintained between cable and live electrical parts.

Dimensions: in. / mm

[6] Must use 9422AP1 or 9422AP2 Handle with this operating mechanism.

9422CSFD33

Dual Cable Operating Mechanisms for Square D™ Circuit Breakers

Dual Cable Operating Mechanisms are designed for use with Square D brand PowerPact™ B, D, H, J, and L circuit breakers through 600 A frame sizes. The cable mechanisms allow for a single handle operator, Class 9422A, to operate both circuit breakers. The cable mechanism is designed especially for tall, deep enclosures where placement flexibility is required. There are numerous cable arrangements to choose from to accommodate many applications.

Features

- Separate cables for each circuit breaker
- Rugged metal flange handle operator
- Maximized flexibility of circuit breaker placement for existing and new applications
- Control panel can be fed from two separate supply voltages (if required)
- Dual mechanism allows both separate supply voltages to be controlled by a single handle to improve security features

Table 8.95: Dual Cable Operating Mechanisms Selection

Circuit Breaker Type	Cable Length in. / mm (quantity)	Catalog Number	Frame Size (max.)
PowerPact B	120 in. / 3048 mm (2)	9422CSBD1	125 A
	36 in. / 914 mm (1)	9422CSBD35	
	60 in. / 1524 mm (1)	9422CSBD35	
	60 in. / 1524 mm (1-CSF 3 pole)	9422CSBD55

Handle Mechanisms

These handle mechanism kits are used with the circuit breaker variable depth and cable operating mechanisms. The kits contain all parts necessary for mounting the handle to the flange of the enclosure. Types A1–A4, A1Y, and AP1 are suitable for right or left-hand flange mounting.

Handle Mechanisms

NOTE: Type 9422A1Y is a 6-in. yellow base with gray handle and red knob.

Table 8.96: 9422 Disconnect Switch and Circuit Breaker Handle Mechanisms

Handle Depth (in.)	NEMA Type 1, 3, 3R, 4, 12 Enclosures	NEMA Type 4, 4X Stainless Steel Enclosures
	Cat. No.	Cat. No.
4 [9]	9422A3	9422A4
6 [9]	9422A1	9422A2
	9422A1Y [10]	
6 [11]	9422AP1	9422AP2
10 [12]	9422A9	9422A10
10	9422AP9	9422AP10
12 [13] [14]	9422A7	9422A8

NOTE: See [Handle Information](#), page 8-34 for dimensional information.

[7] Must use the 9422AP1 or 9422AP2 operating handle with this operating mechanism.

[8] Must use the 9422AP1 or 9422AP2 operating handle with this operating mechanism.

[9] Use with 30–200 A, 9422 switches and all circuit breaker mechanisms.

[10] Yellow base with gray handle and red knob.

[11] Use only with 9422RM1, 9422CMP, and PowerPact M and P operating mechanisms.

[12] Use with Type D2 remote or dual adapter kit.

[13] Use only with 400 A, 9422TG1 and 9422TG2 disconnect switch.

[14] Adjustable depth.

9422 Type R
Circuit Breaker Mechanism

Flange-Mounted, Variable-Depth Operating Mechanisms

Designed for installation in custom built control enclosures where main or branch circuit protective devices are required. All circuit breaker operating mechanisms are suitable for either right- or left-hand flange mounting, convertible on the job.

NOTE: The operating mechanisms do not include handle mechanisms. You must select a 9422A• handle to complete the installation.

Table 8.97: Variable-Depth Operating Mechanisms for Use with Schneider ElectricTM Brand Circuit Breakers (Formerly Merlin GerinTM Brand)

Use with				Operating Mechanism (Does Not Include Handle Mechanism)
Circuit Breaker Frame Size	No. of Poles	Frame Size A	Variable Depth Mtg. Range (in.) [15]

[1] Series Ratings listed at higher system voltages apply to lower system voltages (Example: 240 3P/3W covers 208Y/120 3P/4W).

[2] Short Circuit tests are conducted at 100–105% of the maximum rated voltage of the panelboard.

[3] Please consult the NQ/NQM Panelboards Information Manual (80043-712-06) for additional information, including series ratings with obsolete circuit breakers.

[4] Where LG is shown, LJ and LL can be used.

[5] Unless otherwise noted, main breakers can be applied at the maximum available amperage rating.

[6] Suffixes HID, SWD, and SWN may also be applied to the applicable branch circuit breakers shown above.

[7] Where QO(B) circuit breakers are shown above, QO(B)H, QO(B)VH, and QH(B) circuit breakers may also be used.

[8] Two-pole CAFI circuit breakers cannot be used on 208Y/120V systems.

[9] Series Ratings listed at higher system voltages apply to lower system voltages (Example: 240 3P/3W covers 208Y/120 3P/4W).

[10] Short Circuit tests are conducted at 100–105% of the maximum rated voltage of the panelboard.

[11] Please consult the NQ/NQM Panelboards Information Manual (80043-712-06) for additional information, including series ratings with obsolete circuit breakers.

[12] Where LG is shown, LJ and LL can be used.

[13] Unless otherwise noted, main breakers can be applied at the maximum available amperage rating.

[14] Suffixes HID, SWD, and SWN may also be applied to the applicable branch circuit breakers shown above.

[15] Where QO(B) circuit breakers are shown above, QO(B)H, QO(B)VH, and QH(B) circuit breakers may also be used.

[16] Two-pole CAFI circuit breakers cannot be used on 208Y/120V systems.

- The fuse used in this UL test is an envelope (umbrella) fuse. This fuse is designed as a "worst case" fuse. Thus, no matter what manufacturer's fuse is used, the Square D™ brand circuit breaker is protected.
- The line side fused switch may be in a separate enclosure or in the same enclosure as the loadside breaker. A line side fused switch may be a submain, integral main, or remote main. A load side breaker may be a branch, submain, or an integral main used on the load side of a remote main. This series combination short circuit current rating shall not exceed that of the line side fused switch. The charts apply to Square D™ brand load side breakers only. However, the line side fuse ratings are independent of the fuse manufacturer.
- Not applicable to Corner Grounded Systems.
- Limiters used in Square D™ brand DSL and DSL II fused power circuit breakers are not class L fuses and do not have series ratings.

[22] For indicated circuit breakers rated less than this maximum voltage. The indicated short circuit current rating also applies, but at the voltage rating of the circuit breaker.

Selection Procedure for NQ Merchandised Panelboards

- Review maximum electrical system voltage, ampacity, and available fault current, and determine the type of panelboard that is desired (see tables [Table 9.1–Table 9.4](#)).
- Identify type (plug-on or bolt-on) and total quantity of branch circuit breaker poles and panel spaces required (see Digest sections 7 and 9 for catalog numbers).
- Select proper main lug interior (from [Main Circuit Breaker Interiors—Will accept plug-on and bolt-on circuit breakers, page 9-12](#) or [Table 9.7 NQ 14-inch-wide Main Lug Interiors, page 9-14](#)) or:
 - Select main circuit breaker interior and main circuit breaker adapter kit (from [Main Circuit Breaker Interiors—Will accept plug-on and bolt-on circuit breakers, page 9-12](#) or [Table 9.8 Main Circuit Breaker Interiors—Accepts Plug-On and Bolt-On Branch Breakers, page 9-14](#)), based upon the equivalent number of poles and ampere rating.

NOTE: Interiors include solid neutral and are field convertible to top-feed.

 - If a main circuit breaker interior was selected, select a vertical main circuit breaker (or fuse) from the PowerPacT H-, J-, L- Q-, or LA/LH frame pages in Section 7 of the Digest, or a QOB or QOB-VH back-fed main circuit breaker in Section 9 of the Digest.
- Select ground bars from tables [Table 9.9](#) or any non-standard neutral assemblies (i.e., 200% neutral for non-linear loads) from [Table 9.38](#).
 - Please note that an aluminum ground bar kit is included with NQ Panelboard Interiors.
- Select any required sub-feed circuit breakers, sub-feed lugs (SFL), or feed-through lugs (FTL) kits:
 - Subfeed circuit breaker (SFB), Sub-feed lugs (SFL) or feed-through lugs (FTL) kits: [Table 9.39](#) in the NQ Accessories sections.
 - For subfeed circuit breakers select a PowerPacT H-, J-, L-, or Q-frame circuit breaker from Section 7 of the Digest.
- Determine the total enclosure height required by adding requirements from interior, main circuit breaker, neutrals and ground bars, SFL, FTL, or sub-feed circuit breaker.
- Select enclosure from the tables [Table 9.5–Table 9.9](#), [Table 9.38–Table 9.42](#), [Table 9.24](#), and [Table 9.26](#).
NEMA Type 1—select box and front (cover) catalog number corresponding to interior catalog number.
NEMA Type 3R, 5, 12—select enclosure. Cover for Type 3R, 5, 12 is included with the enclosure.
- Select the branch circuit breakers to be installed in the panel.
For NQ panelboards use QO (VH) or QH circuit breakers from Section 7 of the Digest, QOB(VH), or QHB circuit breakers from Section 9 of the Digest.
- Select options and accessories from tables [Table 9.7–Table 9.44](#).
NOTE: Additional NF and NQ options may be found in the [Supplemental and Obsolescence Digest, Section 4](#).

NQ Merchandised Selection Example

208Y/120 Vac, 3Ø4W, 10 kA SCCR, 225 A, MLO, NEMA Type-1, surface-mount, bolt-on, branch circuit breakers, main sub-feed lugs

Branches	Table No.	Catalog Number	Spaces

Note: All NQ Merchandised Panelboard interiors include the following: a NQFP15 bag of blank filler plates; a neutral bonding strap; an NQ information manual; a NEMA instruction booklet; and a sheet of circuit numbers.

- [1] DC voltage applications require installation of DC rated QO(B) circuit breakers
- [2] Please note that some local building codes limit panelboards to 42 circuits, including those that reference 2005 or earlier version of NFPA 70.
- [3] Accepts all QO(B) shown in Tables in Sections 7 and 9. Branch circuit breaker trip ampacity cannot exceed panelboard mains rating. 175 A and 200 A circuit breakers may only be installed in single phase 400 A and 600 A NQ Panelboards. Tandem circuit breakers may not be installed.
- [4] "C" suffix indicates copper bussing.
- [5] Enclosure height may increase if accessories including alternate neutral lugs, condo riser neutral assemblies, feed-thru lugs, or sub-feed lugs are installed. 26 in. wide enclosures and trim fronts are required if condo riser neutral assemblies are installed.
- [6] Wall mounting brackets add 0.4 inches to back of MHxxWP enclosures.
- [7] Nominal interior dimensions, see PBA600 for details.
- [8] D9 suffix indicates the 8.75 in. Deep Enclosure required for panelboards wit PowerPac™ L Main Breaker, Switch, or Sub-Feed Breaker. See PBA604 for dimensional details.
- [9] Add "F" for flush mount, "S" for surface mount.
- [10] Three point latch trim fronts are required for enclosures on panelboards with QO2175, QO2200, QO2175VH, or QO2200VH branch circuit breakers. These breakers take four pole spaces in single phase NQ interior.
- [11] Enclosure includes trim kit. Nominal interior dimensions, see PBA711 for details.
- [12] Vented Type 3R enclosure with three point latch door. Required for outdoor applications with two sub-feed breakers, or sub-feed breaker with trip current >150A. NEMA 3R enclosures must be bottom fed, and a NQ12RDE kit should also be selected. Interior nominal dimensions, see PBA603WP for details.
- [13] For the NQ14-inch-wide panelboard offer, See NQ 14-inch-wide—240 Vac, 48 Vdc.
- [14] Use only if the Local Jurisdiction where this panelboard interior is being applied has adopted the 2008 NFPA 70—National Electrical Code® (NEC®), which allows single panelboard interiors greater than 42 circuits.
- [15] NEMA 3R, 5, or 12 enclosures must be bottom fed, when selected, an NQ12RDE kit should also be selected. See [NQ Merchandised Accessories](#), page 9-23.

^[16] DC Voltage applications require installation of DC rated QO(B) circuit breakers.^[17] Please note that some local building codes limit panelboards to 42 circuits, including those that reference 2005 or earlier version of NFPA 70.^[18] Accepts all QO(B) shown in Tables in Sections 7 and 9. Branch circuit breaker trip ampacity cannot exceed panelboard mains rating. 175 A and 200 A circuit breakers may only be installed in single phase 400 A and 600 A NQ Panelboards. Tandem circuit breakers may not be installed.^[19] "C" suffix indicates copper bussing.^[20] Enclosure height may increase if accessories including alternate neutral lugs, condo riser neutral assemblies, feed-thru lugs, or sub-feed lugs are installed. 26 in. wide enclosures and trim fronts are required if condo riser neutral assemblies are installed.^[21] Wall mounting brackets add 0.4 inches to back of MHxWP enclosures.^[22] Please select the appropriate Main Breaker Barrier for UL Service Entrance applications (see [US Service Entrance Barriers \(required by NFPA 70—National Electrical Code® \(NEC®\) 2017\)](#), page 9-25).^[23] Circuit breaker interrupt ratings, see the table for each circuit breaker range in Section 7.^[24] Nominal interior dimensions, see PBA600 for details.^[25] D9 suffix indicates the 8.75 in. Deep Enclosure required for panelboards with PowerPac T Main Breaker, Switch, or Sub-Feed Breaker. See PBA604 for dimensional details.^[26] Replace () with "F" for flush mount, or "S" for surface mount.^[27] Three point latch trim fronts are required for enclosures on panelboards with QO2175, QO2200, QO2175VH, or QO2200VH branch circuit breakers. These breakers take four pole spaces in single phase NQ interiors.^[28] Enclosure includes trim kit. Nominal enclosure dimensions, see PBA711 for details.^[29] Vented Type 3R enclosure with three point latch door. Required for outdoor applications with PowerPac T main breaker, two sub-feed breakers, or sub-feed breaker with trip current >150 A. NEMA 3R enclosures must be bottom fed. Interior nominal dimensions, see PBA603WP for details.^[30] For the NQ14-inch-wide panelboard offer, See NQ 14-inch-wide—240 Vac, 48 Vdc, page 9-14.^[31] Pole spaces shown are available for branch circuits, with spaces deducted for the back-fed main breaker.^[32] Do not select a back-fed main for panels to be "Suitable for use as UL service equipment." Select a H frame circuit breaker (and associated main circuit breaker kit) from the list for 225 interiors, for panels to be "Suitable for use as UL service equipment."^[33] QOB2110VH, QOB2125VH, or QOB2150VH take four pole spaces in NQ single phase interior.^[34] For single phase applications, order a 3-pole breaker. Example: HDL36100.^[35] Available for 125–400 A applications. Please order short handle circuit breaker (i.e., LAL36400MB).

[36] For the NQ14-inch-wide panelboard offer, See NQ 14-inch-wide—240 Vac, 48 Vdc.

[37] Pole spaces shown are available for branch circuits, with spaces deducted for the back-fed main breaker.

[38] Do not select a back-fed main for panels to be "Suitable for use as UL service equipment." Select a H frame circuit breaker (and associated main circuit breaker kit) from the list for 225 interiors, for panels to be "Suitable for use as UL service equipment."

[39] QOB2110VH, QOB2125VH, or QOB2150VH take four pole spaces in NQ single phase interior.

[40] Available for 125–400 A applications. Please order short handle circuit breaker (i.e., LAL36400MB).

[41] D9 suffix indicates the 8.75 in. Deep Enclosure required for panelboards wit PowerPacT L Main Breaker, Switch, or Sub-Feed Breaker. See PBA604 for dimensional details.

NQ 14-inch-wide—240 Vac, 48 Vdc^[42]

Features

14-inch-wide NQ panelboards are available for those customers whose equipment space is limited. Developed with customer input, Square D™ brand NQ panelboards are built to last, featuring innovations for ease of installation and durability.

- 240 Vac, 48 Vdc maximum
- 225 A maximum main circuit breaker or main lugs
- 100 A maximum branch circuit breakers
- Visi-Trip™ indication on branch circuit breakers
- 10,000–65,000 A Short Circuit Current Rating (SCCR)
- Interiors supplied with silver flashed copper bus as standard
- Interiors accept bolt-on and plug-on branch circuit breakers
- Three-phase, four-wire, and single-phase, three-wire interiors available
- Panelboards available with Mono-Flat™ front
- May be suitable for use as service entrance equipment with neutral bonding kit and main circuit breaker barrier installed
- Branch circuit filler plates provide fast and easy installation
- Both fully and series-rated systems are available

Other Accessories	
Filler plates (15 per package)	NQFP15

[42] DC voltage applications require installation of DC rated QO(B) circuit breakers.

[43] Add "F" for flush mount, "S" for surface mount.

[44] Select a Q or H frame circuit breaker, HJQLLC barrier (and associated main circuit breaker kit) from the list for 225 interiors, for panels to be "Suitable for use as UL service equipment."

[45] All 14" W boxes come with blank endwalls.

[46] Pole spaces shown are available for branch circuits, with spaces deducted for the back-fed main circuit breaker.

QOB Bolt-On Circuit Breakers with Visi-Trip™ Indicator for NQ Panelboards

NOTE: NQ panelboards also accept QO plug-on circuit breakers, see tables in [Section 7, page 9-15](#) of the Digest. NQ panelboards with 175 A or 200 A QO breakers require three point latch trim fronts.^[47]

[47] For QO plug-on circuit breakers, see the tables starting on [Section 7, page 9-15](#) of the Digest.

[48] 10–30 A circuit breakers are suitable for use with 60 °C or 75 °C conductors. 35–60 A circuit breakers are suitable for use with 75 °C conductors.

[49] Do not connect to more than 250 feet of load conductor for the total one-way run to prevent nuisance tripping.

[50] May be applied in 208Y/120 Vac systems.

[51] Suitable only for feeding 240 Vac and 208 Vac two-wire loads. Does not contain load neutral connection.

[52] Recommended for applications where high initial inrush may occur and for individual dimmer applications.

[53] UL Listed as SWD (switching duty) rated suitable for switching 120 Vac fluorescent lighting loads.

[54] Available in single pole construction and can be mounted in any single pole space which will accept a standard QOB. These circuit breakers can be turned ON or OFF or RESET with a special key (Catalog No. QOK10) included with the circuit breaker. These circuit breakers are UL Listed and available as shown in the table.

[55] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

[56] UL Listed 5,000 AIR on 3Ø corner grounded delta systems.

[57] May be applied in 208Y/120 Vac systems.

[58] DC Rating is not available on indicated products.

[59] UL Listed as SWD (switching duty) rated suitable for switching 120 Vac fluorescent lighting loads.

[60] UL Listed as HACR type for use with air conditioning, heating, and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[61] QOB2150VH uses 4 pole spaces. QOB3110VH, QOB3125VH, and QOB3150VH each use 6 pole spaces. 40A maximum circuit breaker mounted opposite. Use with 75 °C wire only.

[62] UL Listed for use on circuit feeding fluorescent and High Intensity Discharge (HID) lighting systems such as mercury vapor, metal halide, or high pressure sodium. These circuit breakers are physically interchangeable with QOB circuit breakers.

Table 9.13: QO/QOB Circuit Breaker Wire Sizes

NOTE: For accessories, see Accessories for QO/QOB Circuit Breakers, in Section 7.

Single Phase 400 or 600 A NQ Panelboards now accept 150 A, 175 A, and 200 A Two Pole QO Plug-on Branch Circuit Breakers.

Each breaker takes four pole spaces. Installation into three phase interiors is not allowed as it may create a phase to phase short circuit.

One NQ200AN neutral lug kit should be installed for each pair of 175 or 200 A QO breakers if a neutral termination is required.

- One Q1150AN lug kit should be installed for each 110 A to 150 A QO(B) circuit breaker, if a neutral termination is required.

Table 9.15: High Ampacity Plug-on Two Pole QO Branch Circuit Breakers

Catalog Number	Ampere Rating	AIC Rating
QO2150	150	10 kA
QO2150VH	150	22 kA
QO2175	175	10 kA
QO2200	200	
QO2175VH	175	22 kA
QO2200VH	200	

NOTE: May only be installed on Single Phase 400 A or 600 A NQ Panelboards with three point latch trim fronts.

A maximum of four 150 A, 175 A, or 200 A QO (VH) plug-on branch circuit breakers may be installed in NEMA 1 enclosures. These enclosures require NCxxV()3P three point latch trim fronts, as listed in Table 9.5 Main Lug Interiors, page 9-11 or Main Circuit Breaker Interiors, page 9-12.

One 150 A, 175 A, or 200 A QO (VH) plug-on branch circuit breaker may be installed in 8.75" deep MHxxD9VWP NEMA 3R enclosures, as listed in Table 9.5 Main Lug Interiors, page 9-11 or Main Circuit Breaker Interiors, page 9-12.

[63] UL Listed as HACR type for use with air conditioning, heating, and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.

[64] QO arc-fault circuit breakers provide branch feeder protection (for example, QO115AFI) or combination protection (for example, QO115CAFI) as required by the NEC and local code adoption, and comply with UL 1699.

[65] 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.

Sub-feed Circuit Breakers

Main lugs or main circuit breaker interior—1Ø or 3Ø.

Maximum 1 circuit breaker per 225 A main lug or 250 A main circuit breaker panelboard, 2 PowerPacT H-, J-, or Q-frame sub-feed circuit breakers may be installed on a 400–600 A panelboard.

Panelboards in MHxxWP NEMA Type 3R/5/12 enclosures are limited to one 150 A maximum sub-feed breaker.

- Panelboards in vented MHxxD9VWP NEMA 3R enclosures may have two 225 A maximum sub-feed circuit breakers. A single 600 A maximum sub-feed circuit breaker may be factory installed in these new enclosures.

Table 9.19: Sub-feed Circuit Breakers for NQ Panelboards^[71]

Interior Rating	Sub Feed Circuit Breakers ^[71]			Space Factor
	Ampacity	Poles	MCCB Frame

	110–150	2 or 3	HD, HG, HJ, HL, HR ^[72] , ^[74]	
	150–225	2 or 3	JD, JG, JJ, JL, JR ^[73] , ^[74]	
	125–400	2 or 3	LA / LH	
	125–600	3	LG, LJ, LL	18 in. ^[75] 18 in. ^[76]

PowerPacT H, J, & L frame circuit breakers are also available - see Tables PowerPacT Interrupting Ratings, and Common Catalog Numbering System, Section 7.

^[66] Factory Assembled Interiors are rated for trip current of Main Breaker / Switch.

^[67] Three Phase only.

^[68] Copper only.

^[69] D9 8.75" deep enclosures are required for PowerPacT L Main Circuit Breaker, Switch, or Sub-Feed Circuit Breaker. Reference PBA713x drawing for more dimensional information, where x may be A, HR, HRT, or T depending upon the choice of options and enclosure.

^[70] Feed-thru lugs and compression lugs available factory assembled only. These add 6 - 12 inches to enclosure length. Please reference PBA755 or PBA755T for more complete dimensional information, where x may be A, HR, HRT, or T depending upon the choice of options and enclosure.

^[71] See Digest Section 7 for Interrupting Ratings and Catalog Numbers of PowerPacT H-, J-, L-, Q- and LA/LH frame MCCBs.

^[72] Three pole HD, HG, HR MCCBs are installed for single phase sub-feed circuit breaker applications.

^[73] Three pole JR MCCBs are installed for single phase sub-feed circuit breaker applications.

^[74] One or two sub-feed circuit breakers may be selected.

^[75] NQ Panelboards with LA or LH sub-feed circuit breaker and LG, LJ, or LL main circuit breaker are supplied with 26" wide, 8.75" deep enclosures and have Condo Riser neutral assemblies.

^[76] Space Factor for LG, LJ, or LL is 24" when it is installed onto a main circuit breaker panelboard or a main lugs panelboard with a Condo Riser neutral assembly. These panelboards are supplied with 26" wide, 8.75" deep enclosures and have Condo Riser neutral assemblies.

^[77] Bottom feed only in NEMA Type 3R enclosures. NEMA 3R applications with sub-feed circuit breakers greater than 150A require 8.75" deep, 26" wide enclosure - reference PBA603WP.

^[78] Reference PBA701x drawing for more dimensional information. PBA701x - x may be A, E, HR, HRT, or T, depending upon choice of options and trim front.

^[79] Reference PBA707x drawing for more dimensional information. PBA707x - x may be A, E, HR, HRT, or T, depending upon choice of options and trim front.

^[80] Reference PBA709x drawing for more dimensional information. Bottom feed only in NEMA Type 3R enclosures. NEMA 3R applications with sub-feed circuit breakers greater than 150A require 8.75" deep, 26" wide enclosure - reference PBA603WP. PBA709x - x may be A, E, HR, HRT, or T, depending upon choice of options and trim front.

^[81] Reference PBA710x drawing for more dimensional information. Bottom feed only in NEMA Type 3R enclosures. NEMA 3R applications with sub-feed circuit breakers greater than 150 A require 8.75" deep, 26" wide enclosure - reference PBA603WP. PBA710x - x may be A, E, HR, HRT, or T depending upon choices of options and trim front.

^[82] LG, LJ, or LL Main Circuit Breaker requires D9 8.75" enclosure. Reference PBA713x or PBA755x drawing for more dimensional information. PBA###x - x may be A, E, HR, HRT, or T, depending upon choice of options and enclosure.

^[83] Feed-thru lugs and compression lugs available factory assembled only. These add 6 - 12 inches to enclosure length.

^[84] NQ Panelboards with PowerPacT L Main Circuit Breaker and PowerPacT L Sub-Feed Circuit Breaker are supplied with Condo Riser Neutral Assemblies, and require 26" wide, 8.75" deep enclosures.

[86] FA - Factory Assembled Panelboards

[87] 600 A main circuit breaker panelboards with PowerPacT L sub-feed circuit breakers are supplied with Condo Riser Neutral Assemblies and require 26" wide, 8.75" deep enclosures.

[88] Lug Wire Ranges shown meet NEC wire bending space. Lugs may accept larger cables if enclosure size is increased.

[89] 200% Neutrals not available on Column Width interiors.

[90] Panelboards with 200% rated neutrals are not available with 250 A J-frame main circuit breakers or integral lighting contactors.

[91] Installation of 350 kcmil neutral conductors possible if enclosure is extended to increase wire bending space.

[92] Installation of 750 kcmil neutral conductors possible if enclosure is extended to increase wire bending space.

[93] Select 26" Wide Condo Riser Panel under Structure Options in the SE Advantage Panelboard Product Selector.

[94] Space factor is the additional enclosure length required for selected option. Additional required length may be reduced or eliminated if load end options like feed-thru lugs or sub-feed circuit breakers require a space factor of at least 12 inches.

[95] May be used with a 84 circuit interior when a SurgeLoc SPD is installed. No more than 72 branch circuit breaker poles may be installed.

Table 9.43: Add-on Lugs for Neutral Bars or Ground Bars

Catalog Number	Lug Wire Range (AWG - kcmil)	Wire Ampere
QO70AN ^[105]	#12 to #2 Al or #14 to #4 Cu	70 A
NQ100AN ^[105]	#14 to #2/0 Al or Cu	80 - 100 A
Q1150AN ^[106]	#1 to #4/0 Al or Cu	110 - 150 A
NQ200AN ^[105]	(2) #4 to 300 kcmil Al or Cu	175 - 200 A

NOTE: A maximum of 4 lugs may be added to 18 circuit neutral assemblies.

A NQ200AN is required to provide a neutral terminal for every two 175 - 200A QO (VH) circuit breakers.

^[98] For 225 A panel with SFL, FTL, or SFB.

^[99] Not to be used with SFL, FTL, or SFB. These combinations are factory assembled only.

^[100] The final character L indicates the kit is used for Low circuit count interiors 30 and 42.

^[101] 3-pole HD, HG or HR sub-feed circuit breaker should be selected for single phase 110 - 150 A applications.

^[102] The final character H indicates the kit is used for High circuit count interiors 54, 72, and 84.

^[103] PowerPacT L Circuit Breakers require 8.75" deep enclosures.

^[104] Requires box longer than available box offer.

^[105] Requires two standard termination spaces on Neutral or Ground bar.

^[106] Requires three standard termination spaces on Neutral or Ground bar.

Lug Cover Kits for U.S. Service Entrance

Panelboards intended for use as service equipment, require a barrier over live field connected load terminals. Please select the appropriate barrier from the table below, based upon the main circuit breaker.

Table 9.46: US Service Entrance Barriers (required by NFPA 70—National Electrical Code® (NEC®) 2017)

Catalog Number	Contents	Description	Applicable Panelboards
LALLC		LA/LH Line Lug Cover	NQ, NF, I-Line [109]
HJQLLC		H/J/Q Line Lug Cover	NQ, NF
PPLLC		PowerPacT L Line Lug Cover	NQ, NF, I-Line [109][110]
EDBS		E Frame Line Lug Cover	NF [111]
PPPLLC		PowerPacT P Line Lug Cover	NF

[107] When selecting a panelboard with SurgeLoc SPD, an additional 12 circuit positions (6 adjacent mounting spaces per side) are occupied. For example, if the desired number of circuits is 30, refer to page 9-11 and page to select the NQ442L2/NQ442L2C interior and corresponding Box and Trim.

[108] 96 space interiors are available factory assembled when SurgeLoc SPDs are to be installed in 84 circuit NQ panelboards.

[109] For I-Line applications, only to be used on vertical main circuit breakers. Not to be used on backfeed main circuit breakers.

[110] For I-Line applications, requires the use of the Medium Terminal Shield LTSM3P Installed on circuit breaker, not included in these kits.

[111] Order 1 kit for each 3 pole breaker required (each kit contains three one pole covers).

Factory-installed IP2X barriers for NQ Panelboards reduce the risk of accidental contact with energized components if a cover is removed.

Features

- Plastic barriers cover Mains (lugs or circuit breaker), copper bus, and branch circuit breakers
 - IP2X per IEC 60529 on all ungrounded parts
- 240 Vac maximum
- Three phase (Wye and Delta)
 - NEMA 1, 2, 3R, 4/4X, 5, or 12 (up to 225 A)
 - NEMA 1 panelboards up to 400 A
- Branch circuits up to 100 A: 1-, 2-, and 3-pole
- Selectively coordinated up to 30k AIC
- Available with main lugs, or PowerPacT Q-, H-, J-frame, and LA/LH main circuit breakers
- Series rated up to 200 kAIC with integral main circuit breaker—fully rated up to 65 kAIC
- Sub feed lugs up to 225 A
- cULus Listed to UL 67 and CSA C22.2, No. 29

New Enhanced IP2X design meets IEC 60529^[112] with or without a branch circuit breaker installed.

- Unique jaw kit allows QOB branch circuit breakers to plug onto NQ interior with IP2X barriers

Two factory-assembled constructions (refer to Data Bulletin 1640BR1701 for additional information):

Standard IP2X per IEC 60529
(Bus Finger Covers Empty Spaces)

- 1 Main Lug Cover
- 2 Main Breaker Line Side Cover
- 3 Main Breaker Load Side Cover
- 4 Neutral Cover
- 5 Low Amp QO(B) Cover
- 6 High Amp QO(B) Cover
- 7 Bus Finger Cover

Enhanced IP2X per IEC 6052
(Bus Covered Without Branch Circuit Breaker)

[112] International Electrotechnical Commission (IEC)
a. IEC 60529: 1989+AMD1:1999+AMD2:2013 CSV Consolidated version.- Degrees of Protection Provided by Enclosures (IP Code)

NQMLLSC	1	Main Lugs IP2X Cover
NQNCC	1	NQ IP2X Neutral Cover
QO1PJ15	15	QOB Jaw Kit ^[116]

^[113] QOB circuit breakers and jaw kits required for Enhanced IP2X design.

^[114] Available only in standard IP2X design.

^[115] Used only with Standard IP2X design.

^[116] Used only with Enhanced IP2X design.

Selection Procedure for NF Merchandised Panelboards

- Review maximum electrical system voltage, ampacity, and available fault current, and determine the type of panelboard is desired (see [NF and I-Line™ Panelboards](#), page 9-5).
- Identify total quantity of branch circuit breaker poles and panel spaces required (see Digest sections 7 and 9 for catalog numbers).
- Select proper main lug interior from [NF Main Lug Interiors](#), page 9-29 or:
 - Select main circuit breaker interior and main circuit breaker adapter kit from [NF Main Circuit Breaker Interiors - 600Y/347 Vac Max.](#), page 9-30 based upon the equivalent number of poles and ampere rating.
NOTE: Interiors include solid neutral and are field convertible to top-feed.
 - If a main circuit breaker interior was selected, select a vertical main circuit breaker (or fuse) from PowerPacT H-, J-, L-, or LA/LH frame circuit breakers pages in Section 7 or a back-fed E-frame circuit breaker from Section 9 of the Digest.
- Select ground bars from tables [Table 9.82](#) and any non-standard neutral assembly (i.e., 200% neutral for non-linear loads) from [Table 9.77](#).
 - Please note that an aluminum ground bar kit is included with NF Panelboard Interiors.
- Select any required sub-feed circuit breakers, sub-feed lugs (SFL), or feed-through lugs (FTL) kits:
 - Subfeed circuit breaker (SFB), sub-feed lugs (SFL) or feed-through lugs (FTL) kits: [Table 9.78](#) in the NF Accessories sections.
 - For subfeed circuit breakers, select PowerPacT H-, J-, L- frame circuit breaker from Section 7 of the Digest.
- Determine the total enclosure height required by adding requirements from interior, main circuit breaker, neutrals, SFL, FTL, or sub-feed circuit breaker.
- Select enclosure from the tables [Table 9.76](#), [Table 9.79](#), and [Table 9.80](#).
NEMA Type 1—select box and front (cover) catalog number corresponding to interior catalog number.
NEMA Type 3R, 5, 12—select enclosure. Cover for Type 3R, 5, 12 is included with the enclosure.
- Select the branch circuit breakers to be installed in the panel.
For NF panelboards, use E-frame circuit breakers from [E-frame Thermal-magnetic \(480Y/277 Vac Max\) Maximum allowable branch breaker pair combination = 170 A, 100 A Maximum at 600Y/347 Vac](#), page 9-31.
- Select options and accessories from tables [Table 9.77–Table 9.82](#).
NOTE: Additional NF and NQ options may be found in the [Supplemental Digest](#), Section 4.

NF Merchandised Selection Example

480Y/277 Vac, 3Ø4W, 25 kA SCCR, fully rated, copper bus, 100 A, main circuit breaker, Type 1, flush-mount, bolt-on, branch circuit breakers

Branches	Table No.	Catalog Number	Spaces
(13) 20/1		EGB14020	13
one 40/2		EGB24040	2
one 50/3		EGB34050	3

Total 18 spaces

			Min. Box Height
125 A MLO Cu Bus Interior	page 9-29	NF418L1C	—
With Main Circuit Breaker Adapter Kit	page 9-30	N150MH	38 inches
Main Circuit Breaker	Section 7	HGL36100	—
Enclosure (Box)	page 9-30	MH38	—
Front (Cover)	page 9-30	NC38F	—

Total 38 inches

Note: All NF Merchandised Panelboard interiors include the following: a NFFP15 bag of blank filler plates; a neutral bonding strap; an NF information manual; a NEMA instruction booklet; and a sheet of circuit numbers.

[1] Order EDB, EGB, or EJB branch circuit breakers separately. Maximum allowable branch circuit breaker pair combination is 170 A.

[2] Please note that some local building codes limit panelboards to 42 circuits, including those that reference 2005 or earlier version of the US NEC.

[3] "C" suffix indicates copper bussing.

[4] Wall mounting brackets add 0.4 inches to back of MHxxWP enclosures.

[5] Nominal interior dimensions, see PBA600 for details.

[6] Add "F" for flush mount, "S" for surface mount.

[7] Enclosure includes trim kit. NEMA 3R, 5, 12 enclosures must be bottom fed. Nominal enclosure dimensions, see PBA555 for details.

[8] Vented Type 3R enclosure with three point latch door required for outdoor applications with two sub-feed breakers, or sub-feed breaker with trip current >150A. NEMA 3R enclosures must be bottom fed, when selected a NF12RDE kit should also be selected. Enclosure nominal dimensions, see PBA603WP for details.

[9] NF panelboards without neutral connections may be applied to 3 phase, 4 wire grounded Wye systems, except at the Service Entrance.

[10] NEMA 3R, 5, 12 enclosures must be bottom fed, when selected a NF12RDE kit should also be selected.

[11] 800 A interiors with main circuit breaker require 8.75 inch deep, 26 inch wide enclosures.

NF Main Circuit Breaker Interiors - 600Y/347 Vac Max.

[12] Order EDB, EGB, or EJB branch circuit breakers separately. Maximum allowable branch circuit breaker pair combination is 170 A.

[13] "C" suffix indicates copper bussing.

[14] Wall mounting brackets add 0.4 inches to back of MHxWP enclosures.

[15] Please select the appropriate Main Circuit Breaker Barrier for UL Service Entrance applications (see [US Service Entrance Barriers \(required by NFPA 70—National Electrical Code® \(NEC®\) 2017\)](#), page 9-25).

[16] Select the appropriate PowerPacT main circuit breaker from Section 7.

[17] Nominal interior dimensions, see PBA600 for details.

[18] D9 suffix indicates the 8.75 in. Deep Enclosure required for panelboards with PowerPacT L main circuit breaker or sub-feed circuit breaker. See PBA604 for dimensional details.

[19] Add "F" for flush mount, "S" for surface mount.

[20] Enclosure includes trim kit. NEMA 3R, 5, 12 enclosures must be bottom fed. Nominal interior dimensions, see PBA555 for details.

[21] Vented Type 3R enclosure with three point door. Must be bottom fed. Required for outdoor applications with PowerPacT L main circuit breaker, two sub-feed circuit breakers, or sub-feed circuit breaker with trip current >150A. Interior nominal dimensions, see PBA603WP for details.

[22] NF panelboards without neutral connections may be applied to 3 phase, 4 wire grounded Wye systems, except at the Service Entrance.

[23] Pole spaces shown are available for branch circuits, with spaces deducted for the back fed main circuit breaker.

[24] Back-fed EDB 125 A 3 pole main circuit breaker must be ordered separately and field installed. Maximum breaker rating opposite is 20 A.

[25] Please note that some local building codes limit panelboards to 42 circuits, including those that reference 2005 or earlier version of NFPA 70.

[26] Available for 125 A–400 A applications. Please order short handle circuit breaker (i.e., LAL36400MB).

[27] D9 suffix indicates the 8.75 in. Deep Enclosure required for panelboards with PowerPacT L main circuit breaker or sub-feed circuit breaker. See PBA604 for dimensional details.

[28] Three point latch trim front; required for enclosures on panelboards with PowerPacT L Main Circuit Breaker, Switch, or Sub-Feed Circuit Breaker

[29] 800 A interiors with main circuit breaker require 8.75 inch deep, 26 inch wide enclosures.

NOTE: All EDB, EGB, and EJB circuit breakers are UL Listed as HACR Type. For 50°C calibration, use a CA suffix. NF branch circuit breakers are fungus proof as standard.

[30] Maximum allowable branch breaker pair combination = 170 A.

[31] 100 A Maximum at 600Y/347 Vac

[32] UL Listed as SWD (Switching duty rated).

[33] UL Listed as HID (High Intensity Discharge rated).

[34] UL Listed for use on 240 V Corner-grounded Delta Systems (Grounded B Phase). See data bulletin 2700DB0202.

[35] All EPDs occupy two spaces, with or without Alarm Switch option. For alarm switch, add the suffix BA. EPD circuit breakers may not be used in systems with phase to ground voltages other than 277 Vac.

Table 9.50: Factory installed Electrical Accessories

Auxiliary Switch (1A/1B)	Alarm Switch (NO)	Coil Burden Max. (VA)	Minimum Recommended Supply Transformer (VA)
Monitors circuit breaker contact status and provides a remote signal indicating the circuit breaker contacts are OPEN or CLOSED. Application Max Load = 10 A @ 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire	Used with control circuits and is actuated only when the circuit breaker has tripped. Application Max Load = 7 A @ 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire.	288	50
		Shunt Trip—Trips the circuit breaker from a remote location by means of a coil energized from a separate circuit. A 120 V shunt trip will operate at 55% or more of rated voltage. Application For use with momentary or maintained push button. 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire.	

Table 9.51: Factory Installed Electrical Accessory Packages for ED, EG, EJ Circuit Breakers

Accessory Package	Suffix
Auxiliary Switch and Alarm Switch[36][37]	AABA
Shunt Trip Package[36][37]	SA
Auxiliary Switch/Alarm Switch/Shunt Trip Package[36][37]	AABASA
Alarm Switch (N.O.) Package for EPDs only	BA

		150 - 250	2, 3	JD, JG, JJ, JL, JR[55]: [56]	18 inches
		125 - 400	2, 3	LA / LH[57]	12 inches
		125 - 600	3	LG, LJ, LL, LR[59]	18 inches
		125 - 600	3	LA / LH	12 inches
800 A[62]	Main Circuit Breaker	110 - 150	2, 3	HD, HG, HJ, HL, HR[54]: [55]	12 inches
		150 - 250	2, 3	JD, JG, JJ, JL, JR[55]: [56]	18 inches
		125 - 400	2, 3	LA / LH	12 inches
		125 - 600	3	LG, LJ, LL, LR	18 inches

[40] NF panelboards without neutral connections may be applied in 3-phase, 4-wire grounded Wye systems, except at the Service Entrance.

[41] Factory Assembled Interiors are rated for trip current of Main Breaker / Switch.

[42] Back-Fed Main Breaker applications only.

[43] Three Phase Copper only.

[44] PowerPacT L circuit breakers may only be installed on 600 A NF panelboard interiors. 400 A max. PowerPacT L circuit breakers should be selected for applications requiring trip ampacities between 125 - 400 A.

[45] NF Panelboards with PowerPacT L Main Circuit Breaker or Switch are limited to a maximum of 54 branch circuits.

[46] NF Panelboards with PowerPacT L Main Circuit Breaker or Switch require 8.75" deep enclosures and three point latch trim fronts.

[47] Enclosures limited to NEMA Type 1 only.

[48] 8.75" Enclosures limited to 26" Wide NEMA Type 1.

[49] Requires use of ExBx6xxx branch circuit breakers, i.e. EDB16015 for a 1P, 15A circuit.

[50] D9 8.75" deep enclosure and three point latch door is required for PowerPacT L Main Circuit Breaker, Switch, or Sub-Feed Circuit Breaker. See Table 9.48 NF Main Circuit Breaker Interiors - Use I-Line Panelboard for 3Ø3W Delta applications above 240 Vac, page 9-30.

[51] PowerPacT L not available in non-vented (NEMA Type 3R/5/12, or 4/4X) enclosures.

[52] See Digest Section 7 for Interrupting Ratings and Catalog Numbers of PowerPacT H-, J-, L-, and LA/LH frame MCCBs. NEMA 3R applications with sub-feed breakers greater than 150 A require 8.75" deep, 26" wide enclosure - reference PBA603WP for dimensions.

[53] Space Factor is the length required for sub-feed circuit breaker. Please reference Product Selector output for panelboard enclosure dimensions.

[54] Three pole HD, HG, HR MCCBs are installed for single phase sub-feed circuit breaker applications.

[55] One or two sub-feed circuit breakers may be selected.

[56] Three pole JR MCCBs are installed for single phase sub-feed circuit breaker applications.

[57] NF Panelboards with LA / LH sub-feed circuit breakers are shipped fully assembled.

[58] NF Panelboards with PowerPacT L main and sub-feed circuit breakers require 26" wide, 8.75" deep enclosure with 3-point latch trim front. Reference PBA758 or PBA754 drawings for dimensions in NEMA Type 1 or 3R enclosures, respectively.

[59] NF Panelboards with PowerPacT L circuit breakers require 8.75" a deep enclosure with 3-point latch trim front. Reference PBA559x drawings for dimensions, where x may be blank, HR, HRT, or T.

[60] Add 6" to space factor for NF Panelboards with 600 A PowerPacT L circuit breakers in NEMA 3R enclosures. Reference PBA754 drawing for dimensions. Maximum sub-feed breaker is 400A when installed with a 600 A rated main circuit breaker in a NEMA 3R enclosure.

[61] NF Panelboards with PowerPacT L main circuit breaker and any sub-feed circuit breaker(s) are shipped completely assembled in 26" wide, 8.75" deep enclosures, with gutter mounted neutral assemblies.

[62] NF Panelboards with 800 A rated main circuit breaker are shipped completely assembled in 26" wide, 8.75" NEMA 1 enclosures. Reference PBA756 or PBA756HR drawing for dimensions.

Interior Mains Rating	Mains Type	Sub-Feed Circuit Breaker(s)			Space Factor ^[63]
		Ampacity	Poles	MCCB Frame	
400 - 800 A ^[64]	Main Circuit Breaker ^[65]	110 - 400	2, 3	One LA / LH with one H-, or J- frame	36 inches

Common Features

Table 9.60: Sub-feed (Double) Lugs (Standard Copper Mechanical Lugs)

Mains Rating	Sub-feed Lug Wire Range
125 A	(2) #6–2/0 AWG Al or Cu
250 A	two 1/0 AWG–350 kcmil or one 1/0 AWG–750 kcmil Al or Cu
400 A	(2) 1/0 AWG–750 kcmil Cu
600 A	(4) 4/0 AWG–500 kcmil Al or Cu
800 A	(6) 3/0 AWG–500 kcmil Al or Cu
Sub-feed (Double) Lugs (Standard Aluminum Mechanical Lugs): An additional mains and termination point that can be used to feed out to another panelboard or device from the incoming service lines. Available on main lug interiors only.	

Table 9.61: Sub-feed Lug Cabinet Data (Standard Aluminum Mechanical Lugs)

Separated Distribution and Split Bus NF and NQ Panelboards

Square D Separated Distribution and Split Bus Panelboards provide compact, affordable options to protect lighting, HVAC, renewable energy, and appliance circuits in buildings.

Separated Distribution Panelboards facilitate Separation of Electrical Circuits for Electrical Energy Monitoring to simplify compliance with Section 130.5-B of California's 2016 Building Energy Efficiency Standards.

NOTE: Refer to Data Bulletin 1600HO1701 for more information.

Special lug pad adaptors allow field removal of cables, for easy field installation of solid core or split CTs for electrical energy measurement, by load type.

Split Bus panelboards enable configurations of two or three back fed main circuit breakers, with independent branch distribution sections, in a single enclosure.

^[90] Requires two standard termination spaces on Neutral or Ground bar.

**Table 9.84: Separated Distribution Interiors

Square D NF and NQ Separated Distribution and Split Bus Panelboards come Factory Assembled with copper bus, with or without an integral Main Circuit Breaker. A wide variety of configurations may be submitted for quotation via Square D QuoteFAST, and may be quoted or ordered by Authorized Distributors using SE Advantage or E-Way Quote Management.

Features:

- Multiple branch section configurations (pole spaces per section):
 - Split Bus: 18-30; 30-18; 30-30; 30-18-18
 - Separated Distribution: 30-18-18; 18-18-18
- Up to 400 A Mains rating for NQ; up to 250 A Mains in NF panelboards

Notes:

Enclosure width / depth: 20" / 5.75" minimum.

Subfeed breaker or lugs, feed through lugs not available at top or bottom ends of panel.

- Split Bus - feeder breaker (125 A max.) in downstream split section back-fed from feeder breaker in upstream main or split section.
- Segregated Distribution - cables may be removed in the field. Downstream Split section may have same rating as Main.

**(60 A Max. Branch Circuit Breaker)****NQ Application Data**

Application: For use on ac only. Meet Federal Specification W-P-115c, Type 1, Class 1. UL Listed.

Service: 1Ø3W, 3Ø3W, 3Ø4W,
3 Grd. "B" Ø—240 Vac max.

AIR: See the QOB(VH) circuit breaker tables in Section 9.

Mains: Type NQ—Bolt-on main lugs: 100 A, 225 A

- Main circuit breaker: 100 A—QOU, 225 A—QB
- See the tables in Section 7 for main circuit breaker interrupt ratings. See catalog for terminal lug data.
- Main circuit breakers with higher interrupt ratings are available as factory assembled panelboards.

Branches: Bolt-on QOB, 60 A maximum. QOB 10-60 A 1-, 2- and 3-pole. See [QOB Circuit Breakers for NQ Panelboards, page 9-15](#) and [NQ Factory Assembled Panelboards, page 9-18](#) for branch circuit breaker terminal data. QOB-VH and QHB branch circuit breakers are also available as factory assembled.

Cabinet: Front—Screw cover. Box—galvanized steel with removable endwalls.

Gutters:

- 100 A—4 in. min. mains end, 3 in. min. opposite mains
- 225 A—10 in. min. mains end, 5 in. min. opposite mains

[4] Box width = 8.625 in.; width at front, including flange, is 9.69 in.

Powerlink available in column width design

Powerlink™ Intelligent Lighting Control Systems

Powerlink intelligent lighting control systems are ideally suited for controlling lighting and other loads in commercial, institutional, and industrial facilities. Such systems are typically used to lower utility cost by switching branch circuits OFF during non-occupied periods when lighting is unnecessary or during peak demand periods when a partial reduction in load can save significant money.

These systems utilize remotely operated circuit breakers to switch branch circuits ON and OFF via a time schedule or by an externally generated signal (typically a low voltage wall switch, photocell, access system, fire alarm or building management system). All Powerlink components mount inside a standard lighting panelboard to provide a compact, space saving installation.

Powerlink intelligent lighting control systems feature a powerful microprocessor based controller that provides system intelligence for 168 remotely operated branch circuits. Master panelboards contain the control electronics, power supply, and control bus strips for up to 42 branch circuit breakers. Sub-panels extend the capability of the system by allowing remotely operated branch circuit breakers to be operated from the master controller via a simple, 4-wire, sub-net connection.

Powerlink panels systems have the capability of being networked together and operated from a central workstation or via a remote modem connection. Powerlink software allows users to remotely configure the system, change time schedules, monitor circuit breaker or input status, and override zones and breakers.

BACnet Capability

The Building Automation and Control network (BACnet) communication protocol is incorporated into the Powerlink™ controller design. The addition of the BACnet protocol allows Powerlink panels to be easily integrated into a Building Automation System (BAS) employing this open communication standard without the need for communication bridges or gateways.

Controller

Powerlink NF3500G4 controllers support 'native' BACnet and Ethernet communications.

Factory Assembled System

SE advantage may be used to select 120 Vac, 240 Vac or 480Y/277 Vac Powerlink intelligent lighting control systems:

- Select system type and interior size from [Table 9.90](#), [page 9-43](#). All Powerlink panels are furnished with either 1 or 2 control bus strips.
- All Powerlink panels use NF type panelboard interiors, boxes, and trims and are suitable for 120 Vac, 240 Vac or 480Y/277 Vac systems.
- Select branch circuit breaker requirements. Powerlink panels can accommodate both ECB-G3 remotely operated circuit breakers and EDB, EGB and EJB standard branch circuit breakers.
- Refer to panelboard section for additional panelboard accessories.
- For complete price, order by description.
- Apply appropriate discount schedule.

240 Vac Factory Assembled System Example:

3500 level system with 225 A MLO panelboard rated for 208Y/120 Vac, 3Ø4W, 10kAIR, Type 1, surface mount with ground bar and (12) 20 A 1-pole bolt-on remote operated circuit breakers.

Table 9.90:

- Available on 1Ø or 3Ø, 125–800 A main lugs or 125–600 A main circuit breaker interiors
- One sub-feed JD, JG, JJ or JL circuit breaker per 250 A panelboard
- Two sub-feed JD, JG, JJ or JL circuit breakers per 400 A panelboard

- PowerLogic™ metering
- Customer equipment space
- Increased box depth
- Box extensions top, bottom and side
- Drip hoods
- Non-standard paint
- NEMA 1 gasketed
- NEMA 4 Stainless steel enclosure
- NEMA 4X Fiberglass enclosure (NQ and NF)
- Stainless steel trim front (NQ, NF and I-LINE)
- Padlockable hasp
- Special locks (Corbin, Yale, Best)
- Equal height boxes
- Common trip to cover two equal height boxes
- Panelboard skirtheads conduits feeding a panelboard
- Panelboard wireway for terminating conduit in wireway endwall
- Panelboard interiors and special fronts to fit existing boxes

^[7] 600 A main lug panelboards require an 8.75" deep box.
^[8] Dimensions also for 400 A PowerPac T L main circuit breaker panels.
^[9] 600 A main lug panelboards require an 8" deep, 26" wide box.
^[10] 800 A main lug panelboards require an 8.75" deep, 26" wide box.

Powerlink Energy Management (EM) Lighting Control System

Lighting Control System, Relay Panels, and Switches

Energy Management (EM) Lighting Control System

The Powerlink Energy Management (EM) Lighting Control System incorporates the same features found in the Powerlink 3500 level system, in addition to integral branch circuit and optional main metering for energy monitoring and verification of the lighting system. Integral metering is accomplished using the PowerLogic™ Branch Circuit Power Meter (BCPM), which is a highly accurate, full-featured multi-branch circuit power meter that provides unrivalled low-current monitoring.

The Powerlink system reduces electrical energy consumption associated with lighting and other loads by automatically switching loads off during non-occupied periods. The Powerlink system is often ideal for reducing the peak demand by switching unnecessary lights off in response to an automated response signal or when high time-of-day energy tariffs occur.

- Integral individual and optional mains metering to provide utmost flexibility in assuring a sustainable metering and verification program
- Monitors current, voltage, energy consumption, demand, and power factor for complete energy profiling
- Accumulated metering information transmitted via Modbus communications interface
- Data updates occurring within seconds to provide timely preventative maintenance information
- Optional EGX150 web interface for storing and reporting data via standard web browser (suggested for applications without Energy Management System [EMS] software)
- Alarm indication when parameters approach user-configured thresholds
- 16 hard-wired inputs available for connection to devices with physical dry-contacts
- 64 communication inputs available for network connection
- 16 independent time schedules, each can be configured into 24 distinct periods
- 7-day repeating clock with changeable automatic daylight savings time
- Automatic sunrise/sunset tracking with offsets
- 32 special event periods
- 32 remote sources for sharing input status, time schedules, or zone status between controllers
- Full custom logic capabilities, including full Boolean functions and synchronization services
- RS232 and RS485
- Serial communications using Modbus ASCII/RTU, BACnet MS/TP and DMX512 protocols (metering Modbus only)
- Ethernet 100BaseT communications using Modbus TCP and BACnet/IP protocols

	400 A	HCJ41914M					
	800 A	HCJ36918MP					
HCP-SU [9] Universal Single Row Main Lugs or Main Circuit Breaker [8] 3-pole—Suitable for use as service equipment when provided with a main circuit breaker and service barrier kit. [6] For main circuit breaker panel, order plug-on I-Line type PG, PJ, PL, MG, or MJ circuit breakers from page 9-61 through page 9-63 and backfeed as the main breaker (order solid neutral from page 9-51).							
54	800	HCP54868SU	HC2686T() 4P	HC2686T() HR[10]	HC2686DB	HC2886WP	86

^[2] PG, PJ, PL circuit breakers are available with both thermal-magnetic equivalent and MicroLogic trip. The MicroLogic circuit breakers are available 80% and 100% rated. "C" suffix denotes a 100% rating.
^[3] Add "F" for flush mount, "S" for surface mount.
^[4] For Type 1 applications, order interior, front, and box. For Type 3R/5/12 applications, order interior and box only. The front is included with the box.
^[5] Remove drain screws for Type 3R rating.
^[6] Suitable for use as service equipment if equipped with an integral main circuit breaker or when not more than six main disconnecting means are provided and the panelboard is not used as a lighting and appliance branch circuit panelboard. (Not applicable in Canada)
^[7] Bottom feed standard.
^[8] Circuit breaker interrupt ratings, see [Interrupting Ratings Codes \(kA\)](#), page 9-58.
^[9] For main lugs panel, order sub-feed lug kit and back-feed as main lugs.
^[10] Hinged trim with door.

TYPE HCP

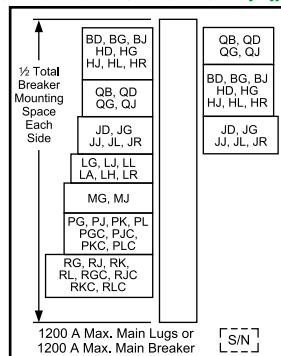

800 A max. branch circuit breaker
BD, BG, BJ, QB, QD, QG, QJ, HD, HG, HJ, HL, HR, JD^[11], JG, JJ, JL, JR, LA, LH, LG, LJ, LL, LR, MG, MJ, PG, PJ, PL, PGC, PJC, PLC^[12]

Box Size:
42 in. Wide, 9.5 in. Deep, NEMA Type 1

TYPE HCR-U Universal Mains

1200 A max. branch circuit breaker
BD, BG, BJ, QB, QD, QG, QJ, HD, HG, HJ, HL, HR, JD^[13], JG, JJ, JL, JR, LA, LH, LG, LJ, LL, LR, MG, MJ, PG, PJ, PK, PL, RG, RJ, RK, RL, PGC, PJC, PKC, PLC, RGC, RJC, RKC, RLC^{[14][12]}

Box Size:
44 in. Wide, 9.5 in. Deep, NEMA Type 1

QB, QD, QG, QJ	225	3	4.5				

[11] JDA circuit breakers with field installable ground fault kits may be mounted in type HCP, HCP-SU, and HCR-U panelboards as shown, and require L-frame mounting space.

[12] PG, PJ, and PL circuit breakers are available with both thermal-magnetic equivalent and MicroLogic trip. The MicroLogic circuit breakers are available 80% and 100% rated. "C" suffix denotes a 100% rating.

[13] JD circuit breakers with field installable ground fault kits may be mounted in type HCP, HCP-SU, and HCR-U panelboards as shown, and require L-frame mounting space.

[14] When RL main circuit breakers with equipment ground fault are applied on a 3Ø4W system, order solid neutral catalog number HCR12SNCT. The HCR12SNCT includes a neutral current transformer.

[15] Order solid neutral from page 9-51.

[16] Add "F" for flush mount, "S" for surface mount.

[17] For 42 in. wide weatherproof enclosures, see Table 9.116 Type 3R/5/12 Enclosures, page 9-52

[18] Add-on door kit available. Example: For HCW50TS trim kit, order HCW50D door kit.

[19] Suitable for use as service equipment if equipped with an integral main circuit breaker or when not more than six main disconnecting means are provided and the panelboard is not used as a lighting and appliance branch circuit panelboard. (Not applicable in Canada)

[20] Circuit breaker interrupt ratings, see Interrupting Ratings Codes (kA), page 9-58.

[21] When RL main circuit breakers with equipment ground fault are applied on a 3Ø4W system, order solid neutral catalog number HCR12SNCT.

The HCR12SNCT includes a neutral current transformer.

[22] 15 in. of mounting space is taken up by the back fed main lug kit or RG, RJ, RL main circuit breaker, leaving 93 in. of branch circuit breaker mounting space.

[23] Add-on door kit available. Example: For HCR86TS trim kit, order HCW86D door kit.

Accessories

Blank Fillers Equipment Ground Bar Solid Neutral

Table 9.110: I-Line Merchandised Panelboard Accessories

		Description	Catalog No.
Blank Filler Kit—1.5 in. [24] (One kit contains quantity of 3 blank fillers.)			HN1M1BL
Blank Filler Kit—4.5 in. [24] (One kit contains quantity of 5 blank fillers.)			HN1M4BL
Solid Neutral Assemblies

			HCPSU8SN [27]
			HCPSU8SNCW [27]
	1200 A		HCW12SN [26]
1200 A, for use with HCR-U universal panel only			HCWM12SN [28]
1200 A, including neutral Current Transformer (CT) for 3Ø4W systems			HCR12SNCTW [28]
Equipment Ground Bar Kits—HCJ, HCP, HCP-SU (single row), HCR-U			PK32DGTG
Blank Extensions (For replacement purposes)			
	1.5 in. for mounting on wide side of I-Line panelboard used with HN1M1BL and HN1M4BL as a filler plate on the wide side of the panel (HCP, HCP-SU and HCRU). Do not use with MicroLogic trip unit as this filler will cover the trip unit. [24]		HLW1BL (Kit contains quantity of 3.)
	4.5 in. for mounting on wide side of I-Line panelboard used with HN1M1BL and HN1M4BL as a filler plate on the wide side of the panel (HCP, HCP-SU and HCRU). Do not use with MicroLogic trip unit as this filler will cover the trip unit. [24]		HLW4BL (Kit contains quantity of 5.)
	1.5 in. for mounting on narrow side of I-Line panelboard used with HN1M1BL and HN1M4BL as a filler plate on the narrow side of the panel. Do not use with MicroLogic trip unit as this filler will cover the trip unit. [24]		HLN1BL (Kit contains quantity of 3.)
	4.5 in. for mounting on narrow side of I-Line panelboard used with HN1M1BL and HN1M4BL as a filler plate on the narrow side of the panel. Do not use with MicroLogic trip unit as this filler will cover the trip unit. [24]		HLN4BL (Kit contains quantity of 5.)
	4.5 in. for mounting on wide side of I-Line panelboard. For use with PowerPacT H and J circuit breakers mounted on the wide side of the panel so that electronic trip unit can be accessed. [24]		HLW4EBL (Kit contains quantity of 5.)
	4.5 in. for mounting on narrow side of I-Line panelboard. For use with PowerPacT H and J circuit breakers mounted on the narrow side of the panel so that electronic trip unit can be accessed. [24]		HLN4EBL (Kit contains quantity of 5.)

Blank Extensions

Table 9.111: Blank Extensions

Application	Circuit Breaker Mounting Ht.	Branch Circuit Side	Catalog Number
All applications, except PowerPacT H/J with MicroLogic trip unit 3, 5 and 6	1.5 in.	Wide Side	HLW1BL
	4.5 in.		HLW4BL
All applications, except PowerPacT H/J with MicroLogic trip unit 3, 5 and 6	1.5 in.	Narrow Side	HLN1BL
	4.5 in.		HLN4BL
Only PowerPacT H/J circuit breakers with MicroLogic trip unit 3, 5 and 6	4.5 in.	Narrow Side	HLN4EBL
Only PowerPacT H/J circuit breakers with MicroLogic trip unit 3, 5 and 6	4.5 in.	Wide Side	HLW4EBL

[24] Blank extension and blank filler pricing is per kit. See note on kit number for number included in each kit.

[25] Used on Type HCJ.

[26] Used on 400 A, 600 A, 800 A, and 1200 A HCP (main lugs), and 600 A and 800 A (main circuit breaker).

[27] Used on Type HCP-SU (single row).

[28] Used on Type HCR-U.

Table 9.112: UL Service Entrance Barriers for I-Line Panelboards with Backfeed Main Circuit Breaker^[29]

I-Line Panelboard Type	Backfeed Main Circuit Breaker	Catalog Number ^[30]

	HC4412DEX (F or S)	HCR-U	12 in.

Table 9.118: I-Line/QMB PanelBoard Drip Hood Kits

The Drip Hoods listed below are intended for use on surface mounted HC and QMB boxes only. Select the appropriate Drip Hood based on Interior Type, Width, and Depth from the following table. The Drip Hoods are designed to fit on the outside of the boxes. The Drip Hood will increase the enclosure rating of the box from Type 1 to Type 2. Reference Instruction Bulletin 80043-401-03.

Catalog Number	Interior Type	Dimensions (In.)	
		Width	Depth
HCT2DH32D9	HCJ	32	9.5
HCT2DH42	HCP	42	9.5
HCT2DH26D9	HCP-SU	26	9.5
HCT2DH47	HCP (L5)	47	9.5
HCT2DH56	HCP (PL)	56	9.5
HCT2DH42D12	HCP (DB)	42	12.5
HCT2DH44	HCR-U	44	9.5
HCT2DH49	HCR-U (L5)	49	9.5

1200 A	15	381	S33930	125,000	100,000	50,000	FA, FD, FG, FH, FJ, KA, KH, KC, KI, HD, HG, HJ, HL, HR, JD, JG, JJ, JL, JR, LA, LH, LC, LI, MA, MH, MX, NA, NC, NX, MG, PG, MJ, PJ, PK, PL, RG, RJ, RL, RK, DG, DJ, DL, LG, LJ, LL, LR	HCR-U
1200 A	9	229	SL1200P5, SL1200P6, SL1200P7	125,000	100,000	50,000	FA, FD, FG, FH, FJ, KA, KH, KC, KI, HD, HG, HJ, HL, HR, JD, JG, JJ, JL, JR, MG, PG, MJ, PJ, PK, PL, RG, RJ, RL, RK, DG, DJ, DL, LG, LJ, LL, LR	HCP, HCP-SU, HCR-U

NOTE: S33930, S33931, SL1200P5, SL1200P6, SL1200P7, SL Kits are rated 1200 A and may be applied to 1200 ampere loads when installed into HCRU panelboards. However, when installed into HCP and HCPSU panelboards they are only rated 800 amperes maximum due to restricted wire bending space.

Table 9.120: Sub-feed Lug kit terminal data

Catalog No. (Prefix)	No. Poles	Ampere Rating	Standard Lug Wire Size [36]
SL100	3	100	#14–1/0 AWG Cu or #12–1/0 AWG Al
SL250	3	250	(1) #4 AWG–300 kcmil
SL400	3	400	(1) #1 AWG–600 kcmil or 2– #1 AWG–250 kcmil
SL800M5	3	800	(3) #3/0 AWG–500 kcmil
S33930	3	1200	(4) #3/0 AWG–600 kcmil
SL1200P5	3	1200	(4) #3/0 AWG–500 kcmil
SL1200P6	3	1200	(3) 350–600 kcmil
SL1200P7	3	1200	(3) #3/0 AWG–750 kcmil

[33] Plug-on in same manner as a branch circuit breaker

[34] For other ratings, see the latest edition of I-Line Information Manual, #80043-309-xx.

[35] SL400 cannot be used in HCJ panelboards due to inadequate wire bending space.

[36] Unless otherwise specified, wire sizes apply to both aluminum and copper conductors.

PowerPacT™ B-frame, Thermal Magnetic

Accessories are located in Section 7 **PowerPacT Accessories**, page 7-51.

	QB	QD	QG	QJ [42]
240 V	10	25	65	100
480 V	—	—	—	—
600 V	—	—	—	—

Padlock attachments for Q-frame are available.

[38] 3P circuit breakers are rated 65 kA at 240/120 Vac, 3Ø, 4-wire delta or 100 kA at 208Y/120 Vac, 3Ø, 4-wire.

[39] 2-pole QB, QD, QG, and QJ circuit breakers are completed by adding the required phasing numbers as indicated in the parentheses, see Table 9.124 on page 9-56

[40] 3-pole QB, QD, QG, and QJ circuit breakers for ABC phasing are complete without additional phasing number. For CBA phasing, complete the catalog number by inserting the number "6" in the parentheses.

[41] Replacement lugs are not available on QB, QD, QG, or QJ circuit breakers. Lugs for QB, QD, QG, or QJ circuit breakers accept one #4 AWG–300 kcmil. No accessories are available for PowerPacT Q Frame breakers.

[42] 3P circuit breakers are rated 65 kA at 240/120 Vac, 3Ø, 4-wire delta or 100 kA at 208Y/120 Vac, 3Ø, 4-wire

Table 9.143: Automatic Molded Case Switches—600 Vac, 50/60 Hz

Ampere Rating	2-pole	3-pole	Withstand Rating ^[70]			Trip Point Amperes	Terminal Wire Range
	Catalog Number ^[69]	Catalog Number	240 Vac	480 Vac	600 Vac	AC	
600 A	PJA26000S60()	PJA36000S60	100	65	25	10000	(3) 3/0 through 500 kcmil Al or Cu
800 A	PJA26000S80()	PJA36000S80	100	65	25	10000	
1000 A	PJA26000S10()	PJA36000S10	100	65	25	10000	(4) 3/0 through 500 kcmil Al or Cu
1200 A	PJA26000S12()	PJA36000S12	100	65	25	10000	

^[68] The ET 1.0 trip unit cannot be field replaced. The Basic Electronic ET1.0 trip unit (offered in 400 A and 600 A only) does not allow adjustment of the long time trip point setting. It is considered an electronic equivalent of a thermal-magnet circuit breaker.

^[69] Fill in parentheses with the following phase connection options: (2) for AC or (5) for CA.

^[70] The withstand rating is the fault current, at rated voltage, that the molded case switch will withstand without damage when protected by a circuit breaker with an equal ampere rating.

[71] To complete the catalog number, replace the blank () with the appropriate interrupt rating (G, J, K, or L).

[72] For 100% rated circuit breakers add a "C" in the 9th character place. For example, the catalog number for a 100% standard-type trip unit with LI trip functions at 250 A would be PGA36025CU31A.

[73] The L interrupt rating is supplied in 480 V only. Change the 5th character (voltage rating) from a 6 (600 V) to a 4 (480 V); for example, PLA34025U31A.

[74] See Table 9.144 PowerPacT P- and R-frame Interrupt Ratings, page 9-63 for interrupt ratings.

Shunt Trip Circuit Breakers

Special Features

For information on the following special features, please see the Supplemental and Obsolescence Digest.

- Powerlogic™ metering [\[1\]](#)
- Customer equipment space (NQ and NF) [\[1\]](#)
- Increased box depth [\[1\]](#)
- Increased gutters—top, bottom, and sides [\[1\]](#)
- Non-standard paint [\[1\]](#)
- Welded base channel [\[1\]](#)
- Type 1 gasketed [\[1\]](#)
- Type 2 drip hood [\[1\]](#)
- Type 3R/4/4X/5/12 stainless steel enclosure [\[1\]](#)
- Type 4X fiberglass enclosure [\[1\]](#)
- Stainless steel trim front [\[1\]](#)
- Padlockable hasp [\[1\]](#)
- Special locks (Corbin, Yale, Best) [\[1\]](#)
- Equal height boxes [\[1\]](#)
- Common trim to cover two equal height boxes [\[1\]](#)
- Panelboard skirt—hides conduits feeding a panelboard [\[1\]](#)
- Panelboard wireway—for terminating conduit in wireway endwall [\[1\]](#)
- Keyed mechanical interlocking of two or more circuit breakers (I-Line and QMB) [\[1\]](#)
- Motor operators (I-Line only)
- Panelboard interiors and special fronts to fit existing boxes
- A standard panelboard box has one blank endwall and one with knockouts. Blank endwalls or knockouts in both endwalls are also available [\[1\]](#)

Space-saving I-Line Smart Cell

Space-saving module for value-added digital solutions. The modular Square D I-Line Smart Cell enables value-added solutions in I-Line panelboards in a variety of combinations. The space-saving, self-contained unit fits onto the I-Line bus in place of a breaker, and allows the I-Line panelboard to be transformed into a digital communication or metered electrical distribution solution.

Smart Cells are available for:

- IFE Ethernet Modbus TCP interface with basic Web pages
- IFM Modbus serial interface
- Energy Reduction Maintenance Setting (ERMS)
- Maintenance Mode Switch (MMS)
- EM3560, PM5563 or PM8244 meter with or without communications
- Gateway & Data Logger

The I-Line Smart Cell assemblies are intended for use in HCP, HCP-SU, and HCR-U I-Line panelboards. The I-Line Smart Cell can be included in your Square D I-Line factory-assembled equipment or ordered individually for field installations such as Retrofit or RTI.

For more information refer to Handout ([2700HO1501](#)) or User Guide ([NHA999570](#)).

For SurgeLogic™ I-Line plug-on SPD information, starting on Digest [page](#) . For field-installable I-Line door kits, see the Supplemental and Obsolescence Digest, Section 4.

Power Solutions Integrated Equipment Overview

For over 30 years, the Schneider Electric Power Solutions business has been providing integrated equipment solutions for retail construction, commercial, and industrial projects. The Square D™ brand family of integrated equipment combines electrical distribution, building controls, and automation into a single, factory-assembled and pre-wired enclosure/lineup. Our innovative, cost-effective, integrated solutions save valuable floor space, shorten construction cycle times, and reduce installation and material handling costs.

Modular Panelboard System—Pre-Engineered Solution

The Modular Panelboard System (MPS) is tailored to customer specifications and may include panels and lighting control equipment. Special Powerlink™ lighting control and column-width panel interiors are available. Additional options include power and control cable wiring, contactors, terminal blocks, surge protective devices (SPDs), equipment spaces, and power metering/monitoring solutions. Seismically qualified MPS sections are also available.

Tailored to customer specifications, MPS sections are:

- 86 in. (2184 mm) high,
- 9.5 in. (241 mm) deep, and
- vary in width depending on customer specifications

Integrated Power Center—Custom-Designed Solution

For more complex applications, the Integrated Power Center (IPC) allows for the integration of a variety of components, including electrical distribution equipment, HVAC controls, lighting controls, power quality and power conditioning products, SPDs, building management systems and power metering/monitoring solutions. As with all Power Solutions Integrated Equipment products, the IPC is designed to meet applicable codes and standards and is available as seismically qualified. Factory-assembled, pre-wired (based on shipping splits), and tested in a controlled environment, IPC sections are:

- 84 in. (2134 mm) high,
- 10.5 in. (267 mm) deep, and
- vary in width depending on customer specifications

Standby Power Connection Solutions—UL Listed

The new family of Standby Power Connection Solutions are designed, tested, manufactured and listed to the UL standards providing you with a reliable solution to quickly and safely connect to a portable generator for standby power. The SPQ cam-lock (SPQCL) tap box design incorporates cam-lock receptacles for generator connection and the capabilities to be wired back to the standby power disconnect in the electrical distribution equipment. The SPQ lug-lug (SPQTB) tap box provides the capabilities to connect to a portable generator and the generator breaker cables using mechanical lugs in lieu of the cam-lock connectors.

The SPQ Cam-Lock Box is:

- 36 in. (915 mm) high
- 30 in. (762 mm) wide
- 16 in. (407 mm) deep

The SPQ Lug-Lug Box is:

- 36 in. (915 mm) high
- 30 in. (762 mm) wide
- 13 in. (330 mm) deep

Submetering Integrated Power Center

The Submetering Integrated Power Center (IPC) is an ideal solution for multi-tenant or departmental metering applications within office towers, condominiums, apartment buildings, shopping centers, and other multi-user environments. The Submetering IPC combines the panel with breakers, the PowerLogic EM4800 multi-circuit energy meter and the associated CTs in a factory-assembled and pre-wired solution saving significant space and on-site installation time. Submetering IPC sections are:

- 10.5 in. (267 mm) deep, and
- vary in width and height depending on the application

Integrated Power Center 2

The newest addition to the family of Integrated Equipment products, the Integrated Power Center 2 (IPC2™) provides maximum flexibility to meet customers' specifications. Features include those found in the IPC and are provided in a free-standing enclosure that can be front and rear aligned when transformers are included. The IPC2 family is available as seismically-qualified. Enclosure options include NEMA 1, NEMA 1 with driphood and NEMA 3R. IPC2 sections are:

- 91.5 in. (2324 mm) high, and
- vary in width and depth depending on customer specifications

Panelboards

Class 2200 / Refer to Documents 2230DB0601, and 2735CT0001

Integrated Power Center 2 Transformer Combo

Ideally suited for projects having both 480Y/277V and 208Y/120V requirements. Available as a stand-alone solution or can be incorporated into an MPS, IPC or IPC2 lineup. The standard 42" wide x 24" deep footprint will decrease space requirements by 40% or more. A typical IPC2 Transformer Combo includes two panels in the upper cells and a transformer in the bottom cell. Other upper cell options include contactors, individually mounted circuit breakers, ATS's, equipment spaces and power metering/monitoring solutions. The IPC2 Transformer Combo is available as seismically qualified. Enclosure options include NEMA 1, NEMA 1 with driphood and NEMA 3R. IPC2 Transformer Combo sections are:

- 91.5 in. (2324 mm) high, and
- vary in width and depth depending on the transformer kVA

Additional savings are realized on installation, material costs and material handling, as shown in the table below.

Table 10.1: IPC2 Transformer Combo—Estimated Savings [1]

	Stick-Built	Transformer Combo	Savings Realized
Estimated Installation Hours	26–32	3–6	23–26
Materials	Associated pipe, wire and fittings	—	Associated pipe, wire and fittings
No. of Pieces Handled	20–30	1	19–29

The IPC2 Transformer Combo has been recognized by the electrical industry by winning the following awards:

- 2006 INNOVATION Award given by the *Electrical Contracting Products* magazine
- 2006 Product of the Year Gold Medal Award given by the *Consulting/Specifying Engineer* magazine

[1] Based on an NF 480 V panel, 75 kVA transformer, NQ 240 V panel installation.

New!

Energy Control Center

Prepare your building for the Future of Energy

Energy Control Centers provide a flexible, resilient and scalable way to distribute and control electric power flow between a utility grid, Distributed Energy Resources (DER) and the electric loads at a site.

The Energy Control Center Implements all Three Layers of EcoStruxure

EcoStruxure
Innovation At Every Level

An Energy Control Center with edge control enables Photo Voltaic to operate during an outage by using an alternate anchor resource such as a genset or lithium ion battery storage system.

During an outage, if there is too much Photo Voltaic power, the edge controller will reduce the Photo Voltaic power in order to prevent backfeeding a genset or a storage battery that is already full.

Conversely, if there is not enough power available from a site's DER's, the edge controller will shed load(s) intelligently.

The final layer maximizes the ROI of the DER's deployed at the site.

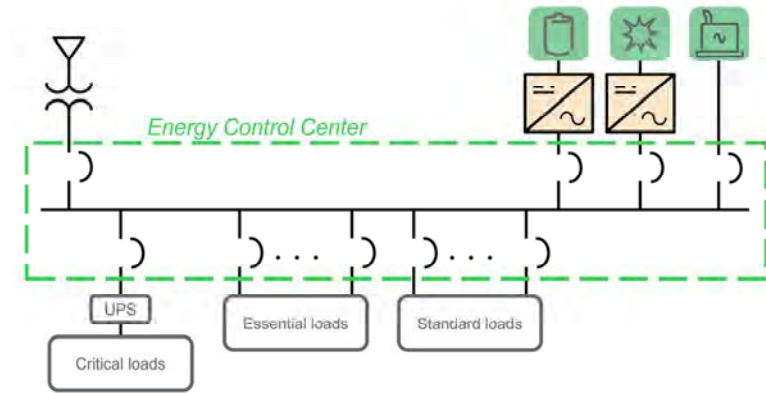

Flexible:

- Works with numerous types and brands of DERs for easier adaptation into an existing building.
- Future ready design – adaptability allows for future facility expansion and integration of additional DERs at a later date.

Scalable:

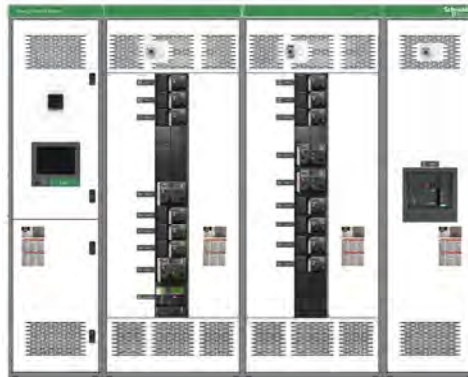

Schneider Electric has Energy Control Center configurations that meet your needs ranging from 800 A through 2500 A.

Technical Features

- Compatible with any type of distributed energy resource
- Sections rated to 5000 A horizontal bus, 3000 A vertical bus
- Single mains to 5000 A
- Six subdivision mains to 4000 A
- Individually mounted feeders to 4000 A
- Suitable for service entrance or distribution
- NEMA Type 1, NEMA 3R
- Front accessible or front and rear accessible
- 98 in. (2489 mm) high with base channels
- Section widths available: 12 in. (305 mm), 24 in. (610 mm), 30 in. (762 mm), 36 in. (914 mm), 42 in. (1067 mm), 48 in. (1219 mm), or 54 in. (1372 mm) wide
- Frame depths available: 24 in. (610 mm), 36 in. (914 mm), 48 in. (1219 mm), 54 in. (1372 mm), or 60 in. (1524 mm)
- Voltage to 600 Vac or 250 Vdc
- Factory assembled
- Hot or cold sequence utility metering
- Customer metering
- Surge protective devices (SPD)

Modular Panelboard System

MPS Interior

Integrated Power Center

IPC Interior

Modular Panelboard System

The pre-engineered Modular Panelboard System (MPS) bundles electrical distribution equipment into a single factory-assembled and wired integrated system. This approach replaces the traditional method of independently mounting each panelboard and lighting control system. MPS allows for the integration of a variety of components including:

- Panelboards: I-Line, NF, NQ, and Column-width
- Surge Suppression: SPD integral to panel and/or separately mounted
- Lighting Controls: Powerlink™ or lighting contactors
- Monitoring/Metering: Powerlogic™ power meters, circuit monitors, branch circuit monitoring, and system display meters

Equipment spaces including factory-installed lighting contactors are available in three configurations:

1. Unwired: Mounted in cell only
2. Line side wired: Line side of each pole is wired to a branch circuit breaker
3. Fully wired: Line side of each pole is wired to a branch circuit breaker, load side of each pole is wired to a terminal block

Built on a panelboard platform, Modular Panelboard System sections are NEMA 1-rated and meet the requirements of UL 67. Individual MPS configurations include panel sections in full-height, stacked or side-by-side arrangements. Individual sections measure:

- 86 in. (2184 mm) high
- 10–44 in. (254–1118 mm) wide
- 9.5 in. (241 mm) deep

Typical applications for MPS equipment include:

- Restaurants / Food service
- Office buildings / Public buildings
- Warehouses
- Schools / Universities

Integrated Power Center

The custom-designed Integrated Power Center (IPC) combines electrical distribution equipment and building management controls into a single factory-assembled and wired integrated system. IPC has much greater design flexibility for producing a fully customized solution integrating a variety of distribution and control components, including:

- Panelboards: I-Line, NF, NQ, and Column-width
- Surge Suppression: SPD integral to panel and/or separately mounted
- Lighting Controls: Powerlink™ or lighting contactors
- Monitoring/Metering: Powerlogic™ power meters, circuit monitors, branch circuit monitoring, and system display meters
- Power quality and power conditioning
- Building automation
- HVAC controls

Equipment spaces including factory-installed lighting contactors are available in three configurations:

1. Unwired: Mounted in cell only
2. Line side wired: Line side of each pole is wired to a branch circuit breaker
3. Fully wired: Line side of each pole is wired to a branch circuit breaker, load side of each pole is wired to a terminal block

Integrated Power Centers are NEMA 1 rated and meet the requirements of UL 891. As with all integrated solutions, IPCs are shipped to the site fully assembled, completely pre-tested and ready-to-install. Individual IPC configurations include panel sections in full height, stacked, or side-by-side arrangements. IPC sections measure:

- 84 in. (2134 mm) High
- 10.25 (260 mm) Deep
- Widths vary, depending upon customer specifications

Typical applications for IPC equipment include:

- Retail stores / Grocery stores
- Office buildings / Public buildings
- Shopping malls / Strip malls

- Schools/Universities
- Restaurants / Food service
- Hotels/Motels
- Warehouses
- Equipment rooms

MPS and IPC Layout, Lead Time, and Pricing

Contact your local Schneider Electric representative or distributor.

MPS and IPC Shipping

MPS and IPC lineups are shipped factory-assembled and pre-wired. Customers may specify single- or multiple-section shipping splits (some limitations apply). In addition, lineups may be ordered with or without factory-installed power cables.

Standby Power Connection Solutions

The Standby Power Quick-Connect (SPQ) Tap Box provides a reliable solution to quickly and safely connect to a portable standby power generator. Two versions of the SPQ Tap Box have been designed and tested to the required UL standard and offer a wider range of solutions for our customers. All SPQ Tap Boxes are NEMA 3R-rated.

SPQ Cam-Lock Tap Box

- UL listed - UL 1008 SB
- NEMA Type 3R enclosure (can be used for NEMA Type 1 installations)
- Lockable door for safety and control access
- Mechanical lugs to standby power disconnect
- Color-coded cam-lock connectors for generator connection
- Hinged bottom access door for cam-lock connection
- Barriers over mechanical lugs for safety
- Application:
 - 400 A and 600 A available
 - 240 V and 480 V versions available
 - Three-phase + neutral + ground
- **SPQCL204RS** – 400 A, 208Y/120 V 3-phase, 4-wire + ground wire
- **SPQCL404RS** – 400 A, 480Y/277 V 3-phase, 4-wire + ground wire
- **SPQCL206RS** – 600 A, 208Y/120 V 3-phase, 4-wire + ground wire
- **SPQCL406RS** – 600 A, 480Y/277 V 3-phase, 4-wire + ground wire

SPQ Cam-Lock Tap Box

SPQ Lug-Lug Tap Box

- UL listed—UL 1773 (cUL listed also)
- NEMA Type 3R enclosure (can be used for NEMA Type 1 installations)
- Lockable door for safety and control access
- Mechanical lugs to standby power disconnect
- Generator connection lugs rated for Type W cable
- Application:
 - 400 A and 800 A available
 - 600 V maximum
 - Three-phase + neutral + ground
- **SPQTB604RS** – 400 A, 600 V max. 3-phase, 4-wire + ground wire
- **SPQTB608RS** – 800 A, 600 V max. 3-phase, 4-wire + ground wire

SPQ Lug-Lug Tap Box

Submetering Integrated Power Center

The Submetering Integrated Power Center (IPC) is an ideal solution for multi-tenant or departmental metering applications. It combines the ability to meter multiple feeder breakers inside a pre-wired enclosure. The Submetering IPC offers significant space and labor savings by replacing individually enclosed, mounted, and wired panels and metering components and providing an integrated solution in one enclosure/lineup including:

- Panelboards
- PowerLogic™ EM4800 Multi-Circuit Energy Meters and associated CTs
- Surge Suppression
- Factory-installed wiring between components

Submetering IPC width and height dimensions vary depending on the application. All sections are 10.5 in. (266.7 mm) deep.

Typical applications for Submetering IPC equipment include:

- Office towers
- Condominiums
- Apartment buildings
- Shopping centers
- Other multi-user environments
- Configurations with 2-PowerLogic EM4800 meters plus Ethernet switch when required based on the number of metered points

Submetering Integrated Power Center

Integrated Power Center 2

Integrated Power Center 2

The Integrated Power Center 2 (IPC2™) provides maximum design flexibility. In addition to the features found in the Integrated Power Center (IPC), IPC2 lineups are free-standing enclosures that can be front and rear-aligned. IPC2 has the ability to incorporate:

- Panelboards: I-Line, NF, and NQ
- Transformers: 300 kVA(max)
 - K-rated also available; may limit max kVA size of transformer
- Individually mounted circuit breakers
- Surge Suppression: SPD integral to panel and/or separately mounted
- Automatic Transfer Switch: Open type 400 A 3-pole maximum including a variety of options
- Lighting Controls: Powerlink™ or lighting contactors
- PowerLogic™ Monitoring / Metering: power meters, circuit monitors, branch circuit monitoring, and system display meters
- Building Management Systems

As a stand-alone solution, the IPC2 family provides the flexibility to enter and/or exit the section from either the top or bottom. IPC2 is offered in a variety of widths and depths:

- 24–48 in. (610–1219 mm) Wide
- 24–36 in. (610–915 mm) Deep

Typical applications for IPC2 equipment include:

- | | |
|-------------------------|--|
| • Schools/Universities | • Casinos |
| • Office buildings | • Hotels |
| • Data centers | • Any project with panels and transformers |
| • Industrial facilities | |

ICP2 Layout, Lead Time, and Pricing

Contact your local Schneider Electric representative or distributor.

IPC2 Shipping

IPC2 lineups are shipped fully assembled and ready-to-install. Customers may specify single- or multiple-section shipping splits (some limitations apply). In addition, lineups may be ordered with or without factory-installed power cables.

Integrated Power Center 2 Transformer Combo

For projects having both 480Y/277 V and 208Y/120 V requirements, the Integrated Power Center 2 (IPC2) Transformer Combo is the perfect solution. One of the most popular members of the IPC2 product family, the IPC2 Transformer Combo has been recognized by the industry multiple times for its innovative design.

As a stand-alone solution, the IPC2 Transformer Combo is appropriate when panelboards and transformers are installed in close proximity to each other. It provides the flexibility to enter and/or exit the section from either the top or the bottom. Catalog numbers have been created for some of the more typical configurations.

All IPC2 sections can be close-coupled to QED switchboard, MPS, and IPC products. Enclosure options for IPC2 include NEMA 1, NEMA 1 with driphood, and NEMA 3R-rated, and all meet the requirements of UL 891. These sections are also seismically qualified to meet IBC and ASCE7 requirements.

IPC2 Transformer Combo

FlexSeT Switchboards (cULus Listed)

FlexSeT is a complete low voltage Switchboard offer and service model that enables new methods of assembly, installation, and maintenance, while delivering unprecedented availability, reliability, and modularity. FlexSeT customers will benefit from dramatically reduced lead times with design flexibility through a modern and innovative switchboard system, offering an end-to-end digital experience.

Designed with the entire product lifecycle experience in mind, FlexSeT is a product developed with a fully customer centric approach, making everything simpler and faster from ordering to maintenance without compromising quality or safety, all while ensuring compliance to UL Standards.

FlexSeT is delivered on-time with the shortest lead time in the market! The complete offer can shorten delivery to days instead of weeks. Even with configuration changes at virtually any part of the ordering process. The product modularity allows for adaptations without risks to your project timelines as features are added or removed in the lineup.

Product Design and Key Features Highlights

Years of leadership in the switchboard market have provided Schneider Electric with the expertise to drive innovation. FlexSeT switchboards are designed to take solutions to a whole new level, making the best switchboards in the market even better.

Designed to be assembled anywhere without the need of heavy machinery or complex tools, FlexSeT is structured to be simple and intuitive, not only for assembly but also for operation and maintenance.

FlexSeT modularity comes in the form of kits and design features that allow for quick and easy installation, removal, or replacement. This makes installation and operation more intuitive and faster with the benefit of improved efficiency.

11 SWITCHBOARDS AND SWITCHGEAR

Swingable Main

The main breaker assembly is mounted on a robust hinge system. This feature enables the use of cable pulling machines in the equipment space and exposes the wire terminals for easier and faster connection.

Bussing System

The bussing designs deliver reliable connections with quick and easy installation! Visi-tite™ bolts ensure proper torquing while the bus bridge connects all phases simultaneously in one simple operation. The bussing has an enclosed design which greatly reduces the points of exposed bus bars.

Backfed Main at 1600 A
Main breaker and the I-Line™ stack in one single section to provide unmatched footprint performance.

I-Line Bus Stack with Neutral Bar

The I-Line bus stack, which has been benefiting our customers for years, has now gotten even better by having the Neutral within the stack.

Captive Hardware

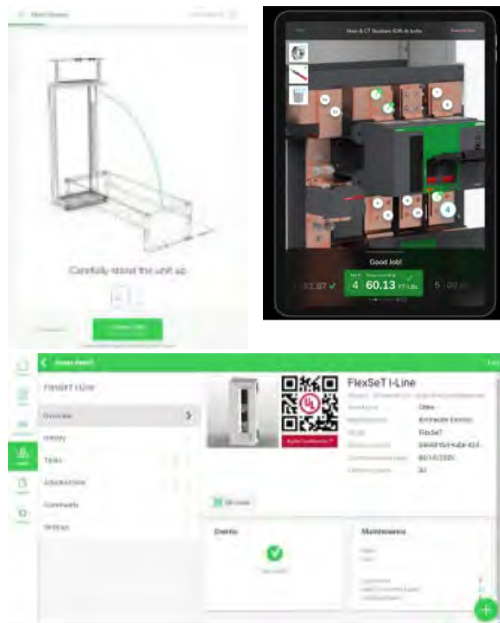

No lost time in removing and replacing covers as the hardware is always in place.

Plug-on Neutral

From Panelboards to Switchboards! Land the neutral closer to the load, reducing complexity and making wiring cleaner and more efficient.

Digital Journey and Tools

FlexSeT has taken advantage of the latest digital and end-to-end cyber-secured technology to drive customer satisfaction for the best possible experience throughout the lifecycle.

Digital tools are used in every aspect of the product starting at the quoting and ordering process with **FlexSeT Design**TM. The new product selector is intuitive by nature and provides logic and pricing live at each selection, surfacing the right information to make informed decisions.

Schneider Electric's **Asset Lifecycle Management**TM (ALM) system tracks and stores all documentation for each feature and component of a FlexSeT Switchboard. The documentation specific to each order and configuration is stored digitally, cyber-secured, and is accessible at anytime with a simple QR scan. This information is linked and stored directly from FlexSeTDesign and updated with any change.

The assembly process is executed with **FlexSeT Build**TM, an interactive step by step guide for the assembler that help ensure the quality and integrity of the product. The app ensures each assembly step is properly executed from start to finish and inspected for compliance subsequently. Furthermore, FlexSeT BuildTM is directly linked and paired with physical assembly tools that ensure proper technical aspects are adhered to, with live verification throughout the assembly. The testing of every section is also completed with FlexSeT BuildTM as the last step. A successful result is required in order to generate and apply the UL label of certification. Each FlexSeT section assembled will have a final report with Digital Artifacts and Photos for quality assurance and compliance.

The UL Mark and Certification Labels are issued digitally at the conclusion of each successful assembly. The auditing of an assembled FlexSeT switchboard is done via digital artifacts and critical quality data collected during assembly and quality control process.

Features and Specifications Summary

Just like all Schneider Electric products, FlexSeT is always evolving to bring the best features to market with the latest technology, and will continue to develop and enhance customer solutions, constantly improving the offer!

Here are the latest features for FlexSeT Switchboards:

- Designed, listed, and assembled in accordance with UL 891 Standards
- NEMA 1 enclosure
- All front and side covers use captive hardware
- Front and rear accessible
- Swingable main breaker mounting assembly
- Main breaker ampacities—100% rated up to 65 kA
 - Backfed: 400 A, 600 A, 800 A, 1000 A, 1200 A, 1600 A
 - Individually mounted: 400 A to 2000 A
- All copper system bussing rated for 2000 A, including neutrals
- Plug-on neutral for group mounted devices
- 2000 A I-LineTM feeder section with neutral bar within the stack—feeders from 15 A up to 1200 A
- Splice bridge with extending bussing
- Visi-TiteTM bolts on all torque-required bussing connections
- Swingable instrument compartment—separated and modularized
- Available devices:
 - PowerLogicTM power meter PM5563
 - Surge protective device—rated up to 240 kA
 - Maintenance mode setting (MMS) switch—compliant with NEC 240.87 Arc Energy Reduction requirements
 - SmartCellTM compatible!
- Digital Asset Lifecycle Management—all drawings, test reports, and instruction/ installation manuals are cyber-secured and available online

Partner Support Program

The Partner Support Program is in place to support and grow our partner business through fast and reliable service using a best-in-class process that is simple and smooth, utilizing a self-help guide. A dedicated Partner Support Program specialist is assigned to each partner with the mission to support, train, and certify partners to build FlexSeT switchboards with the high level of quality and safety standards expected of Schneider Electric products, as well as provide an ongoing, dedicated, direct line of support.

Customer Care Center and Technical Support

For any inquiries on FlexSeT and other Schneider Electric products, please contact our customer service and technical support personnel at 1-888-778-2733 anytime. Our support teams can assist with any questions you might have and help you with the solutions you need.

Catalog of Kits and Parts

Use the commercial reference numbers listed in the following tables to order new/replacement kits and parts as needed. The modularity of the FlexSeT Switchboard design makes it easy for the equipment to expand according to our customer needs. Many applications are retrofittable. New functionality can be added by purchasing the kits below and installing on existing installed equipment. Certain spare parts are provided for replacement as needed by the customer.

Please consult Schneider Electric instruction bulletins JYT1078000, FlexSeT Switchboards, or NNZ9919501, FLEXPON 570/1200/1200S Plug-on Neutrals, for references on certain selections, based on application and technical specifications.

Table 11.1: Field Installable—Individually Mounted Devices (Installed in the Instrument Compartment)

Kit Description	Application	Maximum Voltage	Catalog No.	Installation Site
Instrument compartment box [1]	Enclosure for MMS/Trip unit, PM 5563, and SPD	600	FLEXINSTRCOMP	Partner/Field
MMS/Trip unit	Incident energy reduction switch; Low/no power circuit breaker trip		FLEXIMAMMS	
Power meter 5563	Power metering and monitoring		FLEXIMAMETER	
208 V SPD	Surge protection		FLEXIMA208SPD	
480 V SPD	Surge protection	208	FLEXIMA480SPD	Field
ENCT	Radial ground fault protection 400–2000 A	480	FLEXNCT2000	
120 Vac shunt trip [2]	Powerpact M/P/R remote tripping	600	S33661	
24 Vdc shunt trip [2]	Powerpact M/P/R remote tripping		S33659	

Table 11.2: Field Installable—Group Mounted Devices (Installed on the I-Line Stack)

Kit Description	Application	Maximum Voltage	Catalog No.	Plug-on Neutral Required	Installation Site
240 V MMS/Trip unit	Incident energy reduction switch; Low/no power circuit breaker trip	240	ICWL22X2BFMMMS	No	Partner/ Field
480 V MMS/Trip unit		480	ICWL24X2BFMMMS		
600 V MMS/Trip unit		600	ICWL26X2BFMMMS		
208 V SPD	Surge protection	220	FLEXGRP208SPD	Yes	
480 V SPD		480	FLEXGRP480SPD		
Power meter 5563	Power metering and monitoring	480	FLEXGRPPM5563	No	Field
120 Vac shunt trip [2]	Powerpact M/P/R remote tripping		S33661		
24 Vdc shunt trip[2]			S33659		
1200 A plug-on neutral with sensor [3]	Neutral termination device with LSIG circuit breakers		600		
1200 A plug-on neutral [3]	Neutral termination device	FLEXPON1200			
570 A plug-on neutral [3]		FLEXPON570			

[1] Required for MMS/Trip unit, PM5563, or SPD installation only. An instrument compartment for field installation needs to be ordered with an instrument compartment cover (catalog number 80210-181-50) in the Table 11.4 FlexSeT Spare Parts, page 11-6 table. Not required for ENCT or shunt trip kits.

[2] Shunt trip kits to be shipped from partner to field job site for contractor installation only.

[3] Plug-on neutrals have limited amounts of devices that can be provided. Please consult the FlexSeT PON instruction bulletin (NNZ9919501) to determine the right allocation per circuit breakers and other devices.

FlexSeT Circuit Breakers—Prewired for MMS and Ground Fault Applications

Please use the following table as a reference-specific circuit breakers. These circuit breakers are PowerPact™ Series with a wire harness pre-installed according to application needs. If MMS, or ground fault protection are needed in main or feeder applications, these circuit breakers must be used. These circuit breakers should not be installed in QED-2 Switchboards.

The I-Line™ feeder section in FlexSeT switchboards is fully compatible with any plug-on circuit breaker used in QED-2 Switchboards. The circuit breakers listed in the table are specific only to applications mentioned above, where a harness is provided for ease of installation.

Table 11.3: FlexSeT Circuit Breakers

Description	Application	Mounting Type	Trip Unit	Pre-Wired Harness	Catalog No.
600 V, 1200 A circuit breaker	Main or feeder; MMS and ground fault capable	I-Line Group Mounted	6.0 A (LSIG)	MMS, Trip Unit Power, and ENCT	PJA36100U44AFLEX
600 V, 800 A circuit breaker	Main or feeder; MMS capable	I-Line Group Mounted	5.0 A (LSI)	MMS and Trip Unit Power	PJA36120U43AFLEX

Power-Style QED-2 Switchboards (UL Listed)

For solutions that bring people, products, and information together, Square D™ brand Power-Style QED-2 low voltage switchboards from Schneider Electric are built to last and feature design innovations that make these products easier to install and maintain. Supported by one of the largest distributor, sales, and service organizations in the industry, QED-2 switchboards are readily available to meet the needs of contractors, consultants, and end-users.

Q = Quality—Built to Last

As one of the most trusted names in electrical distribution, Square D™ brand QED-2 switchboards are designed with the highest standards of quality. From sturdy frames, securely fastened thread-forming screws, and standard bolted, base channels, users will see the difference during installation, operation, maintenance, and expansion projects.

E = Efficient and Innovative Designs

In 2010, Schneider Electric launched QED-2, Series 2 switchboard designs. Series 2 designs represent the next generation of our QED-2 switchboard offering, with new features based on extensive customer feedback. From improved branch neutral and ground bar access, to enhanced instrument compartments, Series 2 designs provide easier access for performing equipment installation and maintenance procedures.

QED-2 switchboards feature Schneider Electric's unique I-Line™ plug-on connections in group-mounted construction. With the I-Line design, a screwdriver is the only tool required to firmly ratchet the line end of a molded-case circuit breaker directly onto the I-Line bus assembly. This plug-on design allows quick installation and mounting flexibility of circuit breakers up to 1200 A.

D = Delivery—Ready When You Are

To meet tight project schedules and budgets, our Square D™ brand QED-2 switchboard offering brings together standard designs for the most frequently requested ratings and options, providing immediate pricing for quick shipments from 11 to 30 business days.

Features

- QED-2 Switchboards are designed, listed, and built to UL 891
- Several tiered EcoStruxure communication offers available
- Switchboard ratings through 6000 A, 200 kA; higher amperages available
- Front accessible load connections
- Front and rear alignment standard
- Cable, busway, transformer, or remote QED switchboard incoming fed
- Hot or cold sequence utility metering
- **New!** MasterPact MTZ advanced communication stored energy circuit breaker—available in fixed or drawout for individually mounted mains or feeders
- Thermal-magnetic, PowerPact™ electronic, or MasterPact™ NW stored energy fixed or drawout circuit breakers used as mains and feeders
- Group-mounted circuit breaker and fusible switch mains and feeders
- Fixed-mounted fusible switch mains and feeders
- Powerlogic customer metering, including option for custom communications capability and interwiring
- Networked communications capabilities provide direct access to energy management at main and feeder level
- Internally-mounted Surgelogic™ surge protective devices
- Quick Connect Generator option available
- **New!** **Available in mid-2019:** Expanded stacked breaker designs to optimize overall layout
- Main devices in six sub-division or single main configurations
- Main and branch devices in single section configuration
- Multiple individual devices in single section configurations
- Custom engineering, including main-tie-mains, multiple sets of thru-bus, reduced heights, and engineered houses

Additional Information:

See Table 9.109 Circuit Breaker / Sub-feed Lug Kit Mounting Space Requirement, page 9-48 for circuit breaker mounting height requirements.

Where Utility compartments are required, contact your local Schneider Electric representative.

Power-Style QED-6 Switchboards (UL Listed)

MasterPact™ MTZ, NW, NT, and PowerPact™ H and J Circuit Breakers

The QED-6 switchboard is designed to provide excellent distribution, protection, and power quality management in commercial electrical equipment. The circuit protection components of the switchboard are the MasterPact MTZ2, MTZ3 or NW circuit breakers in 800–6000 A frame sizes, MasterPact MTZ1 or NT circuit breakers in 800–1200 A frame sizes, and PowerPact H and J circuit breakers in 150–250 A frame sizes. These circuit breakers deliver maximum system uptime, system selectivity, ease of maintenance, and reliable circuit protection.

QED-6 switchboard features include: MasterPact MTZ2, MTZ3 or NW UL 489 Listed circuit breakers for main and feeder devices, MasterPact MTZ1 or NT UL 489 Listed circuit breakers for feeder devices, PowerPact H and J UL 489 Listed circuit breakers for feeder devices, and a wide range of designs and options. Highly flexible drawout circuit breakers can meet a wide variety of power distribution requirements. Choices include drawout construction in PowerPact H and J circuit breakers, and optional prepared drawout spaces that are equipped with all specified control functions. This capability allows quick additions for load upgrades.

- QED-6 switchboards are designed, listed, and built to UL 891; MasterPact and PowerPact circuit breakers are designed, listed, and built to UL 489
- Circuit breakers are individually mounted, rear connected; MasterPact MTZ, NW and NT circuit breakers are drawout; PowerPact H and J breakers are drawout
- Family of field installable and upgradeable MicroLogic™ trip units with optional EcoStruxure Power™ data communications features
- Switchboard ratings up to 150 kA short-circuit current rating for services 1600–6000 A at 480 V and 100 kA at 600 V
- Up to (12) 250 A PowerPact H and J circuit breakers in a single 30-inch wide section
- Up to (8) 1200 A frame MasterPact MTZ1/NT circuit breakers in a single 30-inch wide section
- Flexible branch circuit breaker locations: MasterPact and PowerPact circuit breakers can be mixed in a single 30-inch wide section (15–2000 A)
- Compartmentalization: separate compartments for circuit breakers, bussing, and load cabling
- Available in 54-, 60-, 72-, and 80-inch deep construction
- Available in NEMA 3R outdoor walk-in enclosures
- Mixing of MTZ and NW/NT circuit breakers are not offered in factory configured sections but can be field retrofitted as such
- MasterPact and PowerPact circuit breakers are field maintainable

QED-6 switchboards are reliable power protection equipment when working with telecommunication facilities, e-business servers, or mainframes that perform critical business transactions. These types of facilities cannot afford downtime.

QED-6 rear-connected switchboards are designed as standalone switchboards or as an integral part of the low voltage equipment lineup in a user's power unit substation.

QED-6 Switchboard with MasterPact MTZ Circuit Breakers (Class 2746)

QED-6 Switchboard with MasterPact NW/NT and PowerPact H/J Circuit Breakers (Class 2746)

Table 11.5: Circuit Breaker Selection

Rating (A) (Frame)	Circuit Breakers
150–250	PowerPact H, J
800–1200	MasterPact MTZ1/NT
800–6000	MasterPact MTZ2, 3/NW

Specify QED-6 Switchboards

When drawout construction is required for quick circuit breaker changeout; system requirements call for circuit breakers to close within five cycles; stored energy circuit breakers are required; front access to control wires is desired; ease of installation, maintenance, and upgrade of circuit breaker compartmentalization is required; system integrity and segregation of circuit breaker compartments from bus and cable compartments is required; equipment isolation is required.

Benefits/Values of Circuit Breaker Performance

MasterPact MTZ, NW and NT circuit breakers are designed to provide maximum protection and reliable operation with a long service life. They exceed all UL 489 endurance testing requirements and are certified to a minimum of 10,000 operations through the 3000 A frame.

System Coordination

Short-time ratings are high, giving users excellent system coordination and selectivity with downstream breakers.

High Short-Circuit Current Ratings (SCCR)

Up to 200 k AIR at 240 V, 150 k AIR at 480 V, and 100 k AIR at 600 V, which allows customers to design systems with high fault current and paralleling schemes.

Arc Flash Limiting (LF) Feeder Breakers

High speed operation of MasterPact MTZ, NW and NT circuit breakers (150 k AIR at 480 V) helps reduce arc flash incident energy (cal/cm²) on downstream equipment.

Ease of Installation and Maintenance

Thru-the-door construction, an easy to operate drawout mechanism, and front access to all control wiring make this equipment easy to install, maintain, and upgrade. Load connections in the cable compartment are easily accessible in the rear of the switchboard. Remote racking of the MasterPact circuit breaker is also available with the optional remote racking tool, which, if required, is field installable.

Ability to Upgrade

UL Listed, field-installable accessories include: motor operators, shunt trips, under voltage devices, trip units, and communication modules for trip units. Manually operated circuit breakers are field convertible to electrical operation.

Open Communication System

The MicroLogic trip units in MasterPact circuit breakers use the Ethernet TCP/IP or ModbusTM serial protocol. These are widely accepted protocols which allow QED-6 to be integrated into new or many existing communication systems.

Adaptable

Drawout circuit breakers, front access control wiring, and expandable lineups are quickly adaptable to changing load and control requirements.

Expandable

MasterPact circuit breakers have many control termination points, giving the equipment extensive flexibility and expandability for sophisticated control schemes.

Power-Style Commercial Multi-Metering Switchboards (UL Listed)

- Designed, built, and listed to UL 891
- Lever bypass and EUSERC non-lever bypass
- Hot or cold sequence metering—EUSERC, NEMA, LOCAL
- Front and rear alignment standard
- Switchboard ratings through 4000 A, 100 kA
- Meter sections in either three- or six-socket section configuration
- Tenant mains either circuit breaker or fusible
- 60–200 A without lever bypass with self-contained meter sockets, 5- or 7-jaw, ring type and test block where required
- 60–200 A lever bypass with self-contained meter sockets, 7-jaw, ringless
- Factory-installed devices with completely wired from meter socket to disconnect
- Provisions for adding future tenants available, as well as future sections
- Sections in either NEMA 1 or NEMA 3R construction
- For use on 120/240 V, 120/208 V, and 277/480 V systems
- Integrated, front-accessible wireway for top exiting load cables
- Customer access area for top exiting load cables

Lever Bypass

EUSERC UCT
Single Main Circuit Breaker with
I-Line Distribution Panel

EUSERC UCT
Fusible Multiple Mains

Speed-D SB/SF Switchboards (UL Listed)

- UL Listed
- California Energy Commission (CEC) Title 24 compliant configurations available for California installations
- Hot sequence utility compartment per EUSERC requirements
- Two types:
 - Utility–Service disconnect–distribution
 - Utility–Up to six service disconnects
- Single service disconnect, either circuit breaker or fusible rated 400, 600, or 800 A with either type of distribution interiors, NQ up to 240 Vac, I-LineTM through 480 Vac
- Six service disconnects, group-mounted fusible, QMB/QMJ, 30–400 A; utility compartment—400, 600, and 800 A
- Meter doors can be 15 inches high with one meter socket and test block, or 30 inches high with two meter sockets and test block
- Meter sockets can be 6-, 8-, 13-, or 15-jaw meter sockets with test block, based on application
- Solar ready configurations are now available, using a back-fed circuit breaker on the I-Line stack
- Accessories include:
 - Underground pull sections with and without lug landing
 - Loadside wireway
 - Bus links for donut-type current transformers
 - Double padlock hasp attachments
 - Plug-on distribution panel
 - Subfeed circuit breakers
- Full height add-on I-Line distribution section
- Stand-alone I-Line distribution section

Application

Suitable for use as service entrance equipment on ac systems. Sections contain metering compartment, barriers, main disconnects, distribution panel, neutral bus, and grounding provisions.

Metering

C/T compartment with two 15-inch blank meter doors. (Order doors with meter socket from [Table 11.11 Meter Door Selection, page 11-13.](#)) Incoming cable lugs are for top feed with one twin conductor 2 AWG–600 kcmil lug per phase and neutral, suitable for aluminum or copper cables. Optional single conductor lug is available. Refer to [Table 11.12 Accessories, page 11-13.](#)

Mains

Main breaker can be LH, MJ, PowerPact L, or PowerPact P. Standard and advanced electronic trip units available for PowerPact breakers. Multiple main devices use plug-on fusible switches. Main breakers with Energy or Power trip units comply with CEC Title 24 metering requirements.

Branches

NQ distribution bus is rated 400 A and provides mounting space for QOTM/QOB Type (150 A maximum) circuit breakers. Panel provides space for mounting 42 single pole circuit breakers. One or two individually mounted 225 A maximum circuit breakers can be added with bus connectors. (Order subfeed circuit breakers from [Table 11.13 Subfeed Circuit Breakers \(Series E4\), page 11-14.](#))

I-LineTM distribution bus is rated 400, 600, or 800 A and will accept 27 inches of I-Line circuit breakers on the left side with a maximum frame size of “J”. The right side will accept either a QO plug-on distribution panel (240 V only) or LA or LH I-Line circuit breaker, which allows for a back-fed solar power source.

Enclosure

Totally enclosed front accessible with ANSI 49 gray baked enamel finish. Dimensions are 90 in. (H) x 36 in. (W) x 14 in. (D) for indoor and 90 in. (H) x 36 in. (W) x 24.5 in. (D) for outdoor enclosures.

Ordering Information

- Service section:** Order service section from Table 11.6 Single Main Circuit Breaker with Distribution (Series E4), page 11-12, Table 11.8 Single Main Fusible Disconnect with Distribution (Series E4), page 11-13, or Table 11.9 Multiple Mains—Fusible (Series E4), page 11-13, as determined by mains rating, voltage, and system.
- Meter doors:** Order meter door from Table 11.11 Meter Door Selection, page 11-13 as determined by the height and utility metering requirements.
- Accessories and subfeeds:** Order as required from Table 11.12 Accessories, page 11-13 and/or Table 11.13 Subfeed Circuit Breakers (Series E4), page 11-14.
- Circuit breakers and switches:** Order devices from pages listed below as determined by voltage, trip rating, AIR, and mounting space.

Multiple Mains and Branch Devices

- QO, QOB, QO-VH, QOB-VH: page 1-3 and page
- I-Line: page 9-55 to page 9-61
- QMB Switches: page 9-64

[8] To be used on 120/240 V, 3Ø4W delta applications.

[9] Two pole circuit breaker catalog numbers are completed by adding required phase connection letters as suffix (for example, SASFBH100LAC).

[10] Cannot use subfeed circuit breaker kit with multiple mains service section switchboards.

Power-Zone 4
Low Voltage Switchgear with MasterPact MTZ Circuit Breakers
(Class 6037)

Power-Zone 4
Low Voltage Switchgear with MasterPact NW Circuit Breakers
(Class 6037)

Power-Zone 4
Front Accessible Low Voltage Switchgear
(Class 6037)

NOTE: Shown with MasterPact MTZ circuit breakers. MasterPact NW circuit breakers are also available.

Power-Zone™ 4 Low Voltage Switchgear with MasterPact™ MTZ or NW/NT Circuit Breakers

Square D™ brand Power-Zone™ 4 low voltage, metal-enclosed, drawout switchgear is designed to provide superior electrical distribution, protection, and power quality management. The prime components of the switchgear are the MasterPact™ ANSI rated circuit breaker. Power-Zone 4 switchgear is designed to maximize the functionality of the MasterPact circuit breakers, which, in turn, deliver maximum uptime, system selectivity, ease of maintenance, and reliable circuit protection. All of these features are packed into the smallest footprint available for low voltage drawout switchgear.

- Power-Zone 4 is designed and built to ANSI® C37.20.1 and is Listed to UL 1558
- MasterPact MTZ, NW and NT drawout low voltage power circuit breakers are designed and built to ANSI C37.13 and C37.16. Listed to UL 1066
- Short-circuit current rating up to 200 kA at 240 V and 480 V without fuses
- High short-time withstand ratings up to 100 kA for 1 second, minimum
- Arc flash limiting (L1F) MasterPact MTZ2 or NW feeder breakers available in 800, 1600, and 2000 A ratings
- Family of field installable and upgradeable MicroLogic™ trip units with optional EcoStruxure Power™ data communications features
- Power-Zone 4 switchgear can offer optional factory integrated data communications capability with Ethernet (Modbus TCP/IP) connectivity to EcoStruxure Power Edge Control or Asset Management software
- Smallest equipment footprint available in this product class
- Front access to all control and communications wire connections
- Bolted copper bus provided as standard (up to 6000 A maximum)
- Large rear cable compartment pull area allowing maximum room for power cables
- Horizontal bus provision for future equipment expansion
- System designed for maximum uptime with low maintenance
- Modular circuit breaker designed for easy addition of control accessories
- Available in NEMA 3R outdoor walk-in enclosures
- Available in 42" deep, front accessible only version for greater layout flexibility and optimized electrical house footprint
- Available Arc Resistant construction certified to ANSI C37.20.7. See [Power-Zone™ 4 Arc Resistant Switchgear with ArcBlok Technology](#), page 11-16.

MasterPact MTZ2, 3 or NW circuit breakers are available in various levels of interrupting ratings from 42–200 kA at 480 V and 130 kA at 600 V.

The MasterPact MTZ1 or NT circuit breaker is available in an 800 A frame size and 42 kA at 480 V interrupting rating. Up to 8 MasterPact MTZ1 or NT circuit breakers can be mounted in a 30-inch wide section. (Not available for 600 V.)

Circuit breakers of like frame sizes and interrupting ratings are interchangeable.

Table 11.14: Equipment Ratings

Application Voltage Systems		Ampacities	
600 Vac Maximum		1600 A–6000 A (Main circuit breaker or main lugs only)

200 kA	200 kA	130 kA	100 kA (maximum)

Power-Zone™ 4 Arc Resistant Switchgear with ArcBlok Technology

Protecting Your Personnel and Equipment from an Arc Flash

Power-Zone 4 arc resistant switchgear with MasterPact ArcBlok technology offers patented, superior arc flash protection for operators and maintenance personnel. The arc flash containment features are unique to the industry in both the circuit breaker compartment and the structure.

Power-Zone 4 Arc Resistant Switchgear with ArcBlok Technology is certified to comply with *ANSI C37.20.7 IEEE Guide for Testing Metal-Enclosed Switchgear Rated Up to 38 kV for Internal Arcing Faults*, and third-party (UL) witnessed as arc resistant switchgear. Refer to Data Bulletin 6037DB1302 for the complete UL Witness Certification Summary.

Features

- MasterPact MTZ2, 3/NW circuit breakers with patented ArcBlok technology (up to 5000 A)
- Rated for systems with up to 100kA, 635V fault current
- 60 in. deep x 22 in. wide (smallest arc resistant footprint in the industry)
- 22 in., 36 in. section widths
- 60 in., 72 in., 80 in. section depths
- Internal arc gas management system for optimized cooling
- ANSI Type 2B Rating
- NEMA 1 enclosure

Available Options

- Insulated copper bus
- Zone selective interlocking
- High-resistance grounding
- Energy reduction maintenance switch
- Section barriers (rear, cable, and side)
- Circuit breaker remote racking
- ANSI Type 2B rated arc plenum exhaust

Arc Resistant Power-Zone 4
Low Voltage Switchgear
(Class 6037)

NOTE: Shown with MasterPact NW ArcBlok circuit breakers. MasterPact MTZ2,3 ArcBlok circuit breakers are also available.

Built on the Legendary Performance and Reliability of the MasterPact Line

MasterPact MTZ circuit breakers prepare you for the future of power distribution. Smart connectivity. Remote monitoring. Easy customization via digital modules. MasterPact MTZ circuit breakers bring the future-ready EcoStruxure Power capabilities you need to build smart, dependable, and sustainable power distribution systems:

- Smartphone connectivity for wireless alerts and maintenance
- Precision Class 1 power meter built in for energy-saving capabilities
- Easy customization via digital modules
- Intuitive MicroLogic™ X control unit
- Robust performance, even in harsh environments
- Seamless integration with building and energy management systems via EcoStruxure Power architecture
- Designed and tested to applicable standards for ANSI, UL and IEC

With Masterpact MTZ breakers,
enhanced connectivity equips you
for the future of power distribution.
Available from 800 A to 6000 A.

(Class 6042)

MiniBreak™ Compact Height Switches— 5.5 kV, 200 A

The Square D™ brand MiniBreak compact height switch enclosure is only 66-inches high and contains a single 3-pole load interrupter switch, rated 5.5 kV and 200 A. Enclosures are free-standing and suitable for both indoor (NEMA 1) and outdoor (NEMA 3R) applications. These switches are available unfused or with provisions for ANSI-style, 3-inch-barrel fuses rated from 10E A to 200E A. Factory-installed accessories include an auxiliary switch, strip heaters, and provisions for a “lock open” only key interlock. The door is mechanically interlocked with the switch operating handle. Set screw cable lugs for #14 solid—2/0 stranded aluminum or copper cable are provided for two line and one load connections. **Fuses are not furnished with this equipment.** For fuse information, see [Table 11.17](#) Current-Limiting Fuses, Non-Disconnect Type. The Fused switches and many of the fuses listed in this table are available from stock.

Table 11.15: Ratings

Max. design voltage (kV)	5.5
BIL (kV)	60
Frequency (Hz)	60
Continuous amperes	200
Interrupting amperes	200
Momentary (amperes asymmetrical)	20,000
Fault close (amperes asymmetrical)	20,000
Capacitor switching (kVAR)	None
Short time, 2 seconds (amperes symmetrical)	12,500
Low frequency withstand (kV)	19
Fuse integrated (symmetrical)	63,000

NOTE: 1200 hp maximum.

**Premset Compact Vacuum Circuit Breaker Switchgear with
Shielded Solid Insulation System (2SIS)**

Premset represents the new generation of medium voltage switchgear. It is 15 kV vacuum circuit breaker switchgear technology that takes advantage of the innovative shielded solid insulated system (2SIS). 2SIS creates a three-layered system (medium voltage conductive layer, epoxy insulating layer, and grounded shield layer) throughout the entire switchgear that optimizes performance and increases life expectancy. Premset reduces the opportunity of arc flash or contact with live parts by insulating and screening all live parts in an epoxy dielectric molding. In addition, a grounded shield layer helps reduce the likelihood of exposure to electrical hazards while at the same time better protecting the insulating material from harsh environmental conditions such as moisture, dust, chemicals, and vermin.

Premset delivers a compact architecture that is both modular and flexible. It allows for front-only accessibility (bottom incoming cables) and the smallest 15 kV vacuum circuit breaker footprint on the market. Plug-and-play design of accessories and auxiliaries makes even last minute or field modifications possible. Modular design improves cost savings and optimizes delivery times. Premset's modular architecture makes it easy to use in design and intuitive to learn for operators.

Table 11.19: Premset Ratings

Voltage Class	5 and 15 kV			
Bus Current Rating	600 and 1200 A			1200 A
Circuit Breaker Current Rating	100 A	200 A	600 A	1200 A

Listed Metal-Enclosed
Interrupter Switchgear

HVL/cc Metal-Enclosed Load Interrupter Switchgear—Full Range

Square D™ brand HVL/cc metal-enclosed load interrupter switchgear provides switching, metering, and interrupting capabilities for medium voltage electrical power distribution systems and is designed and tested per applicable ANSI/IEEE and NEMA standards.

Made up of modular units, the HVL/cc is easy to expand. Two main bus positions allow future extensions and connections to existing equipment.

HVL/cc switchgear is available in either single or multiple bay units. The design is compact, with front access only options available at system voltages below 17.5 kV.

The HVL/cc switch can be equipped with either an over-toggle mechanism (OTM), which is standard, or an optional stored energy mechanism (SEM). An option with both mechanisms is the Fuselogic™ system. The Fuselogic system offers fuse tripping (with SEM) to provide protection against single phasing loads when a fuse has blown.

Where available, the HVL/cc front access only enclosures can be positioned against walls, in small rooms, or in pre-fabricated buildings. The small footprint can result in considerable cost savings from the reduction of building or room sizes.

Switch Standard Features

- Switch Positions: Closed, open, and internally grounded (optional) (connects switch contacts to ground)
- Enclosure: Epoxy
- Medium: Sulphur hexafluoride
- Maintenance: Maintenance free sealed for life
- Pressure:
 - 5.8 PSI (≤ 17.5 kV)
 - 22 PSI (25.8–38 kV)
- View ports to show switch blade position

Options

- Internal ground switch: Has full fault making capability
- Fuselogic™ system
- Infrared viewing windows
- Class I, Division 2
- Fast auto transfers
- Duplex configurations
- Powerlogic™ metering
- 20-inch or 29.5-inch wide enclosures

Fuselogic™

Fuselogic is a protection system that provides the ultimate in medium voltage fuse protection. This patented system utilizes Square D™ brand current-limiting fuses with mechanical sensors that function without any auxiliary power requirements. Several combinations of Fuselogic functions can be combined to provide simple blown fuse indication contacts with mechanical lockout to anti-single phasing protection. Anti-single phasing requires the optional stored energy mechanism. Fuselogic is available on both HVL/cc and HVL switches.

Switchgear Standard Features

- Compartments: Switch, bus, fuse/cable, mechanism, and optional low voltage/control
- 11 gauge steel enclosure
- Epoxy insulators
- Fuse/cable access panel interlocked with switch
- Front access only options available at system voltages below 17.5 kV
- Animated mechanism mimic bus
- Padlocking provision—open or closed (OTM); open-only (SEM)
- Top or bottom cable entry
- UL/CUL Listed, IEEE C37.20.3
- Live line indicators on all incoming switch bays and outgoing feeder circuits
- Cable lugs included for one cable per phase
- Tin plated copper bus for lineups

Table 11.21: Surge Arresters

System L-L Voltage kV		Arrester MCOV-kV

HVL/cc Switchgear Quick Ship Program—5–15 kV, 600 A

The HVL/cc quick ship program provides basic fused and unfused load interrupter switch configurations for standalone or transformer primary applications. The Quick Ship program offers faster delivery, but with fewer options.

Three-pole, 600 A individual HVL/cc switches are available in free-standing indoor (NEMA 1) enclosures. These switches are available unfused or with provisions for Square D™ brand current-limiting DIN/E fuses. Factory optional accessories include auxiliary bays, main bus, auxiliary switches, and distribution class surge arresters. The fuse access panel is mechanically interlocked with the switch mechanism. Key interlocks are not an available option with Digest-listed HVL/cc switches. (1) Set screw type lugs for (2) #2–350 kcmil copper or aluminum cables are provided for line and load connections.

Fuses are not furnished with this equipment. For fuse information, refer to [General Purpose E-Rated Current-Limiting Fuses: Type DIN/E for HVL/cc Switches, page 11-25](#).

NOTE: Cable entry and exit must be opposite to maintain the minimum sections shown.

5 kV Indoor N1
Top Cable In/Bottom Cable
Out Switch in Position A

Mechanical interlock between switch and fuse access panel.

NOTE: Mechanical interlock is standard on switches.

5 kV Indoor N1
Top Cable In/Bottom Cable Out
Switch in Position B

Provisions for Future Expansion

- All “single” HVL/cc switches have provisions for future expansion on either side
- Order main bus kits for copper 600 A bus

600 A Single Switch Unfused

- Manual over-toggle mechanism, no grounding switch
- Includes (1) set screw for (2) #2–350 kcmil Cu or Al conductors per phase
- Application A = Top entry (incoming—cable or main bus), bottom exit (load—cable or main bus)
- Application B = Bottom entry (incoming—cable or main bus), top exit (load—cable or main bus)

Table 11.29: Surge Arresters

600 A "Single" HVL/cc Switch with PROVISIONS ONLY for Square D™ brand Current-Limiting, Non-Disconnect Type Fuses for Cable Connection to Power-Dry™, Power-Cast™, and Uni-Cast™ Transformers

Application B = Bottom Entry (Incoming Cables)

Table 11.30: 600 A “Single” HVL/cc Switch Selection

NOTE: Switches with transformer connections are painted ANSI 49. Standalone switches are painted ANSI 61. Transformer connections in HVL/cc switches are based on standard Square D™ brand transformer connections. If these switches are used to connect to other manufacturers' transformers, then connections must match standard Square D™ brand transformer connections. (Cable connections are furnished with the transformer.)

General Purpose E-Rated Current-Limiting Fuses: Type DIN/E for HVL/cc Switches

- Integrated rating for 600 A HVL/cc switches with Square D™ brand DIN/E fuses listed below is 65 kA rms symmetrical amperes.
- Current-limiting fuses increase the integrated short-circuit current rating because of their energy-limiting capabilities.
- To increase the short-circuit current rating of the entire lineup of switchgear, current-limiting fuses must be used in the entrance sections.

HVL Metal-Enclosed Load Interrupter Switchgear—Full Range

HVL™ 5–38 kV Load Interrupter is the most popular ANSI-rated switchgear in its class in America. Among medium voltage interrupter switchgear, both the switch and the enclosure stand as industry benchmarks in the areas of design, manufacturing, and performance. Load interrupter switchgear must perform a number of critical functions in a unit substation - protecting equipment and disconnecting faulted lines and transformers. Designed and tested to the latest applicable standards, HVL has been engineered to provide superior protection for your distribution system.

HVL switchgear is available for various applications and configurations, including:

- Individual service entrance bays
- Multiple-bay lineups incorporating HVL load interrupters
- Substation primaries

Square D™ brand metal-enclosed switchgear has become an industry standard for its better system performance, lower maintenance cost, easier system expansion, and reduced system expense.

A full range of ratings and options are available but not listed in this publication. Contact your nearest Schneider Electric sales office or your local Schneider Electric distributor.

Table 11.33: Ratings

Maximum design voltage (kV)	4.76	15	17	25.8	29	38
BIL (kV)	60	95	95	125	125	150
Frequency (Hz)	50/60	50/60	50/60	50/60	50/60	50/60
Continuous amperes	600/1200	600/1200	600	600/1200	600/1200	600
Interrupting amperes	600/1200	600/1200	600	600	400	400

Fault close (kA asymmetrical)	40/61	40/61	40	28	28	20
Capacitor switching (kVAR)	2400	2400	—	—	—	—
Short time rating 2 seconds (kA symmetrical)	25/38/50	25/38/50	25	25	25	25
Low frequency withstand (kV)	19	36	36	60	60	80

Standard Features

- 11 gauge steel enclosure
- Direct drive mechanism
- Permanently attached operating handle
- Visible isolation viewing window
- Mechanical interlocked fuse access door
- Provision for padlock and key interlock
- Highly flexible design
- ANSI 61 paint

Options

- Outdoor construction
- Square D™ brand DIN-style current-limiting fuses
- Boric acid fuses
- Silver or tin plated copper bus
- 600, 1200, or 2000 A main bus
- Heat shrink insulated bus
- Motor operator
- Shunt trip
- Fuselogic™ tripping system
- Roof bushings
- Key interlocks
- Surge arresters
- Utility metering bays
- Duplex switch
- Transformer connections
- Infrared windows for thermal scanning of connections

Fuselogic™

Fuselogic is a protection system that provides the ultimate in medium voltage fuse protection. This patented system utilizes the Square D™ brand current-limiting fuses with mechanical sensors that function without any auxiliary power requirements. Several combinations of Fuselogic functions can be combined to provide simple blown fuse indication contacts with mechanical lockout to anti-single phasing protection. Anti-single phasing requires the optional stored energy mechanism (SEM). Fuselogic is available on both HVL/cc™ and HVL switches.

Class 6040 / Refer to Catalog 6040CT9201 or Brochure 6040BR9401

HVL Switchgear Quick Ship Program—5 kV–15 kV, 600 A

The HVL quick ship program provides basic fused and unfused load interrupter switch configurations for stand-alone or transformer primary applications. The Quick Ship program offers faster delivery, but with fewer options.

Three-pole, 600 A individual HVL switches are available in free-standing indoor (NEMA 1) or outdoor (NEMA 3R) enclosures. The switches used in these enclosures are UL Recognized and are listed under Category WIGG2 in File E140591(M). These switches are available unfused or with provisions for DIN—style, Square D™ brand current-limiting fuses or for boric acid fuses. Factory optional accessories include auxiliary switches, extra cable terminating lugs and distribution class surge arresters. The door is mechanically interlocked with the switch operating handle and provisions for key interlocks are standard. Set screw type lugs for one #2 solid—600 kcmil copper or aluminum cables are provided for line and load connections. Other standard features include a bolted enclosure with a viewing window, ground pad, and space heater (NEMA 3R only). Control power for heater must be from external source. **Fuses are not furnished with this equipment.** For fuse information, refer to [Table 11.45 DIN/E Current-Limiting Fuses, Non-Disconnecting Type](#), page 11-31, or [Table 11.46 Boric Acid Fuses](#), page 11-32. Many of the fuses listed in these tables are available from stock. Switches are listed in the tables below and on [page 11-29](#).

Class 6040 / Refer to Catalog 6040CT9201 or Brochure 6040BR9401

Provisions for Future Expansion

All “single” Digest switches have provisions for future expansion on either side. Order kits HVMB for top crossover copper 600 A bus and HVLC for line connections to the top bus. (See Table 11.44 Factory Modifications, page 11-30.)

HVL Switches for Power-Dry II™, Power-Cast II™, and Uni-Cast II™ Transformer Connections

HVL switches can be configured for close coupling cable connections to listed dry type transformers for primary main switches of unit substations. These are listed in the tables below with current-limiting or boric acid fuses. Both single and duplex switch mains are included in this selection. Transformers are listed on page 11-30 and may not be suitable for close coupling. For transformer availability and specific configurations, contact your local Schneider Electric sales office. All connections in this digest are based on standard Square D™ brand transformer connections. If these switches are used to connect to other manufacturers’ transformers, then connections must coordinate with standard Square D™ brand transformer connections. (Cable connections are furnished with the transformer.)

NOTE: Switches with transformer connections are painted ANSI 49. Standalone switches are painted ANSI 61.

Fuse Selection

The rule of thumb method for selecting fuses for transformer protection is 1.33 times the self-cooled full load current of the transformer or the next higher fuse rating. Selection of the fuse is the customer's responsibility and should be based on transformer and system characteristics.

- **Maximum Fuse Size:**
Maximum fuse size should be determined by comparing the fuse total clearing curve to the transformer damage curve. Contact Schneider Electric for transformer overload and short-circuit withstand capability.
- **Minimum Fuse Size:**
Minimum fuse size shall carry the transformer magnetizing inrush current of 12 times full load amperes for 0.1 second.

Table 11.44: Factory Modifications

Catalog No.	Description
HVMB	Main Bus Kit, 600 A copper
HVLC	Line side connector kit (main bus) 600 A with 2–1/0=500 MCM lugs (bottom entry only) Provisions for key interlocks—Type KFL Kirk key lock with a 0-inch bolt projection (Kirk item master number KFL000010SH)
HVLX3	Auxiliary switch 2 N.O.—2 N.C. contact
HVLC2	Set screw type lugs 1/0—500 kcmil (qty. 3)
Distribution Class Surge Arresters [11]	
HVDSA3	3 kV, 2.55 MCOV
HVDSA6	6 kV, 5.10 MCOV
HVDSA9	9 kV, 7.65 MCOV
HVDSA10	10 kV, 8.40 MCOV
HVDSA12	12 kV, 10.20 MCOV
HVDSA15	15 kV, 12.70 MCOV

Standard Features

- Switches for transformer primaries are cable connected only.
- Key interlocks must be ordered and coordinated by customer.
- Standard color is ANSI 61 for standalone units; ANSI 49 for switches connecting to transformers.
- If switches are purchased to coordinate with Square D™ brand transformers, composite drawings and shipment coordination will not be available.
- Switches are not designed for any special dimensions for retrofit purposes. For dimensions other than shown, contact your nearest Schneider Electric sales office or your local Schneider Electric distributor.

Ordering Information

1. Select switch catalog number based on fused or unfused and enclosure type.
2. Select catalog numbers for factory modifications from the table above.
3. If fused, select fuse from Table 11.45 DIN/E Current-Limiting Fuses, Non-Disconnecting Type (Extended Travel Blown Fuse Indicator), page 11-31 or Table 11.46 Boric Acid Fuses, page 11-32.
4. Price switch and fuses separately. Switches are furnished with provisions only for current-limiting fuse or boric acid fuse.

[10] Includes fuse holder only. See Table 11.46 Boric Acid Fuses, page 11-32 for fuse refills. Boric acid fuses may increase lead times. Contact the factory for availability.

^[18] S&C Boric Acid Fuses

Type SM-5S fuses are manufactured by the S&C Electric Company. SM-5S has a 25.0 kA symmetrical short-circuit rating from 2.4 kV to 17.0 kV. For 16.5 kV ratings, only S&C boric acid fuses can be used.

^[19] Cutler-Hammer - Westinghouse Fuses

Type RBA-400 fuses are manufactured by Cutler-Hammer - EATON Corporation. RBA-400 has a 37.5 kA symmetrical ampere short-circuit rating from 2.4 kV to 4.8 kV and 29.4 kA symmetrical from 12 kV to 13.8 kV.

^[20] Caution—These fuses will not work for the MiniBreak. See Table 11.17 Current-Limiting Fuses, page 11-17 for the appropriate MiniBreak fuses.

^[21] Contact your Schneider Electric representative for current stock quantities.

^[22] Includes one set of three fuses, packed in a single box.

Listed Metal-Enclosed
Interrupter Switchgear

GHA Gas-Insulated Switchgear (UL Listed)

Easy, innovative, and economical **up to 38kV**

GHA Medium Voltage (MV) switchgear is an ideal solution for a variety of applications and requirements. GHA is well suited for public and industrial distribution networks, infrastructure projects, petrochemical oil and gas industries, and container substations to name a few. This compact and modular switchgear offers both flexibility and a long, low-maintenance service life.

Each section consists of sealed-for-life SF₆ modules, which contain the fixed vacuum circuit breaker, disconnect switch, and innovative busbar system. By design, there is no gas handling throughout the service life of the equipment, from installation until recycling at the end of life of the switchgear. Utilize the cutting-edge B-link busbar to easily install, extend, or replace gear in the middle of a lineup, without handling SF₆. Like the gas-filled modules, the B-link system does not require any maintenance.

Front accessible and ideal for a variety of applications, GHA represents the new generation of robust, extremely compact, and low maintenance MV switchgear.

11 SWITCHBOARDS AND SWITCHGEAR

CBGS-0 Circuit Breaker

CBGS-0 Gas-Insulated Switchgear (UL Listed)

Easy innovative and economical up to 38kV

CBGS-0 Medium Voltage (MV) switchgear is compact and easy to install and operate. Due to the insulating gas as well as the solidly insulated busbar and cable connections the medium voltage circuit is protected from environmental influences reducing the risk of arc flash events.

Each section consists of a sealed-for-life SF₆ tank which contains the fixed SF range circuit breaker and disconnect switch. By design there is no gas handling throughout the service life of the equipment from installation until recycling at the end of life of the switchgear.

Front accessible and ideal for a variety of applications from transformer substations to primary power distribution in markets ranging from mining and metals renewable installations container substations and heavy industry where space is at a premium.

DVCAS Switchgear for Wind Farm Applications

DVCAS medium voltage (MV) switchgear from Schneider Electric is designed to meet the electrical switching, protection, and connection needs of wind farm applications up to 38 kV. Three different modules are available:

- Transformer protection module D
- Outgoing line module O
- Incoming line module I

For standard wind power applications, a maximum of four modules can be connected in various configurations to provide the most commonly used wind power functions.

DVCAS switchgear is designed, manufactured, and tested in accordance with the following standards:

- C37.20.3
- C37.54
- CAN/CSA C22.2 No.31-M89
- UL Listed
- IEEE Cable Bushings

Typical IDO Configuration

Module D

Transformer Protection Module D

DVCAS switchgear module D provides transformer protection. Construction features include:

- Metal base frame
- Operating mechanism and relay compartment
 - disconnector operating mechanism
 - operating mechanism of the circuit breaker
 - protection relay VIP, Sepam, or Micom
 - zero sequence current transformer CSH 30
- MV cable compartment
 - bushings for cable connection
 - Three CRc current sensors per phase
- Stainless steel, gas-tight tank
 - busbar system
 - three position disconnector
 - circuit breaker

Outgoing Line Module O

DVCAS switchgear module O functions as an outgoing line to a downstream wind generator. There are two medium voltage cables per phase. Construction features include:

- Metal base frame
- Voltage presence indicator
- MV cable compartment
 - bushings for cable connection
 - clamps for MV cable connection

D + O
Transformer protection + Outgoing line

(I + D + O)
Incoming line + Transformer protection + Outgoing line

(I + I + D + O)
Two Incoming lines + Transformer protection + Outgoing line

Recommended Configurations**Incoming Line Module I**

DVCAS switchgear module I is a three-position switch-disconnector. It is recommended for the incoming line function from an upstream wind generator for the following reasons:

- Reduces downtime caused by faults
- Helps with fault detection
- Reduces interruptions due to maintenance work
- Improves energization works

Module I is always connected to module D on the right with single-phase, coupling bushings. Construction features include:

- Metal base frame
- Operating mechanism compartment
 - operating mechanism of the switch-disconnector
 - motor for the operating mechanism (optional)
- MV cable compartment
 - bushings for cable connection
- Stainless steel, gas-tight tank
 - busbar system
 - three position disconnector

Non Walk-in, Metalclad Switchgear

Masterclad™ Medium Voltage Metalclad Switchgear (UL Listed) The Reliability of a Quality Design

The quality of Square D™ brand Masterclad medium voltage metalclad switchgear stems from a design and manufacturing process that focuses on long-term switchgear performance with the highest degree of reliability.

Based on specific customer application needs, Schneider Electric engineers and technicians select the appropriate standard sections and bus configurations, with the ability to customize where needed. After the specified circuit breakers, instrument and control power transformers, relays, meters and other components are selected and approved. All are factory-assembled, wired, and tested as a complete assembly.

Table 11.53: Ratings

Close and latch rating (kA) (peak)	104	130	164	200

Type VR Vacuum Circuit Breaker

The VR breaker is a horizontal drawout type designed to provide long life, reduced maintenance, and ease of handling. The Type RI advanced design motor-charged stored energy mechanism is a model of reliability with simplicity-with an operating life exceeding ANSI requirements. The VR circuit breaker is UL labeled and includes a permanently mounted manual charging handle.

Standard features include:

- 3-cycle interrupting rating
- Rated per ANSI/IEEE C37.06, C37.09, C37.013, C37.54
- UL Listed
- Motor operated, spring-charged, stored-energy operating mechanism
- Permanently mounted manual charging handle
- Five normally open and normally closed auxiliary contacts
- Wheels that roll directly to floor level from lower cell

Switchgear Construction

- High-speed operation—3-cycles
- Removable (draw-out) circuit breaker
- Grounded metal barriers enclose all live parts
- Automatic shutters driven by breaker racking mechanism
- Closed door breaker position indication
- Closed door breaker racking mechanism
- Insulated main bus—aluminum or copper
- Standard glass polyester insulators or optional epoxy and porcelain insulators
- Mechanical interlocks
- Disconnect type CPT and VT trucks
- Grounded breaker truck in and between test/disconnected and connected positions
- Low voltage instrument/control compartment isolated from primary voltage areas
- Compliance to ANSI/IEEE standards C37.20.2 and C37.55 (designed and tested to comply with or exceed ANSI and IEEE standards)
- ISO 9001 Certification (Designed and manufactured in a facility that is Quality Systems Certified by Underwriters Laboratories, Inc.® to ISO 9001)
- Indoor NEMA 1 enclosure
- Outdoor NEMA 3R enclosure
 - Walk-in enclosure
 - Non walk-in enclosure

Active, Arc-Resistant**Arc Terminator™ Arc Extinguishing System**

Active system detects and controls the effects of internal arcing faults. It complies with ANSI C37.20.7 requirements for arc-resistant switchgear for Type 1, Type 2B, and Type 2C enclosures, even with the switchgear doors open.

In the event of a confirmed arcing fault inside a Masterclad switchgear or Motorpact equipment lineup containing an Arc Terminator (AT) system, the AT system provides a low impedance parallel path to effectively transfer the fault current from the arc to the 3-phase main bus assembly of the switchgear.

The AT system consists of the following components:

- A high-speed closing, or shorting, switch is designed to close on the main bus of the switchgear. This creates a three-phase short circuit fault confined to the main bus. Upstream protective device must clear fault within allowed time per applicable standard.
- The controller box is the central processing device that responds to the signals given by the current sensors and the optical sensors. The current sensor module and the control logic process incoming current and optical signals and send a signal to the output triggering circuit. The output triggering circuit releases stored energy to initiate closing of the mechanical switch and provides optical isolation to prevent false triggering
- Optical sensors are located in each medium voltage compartment within switchgear structures. A dedicated, properly sized set of current transformers is located at the incoming power source(s).

Benefits

- Prevents pressure buildup
- Reduces release of toxic materials
- Eliminates need for reinforced switchgear
- Eliminates special requirements for buildings or plenums
- Minimizes equipment damage
- Reduces operating downtime

Arc Terminator™
Arc Extinguishing System

Passive, Arc-Resistant**Masterclad™ Medium Voltage Switchgear**

This switchgear and all its components meet the IEEE C37.20.7 arc-resistant test guideline for Type 2B enclosures as well as all other applicable ANSI, UL, and CSA standards for metalclad switchgear.

Switchgear Construction:

- Arc exhaust options: vented, arc shield, arc planum and duct
- High-speed operation—3-cycles
- Removable (draw-out) circuit breaker
- Fully compartmentalized construction
- Grounded metal barriers enclose all live parts
- Automatic shutters driven by breaker racking mechanism
- Closed door breaker position indication
- Closed door breaker racking mechanism
- Insulated copper main bus
- Standard glass polyester supports
- Mechanical interlocks
- Disconnect type CPT and VT trucks
- Grounded breaker truck in and between test/disconnected and connected positions
- Low voltage instrument/control compartment isolated from primary voltage areas
- Compliance to ANSI standards C37.06, C37.09, C37.013, C37.54 and C37.55 (designed and tested to comply with or exceed ANSI and IEEE standards)

Ratings

- Up to 63 kA arc containment for 0.5 seconds
- Voltage ratings from 2.4 kV to 15 kV up to 4,000 A
- Type 2B construction, one- and two-high structures

Model III Package Unit Substation
with HVL/cc Load Interrupter Switch (on left)

Power-Zone Model III Package Unit Substations

General

Power-Zone Model III package unit substations combine a primary switch, dry-type transformer, and I-Line™ distribution section into a single, compact unit. All components are engineered, manufactured, and tested by Schneider Electric. The substation is available with a UL listing.

The Model III is only 49 inches deep and 90 inches high, which allows the entire substation to pass through standard size doorways and narrow hallways.

The Model III is front accessible; the transformer taps are accessible from the side. For proper ventilation, a minimum distance of 12 inches should be maintained on the transformer side of the equipment.

Model III package unit substations are ideal for renovations and high rise applications requiring increased customer electrical demand as well as new construction requiring multiple zones and a small footprint.

75–1000 kVA at 480 V; 75–500 kVA at 240 V

Available with primary voltages of 2400–13800 V. Forced air cooling (AA/FA) provides an additional 33%. Features 220 °C insulation and 150 °C, 115 °C, or 80 °C temperature rise. Largest 80 °C or 115 °C rise unit available is 750 kVA.

The secondary circuit breaker distribution section may be equipped with an individually mounted secondary main breaker or an I-Line distribution panelboard. Branch circuit breakers from PowerPact™ B to PowerPact RLC 1200 A may be installed. PowerPact M-, P-, and R-frame molded case circuit breakers are available with electronic trip units.

Additional options include PowerLogic™ and ION™ series metering, surge arresters, and I-Line™ plug-on units with a SurgeLogic™ Surge Protective Device (SPD).

Incoming Line Section

Most Model IIIs are supplied with a Square D™ brand fused HVL/cc 600 A load interrupter switch. The HVL/cc offers the smallest footprint in the industry and is an exclusive sealed interruption type compartmentalized switch. Where switching and overcurrent protection are provided elsewhere, a full-height air-filled terminal chamber can be provided in place of the switch.

Table 11.55: Primary Switch Ratings, Type HVL/cc

Nominal Voltage	4.16	13.8
BIL	60	95
Continuous amperes	600	600
Interrupting amperes	600	600
Fault close (kA asymmetrical)	40	40
Momentary current (kA asymmetrical 10 cycles)	40	40
Duty-cycle-fault-close (number of operations)	4	4
Grounding switch fault close (kA asymmetrical)	40	40
Short-time rating (kA asymmetrical 2 seconds)	25	25
Dielectric withstand (kV 1 minute)	19	36
Electrical endurance (close-open)	100	100
Mechanical endurance (close-open)	1000	1000

Transformer Section

Special barrel wound dry-type transformers employing resin encapsulated VPI (Vacuum Pressure Impregnation) techniques are used to achieve the low-loss, compact design necessary for the space-saving package substation concept. Class H, 220 °C insulation is used throughout. Temperature rise is 150 °C as standard, although 80 °C or 115 °C low temperature premium transformers are available through 750 kVA. Aluminum windings are standard with copper as an option. Four full capacity 2-1/2 percent taps are provided—two above nominal voltage and two below.

Fan cooling is optional. When selected, it increases the capacity rating of the transformer an additional 33 percent. The Model 98 digital controller is employed. This system provides precision control through the use of three high accuracy thermocouple type sensors—one in each phase of the windings.

The controller has a membrane front panel for displaying the temperature of all three phases with individual readings. The hottest phase is automatically displayed. The Model 98 digital controller features simple three-button operation with fan, alarm and trip function settings and is Powerlogic™ compatible.

Table 11.56: Transformer Basic Insulation Levels

KV Class	Primary Voltages	BIL	600 Hz Test
1.2	< 600 V Secondary	10	4 kV
2.5	2400	20	10 kV

Distribution Section

I-Line™ Mounted Molded Case Circuit Breakers

Molded case circuit breakers are group mounted in an I-Line panelboard section offering the inherent ease of installation for which the plug-on I-Line circuit breaker has become known. All circuit breakers are quick-make, quick-break, thermal magnetic, permanent trip type and are factory-calibrated and sealed for accurate overcurrent response and maximum short-circuit strength. PowerPact™ P and R circuit breakers are available with solid-state MicroLogic™ trip units. Current limiting high interrupting capacity FI, KI, and LI circuit breakers are also available. Circuit breakers may be safely back-fed for use as main circuit breakers. All circuit breakers are UL listed and carry integrated equipment rating when used exclusively with other Square D™ brand circuit breakers in intended assemblies.

I-Line panel is available in 1200 A. Maximum mounting space is 108 inches.
Tin-plated copper bus is standard.

Motorpact™ Medium Voltage Motor Controllers (UL Listed)

Square D™ brand Motorpact medium voltage motor controllers from Schneider Electric are designed and manufactured to tackle the toughest power and process control challenges. Our motor controllers feature industry-first innovations that provide unmatched performance, high reliability, low maintenance and exclusive technologies. Motorpact medium voltage motor controllers are designed to provide the most efficient means to control and protect a wide range of applications and may be configured for motor starting, transformer feeders, capacitor feeders, or future spaces. The design has fewer losses inside the controller, providing more efficient use of power for the connected load.

Motorpact controllers are designed to meet or exceed the standards for NEMA ICS3 Part 2, UL Standard 347, and IEC 60470. UL and cULus labels are standard.

Starting application for squirrel cage induction motors:

- Full voltage non-reversing
- Full voltage reversing
- 2-speed, 2-winding, 2-speed, 1-winding
- Reduced voltage non-reversing
 - Auto transformers
 - Solid state soft start
 - Sequential soft start (S3) multi-motor starting

Enclosures are available in NEMA Type 1, 1A, and 3R and feature the smallest footprint in the industry at 14.75 inches wide. Enclosures that are 20 inches and 29.5 inches wide are also available for FVNR.

Optional arc resistant enclosures are available that meet IEEE C37.20.7.

Units are designed as one-high construction for ease of use with a optimum height for the operator controls and isolation switch disconnect handle.

Full front and or front and rear accessibility are provided. A full height cable pulling area is standard.

Controller voltage ratings range from 2.3–7.2 kV vacuum contactors feature a drawout design and have ratings of 200, 400, 450, and 720 A.

Options include live line indicators, blown fuse tripping, solid state protective relays, power factor correction capacitors, surge arresters, surge capacitors and a cable grounding switch.

Distinct service advantages make your Busway installation “hassle-free”

- **Missing Link** program guarantees shipment in a maximum of 5 working days of a small quantity (10 pieces or less) of standard indoor feeder straight lengths and fittings for US destinations. Orders for international destinations require 2 additional days for processing. The quantity of working days guaranteed by this program excludes the day of receipt of the order. Contact your local sales office for outdoor busway and for additional details of this program.
- **Measurement Services** are offered for your critical and complex projects. Schneider Electric will assist with field measurement and assume responsibility for the layout and exact fit of all components. Contact your local Schneider Electric sales office for exact details.
- **Emergency Service**; we are on call 24 hours a day, 7 days a week, 365 days a year. For emergencies, call 1-888-SquareD (1-888-778-2733).
- **Quick Ship** program provides product availability for time sensitive orders. The program is available through the product selectors and offers a limited selection of I-Line busway footage and fittings. Contact your local Schneider Electric sales office for exact details.

Powerbus Busway Construction

Powerbus busway construction consists of a light-weight electrical grade all-aluminum housing with up to five (5) silver-plated copper conductor bars for maximum electrical efficiency. The total product offer includes straight sections, fittings, accessories, and plug-in units for a total installation. This busway is available in 400 A, 225 A and 100 A ratings. A 50% integral ground is standard.

Straight Sections

Straight sections of busway are available in 10 ft. and 4 ft. lengths in a painted black finish. The Enhanced busway offer includes 10 plug-in openings on each side of a 10 ft. section and 3 plug-in openings on each side of a 4 ft. section.

Metering and Communications Options

Single phase systems and DC systems are also available. Contact your local Schneider Electric representative.

Powerbus busway tap boxes and plug-in units are available with optional metering and communication capabilities, which include an integrated display and the ability to remotely monitor the busway.

[1] Busway catalog numbers shown include a black painted finish. Contact your local Schneider Electric representative for a natural aluminum finish option.

[2] For 100 A busway only, add an (L), for top cable access, or a (U), for bottom cable access, before the last letter in the catalog no., which is (B).

[3] Replace the () in the Tap Box w/Meter catalog number with the meter suffix number in Table 12.3 Meter Suffix Number, page 12-3. The meter will be configured based on system voltage.

Powerbus Plug-In Units

Powerbus plug-in units are rated maximum 100 A and may be offered as field installable or factory assembled units. All units conform to NEMA type 1. An optional kit is available for QO units to raise the protection to IP54. This kit raises the QOR unit to moisture protection of IPX3.

[8] Many more factory assembled units are available using combinations of 1P/2P/3P circuit breakers with other NEMA receptacles. Maximum of 3 breaker spaces available. Consult your local Schneider Electric representative.

[9] See Digest Section 7, QO™ and QOU Miniature Circuit Breakers, page 7-11 for QOU circuit breaker information.

[10] Factory assembled units are available using combinations of 1P/2P/3P circuit breakers with other NEMA and IEC type receptacles. Maximum of three drop cords with six breaker spaces available. Consult your local Schneider Electric representative.

[11] See Digest Section 7, QO™ and QOU Miniature Circuit Breakers, page 7-11 for QOU circuit breaker information. Catalog numbers shown have the breaker in the top slot in the front cover and the drop cord in the left position in the base of the unit. Other combinations are available.

Powerbus Plug-in Units with Metering

Powerbus plug-in units with metering are rated maximum 100 A and are offered as factory assembled units. All units conform to NEMA type 1.

- [12] See Digest Section 9, [For NF Merchandised Panelboards](#), page for ED circuit breaker information. Catalog numbers shown have the breaker in the top slot in the front cover and the drop cord in the left position in the base of the unit. Other combinations are available. The Power Meter display will be located below the breaker space. For remote monitoring capabilities, a gateway is required. The gateway is located in the tap box with metering or in a separate gateway plug-in unit listed below. The units with metering can be daisy-chained together back to the gateway. A maximum of 30 units should be daisy-chained together to one gateway.
- [13] Factory assembled units are available using combinations of 1P/2P/3P circuit breakers with other NEMA and IEC type receptacles. Maximum of three drop cords with three breaker spaces available. Consult your local Schneider Electric representative.
- [14] For IP54 splash resistant construction, add an "M54" suffix.
- [15] For metering, replace () in catalog number with the appropriate number in [Table 12.11 Meter Suffix Number](#), page 12-5. Connectors must be rated for appropriate voltages.
- [16] Other IEC Connectors are available.
- [17] For the offer without metering, do not use the suffix "M" or any numbers following.
- [18] Replace () in above tables with the appropriate meter suffix number. Connectors must be rated for appropriate voltages.
- [19] For remote monitoring capabilities, a gateway is required. The gateway is located in the tap box with metering or in a separate gateway plug-in unit listed above. Units with metering can be daisy-chained together back to the gateway. A maximum of 30 units should be daisy-chained together to one gateway.
- [20] Additional NEMA, IEC, and California Standard type receptacles and connectors are available.
- [21] See [5600CT9101](#) for fuse and circuit breaker series connected ratings.

[1] To complete the catalog number, replace the blank with an "H" for the plug-in unit to be mounted on horizontally—oriented busway and "V" for the plug-in unit to be mounted on vertically-oriented busway.
 [2] Cannot be used for 800 A copper busway.
 [3] Feeder style available in lengths from 16 to 120 inches.
 [4] Plug-in style also available in 4, 6, and 8 foot lengths.
 [5] For seismic applications, seismic hangers must be used with horizontal mount flatwise or edgewise busway. Vertical mount busway may use standard fixed or spring hangers.

^[6] For seismic applications, seismic hangers must be used with horizontal mount flatwise or edgewise busway. Vertical mount busway may use standard fixed or spring hangers.

Standard Straight Lengths

The basic component of a busway system is a straight section with a “joint pak” factory-affixed to one end. Plug-in busway is available in standard lengths of 4, 6, 8, and 10 feet. Feeder busway is available in lengths from 16” to 120” in increments of 1”.

Riser Busway

We also offer a “Riser” Plug-In busway with openings on one side only for riser installations. This busway offers the same short circuit ratings as our standard plug-in busway.

Indoor Drip Resistant and IP54 Splash Resistant Busway

These water resistant features are available as an option for indoor plug-in and feeder busway.

Outdoor Construction

Outdoor construction is only available in feeder busway. It prevents the entry of rain and can be installed in any mounting position.

High Short Circuit Bracing

I-Line busway is available with either standard short circuit bracing or high short circuit bracing. [Electrical Data for I-Line II Busway, page 12-10](#) lists maximum short circuit ratings for each busway type and rating.

Hangers

Indoor horizontal busway requires one hanger for every 10 feet of busway. Vertical indoor busway requires one hanger for every 16 feet. Outdoor feeder busway requires one hanger for every 5 feet in horizontal mounting and one hanger for every 10 feet in vertical mounting.

Elbows

90° elbows are standard. 91° elbows to 179° elbows in 1° increments are also available.

Tee

90° flatwise tees fittings are standard. Edgewise tees and crosses are also available.

Indoor Tap Boxes

Feeder cable tap boxes are used at the end (-ETBMB) or center (-CTB) of a busway run and incorporate a short section of busway into their construction. See [5600CT9101](#) for the length of the tap box.

Plug-in cable tap boxes are plugged into the side of the busway (at any opening except the very last opening of a run).

Lugs other than standard mechanical lugs are available.

Service Heads

Service heads are of outdoor construction and include Square D™ brand standard lugs.

Unfused Reducer

Unfused reducers are used to reduce from a higher amperage busway to a lower amperage.

NOTE: The National Electric Code does not allow the use of unfused reducers in vertical riser installations. Refer to the NEC for restrictions in industrial installations.

Fused or Circuit Breaker Cubicle

These are used as in-line overcurrent protection devices. They can be used in conjunction with an unfused reducer to offer a device which reduces a run of busway in ampacity and offers overcurrent protection.

I-Line to I-Line II Adapter

This adapter is used to join I-Line II busway (800 A–5000 A) to existing installations of original I-Line busway. If connecting to an existing “slot end” of original I-Line, use a “bolt end” adapter (-12B), and vice versa.

Expansion Fittings

The expansion fitting is built into a 3 ft. – 4 in. straight length for 800 A–5000 A and a 5 feet – 0 inch straight length for 225 A–600 A. Limit of expansion or contraction is $\pm 1\frac{1}{2}$ inches. Not available in outdoor construction.

Bussed Transformer Connection

A bussed transformer connection is used when the busway physically attaches (other than cable) to a three phase transformer. For power company vault termination information, consult the factory.

Transformer Taps

Transformer taps are used to make cable connection to transformers. Lugs other than standard Square D brand lugs are available. Note that taps need **NOT** be located directly above transformers for cable connections.

Connection to Competitive Busway

Consult your nearest Schneider Electric sales office.

Electrical Data for I-Line II Busway

Standards:	UL857 (File Number E22182); CSA C22.2 No. 27-1994 (File Number LL-61778); IEC 61439-6
Systems:	AC-3Ø3W, 3Ø4W, 1Ø2W, 1Ø3W. DC-2-pole. All neutrals are 100% capacity.
Voltage:	600 volts AC/DC, 50 Hz and 60 Hz
Integral Ground:	50% capacity as standard for 800 A to 5000 A, as an option on 225 A to 600 A
Enclosure:	Indoor, indoor drip resistant, indoor splash resistant (IP54), and outdoor (indoor drip resistant, indoor splash resistant (IP54), and outdoor are available in I-Line II [800–5000 A] busway only)

Class J Fuses – Provisions for installing Class J fuses are included in 30 through 600 A fusible devices. Conversion to Class J fuse spacing requires relocating the load side fuse base assembly from standard Class H fuse location to an alternate position in the enclosure.

There are three different types of plug-in connections:

- High Ampere Bolt-On Connection (catalog numbers that begin with “PT”)—bolted “joint pack” type connection
 - Used on I-Line/I-Line II busway amperages 800 A aluminum and greater.
 - Used on I-Line/I-Line II busway amperages 1000 A copper and greater.
- High Ampere Plug-In Connection (catalog numbers that begin with “PB”)—individual bolted jaws for connections
- Low Ampere Plug-In Connection (catalog numbers that begin with “P,” except for “PB” and “PT”)—spring pressure jaws for connection

Table 12.23: Class R Fuse Kits^[12]

Switch Size (A)	Voltage Rating	Kit ^[12] Catalog No.
30	250 V ^[13] 600 V ^[13]	QMB30R QMB36R
60	250 V ^[13] 600 V ^[13]	QMB36R QMB60R
100 200	All	HRK1020
400 600	All	QMB4060R

Class R Fuse Kits when installed reject all but class R fuses.

"Hook-Swing" Mounting

A – High Ampere Plug-In Connection
B – High Ampere Bolt-On Connection
C – Low Ampere Plug-In Connection

^[7] 6-cycle and 30-cycle, and fuse/circuit breaker series connected ratings are available. Please reference 5600CT9101.

^[8] For IP54 splash resistant construction, add an "M54" suffix.

^[9] For use on vertical riser applications only.

^[10] For vertical riser applications, order auxiliary mounting kit—Catalog Number PBQ4060RMK.

^[11] This device uses bolt-on connection. It may be used only on plug-in busway with same number of poles. To complete the catalog number, replace the blank with an "H" for the plug-in unit to be mounted on horizontally-oriented busway and "V" for the plug-in unit to be mounted on vertically-oriented busway. Not for use on 800 A copper busway.

^[12] Kit must be field installed.

^[13] Contains parts to convert two units.

[21] If alternate trip functions are required, contact your local Schneider Electric field office for pricing.

[22] L-frame circuit breaker plug-in units with basic electronic trip units have a fixed, long-time and adjustable, instantaneous setting.

[23] For Trip Unit information, refer to [MicroLogic Trip Units](#), page 7-61.[24] For communication capabilities, add the communication suffix as shown in [Table 12.36 Communication Suffix](#), page 12-15. The communication package will be configured based on the system voltage specified by the communication suffix.[25] For availability on 100% rated, see [5600CT9101](#).

[26] For IP54 splash resistant construction, add an "M54" suffix.

[27] For vertical riser applications, order auxiliary mounting kit—Catalog Number PBQ4060RMK.

New!

H-, J-, and L-Frame Plug-In Units with Electronic Trip and Communication

Hardware communication packages are now available on Powerpact H-, J-, and L-Frame Plug-in Units with Electronic Trip. These hardware communication packages will provide you the capability to access and monitor circuit breaker data from these plug-in units. The packages are available in Modbus and Ethernet.

Add the appropriate communication system voltage suffix to the end of the associated H-, J-, or L-Frame breaker with electronic trip, for example: PHD36060GNU31XIFE4.

Table 12.36: Communication Suffix^[28]

System Voltage	Communication	Communication Type Suffix	System Voltage Suffix
Up to 480Y/277 V	Ethernet	IFE	4
	Modbus	IFM	
480 V only	Ethernet	IFE	5
	Modbus	IFM	
600Y/347 V, 600 V	Ethernet	IFE	6
	Modbus	IFM	

M-Frame Plug-In Units

Table 12.37: M-Frame Circuit Breaker Plug-in Units with Adjustable Basic Electronic Trip Unit (ET 1.0)^{[29][30][31]}

Frame Rating Ampere	System	G Interrupting Catalog Number ^[32]	J Interrupting Catalog Number ^[32]
800	3Ø3W + G	PTMG36800G()	PTMJ36800G()
	3Ø4W + G	PTMG36800GN()	PTMJ36800GN()

^[28] Communication packages are housed in a separate enclosure mounted adjacent to the plug-in units.

^[29] The ET 1.0 trip unit cannot be field replaced or have the long-time trip point setting adjusted.

^[30] All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an "H" for horizontal applications and "V" for vertical applications.

^[31] All M-frame plug-in units are 800 A frame, and the trip setting can be adjusted to 300 A, 350 A, 400 A, 450 A, 500 A, 600 A, 700 A, or 800 A.

^[32] For IP54 splash resistant construction, add an "M54" suffix.

^[33] The 250 A is available as a special device. Contact your local Schneider Electric field office for ordering information.

^[34] If alternate trip functions are required, contact your local Schneider Electric field office for pricing.

^[35] For Trip Unit information, refer to [MicroLogic Trip Units](#), page 7-61.

^[36] Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with standard LI trip functions at 800 A 3Ø3W for a horizontal application would be PTPG36080GHC U31A.

^[37] The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See [Table 7.126 Rating Plugs](#), page 7-64 for rating plug catalog suffix letters.

^[38] All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an "H" for horizontal applications and "V" for vertical applications.

^[39] For IP54 splash resistant construction, add an "M54" suffix.

^[40] The 600 A is available as a special device. Contact your local Schneider Electric field office for ordering information.

^[41] Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with standard LI trip functions at 800 A 3Ø3W for a horizontal application would be PTRG36080GHCU31A.

^[42] The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See [Table 7.126 Rating Plugs, page 7-64](#) for rating plug catalog suffix letters.

^[43] All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an "H" for horizontal applications and "V" for vertical applications.

^[44] For IP54 splash resistant construction, add an "M54" suffix.

Non-Segregated Bus

- Non-segregated phase bus
- 600 V through 38 kV (1200 A–6000 A)
- Aluminum, steel or stainless steel housing
- Aluminum or copper bus bars
- Insulated with fluidized bed epoxy (5 kV–38 kV)
- Complete line of fittings provides for any configuration
- Indoor trapeze and outdoor column supports
- For use in utilities, industrial and commercial facilities

Power-Zone bus is custom designed, manufactured and tested per ANSI C37.23 standards to meet customer specifications. The 600 V product is also UL Listed. It is a completely coordinated package of equipment with all the auxiliary material and supports for connecting transformers, switchgear, MCCs, and motors, in all types of utility, industrial, and commercial facilities.

Bus Options

Some available options are special momentary rating, special housing material and/or finish, special conductor supports, heaters and thermostats, and ground bus.

Weatherproof Bus

All weatherproof runs must be equipped with strip heaters to eliminate condensation and, if applicable, a thermostat. A heater should be used for every seven (7) foot of bus and no more than 20 heaters can be controlled by one thermostat. Also, each bus run should have its own thermostat. The heaters are rated 240 V, 500 watts and operate at 120 V, 125 watts.

Flanged Ends

A flanged end is used to terminate the bus into switchgear, motor control centers, switchboards, or any rigid bus-to-bus connection. It consists of a gasketed equipment flange, up to 1'-0" of 3Ø3W conductor (3Ø4W as applicable), necessary insulation tapes, and required bolting hardware.

Cable Tap Box

A cable tap box includes a gasketed and accessible termination box, lugs, necessary insulation tape (between bus and lugs only), and required bolting hardware. Lug sizes and quantity should be specified by purchaser.

Transformer/Generator Connection

This type of termination should be used whenever the bus is connecting to a transformer, generator, motor, switch or any connection where the bus bars are connecting to porcelain mounted equipment terminals. It will include the same components as a flanged end plus one set of flexible braid type connectors and a terminal box (if required).

Bushing Box (Weatherhead)

A bushing box is used on service entrance run where the cable connection to the bus must be made via porcelain bushings. It is comprised of the same components as a transformer connection plus 3 through stud type apparatus bushings, bushing stud connectors (lug pads) and a strip heater.

Ground Bus

The bus housing is designed and constructed to provide an electrically continuous ground path. The side rails of the bus housings are capable of carrying the full rated phase current continuously and, under short circuit conditions, are capable of carrying up to 60 kA RMS asymmetrical fault current for 3 seconds. Consequently, a separate ground bus is not necessary unless specified.

Wall Entrance Seal

A wall entrance seal consists of a wall throat, wall flange (one side of wall only), and a barrier which prevents air or vapor from passing from one room to another or from outdoors to indoors. It also carries a 1/2 hour fire rating. Consult factory for higher fire ratings.

Table 12.42: Wall Flange

Description
Optional (in addition to wall entrance seal)
Aluminum
14 Gauge Steel
14 Gauge 304 Stainless Steel
14 Gauge 316 Stainless Steel

Equipment Entrance Seal

An equipment entrance seal should be used whenever a barrier is required to prevent the passing of flame and/or gasses between the bus housing and the terminating equipment.

Expansion Fittings

An expansion fitting is used to counteract the strain placed on the bus due to the expansion and contraction of the building or the bus itself. One should be used whenever the bus run crosses a building expansion joint and whenever a straight run of bus exceeds 60 feet.

Flexible Housing (Misalignment) Collar

Required at terminations or wall penetrations when vibrations due to seismic forces may cause damage to the bus. It may also be used to adjust for the "settling" of terminating equipment after installation.

Supporting Steel (Hangers)

Supports should be added on the basis of one for every 10 ft. for indoor and one for every 12 ft. for outdoor. Indoor supports are a trapeze type hanger while outdoor supports are a single or double column type support. Consult factory for other type supports.

Table 12.43: Hangers/Supports

Support Description	Maximum Height Options
Indoor Trapeze Hanger	—
Outdoor, Single Column Support	12 feet
Outdoor, Double Column Support	22 feet

Hazardous or Seismic Locations

Consult factory for bus runs which are to be installed in a location which is classified as hazardous or in a seismic location.

Standard Construction

Standard construction is as follows:

- Conductor (plating): Copper (silver) or Aluminum (tin)
- Conductor Insulation (5 kV through 38 kV only): epoxy
- Conductor Supports: Glass reinforced polyester blocks (5 kV and 15 kV); porcelain (38 kV)
- Housing Material: Extruded Aluminum (1/8-inch Nominal)
- Housing Construction: Totally Enclosed Non-ventilated
- Joint Insulation: EPR and PVC tape
- BIL Rating: 30 kV (600 V), 60 kV (5 kV) and 95 kV (15 kV)
- Momentary (Short Circuit) Rating: 75 kA (600 V), 60 kA (5 kV, 15 kV), and 39 kA (38 kV)
- Ground Conductor: Housing (100% rated)

Standards

Square-Duct wireway is Underwriters Laboratories listed as steel enclosed wireway and auxiliary gutter. CSA listing is also available.

Sizes

2-1/2", 4", and 6" sizes are manufactured from 16 gauge steel. Straight lengths are available with or without knockouts. Knockouts are of various sizes in sides and bottom of wireway. 8", 10", and 12" sizes are made of 14 gauge steel and are furnished without knockouts.

[1] For wireway fill information, see NEC 376.

[2] Add connectors for all lengths and fittings, except closing plates, reducers, and adapters.

[3] Painted 12" x 12" wireway is not furnished with hinge-cover (screw-cover only).

[4] These closing plates also available with knockout. Add "KO" to cat #.

[5] Adapters to competitors' wireways also available. Contact your nearest Schneider Electric sales office for availability.

Oiltight—NEMA Type 12

Type LJB Oiltight lay-in wireway is fully gasketed and used to protect runs of electrical wiring from oil, water, coolants, dirt, or dust as well as physical damage. This wireway is manufactured to exceed oiltight and NFPA standards for industrial control equipment. Lengths and fittings are made of 14 gauge steel with 10 gauge end flanges. Straight lengths and fittings have hinged covers with oil resistant gasket all around and are held closed with pull-down latches. All lengths and fittings are without knockouts. Type LJB lay-in Wireway is finished with ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. All Type LJB oiltight wireway is UL listed as steel enclosed wireway and auxiliary gutter. Conforms to NEMA Type 12.

Raintight Wireway—NEMA Type 3R

Outdoor raintight wireway is used to protect electrical wiring against rain, sleet, and physical damage. Unique drip shield cover protects wiring from weather and maintains the “lay-in” feature for ease of wiring installation. Lengths and fittings are constructed of 16 gauge galvanized steel with ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. Underwriters Laboratories Listed as steel enclosed wireway and auxiliary gutter (*horizontal mounting only*). Conforms to NEMA Type 3R.

Raintight Trough—NEMA Type 3R

Raintight trough is designed for ganging meter devices, panelboards, switches, and circuit breaker enclosures. Each length is a completely enclosed section with a removable cover that has provisions for sealing.

Design: 4" and 6" wireway is constructed of 16 gauge galvanized steel. 8", 10", and 12" wireway is constructed of 14 gauge galvanized steel. All raintight troughs conform to NEMA Type 3R.

Finish: ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. All raintight troughs are Underwriters Laboratories listed as steel enclosed wireway and auxiliary gutter (*horizontal mounting only*).

Wall Duct General Description

UL Listed, File E65247, for Enclosure of Wiring to X-Ray Machines. Also available in aluminum for MRI application.

Wall duct is used as the continuation for standard trench duct in the floor. Wall duct can be routed up the wall and across the ceiling or under the finished floor (in ceiling space below) to provide a continuous lay-in raceway system from control consoles and floor equipment to overhead apparatus. Devices are furnished complete with covers and are available for either flush or surface mounted installations.

General Notes:

- Standard construction is 14 gauge steel with gray electrodeposition paint. Alternate construction is painted aluminum.
- Covers and coupling devices are furnished with each device.
- Wire retainers are furnished with each device.
- Straight lengths are field cut to length.
- Partitions and tunnels are to be field modified and installed where required.
- Hangers or other mounting devices to be furnished by others.

Typical Surface Mount,
Straight-Length Wall Duct

With SURFACE Covers (Matching Width)

With FLUSH Covers (2" Oversize)

Trench Duct General Description

- STANDARD LENGTH of trench duct is 10 ft. Gasketed cover plates are ordered and shipped separately.
- FEATURES of trench duct:
 - Trench duct width is cover plate width.
 - Tub width is trench duct width less 1.8".
 - Overall width (bottom flange to flange) is 3" wider than trench duct width.
 - Standard depth is adjustable from 2-3/8" to 3-3/8". Also available as standard is depth adjustable from 3" to 4". To order, change "2" to "3". Ex. RSV063100120. Applies to trench duct, elbows, crosses, tees, and reducers. Other depths available.
 - Tees, crosses, horizontal elbows, and reducers are shipped complete with cover plates assembled.
 - Grey vinyl tile trim is furnished as standard. Aluminum is available when requested.
 - All compartments over 17" wide must be supported with dividers or posts.

LV Transformers EZ Selector–Selection Assistance

LV Transformers EZ Selector

Steps to select an LV transformer.

1. Select product type:
 - Three Phase – Energy Efficient – EX (DOE 2016)
 - Three Phase – Energy Efficient – EX, K-13 Rated (DOE 2016)
 - Three Phase – Energy Efficient – EX, Watchdog Low Temperature Rise (DOE 2016)
 - Single Phase – Energy Efficient – EE (DOE 2016)
 - Three Phase – Resin Encapsulated
 - Single Phase – Resin Encapsulated
2. Select kVA Rating – 15, 30, 45, 75, 112.5, 150, 225, 300, 500, or 750 kVA
3. Select Primary Voltage – 208, 240, 480, or 600 Vac Delta
4. Select Secondary Voltage – 208Y/120, 240 Vac Delta 120 V CT, 480Y/277
5. Select Mounting – Floor, Wall
6. Select Enclosure – Indoor (Type 1), Indoor (Type 2), Indoor/Outdoor (Type 3R), Indoor/Outdoor (Type 4X)
7. Select Temperature Rise – 55°C, 80°C, 115°C, 150°C
8. Select Material – Aluminum, Copper
9. Select Sound Level – 39 dB (6 dB below), 44 dB (6 dB below), 47 dB (3 dB below), 49 dB (6 dB below), 54 dB (6 dB below), 58 dB (6 dB below)

General Purpose Dry Type 600 Volts and Below Overview

The Energy Policy and Conservation Act of 1975 (EPCA), update in the Energy Policy Act of 2005, authorized the Department of Energy (DOE) to evaluate and set minimum efficiency levels for Low Voltage Distribution Transformers. The DOE published a final rule prescribing new energy conservation standards for distribution transformers. 78 FR 23335 (April 18, 2013).

10 CFR 431.196: The efficiency of a low-voltage dry-type distribution transformer manufactured on or after January 1, 2016, shall be no less than that required for their kVA rating in the table below. Low-voltage dry-type distribution transformers with kVA ratings not appearing in the table shall have their minimum efficiency level determined by linear interpolation of the kVA and efficiency values immediately above and below that kVA rating. All efficiency values are at thirty-five percent of nameplate-rated load temperature corrected to 75°C, determined according to the DOE Test Method for Measuring the Energy Consumption of Distribution Transformers under Appendix A to Subpart K of 10 CFR part 431. https://www1.eere.energy.gov/buildings/appliance_standards/standards.aspx?productid=55&action=viewcurrent

—	—	750	99.23
—	—	1000	99.28

Distribution transformer means a transformer that (1) has an input voltage of 34.5 kV or less; (2) has an output voltage of 600 V or less; (3) is rated for operation at a frequency of 60 Hz; and (4) has a capacity of 10 to 2500 kVA for liquid-immersed units and 15 to 2500 kVA for dry-type units.

Low voltage dry-type distribution transformer means a distribution transformer that: has an input voltage of 600 V or less, is air-cooled, and not used oil as a coolant.

The following product offering must comply with the table above:

- Three- and single-phase
- Step up and step down transformers
- General purpose ventilated transformers (isolation transformers)
- Watchdog general purpose ventilated transformers (low temperature rise)
- Transformers designed for harmonic applications (K-rated, harmonic mitigating, data center transformers, etc.)
- General purpose open core and coil transformers

The following low voltage transformers do not need to comply with the table above:

- Auto-transformers
- Drive isolation transformers
- Non-ventilated transformers
- Resin encapsulated transformers
- Buck boost transformers
- Control transformers (machine tool)
- Medical isolation panel transformers compliance with UL 1047 (tables 30.1 and 30.2) (SPECIAL IZ — LOW LEAKAGE)

New Three-Phase Offering from Square D — DOE 2016 EX

- Exceed the efficiency levels from 10 CFR 431.196
- Terminals sized to handle wire ranges to match Square D circuit breakers, switches, panelboards, etc. Located to meet NEC bending radius and layout to simplify connections
- IZ Levels to allow for designing with the minimum AIC Panels available
- In-rush current limited to expand the Square D circuit breaker options at both 125 and 250% sizing
- Sound level at 3 dB for all designs, but up to 6–10 dB below on certain units—QUIET QUALITY
- 1/2 in. clearance from the rear and side, **UL 1561alcove testing all enclosures to not exceed 90°C on adjacent walls**
- Four product families of the DOE 2016 EX: General purpose, aluminum and copper windings, 150°C rise; Watchdog, low temperature rise, aluminum and copper windings, 115 or 80°C rise; Two solutions for harmonic loads: K-13 Wye secondary, harmonic mitigating transformers and K-9 ZigZag secondary, harmonic mitigating transformers.

[1] Efficiencies are determined at the following reference conditions:

(1) for no-load losses, at the temperature of 20°C; (2) for load-losses, at the temperature of 75°C and 35% of nameplate load. (Source: Table 4–2 of National Electrical Manufacturers Association (NEMA) Standard TP–1–2002, *Guide for Determining Energy Efficiency for Distribution Transformers*.)

Watchdog transformers, by design, reduce energy consumption at loads greater than 50% loading, giving fewer BTUs/hour at those loading levels. The life expectancy is greater than that of 150°C rise General Purpose units.

- Aluminum or copper windings
- Two temperature rise options: 115°C rise on 220°C insulation systems (15% continuous emergency overload capacity); 80°C rise on 220°C insulation systems (30% continuous emergency overload capacity)

DOE 2016 Low Voltage Distribution Transformers designed for applications with harmonic loads.

Square D offers Delta - Wye 30°Phase Shift transformers which reconfigure the harmonic models and mitigate the harmful effects of triplens. UL Listed with the following K-ratings to handle excess heat created by harmonic wave forms, K4 and K13. Available with aluminum or copper windings and 150°C or 115°C Rise with 220C insulation system.

Schneider Electric Low Voltage Transformers have been qualified to the site-specific requirements of the following listed model building code and/or standard. (International Building Code, California Building Code, Uniformed Building Code). Qualification based on tri-axial shake table test results conducted in accordance with the AC156 test protocol3 (Acceptance Criteria for Seismic Qualification Testing of Nonstructural Components).

- Enclosure 1A to 11A, 12C to 16C, 12B to 15B (Resin Encapsulated Transformers)
- Enclosure 17D to 31D, 17H to 18H, 17K to 22K, 25J to 31J (Ventilated Transformers)
- Enclosure 17K to 20K with wall mounting bracket (Ventilated Transformers)
- Enclosure 17E to 31E (Non-ventilated Transformers)
- Enclosure MPZ A, AA, B, BB, C, CC (MPZB)

Product is Listed for installation in Hospitals State of California–OSHPD Special Seismic Certification Preapproval OSP-0023-10.

Accessory Tables–required for Building Inspection–OSHPD		
OSP Label Catalog Number	Products	Enclosure Style

7400CAOSHPDMPZB	Mini Power Zone Bolt-on	A, AA, B, BB, C, CC

Sealed, Mini Power-Zone™ Unit Substation

The Square D™ brand Mini Power-Zone™ unit substation from Schneider Electric provides the answer to requirements for a compact unit substation at low amperage ratings.. This complete package yields considerable savings on floor space, installation, and overall cost.

NOTE: Mini Power-Zone unit substations are UL 1062 Listed File E92978 design in a Type 3R enclosure allowing for indoor or outdoor applications. Designed for wall-mounting, the unit substation leverages Schneider Electric components integrated into one device..

- Epoxy resin encapsulated low voltage transformer
- H-frame main circuit breaker
- Secondary main circuit breaker
- Square D panel board or load center allowing for QO™ or QOB™ branch circuit breakers

New!

New MPU solution leverages the latest load center interiors, giving customers more flexibility for branch circuit requirements. Additionally design with a tiered dead front construction. The first dead front allows access to the secondary main circuit breaker, distribution panel board, and the second dead front. The second dead front allows access to the primary main circuit breaker and incoming voltage connection points.

Resin Encapsulated Export Model and Buck Boost Transformers Single Phase Export Model

These general purpose transformers accommodate voltage systems world wide. Export model transformers 10 kVA and smaller, CE marked in addition to being cULus Listed. For CE marked transformers in other ratings, contact your local Schneider Electric representative for CE marked transformers up to 300 kVA, single and three phase.

Table 14.16: Single-Phase—110 / 220 Vac Secondary; 50/60 Hz; cULus Listed (240 x 480 Vac Primary to 120 / 240 Vac Secondary - 60 Hz only)

Sealed Single-Phase Buck and Boost

When buck and boost transformers are interconnected as an autotransformer, they can supply small changes in voltage. Wiring diagrams and sizing are available from catalog 7414CT0201 or www.buckboostcalculator.com.

Units can also be used as isolation transformers for:

120 x 240 to 12/24 or 16/32 and 240 x 480 to 24/48 by connecting using the diagram on the nameplate.

NOTE: When used to supply a three-phase four-wire load, the source must be three-phase four-wire.

PZC Transformer Enclosures

Power Zone Center house is installed over the standard ventilated units to provide additional security and environmental protection.

Type 3R enclosure Option No. 1 constructed of 304 stainless steel for corrosive protection.

Designed to allow energy efficient transformers to be installed in environments requiring more protection.

Type 3R enclosure Option No. 2 constructed of painted galvanized for safety

Designed to allow energy efficient transformers to be secured with a padlockable handle for security, which is ideal for school yards.

PZC transformer enclosures are shipped separately from transformers so they can be pre-installed on the job site.

Four standard enclosures of each type material are available for installation of transformer enclosure types D and H.

Drawings are in the Classic Technical Library. Search by catalog number, which is the same as the drawing number.

Type T and Type TF

Type T transformers are designed with low impedance windings for excellent voltage regulation and can accommodate the high inrush current associated with contactors, starters, solenoids, and relays. Type T transformers are manufactured using the most advanced insulating materials and are the best choice if size and cost are of concern.

Type TF transformers include factory-installed primary and secondary fuse blocks. Type TF transformers consist of two primary fuse blocks and one secondary fuse block. The primary includes rejection-style clips to increase the AIC ratings for the fuses. Since the fuse blocks are mounted on the top of the transformer, Type TF transformers are interchangeable with Type T transformers except for their increased height.

Selection Guide

1. Determine the inrush and sealed VA of each coil in the control circuit and the VA of all other components.
2. Total the **sealed** VA of all operating coils and the VA of all other loads. (This determines the minimum VA size required for the circuit.)
3. Total the **inrush** VA of all coils that are starting at the same time and all loads and coils that are running.
4. Locate a value in the VA column of [Table 14.23 Regulation Chart for Type T, page 14-14](#), shown below, that is **equal to** or **greater than** the value calculated in step 2.
5. In the VA row selected in step 4, find the inrush value under the appropriate voltage regulation column of [Table 14.23 Regulation Chart for Type T, page 14-14](#), shown below. If this value is **greater than** the calculated value from step 3, this is the correct transformer VA rating.

If the inrush value on the selected VA row is **not greater than** the calculated value from step 3, use the next higher transformer VA rating, that is, the rating on the next row.

If your supply voltage is stable and fluctuates less than 5%, Schneider Electric recommends you use the 90% secondary voltage column. If your supply voltage is not stable and fluctuates more than 10% we recommend you use the 95% secondary voltage column. We recommend that you never use the 85% secondary voltage column since magnetic devices lose life expectancy if they are continuously started at 85% of rated voltage.

Transformer disconnects are available in NEMA Type 1 Standard, NEMA Type 12 Standard, and NEMA Type 1 Mini.

Transformer Disconnects for NEMA Type 1 and Type 12 Enclosures

Square D™ brand transformer disconnects mount inside or outside a control system enclosure. The transformer disconnect being connected directly to the 480 Vac system controls power for auxiliary, single-phase loads when the main three-phase disconnect is either ON or OFF. The transformer disconnect is normally wired to the line side of the control panel's main disconnect.

This convenient source of 120 Vac power can be used for auxiliary or isolated loads, such as panel lighting, portable power tools, and programmable controller equipment.

Units consist of copper-wound transformers, a disconnect switch, and primary and secondary fuse blocks. All blocks are installed in NEMA Type 1 or Type 12 enclosures.

Transformer disconnects are UL Listed. Use Square D™ brand Type TF industrial control transformers and Square D™ brand disconnect switches.

Multiple enclosure options and accessories are available. See catalog 9070CT0301 or contact your local Schneider Electric representative or distributor.

- Standard NEMA Type 1
- Mini NEMA Type 1
- Compact NEMA Type 1
- NEMA Type 12

Voltage Transformers

Schneider Electric offers three models of voltage transformers, each suited for a particular application:

- Model 450R
 - Applications requiring accurate voltage measurement within the 0.3% accuracy class
 - Switchboards with 1% instrumentation
- Model 460R
 - Applications with less critical accuracy and low burden requirements
 - Transducers and other panelboard monitoring
- Model 470R
 - Extremely accurate voltage measurement
 - Low burden applications, such as PLC modules and similar, high-impedance electronic devices

Table 14.43: Voltage Transformers

Application	Model Number	Accuracy/Burden and Thermal Rating	Primary Voltages (120 Vac Secondary)
Large burden	450R	0.3 W, X, M, Y; 500 VA Thermal	120–600 Vac
Small burden	460R	0.6 W, 1.2X; 150 VA Thermal	120–600 Vac
Small burden	470R	0.3W, 1.2X; 150 VA Thermal	120–600 Vac

Current Transformers

Current transformers are low cost, compact units that offer good electrical performance in a general purpose transformer.

- They are very easy to mount on the conductors.
- All current transformers feature permanent polarity marks molded into the case.

The following types of current transformers are available:

- General purpose
- Toroidal (single ratio)
- Rectangle window (single ratio)
- Split core
- Bushing (single ratio) (multi-ratio)

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

Contact your local Schneider Electric representative for other available features.

New!

Medium Voltage Distribution Transformers

New! Revised Medium Voltage Transformer Energy Efficiency Information For 2016! In 2010 Schneider Electric released new efficiencies for MV transformers based on The Department of Energy (DOE) 10 CFR Part 431 Energy Conservation program for Commercial Equipment. We are now launching even more efficient transformers to further reduce energy consumption from MV transformers. Starting January 1, 2016 certain medium voltage distribution transformers with ratings of 2,500 kVA and below, 34.5 kV primary and below and 600 Vac class secondary voltages must meet revised minimum efficiency requirements. Liquid Filled Padmounts, Liquid Filled Substations, Dry Type VPI and Power Cast products shipped after January 1, 2016 will all be included. The minimum efficiency tables are listed below. Please contact your nearest Schneider Electric Sales Office for more information. Page 14-19 and 14-20 includes our updated offer.

NOTE: BIL means Basic Impulse Level.

NOTE: All Efficiency values are at 50% of nameplate-rated load, determined according to the DOE Test Procedure 10 CFR 431, Subpart K, Appendix A.

New!

Dry Type Medium Voltage Transformers

All transformers are built with 220 °C insulation and 150 °C temperature rise. For 115 °C rise add F to catalog number. For 80 °C rise add B to catalog number. For copper windings, add CU to the end of the part number. Check with factory to verify dimensional changes and weights for copper windings or alternate temperature rises.

Standard high voltage taps: 4-2.5%, 2AN and 2BN. For 4-2.5% FCBN, add BN to catalog number.

New!

1,201–15,000 Vac Three-Phase Indoor Transformers

See [Table 14.51 New! Enclosure Dimensions, page 14-24](#). Enclosures are for indoor use only. If outdoor enclosure is required, this is outside the scope of the digest, contact your local Schneider Electric Representative.

Lugs: Furnished by customer.

All secondary voltages are at 10 KV BIL. (BIL means Basic Impulse Level).

To complete the three-phase catalog numbers on this page:

1. Select the voltage you require from the chart on the pricing page.
2. Insert the voltage code number in place of the () in the catalog number.

Example 1: 1,000 kVA Energy Efficient, 3Ø, 60 Hz, 150°C temp. rise, 60 kV BIL, NEMA sound level, ventilated indoor enclosure, 13.2 kV delta 480Y/277, with 2-2.5% full capacity taps. 2AN and 2BN = EX1000T51H.

Example 2: 750 kVA Energy Efficient 3Ø, 60 Hz, 80°C temp. rise, 60 kV BIL, NEMA sound level, ventilated indoor enclosure, 4160 V Delta, 480Y/277, 2-2.5% full capacity taps. 2AN and 2BN = Part number EX750T19HB.

Example 3: 500 kVA Energy Efficient, 3Ø, 60 Hz, 115°C temp. rise, Copper Windings, 60 kV BIL, NEMA sound level, ventilated indoor enclosure, 12470 Vac delta, 208Y/120, with 2-2.5% full capacity taps. 2AN and 2BN = EX500T42BCU.

Overview of Isolated Power Panels

Schneider Electric has been involved in the design and manufacture of isolated power systems since 1944. Our isolated power panels have evolved over the years and will continue to do so to meet the ever-changing needs of the health care industry.

All of our current power panels incorporate single-phase, NQ panelboard interiors that accept plug-on or bolt-on branch circuit breakers. The panels are designed to support up to 16 branch circuits, eight of which are factory-installed. Since the average number of circuits required per panel in an operating room is five, the eight factory-installed branch circuit breakers will meet the majority of applications.

The Iso-Gard™ Series 6 Line Isolation Monitor (LIM) is readily visible in all layouts, eliminating the need for a composite unit when isolation power panels are installed in operating rooms.

Iso-Gard™ Series 6—UL Recognized

The Square D™ brand, Iso-Gard Series 6, microprocessor-controlled, line isolation monitor (LIM) is included as standard equipment in all Schneider Electric hospital isolation panels. The Iso-Gard Series 6 LIM incorporates automatic and manual self-test and self-calibration to reduce the frequency of required periodic testing. Other features include:

- Digital and analog display
- Unique audible alarm that will not be confused with other equipment
- UL component recognized and CSA classified
- Microprocessor-controlled circuitry for highest accuracy and stability
- Total hazard current factory set to 5 mA; field-capable setting to 2 mA
- Communication to MODBUS via Gateway

The Iso-Gard Series 6 LIM is also available as a replacement unit for older LIMs, is a direct replacement for all previous Schneider Electric LIMs, and is electrically compatible with all hospital isolated power systems. For more details, refer to 4805CT1301 and MED101301xx.

Schneider Electric created the following four upgrade kits to simplify the ordering process. With a single catalog number, you can now purchase all components necessary for the functional replacement of your existing Iso-Gard LIM.

Iso—Gard Series 6 LIM

NEC® Requirement

The National Electrical Code® (NEC®) **requires** audible and visual alarm indication where isolation power is used (NEC 517-160). Schneider Electric offers the IG2000P and IG2000CBM remote alarm indicators for this purpose.

IG2000P

The Iso-Gard™ IG2000P remote indicator from Schneider Electric provides remote indication of the visible and audible alarms from a line isolation monitor (LIM).

- Green LED—stays illuminated while the system is in normal condition
- Red hazard LED—illuminates when the Total Hazard Current (THC) exceeds the preset alarm level
- Audible hazard alarm—sounds when the THC exceeds the preset alarm level
- Mute button with yellow LED—silences the audible alarm on the remote indicator (local muting), or silences all audible alarms in the system (system muting)
- Test button—remotely performs a functional test of the LIM

The IG2000P remote indicator is available mounted in a one- or two-gang stainless steel faceplate for flush mounting into a panel or wall box with a two-inch minimum depth. The basic electrical connection is made using three wires.

New!

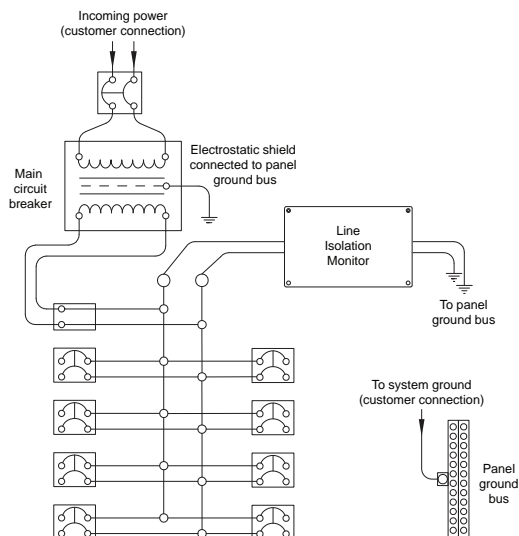

IG2000CBM

The Iso-Gard™ IG2000CBM remote indicator from Schneider Electric provides remote indication of the visible and audible alarms and digital mA reading from an Iso-Gard Series 6 (IG6) line isolation monitor (LIM).

- Green LED—stays illuminated while the system is in normal condition
- Red hazard LED—illuminates when the Total Hazard Current (THC) exceeds the preset alarm level
- Audible hazard alarm—sounds when the THC exceeds the preset alarm level
- Mute button with yellow LED—silences the audible alarm on the remote indicator (local muting), or silences all audible alarms in the system (system muting)
- Test button—remotely performs a functional test of the LIM

The IG2000CBM remote indicator is available mounted in a two-gang stainless steel faceplate for flush mounting into a wall box with a two-inch minimum depth. The basic electrical connection is made using four wires.

Overview

Isolated power panels provide a small local electrical network that can be monitored from a line isolation monitor (LIM), allowing for predictive ground fault protection instead of reactive.

A typical isolated power system contains:

- Main disconnect
 - QO circuit breaker (120 V, 208 V, 240 V)
 - H-Frame circuit breaker (277 V, 480 V)
- Isolation Transformer
- Line isolation monitor
- NQ interior
- QO branch circuit breakers
 - Eight factory-installed
 - Space for eight additional
- Ground bus

Multiple layouts are available:

- Standard isolation panels
- Duplex panels
- Dual voltage panels
- Controlled panels

Standard Isolation Panels

Standard panels offer the most compact solution for a single isolated power system feeding one operating room.

120 V Distribution

- Available in four options: 3, 5, 7.5, or 10 kVA
- Up to 16 branch circuits

208 V (240 V) Distribution

- Available in four options: 3, 5, 7.5, or 10 kVA
- One or two branch circuits

Duplex Panels

Duplex panels offer two isolated power systems in a single panel. The systems are separated from each other by a barrier. Duplex panels provide the ability to mix and match the two systems for kVA and distribution voltage to help the designer maximize wall space while meeting the power requirements of the operating room(s).

Dual Voltage Panels

Dual voltage panels supply both 120 V and 208 V (240 V) isolated power to an operating room.

- Back box requires a 14-inch-deep wall
- Each panel supplies up to sixteen 120 V circuits, plus two 208 V branch circuits

The standard offering includes the following:

- One 30 A, 208 V circuit for equipment such as a laser receptacle
- One 50 A, 208 V circuit for equipment such as an X-ray receptacle

Controlled Panels

Controlled panels are designed to provide 208 V (240 V) of isolated power to multiple areas from one central location. Historically, they were used to retrofit operating rooms with 208 V. A programmable logic controller (PLC) lets the panel be designed to feed multiple load location, but only provide power to specific power modules. This helps prevent overloading of the system. Since the PLC limits the number of circuits, only the longest-possible conductor length is taken into account during start-up testing.

Schneider Electric offers 208 V or 240 V modules designed to complete the control circuit of a controlled power panel.

Receptacle Modules for Controlled Panels

X-ray/laser power receptacle modules provide a convenient source of power for portable X-ray and laser equipment. The receptacle provided in each module is matched to the NEMA plug configuration of the equipment with which it will be used, and is mounted behind the door on the stainless steel face plate. The door features a concealed hinge and a touch latch.

Power/Ground Modules

When both ground jacks and power receptacles are required, these UL Listed modules offer convenience and save labor in field wiring. The units include four power receptacles, four twist-to-lock ground jacks, and a ground bus with a generous number of lugs for external ground connections.

The main ground connection in the module accommodates up to a #1/0 cable. The units are completely factory wired; only field power connections and ground connections are necessary. They are furnished with Type 304, brushed stainless steel face plates.

4 Red Duplex Receptacles
and 4 Ground Jacks

4 Locking Receptacles
and 4 Ground Jacks

Hospital Ground Cords and Jacks

Schneider Electric provides hospital-grade devices for the supply and grounding of portable equipment.

- Hospital ground cords
 - Highly flexible wire with a heavy duty lug or clip end
 - Ground cord with lug end is UL Listed (UL 467)
 - Various lengths available

Ground Cord with Lug End

Ground Cord with Clip End

- Hospital ground jacks

Table 16.5: How to Order

To Order Specify:	Catalog Number
• Class Number	Class Type
• Type Number	2510 FG1

[1] Furnished with one 3/4" pipe tap in the bottom (reversible for top feed). For a 3/4" pipe tap in the top and bottom, add the suffix H to the Type.

[2] For a green pilot light, add the letter G to the catalog number (i.e. 2510FG2PG).

[3] For a replacement starter, order the Open type above.

[4] When replacing a starter equipped with a pilot light in NEMA 4 enclosure, retain the pilot light mounting bracket from the original device.

Manual Switches, Type K

^[8] Selector switch is on the left and increases the overall depth to 3.5 in.

^[9] Only one pilot light (located on right) is used on Class 2511 switches.

^[10] Dimensions include factory wired power connections.

^[11] Selector Switch is on left, extends 1-5/8" from mounting surface.

Integral Horsepower

Types M and T integral horsepower manual starters provide convenient On-Off operation of small single phase, polyphase or DC motors. Typical applications include small machine tools, pumps, fans and conveyors.

- Push button (M) or toggle (T) operators
- Reliable overload protection
- Pilot light and auxiliary contact available

[12] NEMA 7 & 9 enclosures are cast iron. NEMA 7 & 9 cast aluminum enclosures are also available; to order, replace the **R** in the catalog number with a **T**. For additional information, contact the Customer Care Center.

[13] Approved for group motor installations per NEC 430-53(c).

Reversing and Two Speed

Class 2511 reversing and Class 2512 two-speed manual starters consist of two mechanically interlocked Class 2510 Types M or T manual starters.

Table 16.19: Reversing Class 2511

				380-575	7-1/2	10				

Thermal Units

Starters will not operate without properly installed thermal units and device reset. Thermal unit must be installed so that markings face the front of starter.

Application Data

Size—Available in NEMA Sizes M-0, M-1, and M-1P.

Poles—Two poles single phase; three poles polyphase; 2 poles DC.

Voltage—600 Vac max.; 250 Vdc max.

Overload Relays—Melting alloy thermal overload relays have provisions for one Type B thermal unit for single phase starters and three Type B thermal units for three phase starters. **All thermal units must be installed and the device reset before the starter contacts will operate.** After overload relays have tripped, allow one or two minutes for the alloy to solidify before resetting.

Operator—Available with a push button or toggle operator in open and NEMA 1 versions. NEMA 4/4X (stainless) and 12 versions utilize a direct acting push button only. NEMA 4/4X (polyester) and 7/9 versions utilize an external toggle to actuate a push button device inside.

Maintenance of Equipment

For proper performance, all equipment should be periodically inspected and maintained. Replacement contacts and interlocks are available in kit form to facilitate servicing and stocking. In addition, the service bulletin contains an exploded view of the device with components clearly marked for easy identification by description and part number.

Mechanism Lock Off—Both open devices and starters in NEMA 1 surface and flush mounting, and NEMA 4, 4X, 7 & 9, and 12 enclosures can be locked in the Off or Stop position.

The NEMA 1 surface mounting, 4, 4X, 7 & 9, and 12 enclosures can also be locked closed to prevent unauthorized entry.

Table 16.21: Terminal information and Replacement Contact Kits

NEMA Size	Power Terminals		Auxiliary Interlock Terminals		Number of Poles	Service Bulletin	Replacement Contact Kit

M-1	Pressure Wire	14–8	Pressure Wire	16–12	2 or 3	312AS	9998	ML2
M-1P	Box Lug	14–6	Pressure Wire	16–12	2	312AS	9998	ML2

Accessories and Modification Kits

One auxiliary contact, either N.O. or N.C. can easily be added internally to any open or enclosed Type M or T manual starter. It occupies the space provided in either the upper right hand or left hand corners of the device. These contacts are for AC loads only. For electrical ratings, refer to [page 16-127](#), Class 9999 Types SX11 or SX12.

A unique red **pilot light** assembly that clips into place is available **factory installed** on NEMA 1, 4, 4X, 12 and flush enclosures or as a **field modification kit** on the NEMA 1 surface or flush mounting enclosures. See [page 16-11](#). The color cap assembly snaps into a knockout in the enclosure cover on the NEMA 1 enclosures. Pilot light kits are available for use on Various voltages (110-600 V). Pilot light assemblies are not available for NEMA 7 and 9 enclosures.

[14] May only be field-added to NEMA 1 enclosures. For green pilot light, order 9999SPG1 additionally.

[15] Form P11 pilot lights require a voltage code. Refer to Table 16.22. Catalog number example: 2510MBG1V02P11.

[16] For proper operation, only one auxiliary contact kit per device may be added.

[17] Used to control a single phase motor utilizing a three phase starter.

[18] Standard on Type K devices.

[19] The lens cannot be replaced. The pilot light kits for NEMA 4 enclosed units are for replacement only.

For detailed information about TeSys U, visit www.schneider-electric.com/us.

Power Base

TeSys U Selection

The NEMA style TeSys U motor starter is an integrated product—simple to choose and to install—consisting of a control unit snapped into a power base. TeSys U can be configured to fit specific applications as well. The NEMA style TeSys U starter uses the same optional accessories—reverser, current limiter, predictive maintenance options, and communication options—as the IEC TeSys U.

Selecting a NEMA TeSys U Motor Starter in Three Steps

Table 16.30: Step 1. Select Power Base

Control Connection	NEMA Size	Max. hp, Three Phase				Max. hp, Single Phase		Power Bases
		200/208 V	220/240 V	460 V	575/600 V	120 V	240 V	
With screw terminations	1	7.5	7.5	10	10	2	3	LUB32NR

Table 16.35: TeSys U Accessories

Accessories for LUB32NR	Quick Description	For details and selection, see pages:
Current limiter	Increases the breaking capacity to 130kA @ 460 V	18-25
Reverser	Stacked or side mounted (LU6MB0** ^[4] only)	18-25
Line phase barrier	Required for use as a self-protected combination starter (UL508 Type E)	18-25
Multifunction control unit	Has functions for monitoring and predictive maintenance	18-25
Function modules	Fault differentiation, thermal overload, motor load indication	18-25
Communication modules	Integrates into existing networks, major protocols available	18-26
Soft starter + TeSys U	Use Altistart U01Soft Starter with TeSys U	18-42
Power bus bars	TeSys U cabling accessory	18-26
Control circuit accessories	Control circuit contact block, external handles, and control circuit filters	18-26

Accessories and Dimensions: See Section 18.

E164862
CCN NLDX

LR43364
Class 3211 08

^[1] DC voltage with range of 0.90 to 1.10 of nominal.

^[2] 48–72 Vdc; 48 Vac.

^[3] The control unit contains solid-state overload relay and control power source for TeSys U. For more details on the different control units, their functions, and placement on the power base see Section 18.

^[4] Complete the catalog number by adding the appropriate voltage code from Table 16.31. For example: LUCAX6FU.

^[5] I = closed contact; O = open contact.

^[6] Requires a multifunction or advanced control unit, plus fault differentiation module LUFDDA10.

Interpreting the Catalog Number

Table 16.36: TeSys N Catalog Numbering System

	T	02	C	N	1	3	G7

								Enclosure Type N: No enclosure

[1] Not available for reversing Type T36 devices.

New!

TeSys N Non-Reversing Contactors

TeSys N contactors are used to switch heating loads, capacitors, transformers and electric motors where overload protection is provided separately. TeSys N contactors are available in NEMA Sizes 00–7. Target market segments include hospitals; retail; food and beverage; marine; oil and gas; and mining, metals, and minerals.

New!

TeSys N Non-Reversing Starters

TeSys N starters are used for full-voltage starting and stopping of AC squirrel-cage motors. Starters are available in NEMA Sizes 00–7 and come standard with Motor Logic Class 10/20 selectable solid-state overload relays. Starters with bimetal overload protection can be assembled from TeSys N contactors and TeSys D overload relays.

[6] Replace the bullets (●●) in the catalog number with the coil voltage code. Refer to the coil voltage codes shown in Table 16.44.

[7] Special size combinations of the contactor and Motor Logic overload relay are available. Add 0 to the catalog number before the coil voltage for a Size 0 overload relay (6–18 A); 9 for a Size 00C (3–9 A); and 8 for a Size 00B (1.5–4.5 A)—for example, T36CN130G7.

[8] The 24 and 120 Vac coils are available with optional separate control; add Form S to the catalog number (for example, T36AN13B7S).

[9] The 24 Vdc coil requires separate control; add Form S to the catalog number (for example, T36AN13BDS).

New!

TeSys N Reversing Starters

TeSys N reversing starters are used for full-voltage starting, stopping, and reversing of AC squirrel cage motors. Reversing starters are mechanically and electrically interlocked and are available in NEMA Sizes 00 through 5. Starters come with Motor Logic Class 10/20 selectable solid-state overload relays as standard. Reversing starters with bimetal overload protection can be assembled from TeSys N reversing contactors and TeSys D overload relays. For more information on TeSys D overload relays, see Section 18.

				0.1 to 30 s	LADR2
				10 to 180 s	LADR4

Table 16.52: Mechanical Latch Blocks with Manual or Electrical Unlatch

Front snap-on mounting onto	Application	Catalog Number
Size 00–2	For silent operation and energy conservation	LAD6K10 ^{[21][22]}

Table 16.53: Coil Voltage Codes for LA6DK Mechanical Latch Blocks

Volts	24	120	208	240	480
AC or DC ^[23]	B	F	L	M	R

^[14] For spring terminal versions of these blocks, add a **3** to the end of the catalog number (for example, LADN223). For slip-on versions, add **9** to the end of the catalog number (for example, LADN229).

^[15] Including 1 N.O. + 1 N.C. make-before-break overlapping contacts.

^[16] 1 block may be added to the left side of Size 00–1, AC coils only; only 1 block may be added to either side of the Size 2 contactor, AC coil only. Cannot be installed on Size 00–2 contactors with DC coils.

^[17] Device comes with 4 ground terminal points.

^[18] For spring terminal versions of these blocks, add a **3** to the end of the catalog number (for example, LADT23). There is no charge for this modification.

^[19] Scale range is expanded between 0.1 and 0.6 seconds on the dial for more accurate settings at the lower end of the range.

^[20] Switching time between the opening of the N.C. contact and the closing of the N.O. contact: 40 ms ± 15 ms.

^[21] Complete the catalog number by adding the coil voltage code (for example, LAD6K10F).

^[22] Does not include internal coil clearing contact.

^[23] DC available at 24 V only.

TeSys™ N Reversing Contactors: Field Assembly

Table 16.54: Contactors

[25] Kit combines both LAD4CM and LA9D65A69

LA4DA1U

Coil Suppressors and Cabling Accessories

RC Coil Suppressor

- Transient voltage limited to 300% of nominal voltage, maximum.
- Oscillating frequency is limited to 400 Hz maximum. Slight increase in drop-out time (1.2 to 2 times normal).

Table 16.55: Resistor/Capacitor Circuit (RC) for Reduction of Electrical Noise in AC Contactor Coils

Installed by	Mounting on	Operating Voltage 50/60 Hz	Catalog Number
Snapping into the cavity on the right side without tools [26]	Size 00–1	24 V	LAD4RCE
		120 V	LAD4RCG
		120–240 V	LAD4RCU
Snap-on mounting, and connection without tools to the contactor coil terminals	Size 2	24 V	LAD4RC3E
		120 V	LAD4RC3G
		120–240 V	LAD4RC3U

Varistor Coil Suppressor

- Transient voltage value limited to 200% of nominal voltage, maximum.
- Maximum reduction of transient voltage peaks. Slight increase in drop-out time (1.1 to 1.5 times normal).

Table 16.56: Varistor (Peak Limiting) for Reduction of Electrical Noise in AC Contactor Coils

Installed by	Mounting on	Operating Voltage 50/60 Hz	Catalog Number
Snapping into the cavity on the right side without tools [26]	Size 00–1	24 V	LAD4VE
		120 V	LAD4VG
		120–240 V	LAD4VU
Snap-on mounting, and connection without tools to the contactor coil terminals	Size 2	24 V	LAD4V3E
		120 V	LAD4V3G
		120–240 V	LAD4V3U

Diode Coil Suppressor

- No overvoltage or oscillating frequency.
- Polarized component. Increased drop-out time (6–10 times normal).

Table 16.57: Diode for Reduction of Electrical Noise in DC Contactor Coils

Installed on the upper part by	Mounting on	Operating Voltage, DC	Catalog Number
Snap-on mounting and connection w/o tools to the contactor coil terminals	Size 00–1	24 Vdc	LAD4DDL
Clip-on front mounting	Size 2	24 Vdc	LAD4D3U

LAD4T3B

Bidirectional Diode Coil Suppressor

- Protection provided by limiting the transient voltage to 2 Uc max.
- Maximum reduction of transient voltage peaks.

Table 16.58: Bidirectional Peak Limiting Diode

Installed by	Mounting on	Operating Voltage 50/60 Hz and DC	Catalog Number
Snapping into the cavity on the right side of the contactor [26]	Size 00–1 [27]	24 (AC only)	LAD4TB
Clip-on front mounting and connection without tools to the contactor coil terminals [27]	Size 2	24 V	LAD4T3B
		120 V	LAD4T3G
		208–240 V	LAD4T3U

LAD4BB••

TeSys N Cabling Accessories

Table 16.59: Cabling Accessories

Usage	Mounting on	Operating Voltage 50/60 Hz	Catalog Number
For adapting existing wiring to a new product or for use with top-mounting accessory.	Size 00–1, AC only	Without coil suppression	LAD4BB
		With coil suppression (varistor)	24 V
		120 V	LAD4BBVE
For adapting existing wiring to a new product or for use with top-mounting accessory	Size 2, AC only	120–240 V	LAD4BBVG
		—	LAD4BBVU
		—	LAD4BB3

[26] Installing the suppressor into the cavity makes the electrical connection. The overall width of the contactor remains the same.

[27] For Size 00–2 with DC coils, 3-pole contactors are fitted with built-in bidirectional diode suppression as standard.

Electronic Timers and Interface Modules

The following accessories require use of cabling accessories (LAD4BB●●) for proper mounting. See [page 16-20](#) for illustration.

The solid-state **Electronic Serial Timer Modules** in [Table 16.60](#) delay the energizing of the contactor coil, and feature built-in varistor surge suppression.

Table 16.60: Electronic Serial Timer Modules

Type	Operational Voltage 24–250 Vac	Time Delay	Catalog Number
On-delay	Size 00–2	0.1–2 s	LA4DT0U
		1.5–30 s	LA4DT2U
		25–500 s	LA4DT4U

The **Interface Modules** in [Table 16.61](#) allow the contactor coils to be energized from low voltage and low current level signals. They come in mechanical relay and solid-state versions. The relay plus manual operation versions include a lever for manually turning the contactor on and off. When a module receives a low-level signal, it allows the separate-sourced control voltage to flow to the contactor coil. It saves space and wiring time compared to conventional interposing relays.

Table 16.61: Interface Modules [\[28\]](#)

Interface Type	Operational Voltage 24–250 Vac	Input Voltage	Catalog Number
Relay	Size 00–2	24 Vdc	LA4DFB
Relay Plus Manual Operation	Size 00–2	24 Vdc	LA4DLB
Solid State	Size 00–2	24 Vdc	LA4DWB

W	NEMA 4 Watertight, 4X Corrosion Resistant

Numerals

Used to designate specific physical arrangements, such as the number of poles, fuse clip size, etc.; but the numbering varies with the Class of the equipment. Consult the Digest listings for the specific device numbers.

Voltage Code

AC operated devices without control transformer

Code	Voltage/Frequency
V01	24/60
V02	120/60 or 110/50
V06	480/60 or 440/50
V07	600/60 or 550/50
V08	208/60

V81: 480 V Primary, 120 V Secondary for units using a fused transformer control circuit (Form F4T)

This is only a partial listing. Consult the Digest page for each product for more options.

Common Forms (factory modifications)

A	Start-Stop pushbuttons in the enclosure cover
C	Hand-Off-Auto selector switch in the enclosure cover
E	Bimetallic overload relays
F4T	Fused transformer control circuit (primary fuses only)
FF4T	Fused transformer control circuit (primary & secondary fuses)
H	Solid-state overload relay (SSOLR)
P1	Red ON pilot light in the enclosure cover
P2	Green OFF pilot light in the enclosure cover
S	Separate control circuit
X01	One normally closed auxiliary contact N.C.
X10	One normally open auxiliary contact N.O.

Consult "Factory Modifications (Forms)" for additional Form designations. When more than one Form is applied to a single device, arrange the Forms in alphanumeric order.

Table 16.81: How to Order

To Order Specify:	Catalog Number			
	Class	Type	Voltage Code	Form(s)
<ul style="list-style-type: none"> Class Number Type Number Voltage Code Form(s): see page 16-117 	8539	SCG44	V06	AH30P1X11

Description: NEMA Size 1 (10 hp) electronic motor circuit protector (MCP) combo starter in a NEMA 1 enclosure with a 480 V coil, start/stop push button (A), trip-class selectable SSOLR (H30), red pilot light (P1), and 1 N.O. and 1 N.C. auxiliary contact (X11).

IMPORTANT: This information is intended for general interpretation of the catalog numbers. Do not use it to create catalog numbers for this product line.

For more ordering information, refer to the Product Selector at www.schneider-electric.com/us/.

NOTE: The terms *Class*, *Type*, and *Form* do not appear in the catalog number.

Devices are wired from the factory according to customer preference as follows:

- Common control
- Separate control (Form S)
- Control power transformer (CPT)

NOTE: TeSys T devices are unwired.

Type SC02
Size 1, 3-Pole Contactor

General Information

Class 8502 Type S magnetic contactors are used to switch heating loads, capacitors, transformers, and electric motors where overload protection is provided separately. Class 8502 contactors are available in NEMA Sizes 00–7. Type S contactors are designed for operation up to 600 Vac, 50–60 Hz.

NOTE: In Table 16.82, replace ●●● with the voltage code shown in Table 16.83.

Table 16.82: 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

Auxiliary Units

Auxiliary contacts and power poles can be added in the factory or the field on all Type S starters and contactors. Table 16.85 shows the maximum number of auxiliary units, in addition to the holding circuit contact, that can be added to a given size starter or contactor. In addition, it is possible to add a second internal contact on NEMA Size 0, 1, and 2 contactors and starters.

Table 16.85: Auxiliary Units—Class 8502 and 8536

NEMA Size	Type	No. of Poles—Basic Contactor	Maximum Number of External Auxiliary Units (in addition to holding circuit contact)
00	SA	2–3	4 single-circuit auxiliary contacts (N.O. or N.C.) if second internal auxiliary contact is not used.
0–2	SB–SD	1–3	4 single-circuit auxiliary contacts (N.O. or N.C.) [7]
		4–5	2 single-circuit auxiliary contacts (N.O. or N.C.) plus 1 power pole adder (1 or 2 poles, N.O. or N.C.)
3–4	SE–SF	2–5	3 single-circuit auxiliary contacts (N.O. or N.C.)
5	SG	2–3	2 single-circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0–1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)
6–7	SH–SJ	2–3	3 single-circuit auxiliary contacts (N.O. or N.C.)
			2 single-circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0–1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)

Type S Accessories (Class 9999) page 16-125

For How to Order Information, see page 16-28.

[4] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.

[5] Limited to one pilot light, and a selector switch or Start-Stop push button.

[6] NEMA 7 and 9 bolted cast aluminum are not UL listed.

[7] When adding 4 external auxiliary contacts to one Size 0 or 1 contactor, remove one of the return springs.

Coil voltage codes and page number reference for additional information are shown on page 16-29.

For How to Order Information, see page 16-28.

[9] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.

[10] Limited to one pilot light, and a selector switch or Start-Stop push button.

[11] NEMA 7 and 9 bolted cast aluminum are not UL listed.

Type SCO3...H30
Size 1, Three-Pole Starter with Motor Logic™ SSOLR

Schneider Electric offers express shipping for factory modified NEMA Type 1 and Type 12/3R Enclosed Starters. When you need them fast, our Laser™ Delivery program is the answer to getting your product when you need it most. Ask for Laser™ Delivery, then select the product and the modifications you need when you place your order. It's as easy as that!

General Information

Type S magnetic starters are used for full-voltage starting and stopping of AC squirrel cage motors. Motor overload protection for three-phase starter applications can be provided through one of four options, as follows:

- **Solid-State Overload Relay Protection (Motor Logic™ SSOLR)**
These ambient insensitive overload relays are available on Sizes 00 through 6 and standard on size 7. They provide phase loss and phase unbalance protection. To order, add Form **H30** (for selectable trip class 10 or 20 protection). For more information about Motor Logic SSOLRs, see [page 16-101](#) and [page 16-119](#). (Catalog no. example: 8536SCO3V06H30)
- **Adapted Bimetallic or Solid-State Overload Relay (NEMA Sizes 00–1)**
The Adapted Bimetallic or Solid-State relay option includes a specially designed adapter that attaches with bus bars to the Type S NEMA contactor. This adapter allows direct mounting of the IEC Style bimetallic (LRD or LR3D) or solid-state (LR9D) overload relay. To order this starter configuration, add **Form E** (adapter only) to the standard catalog number. The LRD, LR3D, or LR9D overload relay must be purchased separately, based on the FLA of the motor, and installed in the field to properly operate the starter. For the Adapted Bimetallic device only, if the FLA is known at the time of purchase, you can order the starter with the overload relay installed. For more information and a list of options, see [Adapted Bimetallic Overload Relay Forms, page 16-119](#). (Catalog no. example: 8536SCO3V06E—without overload relay).
- **TeSys T Motor Management System (NEMA Sizes 1–6)**
TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T can predict what will happen in the process, as it accurately monitors current, voltage, and power over a wide range. For additional information about TeSys T Motor Management System, see [page 16-103](#) and [page 16-120](#). NOTE: The full catalog number contains a four-character Form number (for example, 8536SCO3V06H616).
- **Melting Alloy Type Thermal Overload Relays (NEMA Sizes 00–6)**
Melting alloy type thermal overload relays utilize the use of replaceable thermal units. These thermal units must be ordered separately and installed to operate the starter. Thermal unit selection begins on [page 16-132](#). The catalog number includes no Form number (for example, 8536SCO3V06).

3-Pole Polyphase—NEMA 1, 4 & 4X

NOTE: In [Table 16.88](#), replace ●●● with the voltage code shown in .

[24] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.

[25] Limited to one pilot light, and a selector switch or Start-Stop push button.

[26] NEMA 7 and 9 bolted cast aluminum are not UL listed.

Types SB–SD With Auxiliary Load Terminals

Capacitors are sometimes used in motor branch circuits to improve power factor. The Size 0–2 Type SB–SD starters listed in Table 16.96 include three auxiliary terminals to allow easy connection of power factor correction capacitors. When capacitors are connected using these terminals, no adjustment to the selection of thermal units is necessary. The auxiliary terminals accept 12–16 AWG solid or stranded wire. NEMA Size 3 and 4 starters have provisions for auxiliary connections. User must supply lugs as necessary.

The Type S starters with auxiliary load terminals may also be used to control two motors simultaneously from a single starter. However, this application is tightly restricted by Section 430-53 of the National Electrical Code. Refer to the NEC for restrictions regarding overload protection, size of controller and motor branch circuit protection.

NOTE: In Table 16.96, replace ●●● with the voltage code shown in .

For melting alloy thermal units, see page 16-132.

Table 16.96: 3-Pole Polyphase—600 Vac Maximum—50–60 Hz (devices require 3 melting alloy thermal units)

Table 16.100: Maximum Allowable Motor Code Letter

Motor Hp Rating	Maximum Allowable Motor Code Letter
1.5–2	L
3–5	K
7.5 and above	H

The motor ratings in Table 16.99 are NEMA standard ratings and apply only when the code letter of the motor is the same as or occurs earlier in the alphabet than what is shown in Table 16.100. Motors with code letters occurring later in the alphabet may require a larger controller. Consult the Customer Care Center at 1-888-778-2733.

The ratings for capacitor switching in Table 16.99 assume the following maximum available fault currents (rms symmetrical amperes):

- NEMA Size 00–3: 5,000 A
- NEMA Size 4–5: 10,000 A
- NEMA Size 6: 18,000 A
- NEMA Size 7: 30,000 A

If the available fault current is greater than these values, connect sufficient impedance in series.

Refer to the instruction material for the actual tested SCCR values.

NOTE: Tables and footnotes are taken from NEMA Standards.

[31] Ratings shown are for applications requiring repeated interruptions of stalled motor current or repeated closing of high transient currents encountered in rapid motor reversal, involving more than five openings or closings per minute and more than ten in a ten-minute period, such as plug-stop, plug-reverse or jogging duty. Ratings apply to single speed and multi-speed controllers.

[32] Per NEMA Standards paragraph ICS 2-321.20, the service-limit current represents the maximum rms current, in Amperes, which the controller may be expected to carry for protracted periods in normal service. At service-limit current ratings, temperature rises may exceed those obtained by testing the controller at its continuous current rating. The ultimate trip current of over-current (overload) relays or other motor protective devices shall not exceed the service-limit current ratings of the controller.

[33] **Fluorescent Lamp Loads—300 V and Less**—The characteristics of fluorescent lamps are such that it is not necessary to derate Class 8502 contactors below their normal continuous current rating. Class 8903 contactors may also be used with fluorescent lamp loads. For controlling tungsten and infrared lamp loads, and resistance heating loads, Class 8903 AC lighting contactors are recommended. These contactors are specifically designed for such loads and are applied at their full rating as listed in the Class 8903 (lighting contactors) section.

[34] Ratings apply to contactors which are employed to switch the load at the utilization voltage of the heat producing element with a duty which requires continuous operation of not more than five openings per minute. Class 8903 Types L and S lighting contactors are rated for resistance heating loads.

[35] When discharged, a capacitor has essentially zero impedance. For repetitive switching by a contactor, sufficient impedance should be connected in series to limit inrush current to not more than 6 times the contactor rated continuous current. In many installations, the impedance of connecting conductors may be sufficient for this purpose. When switching to connect additional banks, the banks already on the line may be charged and can supply additional available short-circuit current which should be considered when selecting the impedance to limit the current.

[36] For NEMA Size 6 and 7, the operation rate is as follows: Continuous operation rate is 3 operations per minute maximum; Jogging or Plugging Duty operation rate is 15 operations per minute for a maximum of three minutes.

Dimensions for Open Type and NEMA 1 Enclosures

NOTE: These dimensions are for reference only. If you need precise measurements, contact the Customer Care Center at 1-888-778-2733.

Class 8502 Type WH

General Information

Class 8502 Type W non-reversing vacuum contactors used to switch capacitors, transformers and electric motors where overload protection is separately provided. Type W vacuum contactors are designed for operation at 600 Volts, 50/60 Hz. (See page 16-66 for Class 8702 Reversing Vacuum Contactors.)

NOTE: In Table 16.114, replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.117.

General Information—Type V Vacuum Contactors

The Class 8502 Type V vacuum contactor is a three-pole device rated 1500 V that meets UL508 (1.5 kV) and CSA. Vacuum technology offers long life and low maintenance in a compact, lightweight design. The contactor is suitable for contaminated atmospheres because the main contacts are sealed in vacuum bottles. Also, since gravity is not used to assist contactor operation, the Class 8502 contactor can be mounted in any plane without special modifications. Type V vacuum contactors are designed for the control of inductive or non-inductive loads at voltages from 200–1500 Vac.

NOTE: In Table 16.119, replace the three bullets (•••) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.122.

General Information—Type W Vacuum Starters

Class 8536 Type W non-reversing vacuum starters are used to switch electric motors where overload protection is not separately provided.

Type W vacuum starters are designed for operation at 600 V, 50/60 Hz. Starters are available exclusively with Motor Logic™ solid-state overload relay (SSOLR), Class 10/20 selectable.

NOTE: In Table 16.123, replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.126.

Pre-Configured NEMA Combination Motor Starters

Save time with these simple & easy pre-configured fusible or motor circuit protector combination starters. These combination starters have the most commonly used accessories, pre-installed for quick installation. With the NEMA 12/3R enclosure, these combination starters are ready for use in most common indoor and outdoor applications. The Motor Logic electronic overload provides a wide selection range of FLA without the need for additional melting alloys.

These combination starters contain the most common features, saving you time and money:

- Fusible Disconnect (class H/K) or Motor Circuit Protector
- Ideal for indoor or outdoor applications (3R/12 enclosure)
- Trusted Square D Type S Starter with Electronic Overload
- Hand-Off-Auto with Green ON, Red OFF LED lights
- Auxiliary contacts
- SPDT Aux on disconnect

Table 16.127: Fusible Disconnect Switch

Voltage (Vac)	Horsepower	NEMA Size	Fuse Clip Size (A)	Overload Range (FLA)	Catalog No.

[RFBK06H](#)

Fusible Disconnect Switch Type 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

Class 8538 and 8539 Type S combination starters combine the requirements of motor overload and short circuit protection into one package. These starters are manufactured according to NEMA standards and are UL Listed (some Form numbers may not be listed—contact the Customer Care Center). Class 8538 and 8539 combination starters operate at 600 Vac maximum, 50–60 Hz, and can be provided with one of four overloaded relay styles (refer to [page 16-33](#)).

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), [page 16-119](#).

3or5 Days
Laser Delivery

Schneider Electric offers express shipping for factory modified NEMA Combo Starters. When you need them fast, our Laser™ Delivery program is the answer to getting your product when you need it most. Ask for Laser™ Delivery, then select the product and the modifications you need when you place your order. It's as easy as that!

NOTE: Some control transformers may require the use of oversized enclosures. Refer to .

For How to Order Information, see [page 16-28](#).

^[1] To order melting alloy overload relay, remove form "H30" from part number.

^[2] Size 6 starters are NEMA 4 painted sheet steel enclosures.

^[3] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

^[4] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in

^[5] **Form H30**, with the possibility of a fourth character to select a lower FLA range (for example, **H308**). See "Solid-State Overload Relay Forms" on [page 16-119](#)

^[6] Single-phase units require one thermal unit. They are not available with **Form H••** (solid-state overload relays).

^[7] Not included in the Laser™ Delivery program.

Non-Fusible Disconnect Switch Type 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119.

120 ^[16]	110	V02
208		V08
240	220	V03
277		V04
480	440	V06
600	550	V07
Specify	Specify	V99

NOTE: For voltage codes used with control transformers, see page . Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

For How to Order Information, see [page 16-28](#).

^[8] To order melting alloy overload relay, remove form "H30" from part number.

^[9] Size 6 starters are NEMA 4 painted sheet steel enclosures.

^[10] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

^[11] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in

^[12] **Form H30**, with the possibility of a fourth character to select a lower FLA range (for example, **H308**). See "Solid-State Overload Relay Forms" on [page 16-119](#)

^[13] Single-phase units require one thermal unit. They are not available with **Form H••** (solid-state overload relays).

^[14] Not included in the Laser™ Delivery program.

^[15] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (for example, order as 8538SBG11V01S).

^[16] These voltage codes must include **Form S** (furnished at no charge).

When specifying **Form S**, please include the motor voltage when ordering (for example, order as 8538SCG11V02S).

Fusible Disconnect Switch Type with Class R Fuse Clips 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119.

^[26] To order melting alloy overload relay, remove form "H30" from part number.

^[27] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See page 16-112 for more information.

^[28] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in Table 16.138.

^[29] For Size 3–5 starters in oversized NEMA 1, 4 or 12 enclosures, contact the factory for pricing and TAG number.

^[30] Not included in the Laser™ Delivery program.

^[31] Form H30, with the possibility of a fourth character to select a lower FLA range (for example, H308). See "Solid-State Overload Relay Forms" on page 16-119

^[32] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, Form S (separate control) must be specified (for example, order as 8538SBG1158V01S).

^[33] These voltage codes must include Form S (provided at no charge). When specifying Form S, supply motor voltage when ordering (for example, order as 8538SCG1158V02S).

For How to Order Information, see [page 16-28](#).

Electronic Motor Circuit Protector (MCP)
3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30• (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), [page 16-119](#).

Specify	Specify	V99

NOTE: For voltage codes used with control transformers, see [page 16-118](#). Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

Dimensions: [page 16-58](#)

Factory Modifications (Forms): [page 16-117](#)

Replacement Parts (Class 9998): [page 16-122](#)

Type S Accessories (Class 9999): [page 16-125](#)

For How to Order Information, see [page 16-28](#).

NEMA Type 1 Enclosure
with 30 mm Operators

Refer to page 16-31 for details.

^[34] To order melting alloy overload relay, remove form "H30" from part number.

^[35] Size 6 and 7 are NEMA 4 sheet steel enclosures.

^[36] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

^[37] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.141](#).

^[38] **Form H30**, with the possibility of a fourth character to select a lower FLA range (for example, **H308**). See "Solid-State Overload Relay Forms" on [page 16-119](#).

^[39] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (for example, order as 8539SBG41V01S).

^[40] These voltage codes must include **Form S** (supplied at no charge). When specifying **Form S**, please supply motor voltage when ordering (for example, order as 8539SCG41V02S).

For Form H30• (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119.

[41] To order melting alloy overload relay, remove form "H30" from part number.

[42] Size 6 and 7 are NEMA 4 only, painted sheet steel enclosures.

[43] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[44] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.143](#).

[45] Form H30, with the possibility of a fourth character to select a lower FLA range (for example, H308). See "Solid-State Overload Relay Forms" on [page 16-119](#)

[46] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available,

Form S (separate control) must be specified (i.e., order as 8539SBG41V01S).

[47] These voltage codes must include Form S (furnished at no charge). When specifying Form S, please include the motor voltage when ordering (for example, order as 8539SCG41V02S).

[48] Not included in the Laser™ Delivery program.

[49] For NEMA Size 3–5 starters in oversized NEMA 1, 4 or 12 enclosures, contact factory for pricing and TAG number.

NOTE: Some control transformers may require the use of oversized enclosures.

Refer to [page 16-57](#).

For How to Order Information, see [page 16-28](#).

^[65] To order melting alloy overload relay, remove form "H30" from part number.

^[66] Size 6 and 7 are NEMA 4 only, painted sheet steel enclosures.

^[67] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

^[68] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in [Table 16.147](#).

^[69] Form H30, with the possibility of a fourth character to select a lower FLA range (for example, H308). See "Solid-State Overload Relay Forms" on [page 16-119](#).

^[70] Not included in the Laser™ Delivery program.

^[71] Single-phase units require one thermal unit and are not available with Form H●● (solid-state overload relay).

Application Data

Table 16.150: Class 8539—UL Listed Short Circuit Ratings

Motor Circuit Protector Type			
NEMA Size	Enclosure	AIC at 480 Vac (RMS)	AIC at 600 Vac (RMS)
0, 1	Standard [72]	100,000	35,000
2 thru 5	Standard [72]	100,000	50,000
6	Standard [72]	65,000	18,000
7	Standard [72]	65,000	30,000

Table 16.151: Electronic Motor Circuit Protector (MCP)
Selection by HP Ratings of Induction-type Squirrel-Cage Motors

3Ø, 60 Hz Voltages				Full-Load (A)	Suffix
200 Vac	230 Vac	460 Vac	575 Vac		
.5–5	.5–7.5	.75–15	1–20	1.5–25	M71
5–10	5–15	10–30	15–40	14–42	M72
10–25	15–30	25–60	30–75	30–80	M73
20–40	25–50	50–100	60–125	58–130	M74
40–60	50–75	100–150	125–200	114–217	M75

NOTE: The MCP adjustable trip range is determined by the suffix of the circuit breaker catalog number. This table indicates the trip range which corresponds to a given suffix number. The MCP motor circuit protector should be adjusted to a level just above locked-rotor current of the motor. This setting will provide optimum overcurrent protection for the motor. For more information on MCP instantaneous-trip circuit breakers, refer to the MCP circuit breaker section of this catalog.

Table 16.152: Class 8539, UL Listed Short Circuit Ratings

Thermal Magnetic Circuit Breaker Type			
NEMA Size	Enclosure	AIC at 480 Vac (RMS)	AIC at 600 Vac (RMS)
0, 1	Standard [72]	100,000	35,000
2 thru 5	Standard [72]	100,000	50,000
6	Standard [72]	65,000	18,000
7	Standard [72]	65,000	30,000

Table 16.153: Class 8538—UL Listed Short Circuit Ratings

NEMA Size	NEMA Fuse Class	Enclosure	Available Amperes RMS Symmetrical
0–3	Class H or K	Standard [73]	5,000
0–3	Class R/J	Standard [73]	100,000
0–2	Class H or K	Oversize	5,000
0–2	Class R/J	Standard	100,000
4–5	Class H or K	Standard [73]	10,000
4–5	Class R/J	Standard [73]	100,000
6	Class H or K	Standard [73]	18,000
6	Class R/J	Standard [73]	100,000

Table 16.154: 2: Motor Code Letter Table

Horsepower	Motor Code Letters
1/2 or less	A-L
3/4–1-1/2	A-K
2–3	A-J
5–25	A-H
30–125	A-G
150 or more	A-F

NOTE: The combination starter selection tables on page 16-51 to page 16-52 are suitable for motors with locked-rotor current letters according to NEC Table 430-7(b) as listed in Table 16.154. For other motors, a special thermal-magnetic circuit breaker with adjustable magnetic trip settings for the specific motor is required. When ordering for these special applications, specify the motor horsepower, voltage, frequency, full-load current, and code letter (or locked rotor current) to help ensure proper protection.

Table 16.155: Terminals

NEMA Size	Type	Line Terminals on Disconnect			Power Terminals On Magnetic Starter			Control Terminals On Magnetic Starter

6	SH	Box Lug	—	(2) 2/0 - 500 MCM Al or (2) 2/0 - 350 MCM Cu (DJL36600 Breaker, DLL Breaker) (1) 2 - 600 MCM Al or (1) 2 - 350 MCM Cu (DJL36400 Breaker) (3) 3/0 - 500 MCM Al or (3) 3/0 - 350 MCM Cu (MJL36800 Breaker) (3) 3/0 - 500 MCM Al or (3) 3/0 - 350 MCM Cu (PLL34080M68 Breaker)	Parallel Groove	250–500 MCM Cu [74]	1 or 2	Pressure Wire	16–12 Cu [75]	2
7	SJ	Box Lug	—	(4) 3/0 - 300 MCM Al or CU (PJL, PKL, PLL Breaker)	Parallel Groove	250–500 MCM Cu	1–4	Pressure Wire	16–12 Cu	2

[72] Standard enclosure includes: NEMA 1, 4 and 4X stainless, and 12/3R.

[73] Standard enclosure includes non-oversize NEMA 1, 4 and 4X stainless, and 12.

[74] Order Class 9999 Type SCU6 parts kit to convert power terminals to accept sizes 2/0–300 MCM wire.

[75] Terminal block range limited to 16–14.

Accessories—Interlocks and Control Transformers

A one or twopole electrical interlock can be added to the disconnect switch or circuit breaker. So if a separate control circuit is used, the magnetic starter can be de-energized when the disconnect is switched to the Off position. See Table 16.156 for proper interlock selection.

For electrical ratings of disconnect and circuit breaker interlocks, see Table 16.157.

An electrical interlock may also be factory installed in either a disconnect switch or circuit breaker combination starter. Specify **Form Y74** for single-pole or **Form Y75** for two-pole interlocks.

Table 16.156: Disconnect Switch and Breaker Interlocks

7	SJ	EO19S2 is standard	N/A	EO19S2 and TE100	EO3S2 and TF200

NOTE: 9070TF transformers are now standard in Series K combination starters.

Internal Auxiliary Switch—Circuit breakers can be supplied with a factory installed auxiliary switch for remote indication of an open and/or tripped or a closed breaker. One (specify **Form Y741**) or two (specify **Form Y751**) auxiliary switches can be supplied. The switches are supplied with normally open and normally closed circuits with a common connection. Contacts must be used on the same polarity and are rated 15 A at 240 Vac. The auxiliary switches are located internally and are furnished with 19-20 inch long leads.

Alarm Switch—The alarm switch only operates when the breaker is tripped. It is used to actuate bell alarms and warning lights. The alarm switch is factory installed only (specify **Form Y742**) and consists of a single pole single throw switch which is normally open except when the breaker is tripped. The contacts are rated 4 A at 240 Vac. This switch is located in the breaker and is supplied with 19-20 inch long leads.

Transformer Selection—Space and drilling are provided in all disconnect switch and circuit breaker combination starters in NEMA 1, 4 & 4X stainless and polyester, 12 and 7 & 9 bolted enclosures for the field addition (or factory installation) of a Class 9070 control circuit transformer and Class 9999 Type SFR4 fuse holder. This kit can be either panel mounted or side mounted on the Type S starter. For standard control transformer selection in combination starters, see . Consult the field office for transformer additions to NEMA 7 and 9 Spin Top™ enclosures. For secondary fuse holder, order 9080PF1.

Fuse Block Mounting Brackets—The standard capacity transformer, Class 9070 Type T100, for the Size 0 and 1 starters mounts to the right of the magnetic starter.

Standards—Most combination starters and forms are UL Listed in file E152395, Category NKJH, and CSA File CR 584.

[76] Class 8538 type numbers ending in suffix **S8**.

[77] Complete the contactor or starter Class and Type with the voltage code. See [Full Voltage Contactors and Starters Forms](#), page 16-118.

[78] Requires oversized enclosure. (Size 2 reversing enclosure.)

[79] Available in standard enclosure with Mag-Gard™ circuit breaker and non-fusible disconnect switch. Requires oversized enclosure with thermal-magnetic circuit breakers and fusible disconnect switches. (Size 2 reversing enclosure.)

Information on Hubs

Hubs are supplied with each NEMA Type 4X combination starter as shown in Table 16.165.

Note that hubs are only installed in stainless steel enclosures; they are not installed in polyester enclosures.

Table 16.165: Hub Sizes

NEMA Size	Quantity	Hub Size (in.)
0 and 1	1	0.75
	2	1.00
2	1	0.75
	2	1.50
3 and 4	1	0.75
	2	2.50

NOTE: Illustrations may not represent the actual enclosure—they are intended for dimensional information only.

2	1.5
3-4	2.5
5	4

[85] Dimensions also for **Form F4T** (standard control transformer) and **Form F4T10** (50 VA additional capacity). Other control transformers may require the use of oversized enclosures. Refer to

[86] 8539 Size 4 only.

General Information

Class 8702 Type S reversing magnetic contactors are used for starting, stopping, and reversing AC motors where overload protection is separately provided. Class 8702 reversing contactors consist of two Class 8502 contactors mechanically and electrically interlocked. Open type devices, Sizes 0–5, are available in either horizontal or vertical arrangements. Sizes 00, 6, and 7 are available as horizontal only. Enclosed devices, Size 00–7, use horizontally arranged components. Type S reversing contactors are designed for operation at up to 600 Vac, 50/60 Hz.

NOTE: In Table 16.167, replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.168.

For information on field modification of NEMA 12 enclosures, see page 16-112.

NOTE: For voltage codes used with control transformers, see page 16-118. Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

Dimensions: page 16-64

Factory Modifications (Forms) page 16-117

Separate Enclosures (Class 9991): page 16-110

Replacement Parts (Class 9998): page 16-122

Type S Accessories (Class 9999): page 16-125

For How to Order Information, see page 16-28.

[1] NEMA 4 and 4X stainless steel enclosures (sizes 0–5) have a brushed finish. Sizes 6 and 7 are painted sheet steel and are rated NEMA 4 only.

[2] NEMA 7 and 9 bolted are not UL listed.

[3] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.

[4] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) can be specified (i.e., order as 8702SAO4V01S).

[5] This voltage code can include **Form S** for separate control (provided at no charge) (for example, order as 8702SAO4V02S).

Single-Phase and 4-Pole Polyphase

NOTE: In Table 16.169, replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.168.

For information on field modification of NEMA 12 enclosures, see page 16-112.

Factory Modifications (Forms): page 16-117
Separate Enclosures (Class 9991): page 16-110
Replacement Parts (Class 9998): page 16-122
Type S Accessories (Class 9999): page 16-125
For How to Order Information, see page 16-28.

[6] NEMA 7 and 9 bolted are not UL listed.
[7] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.
[8] When adding 4 external auxiliary contacts to one Size 0 or 1 contactor, remove one of the return springs.

Introduction and Overload Relays

NEMA Sizes 00, 0, 1 Reversing Starter

Horizontal Type

Vertical Type

Class 8736 Type S reversing magnetic starters are used for full-voltage starting, stopping, and reversing AC squirrel cage motors. Class 8736 starters consist of one Class 8502 contactor and one Class 8536 starter mechanically and electrically interlocked. Open type devices, Sizes 0–5, are available in either horizontal or vertical arrangements. Sizes 00, 6, and 7 are available as horizontal only. Enclosed devices use horizontally arranged components. Type S starters are designed for operation at up to 600 Vac, 50/60 Hz. For How to Order Information, see [page 16-28](#)

Motor Logic™ Solid-State Overload Relay (SSOLR) Protection

These ambient insensitive overload relays are available on three phase sizes 00 through 6 and standard on size 7. They provide phase loss, phase unbalance protection. To order, add Form **H30** (for selectable trip class 10 or 20 protection). For more information about Motor Logic solid-state overload relays (SSOLRs), see [pages 16-101 and 16-119](#). (Catalog no. example: 8736SCO8V06H30)

New! Adapted Bimetallic or Solid-State Overload Relay (NEMA Sizes 00–1)

The Adapted Bimetallic or Solid-State starter includes a specially designed adapter that attaches with bus bars to the Type S NEMA contactor. This adapter allows direct mounting of the IEC Style bimetallic (LRD or LR3D) or solid-state (LR9D) overload relay (OLR). To order this starter configuration, add **Form E** (adapter only) to the standard catalog number. The LRD, LR3D, or LR9D OLR must be purchased separately, based on the FLA of the motor, and installed in the field to properly operate the starter. For the Adapted Bimetallic device only, if the FLA is known at the time of purchase, you can order the starter with the OLR installed. For more information and a list of options, see [Adapted Bimetallic Overload Relay Forms](#), [page 16-119](#). (Catalog no. example: 8736SCO8V06E—without OLR)

New! TeSys T Motor Management System (NEMA Sizes 1–6)

TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T can predict what will happen in the process, as it accurately monitors current, voltage, and power over a wide range. For additional information about the TeSys T Motor Management System, see [page 16-103](#) (for example, 8736SCO8V06H616).

Melting Alloy Overload Relays

Melting alloy type thermal overload blocks are installed as part of the starter, and thermal elements must be selected and installed separately in order to operate the starter. For a three-phase motor, three thermal units must be ordered using the tables beginning under [page 16-133](#). The catalog number includes no Form number (for example, 8736SCO8V06).

Type S Reversing Starters, 3–Pole Polyphase

NOTE: In [Table 16.171](#), replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in . For information on field modification of NEMA 12 enclosures, see [page 16-112](#). For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), [page 16-119](#).

For How to Order Information, see page 16-28.

[14] NEMA 4 and 4X stainless steel enclosures (sizes 0–5) have a brushed finish. Sizes 6 and 7 are painted sheet steel and are rated NEMA 4 only.

[15] NEMA 7 and 9 bolted are not UL listed.

[16] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications.

[17] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (for example, order as 8736SCO1V01S).

[18] This voltage code can include **Form S** for separate control (provided at no charge) (for example, order as 8736SBO7V02S).

Open and NEMA 1 Enclosures

NOTE: These dimensions are for reference only. If you need precise measurements, contact the Customer Care Center at 1-888-778-2733.

NOTE: These dimensions are for reference only. If you need precise measurements, contact the Customer Care Center at 1-888-778-2733.

[22] Size 6 and 7 are NEMA 4 sheet steel enclosures.

[23] The standard enclosure has space for a fused control transformer, Form FF4T, on Sizes 0-2 (except 4-pole devices, Size 0 and 1).

[24] 3-Pole only.

[25] Dimensions shown for 2 or 3-Pole devices only.

[26] Without control transformer.

[27] With control transformer (Form FF4T).

Class 8702 Type W
Reversing Vacuum Contactor**Class 8702 Type W**

Class 8702 Type W Reversing Vacuum Contactors are used to switch capacitors, transformers and electric motors where overload protection is separately provided. Type W reversing vacuum contactors are designed for operation at 600 V, 50/60 Hz.

Auxiliary Contacts—An auxiliary contact block, Class 9999 Type WX11, with one normally open contact and one normally closed contact, is used with Size 4, 5 and 6 vacuum contactors. Additional auxiliary contact units may be added to the Size 4 and 5 reversing contactors in the field. A maximum of 2 units may be added to the Size 4; a maximum of 1 unit may be added to the Size 5.

Termination Means—The Size 4 reversing vacuum contactor is supplied with line and load side lugs. The Size 5 and 6 reversing vacuum contactors are supplied without line and load side lugs.

NOTE: In Table 16.180, replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes listed in Table 16.182. Replacement coils are listed in Table 16.181.

For How to Order Information, see page 16-28.

Class 8738 Fusible Disconnect Switch Type 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

Class 8738 and 8739 Type S reversing combination starters combine the requirements of motor overload and short circuit protection into one convenient package. Type S reversing combination starters are manufactured in accordance with NEMA standards, and are UL Listed (although some Form numbers may not be listed—contact your nearest Square D/Schneider Electric sales office for further information). Class 8738 and 8739 reversing combination starters are designed to operate at 600 Vac, 50–60 Hz, and are available with one of four types of overload relays. See [page 16-62](#) for more information. For Class J fuses, use Form Y1072 (no charge).

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), [page 16-119](#)

Specify	Specify	V99

NOTE: For voltage codes used with control transformers, see [page 16-118](#).

Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

Dimensions: [page 16-72](#)

Factory Modifications (Forms): [page 16-117](#)

Replacement Parts (Class 9998): [page 16-122](#)

Type S Accessories (Class 9999): [page 16-125](#)

For How to Order Information, see [page 16-28](#).

[1] To order melting alloy overload relay, remove form "H30" from part number.

[2] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[3] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.186](#).

[4] Form H30, with the possibility of a fourth character to select a lower FLA range (for example, H308). See "Solid-State Overload Relay Forms" on [page 16-119](#)

[5] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available,

Form S (separate control) must be specified (for example, order as 8738SBG12V01S).

[6] These voltage codes must include Form S (supplied at no charge) (for example, order as 8738SC13V02S).

Non-Fusible and Fusible Disconnect Switch Type 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119

Table 16.190: Coil Voltage Codes

Voltage		Code
60 Hz	50 Hz	
24 ^[17]	—	V01
120 ^[18]	110	V02
208	—	V08
240	220	V03
277	—	V04
480	440	V06
600	550	V07
Specify	Specify	V99

NOTE: For voltage codes used with control transformers, see [page 16-118](#).

Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

Dimensions: [page 16-72](#)

Factory Modifications (Forms): [page 16-117](#)

Replacement Parts (Class 9998): [page 16-122](#)

Type S Accessories (Class 9999): [page 16-125](#)

For How to Order Information, see [page 16-28](#).

[12] To order melting alloy overload relay, remove form "H30" from part number.

[13] Size 6 starters are NEMA 4 painted sheet steel enclosures.

[14] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[15] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.190](#).

[16] **Form H30**, with the possibility of a fourth character to select a lower FLA range (for example, **H308**). See "Solid-State Overload Relay Forms" on [page 16-119](#).

[17] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (for example, order as 8739SBG41V01S).

[18] These voltage codes must include **Form S** (provided at no charge) (for example, order as 8739SCG41V02S).

Thermal Magnetic Circuit Breaker

3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30• (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119

Table 16.192: Coil Voltage Codes

Voltage		Code
60 Hz	50 Hz	
24 ^[24]	—	V01
120 ^[25]	110	V02
208	—	V08
240	220	V03
277	—	V04
480	440	V06
600	550	V07
Specify	Specify	V99

NOTE: For voltage codes used with control transformers, see [page 16-118](#).

Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is available at no charge.

Dimensions: [page 16-72](#)

Factory Modifications (Forms): [page 16-117](#)

Replacement Parts (Class 9998): [page 16-122](#)

Type S Accessories (Class 9999): [page 16-125](#)

For How to Order Information, see [page 16-28](#).

^[19] To order melting alloy overload relay, remove form "H30" from part number.

^[20] Size 6 starters are NEMA 4 painted sheet steel enclosures.

^[21] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

^[22] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.192](#).

^[23] Form H30, with the possibility of a fourth character to select a lower FLA range (for example, H308). See "Solid-State Overload Relay Forms" on [page 16-119](#).

^[24] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, Form S (separate control) must be specified (for example, order as 8739SBG1V01S).

^[25] These voltage codes must include Form S (provided at no charge) (for example, order as 8739SCG5V02S).

Thermal Magnetic Circuit Breaker
3-Pole Polyphase—600 Vac Maximum—50–60 Hz

For Form H30* (special lower-FLA factory-assembled starter combinations with Motor Logic SSOLR protection), see [Solid-State Overload Relay Forms](#), page 16-119

[26] To order melting alloy overload relay, remove form "H30" from part number.

[27] Size 6 starters are NEMA 4 painted sheet steel enclosures.

[28] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[29] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard coil voltage codes shown in [Table 16.194](#).

[30] **Form H30**, with the possibility of a fourth character to select a lower FLA range (for example, **H308**). See "Solid-State Overload Relay Forms" on [page 16-119](#)

[31] 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (for example, order as 8739SBG2V01S).

[32] These voltage codes must include **Form S** (provided at no charge) (for example, order as 8739SDG3V02S).

[33] Standard enclosures include NEMA 1; 4 and 4X stainless; and 12/3R.

NEMA 1, 12, and 3R Dimensions

NOTE: These dimensions are for reference only. If you need precise measurements, contact the Customer Care Center at 1-888-778-2733.

Information on Hubs

Hubs are supplied with each NEMA 4X combination starter as shown in Table 16.202.

Note that hubs are only installed in stainless steel enclosures; they are supplied but not installed in polyester enclosures.

Table 16.202: Hubs

NEMA Size	Quantity	Hub Size (in.)
0-1	1	0.75
	2	1.00
2	1	0.75
	2	1.50
3-4	1	0.75
	2	2.50

Figure 16.18: NEMA 4 & 4X Stainless Steel Enclosure

[36] See Table 16.202 for important information on hubs for NEMA 4X enclosures.

[37] The dimensions shown in all tables above are also for Form FF4T (standard control transformer),

Form FF4T11 (100 VA extra-capacity), and Form FF4T12 (200 VA extra-capacity).

[38] Dimensions also for Form F4T (standard control transformer), Form F4T11 (100 VA extra capacity) and Form F4T12 (200 VA extra capacity).

Type L

Type LX

Features

- LED ready [1]
- 30 A fluorescent lighting rating, 20 A tungsten lighting rating
- Electrically and mechanically held
- 2 through 12-pole versions
- Field-convertible contacts with N.O. and N.C. indicators (8 N.C. contacts maximum [2])
- Silver-Cadmium-Oxide double break contacts

NOTE: When ordering contactors with more than 8 poles, the catalog number configuration is the number of normally open contacts followed by a 0 and then the number of normally closed contacts (i.e. for 4 N.O. and 6 N.C. on a 10-pole contactor, order 8903LG406V02).

NOTE: If a holding circuit contact is required for proper operation, order an additional contact.

Power Pole Kits

The kits in Table 16.204 are used to add 30 A power poles to existing Type L contactors when additional circuits are required. Type L lighting contactors come with mounting brackets, so that adder poles may be mounted from the front by a single captive screw. Adder poles come standard with N.O. contacts which are convertible to N.C.

For How to Order Information, see page 16-28.

NOTE: 12 N.C. poles are only available with a 120 V coil (V02).

Voltage		Code
60 Hz	50 Hz	
24	—	V01
120	110	V02
208	—	V08
240	220	V03
277	—	V04
480	440	V06
Specify	Specify	V99

[1] Conforms to NEMA -410 -2015 and UL508: Table 46.1 and Section 61C test procedures for LED loads up to 16 A at 120 V. Devices were tested to 20 A at 120 V and conform to the test requirements.

[2] Factory conversion of N.O. contacts to N.C., order by catalog number (for example, for 6 N.O. and 2 N.C. poles on an 8 pole contactor, order as 8903LG62V02). Versions are available from the factory with up to 12 N.C. poles for Type L (electrically held) or 2, 4, or 6 N.C. poles for Type LX (mechanically held). For field conversion, there is a maximum of eight N.C. poles for Type L (electrically held) and a maximum of six N.C. poles for Type LX (mechanically held) contactors.

[3] Cannot support control transformer Forms.

[4] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See page 16-112 for more information.

[5] Separate enclosures are available for these devices. It may be possible to improve delivery by ordering an open type contactor and separate Class 9991 enclosure.

[6] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard voltage codes listed in Table 16.205. All lighting contactors come with separate control as standard.

[7] When ordering **Form C** on mechanically held devices, you must also include **Form R6**.

[8] 8903LO (electrically held) devices can accommodate 10 or 12 N.C. contacts use **only** 120 V 60Hz coils.

[9] LO60 and LXO60: add single-pole kits only, 1 on each side, for converting to 8-pole. To maintain proper operation, the contactor cannot be converted to more than 8 poles.

LO80 and LXO80: use single-pole kits, 1 on each side, for converting to 10-pole and use two-pole kits, 1 on each side, for converting to 12-pole.

LO1000 and LXO1000: remove the existing single-pole kit and install two-pole kits, 1 on each side, for converting to 12-pole.

Electrically Held

Mechanically Held

Features

- Electrically and mechanically held
- 30–800 A lighting ratings
- LED ready [10]
- 2- through 5-pole versions (5-poles through 200 A)
- UL Listed short-circuit rating up to 100,000 Amperes
- Factory wired controls and clearly marked termination points
- Quick ship on most items in 5–7 days

NOTE: If a holding circuit contact is required for proper operation, order an additional contact.

[10] Conforms to NEMA -410 -2015 and UL508: Table 46.1 and Section 61C test procedures for LED loads up to 16 A at 120 V. Devices were tested to 20 A at 120 V and conform to the test requirements.

[11] Lighting contactors come with separate control as standard—except electrically held 400, 600, and 800 A devices, which come with common control as standard.

[12] 24 V coils are not available for 200–800 A devices. Contact your local sales office for more information.

[13] On 400–800 A electrically held contactors, for voltage code V04, you must select Form S (separate control).

[14] Cannot support control transformer forms.

[15] For contactor sizes 30–300 A, NEMA 4 and 4X enclosures are brush finished stainless steel. Sizes 400–800 A are painted sheet steel.

[16] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See page 16-112 for more information.

[17] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard voltage codes in Table 16.207.

[18] Separate enclosures are available for these devices. It may be possible to improve delivery time by ordering an open type contactor and a separate Class 9991 enclosure from the section, Separate Enclosures, page 16-110.

[19] Form FF4T comes standard; include the line voltage when ordering. Control voltage is 120–60.

Power Pole Kits for Type S Only

A single-pole or double-pole kit can be added to any 2- or 3-pole 30 or 60 A Type S lighting contactor to make a 4- or 5-pole device. Factory assembled 4- and 5-pole contactors utilize the basic 3-pole device with a single or double-pole kit installed. Only one power pole can be added per contactor. Sufficient room is provided in all enclosure styles for the addition of a power pole kit.

Table 16.209: Power Pole Kits for Type S Only

Ampere Rating	Description	Class 9999 Type
30	One N.O.	SB6
	One N.C.	SB7

Replacement Contacts: [page 16-124](#)

Dimensions: [page 16-83](#)

For How to Order Information, see [page 16-28](#).

[20] When power pole is added to 60 Ampere contactor, a 4-pole coil is also required. Order from Table 16.331. 60 A power poles are suitable for use with copper or aluminum wire.

File E16151
CCN NRNT

NOTE: If a holding circuit contact is required for proper operation, order an additional contact.

Features

The features include: disconnect switch and circuit breaker versions; rugged flange-mounted handle; easy installation; occupation of less space; increased operator protection; room to spare for modifications; Class R fuse clips standard; electrically and mechanically held; 30–600 A.

It is desirable to install the branch-circuit protective device and lighting contactor, combining switching and over-current protection, in one enclosure. Combination lighting contactors are well suited for industrial, highway and area lighting applications, or where a lighting circuit may have to be disconnected for periodic maintenance. They may also be used for resistance heating loads.

For How to Order Information, see page [page 16-28](#).

[21] For NEMA 4 and 4X watertight, dusttight, and corrosion-resistant glass-polyester enclosures, add **Form G18** (limited to 100 A max.). 400 and 600 A enclosures are painted sheet steel (NEMA Type 4 & 4X).

[22] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[23] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard voltage codes shown in [Table 16.207](#).

[24] The control/coil voltage must be specified.

[25] 24 V coils are not available for 200 A or larger devices. Contact the Customer Care Center for additional information.

Night-Master Combination Lighting Contactors

The Class 8903 Night-Master Outdoor Combination Lighting Contactor is the only product on the market that is UL Listed for Service Entrance. This allows the contactor to be pole mounted when used to control lighting in remote locations such as parks, monuments, group sports facilities, and streets and highways.

Factory modifications such as photocells, time switches, key operated selector switches, and the combination of photocells and time switches (photocell on, time switch off) allow the Night-Master to be located in applications where manual operation of lights is not practical.

Night-Master comes in long and short versions in sizes 30 through 200 Amperes. Most common modifications can be provided from the factory, or added in the field to the pre-drilled and pre-tapped panels.

NIGHT-MASTER Outdoor Combination Lighting Contactors offer a disconnecting means, overcurrent protection, and a lighting contactor in one NEMA 3R Rainproof enclosure. These combination units satisfy the requirements of the National Electrical Code and UL 508 for service entrance equipment.

Features

- Solid neutral standard
- Grounding lug standard
- Padlocking provisions
- Short and long versions available
- Electrically held Type S lighting contactor
- Eliminates the need for separate mounted safety switches
- Additional panel space eliminates the need for external mounting of time clocks
- Separate control comes standard on all lighting contactors

NOTE: If a holding circuit contact is required for proper operation, order an additional contact.

For How to Order Information, see page 16-28.

[26] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard voltage codes listed in Table 16.214.

[27] 24 V coils are not available for 200 A devices. Contact your local sales office for additional information.

Factory Modifications (Forms)

NOTE: If a UL label is required, consult the Customer Care Center at 1-888-778-2733. Some Forms are not UL Listed.

Standard Equipment dimensions and enclosure construction may not apply when certain special features are added. Such cases should be referred to the factory with a complete description when precise dimensions are required.

Red push-to-test pilot light	P21	Any	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Interlock necessary for pilot light one needed for each additional pilot light	[35]	Any	Y	Y	Y	Y	Y	Y	[36]	Y	Y	Y	Y	Y	Y
Two-wire interface for mechanically held [33]	R6	Any	—	Y	—	Y	—	—	Y	Y	Y	Y	Y	Y	Y
Addition of undervoltage and overvoltage relay	R46	Any	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Three wire control for long distance applications[33]	R62	Any	—	Y	—	Y	—	—	Y	Y	Y	Y	Y	Y	Y
Auxiliary contacts (specify number of N.O. + N.C.)	X	Any	Y	Y	Y	Y	Y	Y	[36]	Y	Y	Y	Y	Y	Y
Auxiliary electrical interlock installed on disconnect switch or circuit breaker operating mechanism	Y74	Any	—	—	Y	Y	Y	Y	—	Y	Y	Y	Y	Y	Y
Coil transient suppressor (120 Vac only)	Y145	Any	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	—	—
Addition of lightning arrester	Y1532	Any	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Substitute copper only lugs for standard	Y157	Any	Y	Y	Y	Y	Y	Y	—	—	Y	Y	Y	Y	Y

[28] When ordering Form C on mechanically held devices, you must also include Form R6.

[29] Transformer voltage codes.

[30] Single primary voltage must be specified using the codes shown in Table 16.217.

[31] Mechanically held only. Electrically held device has a control circuit requiring a 120 V secondary, therefore, a transformer is supplied. The transformer comes wired to L1 and L2 unless Form S is called for. It is supplied with two primary and one secondary fuse.

[32] Photocell mounted on a NEMA 1 enclosure is designed for indoor areas which rely on natural light. Addition of the photocell does not make the enclosure suitable for outdoor (NEMA Type 3R) installations.

[33] Available for 24 V, 120 V, 240 V, 277 V and 480 V applications only.

[34] For electrically held enclosed devices, the first pilot is wired in parallel with the coil. Operating interlocks are required for all additional pilot lights. Mechanically held devices require operating interlocks for all pilot lights.

[35] Do not use Form X for any interlock wired in series with a pilot light, but do specify how the pilot light and interlock are to be wired into the circuit.

[36] Electrically held 20 A multipole contactors cannot add interlocks. Additional poles can be used for the same function, however. Mechanically held (Type LX) provide one double throw auxiliary (or status) contact as standard.

Table 16.217: Voltage Codes

Voltage at 60 Hz (primary-secondary)	Code
120-24	V89
208-120	V84
240-24	V82
240-120	V80
277-120	V85
480-24	V83
480-120	V81
480-240	V87
600-120	V86

Order Example

You have device 8903SMG2V02. V02 means that you need a coil voltage of 120-60/110-50, wired for separate control.
You want to add Form FF4T, with transformer voltages of 480 V primary, 120 V secondary. The new and complete Class, Type, Voltage Code and Form number are:

Class	Type	Voltage Code	Form [37]
8903	SMG2	V81	FF4T

[40] No field installed kit available.

[41] Mechanically held contactors need two distinct signals to operate. An N.O. contact block must be added to the Class 9999 Type SA3 push button kit.

[42] Form R6 available for 24 V, 120 V, 240 V and 277 V only.

[43] Insert CA2SK11() voltage code from page 23-21.

[44] 2- or 3-pole only. For 4- or 5-pole use Class 9999SP15R.

[45] The coil voltage must be the same as the pilot light rating. Kit contains one (1) Class 9001, Type KP1R6 120 V/60 Hz red pilot light control unit. For other voltages, refer to the Class 9001, Type KP Control Section.

[46] Requires holding circuit interlock for Type S or additional power pole on Type L devices.

EH = Electrically Held. MH = Mechanically Held.

[50] For glass polyester enclosures (through 100 A), see Table 16.106.

[51] All Type K Forms.

[52] X hub is 1/4" left of center. W hub shown is another X hub. K dimension is distance between two X hubs. Actual W hub is located 3-3/16" to the right of X hub shown.

NEMA 12/3R and Night-Master™, NEMA 3R

Table 16.226: See Figures: NEMA 12/3R (30–600 A) and NEMA 12/3R (800 A) (EH = Electrically Held; MH = Mechanically Held)

Definite purpose contactors are ideal for heating, air conditioning, refrigeration, data processing, and food service equipment. New compact 1 and 2-Pole contactors are available along with standard size 2, 3, and 4-Pole devices.

They feature quick connect terminals and binder head screws for easy wiring. Box lugs are standard on 40 A contactors and larger. An exclusive DIN track mounting option may reduce installation costs. Coils can be changed on the Type DPA contactors (50 to 90 A) quickly without a tool. Auxiliary contact modules snap on either side of the Type DPA contactors.

- Compact Design
- Industry Standard Mounting
- Double Break Contacts
- Low Coil VA
- Straight-Through Wiring
- Low Cost

8911DPSO33V09 Definite Purpose Starter

Type DPSG23V02

Types DPS and H through M

Class 8911 definite purpose starters are inexpensive starters for applications with relatively low duty cycles. Typical applications include air compressors, agricultural equipment, pumps, and HVAC equipment. Definite purpose starters offer:

- Low cost
- Small size
- Melting alloy overload block
- Trip-free reset mechanism
- Open type or enclosed
- 500,000 mechanical operations

Table 16.254: How to Order

To Order Specify:	Catalog Number			
• Class Number	Class	Type	Coil Voltage Code	Form(s)
• Type Number				
• Voltage Code				
• Form(s)	8911	DPSG33	V02	

[1] See for selection information on standard trip thermal units.

[2] Holding circuit contacts are not provided as standard; refer to Table 16.252 for kit.

[3] Replace the three bullets (●●●) in the catalog number with the coil voltage code. Refer to the standard voltage codes listed in Table 16.251.

[4] Type DPS 4-pole starter not available. Suggest 3-pole device with auxiliary contact.

[5] Does not include holding circuit interlock—order auxiliary contact.

[6] Use for 20 to 40 A starters. For 50 A starters, use the 9999BLX bracket.

[7] Append the coil voltage code from Table 16.251.

Type SSD4030

Type SSE4050

Class 8940 Type SS, XS Selection

Class 8940 Type SS and XS panels in NEMA 3R enclosures are specifically designed for pumping applications. Extra space is provided for field installation of auxiliary equipment.

- Type S Contactor provided as standard
- Approved for submersible pump applications
- Motor Logic™ Class 10/20 (Selectable) SSOLR through 200 hp—480 V, 100 hp—240 V. Included in the catalog number for Type SS (the H30 suffix is required only for eMCP units). (Includes rubber boot.)
- All prices include a Start push button and a Hand-Off-Auto selector switch
- Adjustable trip current
- Phase failure sensitive
- Ambient temperature compensated overload
- All devices are UL Listed, and marked “Suitable For Use As Service Equipment”

NOTE: Motor Logic™ SSOLRs are designed to protect 50/60 Hz, three-phase AC motors from overload and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip. For applications of this nature, it is recommended that bimetallic overload relays (Form B12) be used.

NOTE: Standard enclosures include non-oversize NEMA 1, 4 & 4X Stainless, and 12.

For How to Order information, see page 16-28.

[1] To substitute an IEC ambient compensated bimetallic overload relay (up to size 5) for the Motor Logic SSOLR, request Form B12 and state motor hp (no charge). This applies to the above (SSx) devices only.
 [2] Fuse clips are sized for use with dual-element time-delay fuses.
 [3] Circuit breaker disconnect supplied. (See Section 7 for circuit breaker adjustment range.)
 [4] A voltage code is not required for 240 V or 480 V common control with 8940SS controllers.
 [5] To select a Motor Logic SSOLR with an FLA lower than the standard NEMA sizing, use the four-character Form H30•. See the section “Solid-State Overload Relay Forms.”
 [6] See Table 16.258 for coil voltage codes.
 [7] See page 7-32 for circuit breaker adjustment range.
 [8] FLA is 45–135.

160–250 A	3	B12	B	9065TJF160

Class 8940 Type W, X

Class 8940 style S2 pumping plant panels in NEMA 3R enclosures are specifically designed for oil field applications. All panels are supplied with an electronic motor circuit protector (MCP) or a visible blade, fused, disconnect switch. This line of pumping plant panels features:

- Rugged spring latches for easy access without a tool
- Side mounted control units for convenient operation
- Door retainer available for windy areas
- Includes Hand-Off-Auto selector switch
- Motor Logic™ Class 10/20 (selectable) SSOLR included (the H30 suffix is required).
- UL Listed for use as service equipment for motors
- Extra panel space for additional electrical controls
- All devices are UL Listed, and marked "SUITABLE FOR USE AS SERVICE EQUIPMENT"

NOTE: Motor Logic™ SSOLRs are designed to protect 50/60 Hz, three-phase AC motors from overload and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip. For such applications, we recommend bimetallic overload relays (Form B12).

Table 16.261: Factory Modifications (Forms)

Description	Form
Substitute Class 10 IEC overload relay – state motor hp (NEMA Sizes 0–4 only)	B12
Control transformer with fused primary, Types: <ul style="list-style-type: none"> • NPD, NPE, NPF, SSC, WC, XC (50 VA) • NPG, SSD, XD, WD (100 VA) • NPJ, SSE, XE, WE (150 VA) • SSF, XF, WF (300 VA) • SG, NSG, XSG (50 VA and an interposing control relay) 	F4T
Factory-installed door wind latch assembly in a standard Class 8940 Type SSC, SSD, SSE, SSF, XSE, and XSF	G45
Elapsed time meter	G97
Substitute Class 10/20 (selectable) Motor Logic™ SSOLR [15]	H30
On Delay Timer	K25
Off Delay Timer	K26
Program timer with day omission feature	K141
Backspin timer (time delay upon energization)	K15
Start push button (S2 panels only)	A28
Slim panel (Types WC, WD, WE, XC, XD, XE only)	L8
Short panel (Types SSE, SSF, XE-S2 and XF-S2 only)	L9
Pilot light (specify lens color). Does not include auxiliary contact.	P [16]
Separate control	S
Auxiliary contacts (specify N.O. or N.C.)	X [17]
Special UL panel label for modified UL Listed devices on non-standard panels (requires approval by the manufacturing plant)	Y1
Lightning arrestor	Y1532
Move control operators from the enclosure side to the door	Y45
Phase failure, phase reversal relay with time delay including under and over voltage protection	R44
Substitute standard trip melting alloy overload relays	Y61
Substitute quick-trip melting alloy overload relay (Sizes 1 and 2 only)—Not available on IEC style contactors	Y611
Substitution of Class R rejection fuse clips for standard fuse clip. (8940 RD, RE, RF, RG, MD, ME, MF, MG, SSC, SSD, SSE, SSF, SSG, WC, WD, WE and WF)	Y1071

[9] Form S required for separate control.

[10] 24 V coils are not available on Size 4–7 starters. On Size 1–3 starters, 24 V coils are available using Form S.

[11] A retro-fit reset kit is required for pre-series B pump panels. See page 16-109 for selection.

[12] Coil voltage code must be supplied to order this product. See Table 16.258 for codes.

[13] Fuse clips are sized for use with dual-element time-delay fuses.

[14] To select a Motor Logic SSOLR with an FLA lower than the standard NEMA sizing, use the four-character Form H30•. See the section "Solid-State Overload Relay Forms."

[15] Motor Logic SSOLR are designed to protect 50/60 hertz three-phase AC motors from overload, phase unbalance and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip. For applications of this nature, it is recommended that bi-metallic overload relays (Form B12) be used.

[16] Indicate pilot light color as Form P1 (red) or Form P2 (green). See page 16-117 for more selections.

[17] To determine the maximum number of auxiliary contacts which can be added to each Type S device and for the appropriate "X Form," refer to Table 16.85 (for non-reversing single-speed devices) or to Table 16.170 (for reversing or two-speed devices).

For How to Order Information, see [page 16-28](#).

Selection

Duplex Motor Controllers are used to control two motors, and consist of two starters in a common enclosure. Two separate disconnect switches or circuit breakers with operators are included with all combination devices. Unless **Form Y68** is specified, an alternation circuit (a Class 8501 Type XO40 relay) is included, which alternately operates first one motor and then the other on each successive closing of a pilot device. Both motors will be energized should a second pilot device close. All devices incorporate a terminal block to simplify wiring of pilot devices A and B. Typical applications include pump motors where a second pump is required for peak demand periods yet alternation is desirable to equalize pump wear.

[11] 24 V coil is not available on Size 4. On Sizes 00–3, specify **Form S** (separate control).

[12] These voltage codes must include **Form S** (no additional charge).

8965DPR33V02 Hoist Contactor
600 Vac, 25 A
DPR, Angled

Class 8965 Type DPR reversing/hoist contactors are designed for the control of motors in hoists, overhead doors, small elevators, commercial laundry equipment, and other related products which use reversing motors. They are rated to perform in the short periods of jogging experienced in hoist service.

The coils are designed to operate on line voltages of 85–110% of rated voltage, and are for applications at 50 or 60 Hz only. Coils are easily replaced with external base removed.

Auxiliary contacts can easily be fieldadded to any Class 8965 reversing contactor. Type DPR contactors accept one auxiliary contact module with up to two isolated circuits per side (two modules per device). When auxiliary contacts are ordered separately, two modules are normally used for each device; one for forward, one for reverse.

Melting Alloy Overload Relay Selection

NEMA style thermal overload relays feature:

- Exclusive one-piece thermal unit
- Inverse time delay trip
- Trip free reset mechanism
- Replaceable contact units

Note that these overload relays do not include thermal units, which must be ordered and field installed separately. Slow trip (Class 30) and quick trip (Class 10) melting alloy thermal units are available for all Size 1, 2, 5 and 6, and some Size 3 and 4 applications.

NOTE: These dimensions are for reference only. If you need precise measurements, contact the Customer Care Center at 1-888-778-2733.

[1] The maximum power circuit rating for Type S separate-mounting overload relays is 600 Vac only. The maximum control circuit contact rating for Type S versions is 600 Vac only.

[2] For 4-pole starters used on two-phase systems, order two thermal units plus one Class 9998 Type SO31 jumper strap kit for every two starters. Each kit includes two jumper straps.

[3] Field modification possible. Order 9999S04 (for Form Y342) or 9999S05 (for Form Y344).

[4] This Form cannot be field modified.

Motor Logic Solid-State Overload Relays

Motor Logic solid-state overload relays (SSOLRs) feature: 3 to 1 adjustment for trip current; phase loss and unbalance protection; direct replacement for Type S melting alloy. They are ambient insensitive and self-powered. Switch selectable trip class; Class II ground fault detection; and direct replacement for Type S melting alloy. Electrical remote reset is also available.

NOTE: Motor Logic SSOLRs are designed to protect 50/60 Hz, three-phase AC motors from overload, phase unbalance, and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip.

Introduction

TeSys T is a motor management system that provides full motor monitoring, control, and protection when used with short circuit protection and a contactor. TeSys T manages most critical processes while reducing downtime and increasing productivity.

TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T predicts what will happen in the process, as it accurately monitors current, voltage, and power over a wide range.

TeSys T is a green motor management system with unique power monitoring capabilities for better energy management. TeSys T carries all appropriate and necessary third party certifications.

To get detailed information about TeSys T, visit our website at www.schneider-electric.us.com.

TeSys T detailed functionalities and possible configuration:

Communication:

TeSys T is a flexible motor management system that supports six major communication protocols: Modbus™, CANopen, DeviceNet™, Profibus™, Ethernet/IP, and Modbus/TCP.

These communication protocols allow the TeSys T controller to integrate seamlessly into your automation systems.

Ethernet/IP and Modbus/TCP provide FDR to enable quick replacement of products and minimize maintenance time.

Protection functions:

- thermal overload
- phase imbalance and phase failure
- thermal motor protection via PTC probes
- phase reversal
- ground fault detection
- long starting times and motor stalling
- automatic load shedding and restarting
- load fluctuations (current, voltage, power)
- variations of Cos ϕ (power factor)

Metering functions:

- Measurements (rms values):
 - current on the 3 phases
 - voltage on the 3 phases (shedding)
 - motor temperature
 - ground fault sensing
- Values calculated:
 - average current
 - frequency
 - Power factor, power, power consumption

Motor control functions:

A motor managed by a TeSys T controller can be controlled:

- locally, using the logic inputs present on the product, or via the human machine interface (HMI)
- remotely, via the network

Motor control modes:

10 predefined motor control modes are incorporated in the controller. Each listed mode is available as 2 or 3 wire control.

- overload mode: monitoring of motors whose control is not managed by the controller
- independent mode: starting of full voltage non-reversing motors
- reverser mode: starting of full voltage reversing motors
- 2-step mode: 2-step starting of motors (star-delta, by autotransformer and by resistor)
- 2-speed mode: 2-speed starting of motors (Dahlander, pole changer)

A custom mode is available to allow the user to create a specific motor control mode that is not predefined in the controller.

Custom Logic has the basic functions of a small programmable logic controller (PLC). Programming can be done in Structured Text mode or in Block Diagrams through SoMove V2.2 software. To ensure consistency, the same software used to commission the TeSys T controller is used for Custom Logic programming.

Statistical and diagnostic functions:

- history of the last five detected faults
- motor statistics
- controller operations
- warning of pending faults

Table 16.286: Standards and Certifications

Product Type	LTMTR Controllers	LTMEV40 Expansion Modules
Conforming to standards	IEC/EN 60947-4-1, UL 508, UL E164353 NKCR, CSA 22-2 n°14, CSA LR43364 Class 3211 03, IACS E10	
Product certifications	UL, CSA, BV, LROS, DNV, GL, RINA, ABS, RMRos, NOM, CCC, C-TiC'K, ATEX, GOST, KERI	

Possible Configurations:

TeSys T controller is a flexible motor management system using SoMove V2.2 commissioning tool. PowerSuite is the configuration software for the TeSys T controllers. See [page 16-106](#) for details.

TeSys T is a motor management system that provides full motor monitoring, control, and protection when used with short circuit protection and a contactor. TeSys T manages most critical processes while reducing downtime and increasing productivity.

	100–240 Vac	1.35–27	LTMR27PFM
100	24 Vdc	5–100	LTMR100PBD
	100–240 Vac	5–100	LTMR100PFM

The controller is the central component in the motor management system. It manages the basic functions such as:

- measurement of 3-phase current via integral current transformers from 0.4 to 100 A (up to 810 A by external current transformers)
- measurement of ground current internally or external ground sensors
- measurement of motor temperature
- inputs and outputs for the various motor control modes, detected fault management, and other functions

Characteristics

As standard, the controller manages the following:

Control Modes

- overload mode
- independent mode
- reverser mode
- 2-speed mode
- 2-step mode
- Custom mode

Inputs/Outputs

- 6 discrete logic inputs
- 3 relay logic outputs (1 N.O. contact each)
- 1 relay output for detected fault signaling (1 N.O. + 1 N.C.) overload relay

Measurements

- connection for a thermistor probe
- connections for a ground sensor

Holder for LTMCU (with magnetic back)	—	LTM9KCU
Magelis compact display	24 Vdc	XBTN410
Configuration software Windows 99, 2000, XP	—	VJDSNDTMSV13M

LTME Expansion Module

The expansion module adds the following functionalities to the TeSys T controller:

- voltage measurement between phases up to 690 V nominal
- 4 additional inputs

Inputs

- 4 discrete logic inputs (isolated)
- 2 types of power for the inputs: 24 Vdc and 100 to 240 Vac
- A 24 Vdc LTMR controller can be assembled with a 240 Vac expansion module and vice versa

The LTMVE must be connected to the LTMR controller by a connecting cable.

HMI—Human Machine Interface

Depending on the application, two types of HMI can be used with the motor management system.

- The LTMCU operator control unit:
 - Control/monitoring of a 1 to 1 LTMR controller
- A Magelis XBTN410 terminal
 - Control/monitoring of 1 to 8 LTMR controllers

LTMCU Compact Display

- Configure the parameters
- Display information
- Monitor the alarms and detected faults
- Local control of the motor via the local control interface (keys can be customized)
- Three different languages can be loaded into the LTMCU controller at the same time: English, French, Spanish are the defaults.

A language download utility (LangTool), together with all the other languages, are available on the website www.schneider-electric.com.

This tool allows the languages present in the LTMCU control until to be adapted.

The LTMCU HMI control unit has an additional front panel RJ45 port, protected by a flexible cover.

Magelis™ Display

Two applications have been predefined for the TeSys T controller. Depending on the application loaded, the HMI terminal makes it possible to:

- Configure and monitor a motor starter (LTM_1T1_V1.dop)
- Monitor and modify certain parameters up to 8 motor starters (LTM_1T8_X_V1.dop)

Vijeo Designer programming software is needed for loading applications into the XBT HMI terminal.

Configuration with SoMove Software

The TeSys T configurator is incorporated in the SoMove software application, versions 2.2 and higher.

SoMove software allows configuration, commissioning and maintenance of motor starters protected by a TeSys T controller.

A library containing predefined motor control mode functions is available in order to:

- allow standardization
- avoid errors
- reduce motor starter setup times

By using logic functions, a custom mode makes it possible to:

- easily adapt these predefined motor control mode functions to the specific needs of your applications
- create new functions

The functions thus defined can be saved and used to build your function library for future applications.

To create special functions, a logic editor is incorporated in the configurator and allows a choice of 2 programming languages:

- function block
- structured text

Stand-Alone Mounting Bracket
(Mounted to the Overload Relay)

The adapted bimetallic Type S starter incorporates a mounting bracket for use with a self-contained adjustable bimetallic or solid state overload relay. A separately mounting version of the bracket is also available for use with contactors that do not offer the same terminal configurations as the Type S, or for applications with height restraints that demand mounting next to the contactor rather than directly below as is typical for most starter configurations.

The bimetallic thermal overload relays feature Class 10 or Class 20 protection with automatic and manual (hand) reset and a trip-free mechanism. These overload relays are ambient temperature compensated, and available with or without phase imbalance protection. The component is available as a replacement on a starter or as a separately mounted overload relay adapter. The overload relay (LRD or LR3D) can be purchased separately and field installed at a future date.

The solid-state overload relays feature Class 5, 10, 20 or 30 protection (dip switch selectable) with automatic and manual (hand) reset and a trip-free mechanism. These overload relays are ambient-temperature compensated and can be wired for single-phase applications (must use the three-pole unit). The component is available as a replacement on a starter or as a separately mounted overload relay adapter. The overload relay (LR9D) can be purchased separately and field installed at a future date. If using the LR9D with a single-phase motor, the three-pole adapter must be purchased to accommodate looping of the motor leads.

For more information, see [Table 16.325](#).

NOTE: The LRD, LR3D, or LR9D overload relays must be purchased separately.

External Reset Mechanisms, Class 9066

Type RA kits provide a convenient external means for resetting overload relays mounted in control enclosures of almost any depth. Designed for use on NEMA 1, 4 or 12 enclosures, they can be used with any Square D open type magnetic starter or Class 9065 overload relay. All kits are individually packaged for easy stocking and include complete installation instructions.

Only a single mounting hole is required in the enclosure door. Each kit contains one or more threaded reset rods, grooved at intervals of 3/4" so they can be cut to the approximate length required without thread damage. Final adjustment is easily made after installation by rotating a plunger and tightening the lock nut. Mechanisms with more than one reset rod include a steel cross bar with mounting holes located at 1/2" intervals, providing a choice of rod locations to suit any application. All steel parts are electrically isolated from the enclosure and the operator.

Type RB kits make it possible to field install external reset mechanisms to Type S combination starters in NEMA 12 enclosures. They may also be used to replace external reset mechanisms on Type S combination starters in NEMA 1, 4 and 12 enclosures.

Separate Enclosures, Class 9991

Separate enclosures can be used with open style devices for field assembly of enclosed controls. These enclosures, plus the open style components, are equivalent to a factory-assembled device. Separate enclosures are for use only with the following equipment:

- **NEMA 4 and 12** Class 9991 separate enclosures for Type S devices come standard with closing plates. See [Table 16.304](#) for the specific number of closing plates. For applications requiring enclosures without closing plates, contact your nearest Schneider Electric sales office.
- **NEMA 3R** enclosures for field assembly of equipment for outdoor applications come with three closing plates, a reset mechanism, and a predrilled panel as standard. For a conduit connection to the top of these enclosures, select watertight hubs from the listing on Digest page 3-10 in accordance with applicable code requirements. Square D NEMA 12 enclosures can also be modified for outdoor use. For details, refer to the NEMA 12 enclosure modification information on page [page 16-112](#). **NOTE:** Not for use in high-corrosive outdoor locations or sea coast environments.
- **NEMA 4X** enclosures for Type S devices, Sizes 0–2 and 30–60 A, come standard without closing plates. Cover mounted control units for NEMA 4X separate enclosures are available as a factory modification only.

When closing plates are removed from NEMA 4, 12, and 3R enclosure covers, the openings can be used for easy installation of Class 9001 Type K or SK cover-mounted control units. Convenient Class 9999 modification kits containing Class 9001 Type K control kits can be found on page [page 16-126](#).

[1] The standard cabinet has a brushed finish.

[2] Type MBO. Size MO only.

[3] For contactors, replace the reset assembly with a proper closing plate: for NEMA 4, use Class 9001 Type K52; for NEMA 3R and 12, use Class 9001 Type K51. (Class 9991 Types SCW20 and SDW20 are designed for contactors only, so reset closing plates are not required.)

[4] NEMA 12 enclosures can be field modified for outdoor non-corrosive and non-service entrance rated applications. See [page 16-112](#) for more information.

[5] This enclosure is suitable only for starters with a **melting alloy**, **solid-state**, or **adapted bimetallic** overload relay.

[6] For electrically held devices only.

Flush Mounting Starter with Pull Box and Mounting Strap and Plaster Adjustment Feature

Type SCG8
NEMA 1 Enclosure

Flush Mounting, General Purpose Separate Enclosures

Flush mounting, general purpose separate enclosures for Type S Sizes 0–2, 30–60 A are provided with knock-outs in the cover for field assembly of one Class 9999 push button or selector switch kit and one Class 9999 pilot light kit. (Refer to Class 9999 for selection.) For Type S Size 3, 100 A, three closing plates are provided for installation of Class 9001 Type K oiltight control units. For enclosure dimensions, refer to Table 16.309.

	EO1, EO17, T50	—	UE7

[7] The standard cabinet has a brushed finish.

[8] For contactors, replace the reset assembly with a proper closing plate. For flush mounting, use Class 9999 Type SG2—except for Class 9991 Type SDF11 enclosures, which require a Class 9001 Type K51 or K11 closing plate. (Class 9991 Types SEF11 and LF1 are designed for contactors only, so reset closing plates are not required.)

[9] This enclosure is suitable only for starters with a **melting alloy, solid-state, or adapted bimetallic** overload relay.

[10] Series B starter enclosure.

[11] For horizontally arranged Class 8702 contactors, replace the reset assembly with a Class 9001 Type K51 closing plate.

[12] If cover mounted control units are required, select an oversized enclosure listed in Table 16.307.

[13] For electrically held contactors only. See Table 16.307 for mechanically held contactors.

Fuse Block InstalledType SCA11
NEMA 12 Enclosure

Enclosure Selection

NEMA 1, 4, and Oversized Enclosures

For the Addition of a Control Circuit Transformer

The Class 9991 enclosures listed in [Table 16.307](#) accept an open type Class 8502 or 8536 Type S, NEMA Size 0, 1, 1P, or 2 contactor or starter along with a fused control circuit transformer (Form F4T) to allow field assembly of enclosed controllers. In the cover of the Class 9991 Type SCG1 enclosure, knock-outs are provided for field addition of Class 9999 cover-mounted control units. All other Class 8502 & 8536 enclosures include a panel with space and drilling for an open-type device and a fused control circuit transformer. In addition, three closing plates are included in each cover for easy installation of Class 9001 Type K or SK control units.

Oversized enclosures for open type Class 8903 Type L & LX, 20 A and Type S, 30 and 60 A electrically and mechanically held lighting contactors include a panel with space and drilling for an open-type contactor and fused control circuit transformer (Form F4T) and/or an auxiliary relay for use with single pole pilot devices (Form R6). When an auxiliary relay is required, use a Class 8501 Type XO11 relay. Three closing plates are provided as standard for easy installation of Class 9001 Type K or SK control units.

Note: A Class 9991 Type SCG1 NEMA 1 separate enclosure can also be used for Class 8903 Type SMO, 30 A electrically held lighting contactor if Form F4T (control transformer), with or without cover control units is required.

NEMA 12/3R Enclosures Modified for Outdoor Applications (not to be used in salt air or corrosive environments)

Field Modifications for NEMA 3 dusttight, raintight and sleet resistant outdoor applications are as follows: Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance shall be used.

Field Modifications for NEMA 3R rainproof and sleet resistant outdoor applications are as follows:

- Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance, when the conduit enters at a level higher than the lowest live part, shall be used.
- Drain holes of 1/8 inch diameter shall be added to the bottom of the enclosure.

Class 9001 Type K oiltight/watertight control units can be easily installed in NEMAs 4, 12, and oversized NEMA 1 separate enclosures provided with closing plates. When installing control units simply remove the closing plates and install the proper Class 9001 Type K components. Convenient control unit kits complete with assembled and pre-wired operators for quick installation are available as Class 9999 user modification kits. See [Table 16.308](#) for contents of each control unit kit. Class 9001 Type SK NEMA 4X corrosion resistant control units may be used as an alternate.

[14] For complete description, see the Class 9070 section. **Note:** The Class 9991 Type SCG1 enclosure comes standard with a Class 9999 Type SF4 fuse block.

[15] The standard cabinet has a brushed finish.

[16] NEMA 12 modified for outdoor use (see [NEMA 12/3R Enclosures Modified for Outdoor Applications](#)).

[17] For contactors (Class 8502), a separate closing plate is provided with each enclosure to replace the reset mechanism—with the exception of Class 9991 Type SCG1, which requires a separate reset closing plate: Class 9999 Type SG2.

[18] To mount in an SCG1 enclosure, a Class 9991 Type S1 adapter bracket is also required.

[19] Mechanically held.

Full Voltage Starters

Factory installed modifications are available for the classes of control equipment listed in the respective tables. Kits are also available for many field modifications and normal parts replacement on most control items. Refer to Classes 9998 and 9999 for complete listings.

NOTES

- Standard equipment dimensions and enclosure construction may not apply when certain special features are added. Such cases should be referred to the factory, with complete description, when precise dimensions are required.
- If a UL label is required, consult the Customer Care Center at 1-888-778-2733. Some Forms are not UL Listed.

[1] All push buttons are momentary contact unless specified otherwise.

[2] Selection of various Form combinations may force the use of a larger enclosure.

[3] Specify the appropriate Class 9001 Type K or SK operator required.

[4] Not available for Size 00.

[5] Specify the marking and/or the required Class 9001 Type KN or SKN legend plate.

[6] Indicate the pilot light color as **Form P1** (red), **Form P2** (green), and so forth, as shown in Table 16.320. Unless otherwise requested, standard practice is to wire a red pilot light to indicate that the device is energized. No additional auxiliary contact is required. Also, standard practice is to wire a green pilot light to indicate that the device is de-energized. An additional normally closed auxiliary contact is supplied. A wiring diagram must be provided for other pilot light colors or arrangements.

[7] To determine the maximum number of auxiliary contacts that can be added to each Type S device, and for the appropriate X Form, refer to Table 16.85 (for non-reversing single-speed devices) or Table 16.170 (for reversing or two-speed devices). For Class 8600 reduced voltage controllers, consult the Customer Care Center at 1-888-778-2733.

[8] Only for pilot light. Available for Size 00.

240–120	V80
277–120	V85
480–24 [14]	V83
480–120	V81
480–240	V87
600–120	V86
Specify	V99

Selection of Control Circuit Transformers

The standard primary/secondary voltages for control circuit transformers are indicated in .

To order, select the desired device with the appropriate transformer Form designation. Then convert the previously selected voltage code (V●●) to reflect the desired primary/secondary voltage for the transformer. The secondary voltage should equal the previously selected coil voltage of the device.

Example:

You have selected 8536SDG1V02S. V02S means that you need a coil voltage of 120-60/110-50 wired for separate control. You would like to add **Form FF4T**, with transformer voltages of 480 V primary, 120 V secondary, and solid-state overload relay protection with selectable Class 10/20 trip class—Form **H30**. (The Form designations needed are **FF4**, **H30**, and **T**.)

The new and complete Class, Type, voltage code, and Form number will be:

Class	Type	Voltage Code	Form [15]
8536	SDG1	V81	FF4H30T

[9] All combination style devices—such as Class 8538, 8539, 8738, and 8739—that use **Form S** should also use **Form Y74** (auxiliary contact installed on the disconnect switch) in accordance with NEC Article 430-74.

[10] Not available for Sizes 6 and 7.

[11] See .

[12] **Single** primary voltage must be specified.

[13] Not available for NEMA Sizes 0, 00, or 7. NEMA Sizes 00 and 0 cannot be used with marine controls.

[14] 12 V coils are not available on Sizes 3–7. 24 V coils are not available on Sizes 4–7.

[15] Specify Form numbers in alphabetical order. Each letter indicates the beginning of a new Form and may be followed by one or more numbers.

Solid-State Overload Relay Forms

The solid-state overload relay (SSOLR) is available on NEMA Size 00–7. For Class 8536, 8538, 8539, 8736, 8738, 8739 and 8810 devices.

Form Description

Type S Starter with Motor Logic™ Solid-State Overload Relay (SSOLR)

3: Motor Logic SSOLR, Class 10/20 (Selectable)

0: No additional modifications

1: N.O. auxiliary contact (field convertible to N.C.)

Special note for Class 8810 devices:

You **must** specify two separate Form numbers to get Motor Logic overload relays on two-speed starters.

- The catalog number will be alphanumeric. Example:
- Open style, Size 4 two speed starter with Motor Logic SSOLRs
 - Single winding, 460 V, constant or variable torque
 - High speed FLA = 96 A
 - Low speed FLA = 27 A (use Size 2 overload relay)

Catalog number to order: **8810SF01V02H30H302S**

Where:

- Form H30 is a Size 4 contactor with a 45–135 A Motor Logic SSOLR for high speed
- Form H302 is a 15–45 A Motor Logic SSOLR on the low speed contactor.

Special Factory-Assembled SSOLR/Contactor Size Combinations (When Applicable):

(must be specified on Size 00 starter orders)

Blank: Overload relay matched to the starter size (for example, Size 1 contactor and 9-27 A overload relay)

- 0: 6–18 A overload relay on the starter size indicated by the starter catalog number
- 1: 9–27 A overload relay on the starter size indicated by the starter catalog number
- 2: 15–45 A overload relay on the starter size indicated by the starter catalog number
- 3: 30–90 A overload relay on the starter size indicated by the starter catalog number
- 4: 45–135 A overload relay on the starter size indicated by the starter catalog number
- 8: 1.5–4.5 A overload relay on the starter size indicated by the starter catalog number (only offered on Feature Units)
- 9: 3–9 A overload relay on the starter size indicated by the starter catalog number

NOTE: Size 7 comes standard with the Motor Logic SSOLR, Class 10/20 (Selectable). No Form designation is required.

Table 16.324: Special Factory-Assembled Starter Combinations with Motor Logic SSOLR Protection

NEMA Contactor Size	SSOLR Size						
	00		0	1	2	3	4

Adapted Bimetallic Overload Relay Forms

New!

Table 16.325: Adapted Bimetallic Overload Relay for NEMA Type S Starter

This bimetallic overload relay is available on NEMA Sizes 00, 0 & 1 for Class 8536, 8538, 8539, 8736, 8738 and 8739 devices. To order a starter with the **adapter only**, add Form E to the catalog number (8536SBG2V02ES). When ordering with the adapter and bimetallic overload relay installed, use [Table 16.326](#) as a guide.

Form Description

Bimetallic Overload Relay

Class

- 1: Class 10 Balanced Loads (with single phase sensitivity)
- 2: Class 20 Balanced Loads (with single phase sensitivity)
- 3: Class 10 Unbalanced Loads (without single phase sensitivity)
- 4: Class 20 Unbalanced Loads (without single phase sensitivity)

FLA: Suffix from the TeSys D Overload Relays table below (for example, for 4–6 FLA, use suffix **10**)

Terminals: **0** for screw terminal and **6** for ring tongue terminals

Sample catalog number: **8536SCO3V02E2160S**

NEMA Size 1 starter controlling a 7.5 hp motor (11 FLA)—Bimetallic overload relay is LRD16L (9–13 FLA)

Table 16.326: TeSys D Overload Relays for Sizes 00–1 Type S Starters, Non-Reversing and Reversing, Classes 8536, 8538, 8539, 8736, 8738, and 8739

Solid-State TeSys D Overload Relays for Type S Starters**Sizes 00–1, Non-Reversing (Classes 8536, 8538, 8539) and Reversing (Classes 8736, 8738 and 8739)****NOTE:**

- **Field installed only:** The LR9D Overload Relay cannot be factory installed—it must be purchased separately and field installed.
- **Single-phase motor applications:** When using the LR9D with a single-phase motor, you must purchase the three-pole starter to accommodate looping of the motor leads.

Current Setting	Overload Relay Catalog Number (sold separately)
Range Amperes	Trip Class 5/10/20/30 Dip Switch Selectable

Enclosures	For other full voltage controllers	1	Y47	X	X	X	X	X	X	X	X
	For reduced voltage controllers	1	Y47	X	X	X	X	X	X	X	X
	Brushed stainless steel watertight device										
	Class 8606	—	Y56	—	—	X	X	X	X	X	X
	Classes 8630 and 8640	—	Y56	—	Std.	Std.	Std.	Std.	X	X	X

[19] NEMA 7 and 9 enclosures are available only with Class 2510, 8502, and 8702 devices.

[20] This adder, used with a NEMA 4X enclosure, applies only to Classes 8538, 8539, 8738, 8739, and 8810 non-reversing.

[21] If the controller has a control transformer, price that transformer with additional capacity for the relay provided.

[22] Specify the control and line voltage.

[23] The motor hp and voltage must be specified when placing an order. Meters are panel-mounted in NEMA 12 enclosures.

[24] Available only on Spin Top™ and cast aluminum NEMA 7 and 9 enclosures.

9998SG380	380 V
9998SG480	480 V

NEMA Size 5, Type S, E-Coil Modification Kit for Series A Devices

Applies to Classes 8502, 8536, 8538, 8539, 8606, 8630, 8640, 8647, 8650, 8651, 8702, 8736, 8738, 8739, 8810, 8811, 8812, 8910 and 8903. Consists of:

- E-coil (31096320** from Table 16.331).
- Armature
- 15 A, 600 V fuse and holder (Class 9999SFR)
- Bottom magnet
- Instruction material

NOTE: No 600 V coil nor mechanically held lighting contactor.

[1] For 8910DPA1 to DPA9, see page 16-90.

[2] Use a 60 Hz coil of the next higher voltage.

[3] Use on Type S Series B devices only.

[4] Size 5 Series A devices should use these only as replacements for the exact part number. Another option is to use the coil modification kits in Table 16.332 for the Series B coil.

		480 V	9998PBV28

[5] To order an unlatch coil, add **L** to the Type number and **B** to the suffix. Example: For a 120 V 60 Hz unlatch coil, order 9998XL44B.

[6] Series C (double pole) and Series E (single pole).

[7] Use a 60 Hz coil of the next higher voltage.

[8] Not dual rated. 125 Vdc or 250 Vdc only.

Contactor and Starter Replacement Part Kits

Class 9998 replacement parts kits are available for servicing Square D relays, contactors, and starters as well as pressure, vacuum, and float switches. Each kit contains the necessary movable and stationary contacts, contact springs (when required)—NEMA Size 3 and above do not include contact springs, and springs are not available), and additional hardware required to service the devices listed below. When servicing devices having more poles than contained in the corresponding kit, it may be necessary to order an additional kit.

• Type Number	9998	SL6

[1] Single-pole kits.

[2] Includes reversing, two-speed, and similar devices. Select the coil based on the NEMA size of the basic starter or contactor.

Class 9998 Type SO1

Contact Units for Melting Alloy Overload Relays

One normally closed contact, Class 9998 Type SO1, is provided in each overload relay block on Type S starters Sizes 00-6. The Class 9998 Type SO1 contact unit listed in Table 16.344 is provided as standard in each Class 9065 melting alloy overload relay. Contact modules can be easily replaced and are identified in Table 16.344. Isolated overload relay alarm circuit contacts are available as an optional feature. A pilot light or alarm bell can be wired in series with this contact to indicate that the overload relay has tripped. For further information on isolated alarm contacts refer to Class 9999 Types SO4 and SO5, page 16-129.

Table 16.344: Class 9998 Type SO1 Contact Units for Melting Alloy Overload Relays

Magnetic Starter			Description [3]	Parts Kit Number
NEMA Size	Type	Series		
00-4 and 6	SA-SF SH	A & B	Standard N.C. contact unit	Class 9998 Type SO1[4]

Class 9998 Type UB Universal Baseplate

A universal baseplate may be used to retrofit a Square D Type S NEMA starter into an application which is currently using a competitive NEMA starter. The universal baseplate is a metal plate which attaches to the panel in the location of the starter to be replaced. The Type S starter then mounts to the baseplate. It is available for NEMA Sizes 00 through 4, and mounting screws are provided with each plate.

The universal baseplate adapter allows the Type S starter to replace the competitive starters in Table 16.345:

Table 16.345: Competitive Starter Replacement

Competitor Starter	NEMA Size	Base-plate	NEMA Size	Base-plate	NEMA Size	Base-plate	NEMA Size	Base-plate

Melting Alloy Overload Relay Jumper Strap Kits

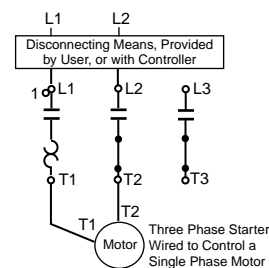

Jumper strap kits are for use on three-phase manual or magnetic starters with melting alloy overload relays only, where a three-phase starter is used to control a single-phase motor. These kits will include two jumper straps, a wiring diagram showing how to wire a three-phase starter to control a single-phase motor, and single-phase (one thermal unit) selection tables.

Table 16.346: Melting Alloy Overload Relay Jumper Strap Kits

To Order Specify:	Catalog Number	
• Class Number	Class	Type
• Type Number	9998	UB01

[3] Refer to page Table 16.351 for contact ratings.

[4] The Type SO1 is also the replacement contact unit for Class 9065 Type M melting alloy overload relays.

[5] CP1 discount schedule.

Cover-Mounted Control Unit Selection

Class 9999 push button, selector switch and pilot light cover-mounted control unit kits can be easily field installed in a NEMA 1, 3R, 4 or 12 Type S contactor or starter enclosure cover. Knockouts or removable closing plates are furnished with many enclosure covers for convenient field installation of control units. Kits are supplied with leads and clearly illustrated instructions. The Class 9999 cover mounted control unit kits are identical to the units which are factory installed.

Class 9999 Type SP2R Pilot Light Kit

Class 9999 Type SA2 Push Button Kit

Class 9999 Type SC2 Selector Switch Kit

Class 9999 Type SA3 Push Button Kit

[1] User-made openings are required in order to field install these modification kits on standard Class 8502 and 8536 Type S Sizes 0–2, and Class 8903 Sizes 30–60 A, NEMA 4 and 12 enclosures.

[2] Each pilot light kit contains one red and one green lens cap.

[3] The coil voltage must be the same as the pilot light rating. The kit contains one 60 Hz red pilot light control unit, Class 9001 Type KP1R31120V. For other voltages, refer to Class 9001 Type KP.

[4] Also requires an N.O. auxiliary contact for the holding circuit contact when used on Class 8903 electrically held lighting contactors.

[5] For control unit kits for Class 8903 mechanically held contactors, refer to Mechanically Held, page 16-81.

[6] To mount a control unit in a NEMA 1 enclosure, a Class 9999 Type BLX bracket is also required.

Internal Auxiliary

External Single-Circuit Auxiliary Contact

Auxiliary Contacts for Manual and Magnetic Contactors and Starters

Internal Contacts

Class 9999 Type SX11 internal contact kit is a replacement unit for the N.O. holding circuit contact supplied as standard on Type S Sizes 00–2 three phase starters and contactors. The Class 9999 Type SX12 is a replacement unit for the N.C. electrical contact which is furnished as standard on Type S, Sizes 00–2 mechanically interlocked devices (e.g., Class 8736 reversing starters). Internal contacts are also used on Class 2510 Types M & T manual starters. The internal contacts can be used for other applications as long as the electrical rating is not exceeded. See Table 16.351 for electrical ratings.

External Contacts

Class 9999 Type SX6 external auxiliary contact is supplied as standard for the N.O. holding circuit contact on Type S Sizes 3–7 starters and contactors. Additional auxiliary contacts can be added to Type S contactors, starters and lighting contactors. These contacts mount on either side of the basic contactor and are available with convertible or non-convertible contacts. The contacts of the convertible version can be changed from N.O. to N.C. or vice versa in the field. The non-convertible version has fixed contacts, either N.O. or N.C.

To determine the number of auxiliary contacts that can be added to each Type S contactor or starter, refer to the Class 8536 or Class 8736 section.

See Table 16.351 for electrical ratings.

Table 16.351: Maximum Ratings for Type S Auxiliary Contacts and Timers

Class 9999 Type SB6
Single Power Pole AdderClass 9999 Type SB9
Double Power Pole Adder**Motor Logic—Class 9999****Isolated Auxiliary Contacts for Motor Logic Overload Relays**

Overload relay auxiliary contacts are available factory installed or in kit form for field installation on Motor Logic overload relays. These contacts may be used for isolated alarm contact applications.

DIN Adapter

The DIN adapter provides a method to mount the Motor Logic overload relay to a 35 mm DIN rail.

Lug-Lug and Lug-Extender Kits

A Class 9999 LL0 Lug-Lug Kit can be field installed on separately mounted overload relays. The standard Size 00B, 00C, 0, and 1 Class 9065 Type SS and SF overload relays are supplied without lugs. A Class 9999 LB0 Lug-Extender Kit is designed for Size 00B, 00C, 0, and 1 Retrofit Starter Applications. This kit allows the lugs to be in the same location as the Class 9065 melting alloy overload relay, eliminating the need for additional wire length.

Remote Reset Module

The Remote Reset Module can be easily field installed on solid-state overload relays. This module will allow the overload relay to be reset from a remote location.

Table 16.359: Remote Reset Module

For Use With		Parts Kit Description	Class 9999 Type
Class and Type	NEMA Size [9]		
536 SA-SJ	00B through 7	Remote Reset Module	RR04 [10]

9065 SS, SR, SF, ST	3 and 4		

Power Pole Adders

One single- or double-circuit power pole kit can be field added to a basic two- or three-pole Type S contactor or starter Sizes 0, 1 and 2, or lighting contactors 30–60 A. See Table 16.360 for selection. The ratings for these power pole adders correspond to the NEMA contact ratings found on page 16-122. A two- or three-pole contactor or starter accepts only one single- or double-circuit unit. A power pole cannot be used on four- or five-pole devices, or on devices that are mechanically interlocked.

When adding a power pole to a Size 0 or 1 device, remove the return springs according to the instructions that come with the device.

When adding a power pole to a Size 2 or 60 A device, a coil change is required. Select a four- or five-pole coil from page 16-122, or specify Form Y118 as noted in the footnote below.

When adding Size 0–2 power pole kits to a Size 3–7 or 100–800 A device, an adapter bracket (9999 SBT1) is required. The Class 9999 Types SB6–SB15 power pole kits are suitable for copper wire only. Types SB21–SB25 come with lugs suitable for copper or aluminum wire.

Table 16.360: Power Pole Adders—Selection

For Use With		Power Pole Adder Kit	
Type	Size	Description	Class 9999 Type
SB, SC, and SM	0, 1, and 30 A	One N.O. power pole adder	SB6

SP	60 A		SB25 [12]
SE-SJ and SQ-SZ and SJ	3–7 and 100–800 A	Adapter bracket	SBT1

[9] Size 00B and 00C are not actual NEMA sizes. These designations are used to differentiate the lower FLA of these devices from the NEMA Size 00 Motor Logic solid-state overload relay.

[10] 120 Vac power required.

[11] For mounting the remote reset module on the top of the overload relay.

[12] To order a Size 2 or 60 A power pole kit complete with a new starter coil, specify Form Y118, the voltage, and the frequency (for example, Class 9999 Type SB11 Y118, 120 V, 60 Hz).

Class 9999 Type SF4
Fuse Kit

Control Circuit Fuse Holder

The control circuit fuse holder is designed to be used on Type S contactors and starters, Sizes 00–7, when either one or two control circuit fuses, 600 V maximum, are required. The Type SF3 and SF4 fuse holders will accept standard 600 V Bussmann Type KTK or equivalent fuses (13/32" x 1-1/2"); 6 A maximum. The SFR3 and SFR4 will accept Class CC 600 V Bussmann Type KTK-R or equivalent fuses only.

Table 16.361: Control Circuit Fuse Holder—Selection

Description (fuses not included)	Class 9999
	Type
Single Fuse Unit	SF3
Single Fuse Unit for Class CC Fuse	SFR3
Two Fuse Unit	SF4
Two Fuse Unit for Class CC Fuses	SFR4

Transient Suppression Module

The transient suppression module is designed to be used where the transient voltage, generated when opening the coil circuit, interferes with the proper operation of nearby integrated or solid-state control circuits. The module consists of an RC circuit and is designed to suppress the coil voltage transients to approximately 200% of peak coil supply voltage. The module is wired across the coil for Type S, Sizes 00–5 and is designed for coil voltages of 120 V only.

Type SO4

Isolated Alarm Contacts For Melting Alloy Overload Relays

Isolated overload relay alarm contacts are available factory-installed or in kit form for field installation in NEMA Size 00–6 Type S ^[13] starters, and Class 9065 Type SE melting alloy overload relays. NEMA Size 7 Type S devices use a solidstate overload relay which has isolated alarm contacts as a standard feature. The alarm contacts allow the starter to be used in applications that require isolated contacts, such as inputs to a computer.

Class 9999 Types SO4 and SO5 modules are interchangeable with the standard module (Class 9998 Type SO1) and can be installed on starters already in service. The case is made of clear plastic (polycarbonate) to allow for visual inspection of contacts.

Table 16.364: Contact Unit for Melting Alloy Overload Relays

Solid Neutral

The Class 9999 Type SN kit can be used on Class 8903 Type S lighting contactors and other controllers where field addition of a solid neutral is required. Each kit has lugs suitable for both copper and aluminum wire, and mounts with two screws.

Table 16.365: Solid Neutral Selection

Number of Lugs	Wire Capacity Per Lug (Cu/Al)	Class 9999
		Type
4	14–2/0	SN1
3	one 4–600 MCM or two 1/0–250 MCM	SN2
3 (Dual)	two 2–600 MCM	SN3
2 (Dual)	two 6–350 MCM	SN4

Tie Point Terminal Block

The tie point terminal block provides easy wiring of a Hand-Off-Auto selector switch or Start-Stop push buttons with separate control. The T7 terminal block requires no panel space. It simply snaps on Sizes 00–4 Type S contactors and starters by two tabs and is secured to the left hand coil terminal.

Table 16.367: Tie Point Terminal Block Selection

Magnetic Contactor or Starter		Class 9999 Type
NEMA Size	Type	
00–4	SA-SF	T7

Tie Point Terminal Block

To Order Specify:	Catalog Number	
• Class Number	Class	Type
• Type Number	9999	SO4

[13] Isolated alarm contacts **cannot** be added in the field to the Size 5 Type S starter. Current transers and a Size 1 overload block must be used. For factory installation specify **Form Y342**.

Type SM1

Type SM12

Mechanical Interlock

General: Type S contactors or starters can be mechanically interlocked so that only one device is energized at a time. The mechanical interlock is an interference (non-jamming) type, locking at the beginning of the stroke of any starter or contactor.

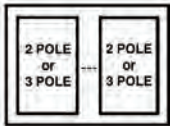

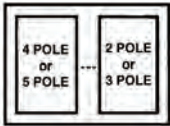

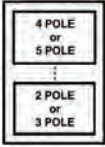

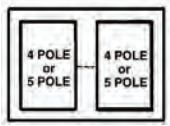

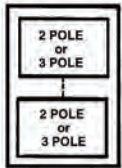

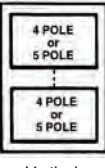

Type S Sizes 00, 0, 1, and 2—The mechanical interlock is mounted on the underside of the reversing baseplate. Two pins extend from the mechanical interlock through openings in the baseplate and engage the contact carrier of each contactor. Two styles of mechanical interlocks are used: one version for three pole contactors, a different version for four or five pole contactors. *When adding a power pole to the left side of an existing Size 0, 1, or 2 three-pole reversing contactor, a new mechanical interlock must also be installed. When added to the right side only, the power pole is not mechanically interlocked with the left-hand contactor.*

Type S Sizes 3 and 4—The mechanical interlock is separate from the mounting pan on Sizes 3 and 4. Cams on the mechanical interlocks are operated by the contact carrier of each contactor. The mechanical interlock is attached to the underside of the two contactor baseplates on Sizes 3 and 4.

NOTE: The mechanical interlock kits in Table 16.368 can be used to interlock 2–5 pole contactors. Mechanical interlocks for horizontal and vertical arrangement are listed in various pole arrangements.

Mechanical interlock Types SM1 through SM10 for Sizes 00–2 devices use overload relay mounting brackets to support the overload relay portion of the starter. See Table 16.369.

Fuse Block Replacement Parts Kits

Class 8538 (Series D and newer), Class 8738 (Series E and newer), and Class 8903 (Series C and newer) Type S non-fusible combination starters and lighting contactors (sizes 0–2, 30 to 60 A) can be converted to the fusible type by installing a Class 9422 Fuse Clip Kit. Both fusible and non-fusible combination devices have the same size enclosure in NEMAs 1, 4, and 12 construction, which permits this conversion. The 9422 Fuse Clip Kits contain line and load fuse clips, load base, and fuse pullers.

[15] When using with a 9422FTCN or FTCTF disconnect switch in Class 8538 or 8738 combination starters, remove and discard the metal base plate.

[16] No Class number required. Discount schedule DE1.

[17] Cannot be used in Series B or newer 8538 devices.

[18] Fuse clips are not provided in the Type SR4 and SR5 kits. On new installations, Class 9999 Type S fuse clips must also be purchased. Three non-removable pins are included and can be installed only in the latest production devices, which have a hole in the lower fuse clips.

[19] Class 8538 Type numbers ending in suffix S8.

General

All tables are based on the operation of the motor and controller in the same ambient temperature, 40 °C (104 °F) or less. Always be certain the correct thermal units are installed in the starter before operating the motor. Each thermal unit shall be installed such that its catalog number is visible. See [page 16-136](#) for information on installing thermal units. On melting alloy thermal units the ratchet wheel must engage the pawl assembly.

Selection Procedure

1. Determine motor data:
 - a. Full load current rating
 - b. Service factor

NOTE: If motor full load current (FLC) is not known, a tentative thermal unit selection could be made, based on horsepower and voltage. Refer to [page 16-136](#).
2. Motor and controller in *same ambient temperature*:
 - a. All starter classes, except Class 8198:
 1. For 1.15 to 1.25 service factor motors use 100% of motor FLC for thermal unit selection.
 2. For 1.0 service factor motors use 90% of motor FLC for thermal unit selection.
 - b. Class 8198 only:
 1. For 1.0 service factor motors use 100% of motor FLC for thermal unit selection.
 2. For 1.15 to 1.25 service factor motors use 110% of motor FLC for thermal unit selection.
3. Motor and controller in *different ambient temperatures*:
 - a. Multiply motor FLC by the multiplier in [Selection of Thermal Units for Special Applications](#), [page 16-132](#). Use the resultant full load current for thermal unit selection.
4. Locate the proper selection table from the index, [pages 16-133 and 16-134](#).
 - a. The proper thermal unit number will be found adjacent, to the right of the range of full load currents in which the motor FLC or resultant full load current falls.
5. See [page 16-135](#) for calculation of trip current rating.

Slow Trip Thermal Unit Selection

To select Type SB slow trip thermal units, the selection table for a standard Type B thermal unit may be used with the following modifications: For continuous rated motors having service factors of 1.15 to 1.25, select thermal units from the standard Type B table using 93% (102% for Class 8198) of the full load current shown on the motor nameplate and then substitute an SB for the B in the thermal unit type number.

Example: A motor with a full load current of 12 A controlled by an 8536SCG3 would require B22 thermal units for standard trip applications and SB19.5 thermal units for slow trip applications. The SB is selected by multiplying 12 A times 93% for 11.16 A and using this value to select B19.5. Then add the S prefix to arrive at SB19.5.

For continuous rated motors having a service factor of 1.0, select thermal units in the same manner using 84% (93% for Class 8198) of full load current shown on the motor nameplate.

NOTE: SB thermal units are used on Size 0, 1, 2, and only some Size 3 applications. Check thermal unit tables for current ranges.

NOTE: For thermal unit selection tables for other devices including obsolete devices, consult the Customer Care Center at 1-888-778-2733.

[9] Series letters listed refer to the marking on the nameplate of the basic openstyle starter. When the starter comes in a controller containing other devices, the controller may have a different series letter marked on the enclosure nameplate.

[10] This device will accept Type SB slow trip (Class 30) thermal units. For selection, see page 16-132.

[11] Type A thermal units for full-load currents lower than those listed in this table are available. For complete information, consult Customer Care Center at 1-888-778-2733.

[12] Large enclosure tables apply for **Class 8904** combination and reversing starters. For non-combination and non-reversing **Class 8904** starters refer to small enclosure selections, page 16-133.

[13] For **Class 8630** starters, divide the delta-connected motor full-load current by 1.73, and use this quotient to select thermal units.

[14] For **Class 8640** and **Class 8940** starters (MD, PD, ME, PE, MF, PF, MG and PG), use the full-load current of each motor winding as a basis for thermal unit selection—normally one-half the total motor current.

[15] **Form Y81** must be specified to use quick trip (Class 10) or slow trip (Class 30) thermal units on Size 3 starters.

[16] Divide the motor FLC by 60, and use this quotient to select the appropriate thermal units.

[17] Refers to the Type number of the starter in the MCC, not the Type number of the MCC.

Calculation of the Trip Current Rating

Trip Current Rating—The trip current rating is a nominal value that approximates the minimum current to trip an overload relay in an ambient temperature, outside of the enclosure, of 40 °C (104 °F). In all selection tables except Class 8198, the trip current rating is 1.25 times the minimum full load current shown for the thermal unit selected. For Class 8198, the trip current rating is 1.15 times the minimum full load current. This applies to bimetallic overload relays with the trip adjustment set at 100 percent.

Calculation Procedure

1. Use the selection table for the specific controller involved.
2. Find the minimum motor full load current listed for the thermal unit in question.
3. Multiply that current by 1.25 (1.15 for Class 8198). The result is the trip current rating.

Example 1: Determine the thermal unit selection and trip current rating for thermal units in a Class 8536 Type SCG3 Size 1 magnetic starter used to control a three-phase, 1.15 service factor motor with a full load current of 17.0 Amperes, where the motor and controller are both located in a 40°C (104°F) ambient temperature.

1. From Table 13 the proper selection is B32.
2. The minimum motor full load current is 16.0 Amperes.
3. Trip current rating is $16.0 \times 1.25 = 20.0$ Amperes.

Protection Level is the relationship between trip current rating and full load current. Protection level, in percent, is the trip current rating divided by the motor full load current times 100. In Example 1 the protection level for the B32 thermal unit is: $20.0/17.0 \times 100 = 118\%$.

National Electrical Code, Section 430-32, allows a maximum protection level of 125% for the motor in the above example.

Minimum Trip Current (also called ultimate current) may vary from the trip current rating value, since ratings are established under standardized test conditions. Factors which influence variations include: the number of thermal units installed, enclosure size, proximity to heat producing devices, size of conductors installed, ambient (room) temperature, and others.

Except for ambient temperature-compensated overload relays, an ambient temperature higher than 40°C would lower the trip current, and a lower temperature would increase it. This variation is not a factor in selecting thermal units for the average application, since most motor ratings are based on an ambient temperature of 40 °C, and motor capacity varies with temperature in about the same proportion as the change in trip current. Temperature-compensated relays maintain a nearly constant trip current over a wide range of ambient temperature, and are intended for use where the relay, because of its location, cannot sense changes in the motor ambient temperature.

Calculation of the Trip Current for Ambient Temperatures Other Than 40 °C

For a controller ambient temperature other than 40 °C (104 °F) trip current can be calculated by applying a correction factor from the curve in Figure 1. The approximate trip current for a particular ambient temperature is the product of (1) the multiplier M corresponding to the temperature and (2) the 40 °C trip current rating.

NOTE: Ambient temperature is the temperature surrounding the starter enclosure. Normal temperature rise inside the enclosure has been taken into account in preparing the thermal unit selection tables.

Example 2: Determine the trip current for the motor and controller in Example 1, except the controller is in a 30 °C (86 °F) ambient temperature. From the curve in Figure 1 the multiplier M is 1.1 at 30 °C. The approximate trip current is $16.0 \times 1.25 \times 1.1 = 22$ A.

Approximate Thermal Unit Selection Based On Horsepower and Voltage

General—Thermal units selected using approximate full-load currents from Table 16.379 will provide a trip current between 101% and 125% of full-load current for many 4-pole, single speed, normal torque, 60 Hz motors. Since full-load current rating of different makes and types of motors vary so widely, these selections may not be suitable.

Thermal units should be selected on the basis of motor nameplate full-load current and service factor. Thermal unit sizes originally selected on an approximate basis should always be rechecked and corrected at the time of installation if required.

How to use Table 16.379:

- Locate the motor horsepower and voltage.
- Determine the approximate full-load current from Table 16.379.
- Use the approximate full-load current in place of actual nameplate full-load current and follow the Selection Procedure on page 16-132.

Table 16.379: Use This Table Only When the Motor Full-Load Current Is Not Known

Motor Horsepower	Motor Full-Load Current					
	Three Ø				Single Ø	
	200 V	230 V	460 V	575 V	115 V	230 V
1/6	—	—	—	—	4.4	2.2
1/4	—	—	—	—	5.8	2.9
1/3	—	—	—	—	7.2	3.6
1/2	2.5	2.2	1.1	0.9	9.8	4.9
3/4	3.7	3.2	1.6	1.3	13.8	6.9
1	4.8	4.2	2.1	1.7	16	8
1-1/2	6.9	6.0	3.0	2.4	20	10
2	7.8	6.8	3.4	2.7	24	12
3	11.0	9.6	4.8	3.9	34	17
5	17.5	15.2	7.6	6.1	56	28
7-1/2	25.3	22	11	9	80	40
10	32.2	28	14	11	—	50
15	48.3	42	21	17	—	—
20	62.1	54	27	22	—	—
25	78.2	68	34	27	—	—
30	92	80	40	32	—	—
40	120	104	52	41	—	—
50	150	130	65	52	—	—
60	177	154	77	62	—	—
75	221	192	96	77	—	—
100	285	248	124	99	—	—
125	359	312	156	125	—	—
150	414	360	180	144	—	—
200	552	480	240	192	—	—

NOTE: These currents should not be used for selection of fuses, circuit breakers or wire sizes. See NEC tables 430-248 through 430-250. For motors rated 208-220 volts, use 230 V column. For motors rated 440 to 550 volts, use 460 and 575 V columns, respectively.

Mounting of the Thermal Units

Always be certain the correct thermal units are installed in the starter before operating the motor. Thermal units should always be mounted so that their type designation can be read from the front of the starter (see Figure 1). Melting alloy thermal units should be mounted so that the tooth of the pawl assembly can engage the teeth of the ratchet wheel when the reset button is pushed.

Mounting surfaces of starter and thermal units should be clean and care should be taken to insure that thermal unit mounting screws are fastened securely.

Overview

Designed and manufactured to tackle the toughest power and process control challenges, the Model 6 Motor Control Center features industry-finest innovations that provide unmatched performance, high reliability, and low maintenance. The Model 6 Motor Control Center has integrated industry-leading components into the smallest and most flexible footprint possible to meet your power, control, and automation needs. The Model 6 offers superior quality, increased uptime, and features that improve the protection of your personnel and facility from electrical safety hazards.

Model 6 Motor Control Center

20-in. (508 mm)-wide Section with Standard Vertical Wireway

Model 6 Structure Features

- Horizontal main bus uses captive splice bar assembly; allows splicing without removing units
- Horizontal bus is located at the top of the structure for easy installation, inspection and maintenance
- Available ampacity 600 A, 800 A, 1200 A, 2000 A, 2500 A, and 3200 A
- Sliding non-conductive horizontal bus barrier
- 300 A, 600 A, and 1200 A vertical bus
- Vertical bus openings on 3-inch centers
- Optional automatic vertical bus shutters are available
- Base mounting channel includes lever notches for ease of alignment
- Full depth vertical wireway available, either 4-inch or 9-inch width
- Vertical ground bus is standard

Model 6 Arc Resistant

The Model 6 Arc Resistant Enclosure provides reliable arc flash containment through passive technology and design and has been witnessed and verified by UL for design and performance to the ANSI/IEEE C37.20.7 standard. Most of the standard offer configurations and units are available, making the Model 6 Arc Resistant MCC the industry's most complete offer.

Certification and Validation:

- Tested and certified performance to the industry's Arc Resistant Standard (ANSI/IEEE C37.20.7)
- Internal arc testing validated and witnessed by UL
- Industry's highest MCC arc duration rating of 100 milliseconds (6 Cycles)

Technical Specifications and Highlights:

- Up to 65 kA at 600 VAC Rated
- Accessibility Type 2A
- Main bus up to 2000 A amps
- Optional insulated bus (Epoxy or Heat Shrink)
- Optional automatic bus shutters
- Optional exhaust plenums
- Reinforced enclosure: 12 gage steel doors and covers, additional fasteners and hinges
- Reinforced frame with additional internal supports
- Pathways inside the enclosure manage arc by-products and pressure
- iMCC remote monitoring and controlling
- MasterPact type LF (designed to limit arc energy) circuit breakers are available in upstream gear

Model 6 ArcBlok

The Square D™ brand Model 6 Low Voltage Motor Control Center (MCC) with ArcBlok™ by Schneider Electric™ is a game changer in electrical equipment protection and safety-related work practices. With ArcBlok arc isolation, the line side conductors are fully enclosed inside a cable vault, which has been tested for the ANSI/IEEE C37.20.7 requirements for arc containment. Not just a barrier, ArcBlok reduces the chance that an arc flash could occur and reduces and contains the arc energy if it does. Sensors inside the compartment continuously take thermal readings and communicate those to a mobile device, while maintenance personnel stand outside the arc flash zone to review.

Build features include:

- Steel barriers
- Lifting handles
- Bolts face outward for easy alignment
- Interior barriers separate phases
- Thermal sensors communicate data
- Absence of voltage tester
- Vents direct arc flash energy to minimize impact

Technical Details

- ArcBlok MCC: 100 kA at 208, 240 and 480 Vac; 50 kA at 600 Vac, up to 1200 A
- Line side testing was UL® witnessed in accordance with ANSI/IEEE C37.20.7-2017
- Model 6 MCCs are Listed to UL845 Standard and Certified to Canadian Standard C22.2 No. 254 and Mexican Standard NOM-003-SCFI-2014 (NMX-J-515-ANCE)
- PowerPact™ P Molded Case Circuit Breakers with ArcBlok Technology are Listed to the UL489 Standard and Certified to Canadian Standard C22.2 No. 5

Model 6

Model 6 Unit Features

- Metal operator handle, color coded for clear indication of disconnect position (including "Tripped")
- Twin-handle cam mechanism standard on all plug-on units (except CompacTM 6)
- Rugged unit construction features solid rear sides and hinged bottom plates
- Forward tilted pull-apart control terminal blocks standard with NEMA Type B or C wiring
- Starter units available with Class 8536 Type S NEMA or D-Line IEC
- Available overload relays on starter include: melting alloy, Motor LogicTM, and TeSysTM T
- Control station plate for pilot devices is mounted on front of unit
- Easily accessible control transformer
- Starter mounted on right-hand side of unit, adjacent to wireway, for ease of cable termination

Intelligent Motor Control Center—Model 6 iMCC

Maximize customer value with the industry's most comprehensive energy and asset management capabilities.

Standard Architectures

SIMPLE, standardized network designs create consistency and familiarity, reduce changes, accelerate startup and commissioning, and ultimately drive efficiency in existing operations and future expansions.

Reduced Lead Times

FASTER quotations, drawings, pricing, submittals, and manufacturing allow for shorter cycle times and increased flexibility to make changes later in the project as designs mature and requirements change.

Ethernet Communications

OPEN protocols in ModbusTM TCP and EtherNet/IP eliminate expensive proprietary software, hardware, and services. Both protocols provide the speed, reliability, and network services to easily and efficiently manage the entire network. Ethernet-based networks easily integrate with business systems for management across the enterprise.

Integrated Wonderware Solution

COMPLETE Wonderware solution allows the end user to perform comprehensive asset and energy management through simple, organized, and role-based screens. Power and process data can be viewed in real time or in trended report, which increases user awareness and delivers actionable data. Local or remote configuration, monitoring, and control provides optimal flexibility. Maximizing uptime, slashing troubleshooting, and delivering true predictive maintenance strategies become a reality with all the right information at the right time. Seamless integration into enterprise-level Invensys-based SCADA/DCS systems will save countless hours of unnecessary programming, engineering, and troubleshooting during both startup and operation.

Merchandised Units (shipment in as low as 3 days)

Model 6 Industrial Package units (white) are available for ordering by catalog number. A listing of types available by quick shipment may be found on the following pages. This limited offering includes popular combinations of types and options. Catalog numbers consist of class number (8998), disconnect and device types, horsepower or ampacity ratings and options (for example, 8998SBA001XFTMA). See table below. All units are UL Listed.

Combination Starter Units Catalog Numbering System

Units rated as follows:

- Model 6 Industrial Package, 480 V, 60 Hz, NEMA 12 enclosure
- Type 1B wiring, 100,000 AIR rating, 1 N.O./1 N.C. auxiliary interlock on each contactor

NOTE: For more information, contact your nearest Schneider Electric sales office.

[1] Complete Model 6 Motor Control Centers are available from the factory.

[2] Not available with FVR

[3] Not available with Compac 6

[4] Includes forward, reverse and stop push-buttons; and forward and reverse pilot lights with FVR starters

[5] Includes extra 50 VA CPT on Sz 1 FVNR (T1)

Combination Starters Units with Motor Circuit Protector Disconnects

Model 6 NEMA-rated FVNR combination starter units use PowerPact™ Motor Circuit Protectors.

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for five 22 mm devices.

Thermal units are not included with melting alloy overloads.

Combination Starter Units with Fusible Switch Disconnects

Model 6 NEMA-rated FVNR combination starter units listed below use fusible switches with Class R fuse clips (fuses not included).

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for five 22 mm devices.

Thermal units are not included with melting alloy overloads.

CompacTM 6 Combination Starter Units with Motor Circuit Protector Disconnects

NEMA-rated Compac 6, half-height FVNR combination starters use TeSys BV4 Motor Circuit Protectors.

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type.

Units without pilot devices include a station plate with knockouts for four 22 mm devices. Thermal units are not included with melting alloy overloads.

TeSys Control Solutions

TeSys offers solutions for a variety of common control applications, including small to large loads, motor and non-motor loads, in various forms to meet customers specific needs. Basic solutions offer traditional approaches that meet compact, cost-effective, and large HP applications. TeSys also equips OEMs and System Integrators with EcoStruxure Machine connected product solutions that are IoT ready offers to help enhance the intelligence of machinery and equipment, helping to recognize and address potential issues before stoppage and decrease unplanned downtime.

Table 18.1: Solutions that enhance machine intelligence

	Solution 1 — TeSys™ island as group motor	Solution 2 — TeSys island with individual protection	Solution 3 — TeSys Ultra (Type E self-protected) using Multi-function trip unit & communication module or using pre-trip alarm function module	Solution 4 — TeSys T overload relay	Solution 5 — TeSys GV4PB, GV5PB, GV6PB with SDx Module
					
Best Practice Scenario	Ideal for panels with multiple loads . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for panels with multiple loads . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for panels with one or two motors . Each starter communicates directly to PLC.	Ideal for larger HP . Each overload relay communicates directly to PLC.	Ideal for adding intelligence using a simple NO/NC pre-trip alarm contact — Use of PLC to receive/interpret data not required.
Benefits	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	Pre-trip alarm NO/NC contact alerts prior to trip, enabling proactive actions to minimize downtime or alert operators
Circuit Protection	Circuit breaker or fuse protection group	Circuit breaker or fuse	TeSys Ultra (applied as Type E self-protected), using advanced trip unit/function modules	Breaker or fuse	GV4PB, GV5PB, GV6PB
Motor Control	TeSys island load management system with or without TeSys Deca Manual Motor Controllers	TeSys island load management system		TeSys Deca or Giga contactors	TeSys Deca or Giga contactor
Motor Overload Protection				TeSys T overload relay	(included in GV*PB)
Load Types	Motor, resistive/non-inductive, isolation	Motor, resistive/non-inductive, isolation	Motor loads only	Motor loads only	Motor loads only
Max HP 480V	40 HP	40 HP	20 HP	500 HP (up to 810 amps)	450 HP (up to 520 amps)
SCCR	basic 5 kA up to high 50 kA (with GV)	high, to 100 kA	High, to 65 kA	Depends on configuration	Depends on configuration
Available data	Device status/performance Load performance including alarms Voltage, Energy & Power	Device status/performance Load performance including alarms Voltage, Energy & Power	Load performance including alarms	Load performance including alarms Voltage & Power	Pre-trip alarm (via NO/NC contact)
Communication	Ethernet IP, Modbus TCP, Profinet, Profibus	Ethernet IP, Modbus TCP, Profinet, Profibus	Modbus™, CANopen, DeviceNet™, Profibus™	Modbus™, CANopen, DeviceNet™, Profibus™, Ethernet/IP, and Modbus/TCP	None

Table 18.2: Basic — Traditional motor control solution

	Solution 1 — Two component solution		Solution 2 — Single component solution	Solution 3 — Group Motor solution	Solution 5 — Three component solution (Breaker/fuse, contactor & overload relay)	Solution 6 — Type D solution (Motor circuit protector, contactor & overload relay)	Solution 7 — Non-motor load solution (Breaker/fuse + contactor)	
	Type F — up to 65 amps	Motor Protective Circuit Breakers + contactor - up to 520 amps	Type E — up to 32 amps	up to 65 amps				
								
Best Practice Scenario	Most cost effective, high SCCR solution		Most compact, also ideal for critical uptime applications resettable after a short-circuit with no component replacement), high SCCR solution	Few components, 480V delta rated	three-component solution, ideal for higher HPs or high SCCR	ideal for pumping applications, includes adjustable motor inrush sensitivity	ideal for non-motor loads	
Benefits	Simple, two-component solution, cost effective, fast power wiring using bus bars	Simple, two-component solution, cost effective for larger HP motors	Single component solution, Type 2 rated (minimize downtime after short-circuit)	cost effective solution ideal for panels with many motor loads (single breaker for multiple starters)	basic solution, ideal for 480V delta applications, resettable after breaker trip	adjustable motor inrush sensitivity, ideal for pumping applications	ideal for non-motor loads	
Circuit Protection	TeSys™ Deca GV2P, GV3P (applied as Type F with contactor)	TeSys™ Giga GV4PB, GV5PB, GV6PB (UL 489)	TeSys Ultra, with basic trip unit	PowerPact or Multi9 (UL 489) or fuses	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	TeSys BV4 (UL 489)	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	
Motor Control	Tesys Deca LC1D	TeSys Deca LC1D or Giga LC1G		TeSys Deca LC1D	TeSys Deca LC1D or TeSys Giga LC1G	TeSys Deca LC1D	TeSys Deca LC1D or TeSys Giga LC1G	
Motor Overload Protection	(included in GV)	(included in GV)		TeSys Deca GV	TeSys Deca LR or TeSys Giga LR9G	TeSys Deca LR	—	
Load Types	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Resistive/non-inductive, isolation	

Two-Component Motor Circuit Solutions to 520 Amps

Simplify design, panel space and installation with TeSys™ high SCCR solution that use only two components that make up an entire branch circuit up to 520 amps. These two-component solutions are UL compliant using either a Type F combination motor controller rating or a UL 489 rating. For additional solutions and ratings, see Motor Control Solutions for North America data bulletin [8536DB0901](#).

[1] Add coil suffix to complete reference part number (See [TeSys Deca Coil Voltage Codes](#) for LC1D and TeSys Giga Contactors — 3-Pole Standard Version and TeSys Giga Contactors — 3-Pole Advanced Version for LC1F). For example, an LC1D09G7 includes a 120 Vac coil.

[2] Motor Full Load Amp Sizes are based on NEC Table 430.250.

[3] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 100 kA at 480Y with or without use of GV2G busbar links.

[4] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 42 kA at 480Y when using GV2G busbar links.

[5] Requires use of GV3G66 line spacer and GVAM11 short-circuit signaling contact for Type F rating.

[6] UL pending.

Island Concept

TeSys island is an innovative digital load management solution—providing data for higher machine efficiency and ease of servicing, and allowing faster time to market.

TeSys island is a modular, multifunctional system providing integrated functions inside an automation architecture, primarily for the direct control and management of low-voltage loads. TeSys island can switch, help protect, and manage motors and other electrical loads up to 40 hp, 80 A installed in an electrical control Panel.

This system is designed around the concept of TeSys™ avatars.

These avatars:

- are the functional object representing a logical function of the physical module with pre-defined logic
- determine the configuration of the island.

The logical aspects of the island are managed with software tools, covering all phases of product and application lifecycle: design, engineering, commissioning, operation, and maintenance.

1	Bus Coupler	5	Power interface module
2	Analog I/O module	6	Standard Starter
3	Digital I/O module	7	SIL Starter
4	Voltage interface module	9	SIL interface module

The physical island consists of a set of devices installed on a single DIN rail controlling loads, monitoring data, diagnostics information and connected together with a ribbon cable providing the internal communication between modules.

The external communication with the automation environment is made via a single coupler module, and the island is seen as a single node on the network. The other modules include starters, power interface modules, analog and digital I/O modules, voltage interface modules, and SIL interface modules, covering a wide range of operational functions.

Product References

The TeSys island load management system consists of a bus coupler along with other starters and modules as needed to build an “island” of load management, monitoring & control functions. It is recommended to use the online EcoStruxure Motor Control Configurator to ensure proper application and sizing.

TeSys™ Deca Non-Reversing Contactors

TeSys Deca Contactor

The TeSys™ Deca Control Series of contactors (formerly known as TeSys D) provides high reliability and performance in a modern, modular approach. TeSys Deca contactors are UL approved to 100 hp 480 V and 160 amperes continuous current. In addition, they provide a modern appearance with new features such as multi-standard screw terminals that accommodate flat, Phillips and Pozidriv screwdrivers, as well as the new UL60335 approved plastics with greater endurance in the presence of heat or fire.

TeSys™ Deca Reversing Contactors

Each 3-pole device is pre-wired with line and load side power wiring for reversing applications. Each 4-pole device is prewired with load side power wiring.

[14] Includes mechanical interlock without electrical contacts. Installer to complete wiring for electronically interlocking contactor operating coils by using a N.C. auxiliary contact integrated in the contactor or optional LADN or LAD8N auxiliary contact block.

[15] Complete the catalog number by adding the coil voltage code from [TeSys Deca Coil Voltage Codes](#) (for example, LC2D09KUE).

[16] For additional terminal options and coil voltage/consumption options, see Catalog [MKTED210011EN](#). Check with local sales office for availability.

[17] Includes mechanical interlock (LA9D11502) with prewired electrical contacts for interlocking contactor operating coils.

TeSys™ Giga Non-Reversing Contactors

TeSys™ Giga Series is the newest motor control range for large motor and large load applications. This new offering brings greater performance, panel design optimization, and enhanced ease of installation.

TeSys Giga contactors are available in 115 to 800 amperes in both 3-pole and 4-pole configurations. Designers can choose between the standard version and an advanced version. The advanced version provides additional features such as additional coil voltages, lower coil consumption, PLC input control, and a cable memory feature that permits maintenance without removing cables or busbar connections. For lug options, see [Table 18.59 Lugs and Mounting for TeSys™ Giga Contactors and Overload Relays](#), page 18-24.

TeSys™ Giga Overload Relays

TeSys™ Giga electronic overload relays provide wide protection flexibility in a limited number of references that cover up to 630 amperes. Alarm and status LEDs inform users in real time. Ground fault, phase imbalance, trip class (5E, 10E, 20E, 30E), and reset type can easily be configured on the device. Units can be directly mounted to the TeSys Giga contactors or can be individually wired.

Coil Part Number (Order Separately) DC			
24 V	—	—	—

[21] Complete the catalog number by adding the coil voltage code from [TeSys F Coil Voltage Codes](#)

[21] For additional pole options and coil voltage options, see Catalog . Check with local sales office for availability.

(for example, LC1F265G7), or order the contactor (without a coil) and the coil separately. All coils except F780 include 1 N.O. holding circuit interlock contact. The F780 uses two coils that must be wired in series.

[22] For additional pole options and coil voltage options, see Catalog [MKTED210011EN](#). Check with local sales office for availability.

[23] LC1F780 contactors operate with 2 coils as a set. The LX1FX* part number includes both coils.

[24] Order 2 coils and connect them in series.

TeSys Deca contactors: [TeSys™ Deca Non-Reversing Contactors](#), page 18-11 and [TeSys™ Deca Reversing Contactors](#), page 18-14.
TeSys Deca overload relay accessories: [page 18-28](#)
TeSys Deca replacement coils: [page 18-43](#)
TeSys Deca dimensions: [page 18-46](#) to [page 18-57](#)

- [6] For low consumption coils (LC1D09–D38 only), only one front-mounted two-contact block allowed. No side-mounted contact blocks allowed.
- [7] For spring terminal versions of these blocks, add a **3** to the end of the catalog number (for example, LADN223). For slip-on versions, add **9** to the end of the catalog number (for example, LADN229).
- [8] Including 1 N.O. + 1 N.C. make-before break overlapping contacts.
- [9] This block cannot be added to the LC1D 09–D38 contactors; a maximum of 2 blocks can be mounted on the LC1D40A-LC1/LP1D80 contactors only.
- [10] 1 block may be added to the left side of LC1D09–D38, AC coils only; only 1 block may be added to either side of the LC1D40A-D80 contactors, AC coils only. Cannot be installed on TeSys Deca contactors with DC coils.
- [11] Device supplied with 4 ground terminal points.
- [12] For spring terminal versions of these blocks, add a **3** to the end of the catalog number (for example, LADT23).
- [13] Scale range is expanded between 0.1 and 0.6 seconds on the dial for more accurate settings at the lower end of the range.
- [14] Switching time between the opening of the N.C. contact and the closing of the N.O. contact: 40 ms ± 15 ms.
- [15] To complete the catalog number, add the coil voltage code from [Table 18.44](#). For additional voltage options, see Catalog [MKTED210011EN](#). Check with local sales office for availability.
- [16] Does not include internal coil clearing contact.
- [17] Low consumption DC contactors (and relays) (code coil •L) are not compatible with the LAD6K10• mechanical latching blocks.

Auxiliary Contact Modules

Auxiliary contacts give an indication of the contactor status. They can be used for remote visual signaling, alarming, electrical locking, relay activation, and others.

Each contactor is equipped with 1 NO (normally open) and 1 NC (normally closed) auxiliary contact block as standard.

Mechanically linked mirror contacts

The NC (normally closed) contact of the auxiliary contact block is a mirror contact in conformity to IEC 60947–5–1. It is mechanically linked to reliably represent the state of the main power contacts and wherever auxiliary contact state reliability is essential.

The NC contact of the auxiliary contact cannot be closed at the same time as a normally open power contact.

Contact module compatibility

TeSys™ Giga auxiliary contact module is compatible with a range of TeSys Giga contactors. Each TeSys Giga contactor can be equipped with up to four auxiliary contact modules.

^[28] See [MKTED210011EN](#) for additional accessories.

Retrofit Bases

- Suitable for 3–pole contactors
- Retrofit bases to replace similar ratings of TeSys™ F contactors with TeSys™ Giga contactors
- Enables quick and simple replacement in the existing installation
- Two references to cover ranges from LC1F115 to F500

TeSys™ Giga retrofit bases are designed for integrating new TeSys™ Giga contactors into installations using TeSys F™ contactors. The retrofit bases help reduce replacement and reinstallation time when you upgrade your system with the new range of contactors. The retrofit bases come in two frame sizes.

Module	Description	For use with:	Operation Requirements	Catalog Number
Fault differentiation: with manual reset (thermal overload) with auto reset	Provides indication between an overload trip and a short circuit trip.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFDA10
Thermal overload pre-alarm	Signals when the motor current reaches 1.05 of the full load setting on the control unit.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFW10
Motor load indication	Provides a signal proportional to the average currents in the three phases divided by the full load current setting of the control unit. The output corresponds to a load status of 0–2 times the full load setting of the control unit.	Advanced or multi-function control units	4–20 mA (requires separate 24 Vdc power supply)	LUFV2
Parallel wiring	Provides a convenient way to reduce control wiring and allow for connecting starters to a communications network by providing 24 Vdc for the starters.	Advanced or multi-function control units (24 Vdc only) and LU9BN11C or LU9MRC prewired connector	LU9G02 splitter box and PLC network	LUFC00

Alarm Differentiation

Parallel Wiring

Motor Load Indicator

[7] Voltage code required.

[8] The control unit contains solid-state overload relay and control power source for TeSys Ultra. For more details on the different control units, their functions, and placement on the power base see [Control Units and Functions](#).[9] Control units for 4.5–18 and 8–32 can be used **only** with 32 A rated power bases (LUB32, LUB320, and LU2B32).

[10] Complete the catalog number by adding the appropriate code from (for example LUCAX6FU).

[11] DC voltage with range of 0.90 to 1.10 of nominal.

[12] Voltage code to use for a power base with a communication module.

[13] See [page 18-31](#) for placement on the power base.

[14] Increases the breaking capacity of the motor starter.

[15] Offers customization for specific application requirements.

Accessories

Table 18.85: Communication Modules [16][17]

Communication modules allow the TeSys Ultra starter to be connected directly to the network. They are for use with advanced or multi-function control units (24 Vdc only) and require a separate 24 Vdc power supply.

Module	Prewired Connector	Catalog Number
Modbus™ Communication	LU9BN11C or LU9MRC	LULC033

GV2P

GV4PB

TeSys™ Power Motor Circuit Breakers

The TeSys™ Power Motor Circuit Breakers family of products provide efficient motor control and protection solutions up to 520 amps. There are a variety of UL approved applications that enable specified configurations for use as a manual starter, motor disconnect, independent branch short-circuit protection, motor overload protection, or for use with a motor controller such as a contactor to build a complete motor control circuit. Certain configurations are approved for group motor applications as well. Refer to the following selection tables for application information, as well as the Motor Control Solutions for the North American Market data bulletin (8536DB0901) for additional information.

The GV2P (up to 32 amps) and GV3P (up to 65 amps) is rated to UL 60947-4-1 as a motor starter, and also possess Type E ratings for manual switching applications. These devices can be combined with a specified TeSys Deca contactor as a Type F combination motor controller (with specified line side spacer/accessories), with SCCR up to 100kA.

The GV2ME (up to 32 amps) combined with a specified TeSys Deca contactor is ideal for group motor applications.

The TeSys island load management starters are approved for use with TeSys GV2P and GV3P devices as a group motor arrangement. See selection table for application specifics.

The GV4PB, GV5PB, and GV6PB are motor protective circuit breakers rated to UL 489, are approved as branch circuit protection (no line side spacer required) and include motor overload protection. A full motor branch circuit is completed with the addition of a contactor, providing a compact two-component solution up to 520 motor full load amps. Pre-trip alarm accessories can be applied to these units to help anticipate and resolve issues, minimizing operator or maintenance interaction.

GV2P + LC1D Pre-Assembled Kits

Simplify your life! These new **pre-assembled kits** come with a GV2P manual motor protector already connected to an LC1D contactor. Panel builders and end users can now save wiring time by purchasing the pre-assembled kits.

Refer to Catalog [MKTED210011EN](#) and [8536CT1901](#)**TeSys™ BV4 Motor Circuit Protection Selection**

Providing UL508 type D combination ratings in accordance with current NEC installation requirements, the TeSys BV4 motor circuit protector allows for compact motor protection in conjunction with both the TeSys and Square D™ NEMA product families for motor control. The BV4 is a magnetic only, UL489 Listed circuit protector rated up to 100kA short-circuit protect with adjustable instantaneous trip points and can be installed directly to a panel or standard DIN rail.

Motor Circuit Protectors must be applied per a listed combination motor controller rating as required by NEC and UL 508A. See [UL.com/SCCR](#) for combination ratings or contact local support for a tested combination appendix.

Enclosed TeSys™ Deca Starters

TeSys Deca enclosed full-voltage starters are available in Type 1 and Type 12/3R enclosures. The enclosed TeSys Deca offer accepts standard TeSys Deca accessories and all Insta-Kits control units and control power transformer kits. For additional sizes, combinations and accessory options, see Catalog [8100CT1901](#). Check with local sales office for availability.

LS1D30

TeSys™ LS1 Fuse Holders

- 45 mm wide (same dimensions as GV2ME)
- Mounts directly to LC1D09–D38 contactors (with use of GV2AF3 or GV2AF4)
- Meets application needs for fusible starter
- Uses GV2AE instantaneous contact blocks to open control circuits
- DIN rail mounted

Replaceable Switching Modules

- Innovative contact switching modules for TeSys™ Giga Contactors
- Replace worn-out poles with a new switching module in minutes, without having to disassemble the entire product.
- No special tools are needed for the replacement

NOTE: During replacement, replace all switching modules. After replacement, change the position of the RESET button on the control module from A to B or B to A.

LA9G3QA

[5] Supplied per pole are: 2 fixed contacts, 1 moving contact, 2 deflectors, 1 backplate, mounting screws and washers.

[6] Two identical components per pole are supplied.

[7] Available 2Q 2022.

TeSys™ AK5 Panel Busbar System

The AK5 pre-fabricated bus bar system provides a quick and easy method of mounting control devices. All components are finger safe, UL Listed, CSA approved and CE marked. Although the AK5 system can be screw mounted onto any type of support, it **must be mounted** on the AM1DL201 DIN rail when component mounting plates incorporating a tap-off are used. When using tap-offs, the nominal operating current of the bus bar (160 A @ 35°) must not be exceeded. Approvals include IEC 439, UL, CSA, DNV and LROS.

[1] Quick connects (2.8 x 0.5 mm).

[2] Screw termination.

Type JP1R29

Standard, Push-To-Test, and Remote Test Pilot Lights

Class 9001 Type J compact pilot lights are designed to be mounted in a 0.69 in. (11/16 in. or 17.5 mm) diameter mounting hole. Each terminal accepts up to two 14 AWG wires (CU only). Type J compact pilot lights meet NEMA 4 (watertight) and NEMA 13 (oiltight). Type JT push-to-test pilot lights have contacts built into the encapsulated body. Type JTR remote test pilot lights have dual inputs for one push remote testing—all you need is a push button with a current rating equal to or greater than the total lamp draw. Type JTR remote test pilot lights can also be energized from two separate input signals of the same voltage and polarity. This is done by wiring the Test terminal to the second input signal.

[4] Illuminated selector switches can be assembled by using a contact block/light module assembly in conjunction with a selector switch head, supplied without handle, and a transparent handle. See [XB6 Illuminated Operators](#), page 19-16.
 [5] The LED must be the same color as the push button cap.
 [6] Order bulbs separately. See [Additional XB6 Accessories](#), page 19-20.
 [7] Electrical components with connection by printed circuit board pins are available. See [Additional XB6 Accessories](#), page 19-20.
 [8] The LED must be the same color as the lens.
 [9] Neon bulb can only be used with a red, yellow, or white cap.

Table 19.79: Circular Legends for Emergency Stop Mushroom Heads (yellow background)

Diameter	Text	Catalog Number
90 mm	Blank	ZBY8101
	EMERGENCY STOP	ZBY8330
60 mm Bezeled	Blank	ZBY9121
	Emergency Stop	ZBY9320
	Prada de Emergencia	ZBY9420
	Not Halt	ZBY9220

For Legends, refer to [XB4 Legend Holders](#), page 19-38, [XB4 Legend Inserts](#), page 19-39, and [XB4 Legend Sheets](#), page 19-39.

[7] Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

[8] Other key numbers:

—key no. 421E: add the suffix 12 to the catalog number.

—key no. 458A: add the suffix 10 to the catalog number.

—key no. 520E: add the suffix 14 to the catalog number.

—key no. 3131A: add the suffix 20 to the catalog number.

Example: The catalog number for a Ø 40 mm red mushroom head for a trigger action, maintained push button, with release by key no. 421E becomes: ZB5AS94412.

XB4 Selector Switches

	110–120 Vac	White Green Red Yellow Blue	ZB4BV18G1 ZB4BV18G3 ZB4BV18G4 ZB4BV18G5 ZB4BV18G6

For Legends, refer to XB4 Legend Holders, page 19-38, XB4 Legend Inserts, page 19-39 and XB4 Legend Sheets, page 19-39.

[12] For use in bright ambient conditions, for example, in sunlight.

[13] Order bulb separately; see Table 19.119 BA9s Bulbs and Associated Accessories, page 19-41. For BA9 LED, see LED, BA9s Base, page 19-134.

[14] For 240 V LED, replace the last "B" or "G" in the catalog number with an "M". For example, ZB4BV81 (24 V) becomes ZB4BVM1 (240 V).

[15] For Quick-Connect version, add "3" to the end of the catalog number Example: ZB4BVJ13 (Quick-Connect size 1 x 1/40" or 2 x 0.110").

NOTE: The symbol indicates key withdrawal position(s).

For Legends, see [XB5 Legend Holders](#), page 19-58 and [XB5 Legend Inserts Only](#), page 19-59

[42] Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

[43] For contact configurations, see [Sequence of Contacts on Selector Switch Bodies](#), page 19-50.

		40 mm	Black	ZB5AS12
		60 mm	Black	ZB5AS22

Table 19.141: Circular Legends for Emergency Stop Mushroom Heads (yellow background)

Diameter	Text	Catalog Number
90 mm	Blank	ZBY8101
	EMERGENCY STOP	ZBY8330
60 mm Bezeled	Blank	ZBY9121
	Emergency Stop	ZBY9320
	Prada de Emergencia	ZBY9420
	Not Halt	ZBY9220

For Legends, see [XB5 Legend Holders](#), page 19-58 and [XB5 Legend Inserts](#), page 19-59

[50] Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

[51] Other key numbers:

—key no. 421E: add the suffix 12 to the catalog number.

—key no. 458A: add the suffix 10 to the catalog number.

—key no. 520E: add the suffix 14 to the catalog number.

—key no. 3131A: add the suffix 20 to the catalog number.

Example: The catalog number for a Ø 40 mm red mushroom head for a trigger action, maintained push button, with release by key no. 421E becomes: ZB5AS94412.

XB5 Selector Switches

Table 19.142: Non-Illuminated Selector Switches

Table 19.144: Sequence of Contacts on Selector Switch Bodies

Unit Type		Selector Switches														
		2-position						3-position								
Note: L=Left, C=Center, R=Right, O=Open, X=Closed																
Operator Plunger Position	Up															
	Down															
Contact Block Location		L	C	R	L	C	R	L	C	R	L	C	R	L	C	R
Contacts		N.O.	O	O	O	X	X	X	O	O	O	O	O	O	X	X
		N.C.	X	X	X	O	O	O	O	O	X	X	X	X	O	O

For Selector Switch Sequence, see [Sequence of Contacts on Illuminated Selector Switch Bodies](#), page 19-33

[52] For colored lever, add the following code to the end of catalog number: 01—white, 03—green, 04—red, 05—yellow, 06—blue (Example: ZB5AD204).

[53] Other key numbers:

—key no. 421E: add the suffix 12 to the catalog number.

—key no. 458A: add the suffix 10 to the catalog number.

—key no. 520E: add the suffix 14 to the catalog number.

—key no. 3131A: add the suffix 20 to the catalog number.

—key no. 8D1: add the suffix D to the catalog number.

Example: The catalog number for a head with key no. 421E for a 2 position maintained, lockable selector switch, with key withdrawal from the left-hand position, becomes: ZB5AG212

[86] Wireless and batteryless push button and receiver, factory-paired.
[87] For additional components, these devices can be field-paired.
[88] Supplied with output function set to momentary. Outputs programmable to maintained and Start-Stop.
[89] Non-programmable momentary output function.
[90] Supplied with a magnet.
[91] Mounting collar ZB5AZ009 (plastic) or ZB4BZ009 (metal) to be ordered separately.
[92] Only heads ZB4RZA0 and ZB5RZA0 are mechanically compatible.
[93] Cap to be ordered separately: see Caps for Harmony Push Button Heads ZB5RZA0 and ZB4RZA0.
[94] This cap is fitted by Schneider Electric and cannot be removed (risk of damage).

[98] Box equipped with cable gland outlets, compatible with Harmony ZB5 push button heads.

[99] Not wired to the receiver.

New!

ZBRN1 and ZBRN2 Access Points

The access point of Harmony wireless and batteryless range provides network connectivity openness by operating as an intermediate equipment between the transmitter and the PLC (Programmable Logic Controller). The access point receives radio signals from the transmitters and converts them to communication protocols. Based on the model, it is connected to the PLC using either RS485 Modbus Serial line or Modbus/TCP protocol.

The access point can be used with transmitters such as XB4R and XB5R wireless and batteryless push buttons, rope pull switch, mushroom head push button (1), and all PLCs that support Modbus Serial line over RS485 or Modbus/TCP protocols.

Depending on the application, an external or a relay antenna can be used to improve signal reception. An access point can support up to 60 radio transmitters

Radio transmission between 3 transmitters and 1 Access Point

Table 19.196: Configurable Access Points

Stand-alone biometric switch
(XB5S1/XB5S2)Stand-alone USB biometric switch
(XB5S3/XB5S4)USB biometric switch dedicated to Schneider HMI
(XB5S5)

Biometric Switches

The biometric switches of the Harmony® XB5S range are designed to control and secure access to systems and machines by checking users' authorization through fingerprint recognition.

The following types of biometric switches are available:

- Stand-alone biometric switches
 - type XB5S1, with 2 fixed states (bistable)
 - type XB5S2, with pulse control (monostable)
- Stand-alone USB biometric switches
 - type XB5S3, with 2 fixed states (bistable)
 - type XB5S4, with pulse control (monostable)
- USB biometric switches dedicated to Schneider HMI
 - type XB5S5, connected permanently with HMI

The biometric switches are aimed at 2 categories:

- Administrators, who decide and manage the list of users
 - the only people who can record the fingerprints in the device memory
- Users, who are authorized to use the biometric switch as a control unit
 - at least 1 of their fingerprints should be recorded in the device memory
 - access is granted when the finger is placed on the sensing screen

The USB switches communicate with the PC/HMI via the USB port to manage the user database. This database can be visualized, saved, and duplicated by PC/HMI with XB5SSoft application [100] [101]. The fingerprint records can also be erased in the absence of users.

The Schneider HMI [102] with VijeoDesigner software [103] enables the switches to authorize different access levels and trace HMI operations of each user.

The switch operates on 24 Vdc and provides protection against:

- Reverse polarity
- Overload and short-circuit (switching capacity ≤ 200 mA)

Mounting

The product is of monolithic design (a single plastic housing) and is mounted by means of a nut (hand-tightened without need for tools) in a standard 22.5 mm/0.886 in. diameter hole. It can be installed on a flat, horizontal, or vertical surface.

A protective cover is available as an accessory to protect the active face of the sensing screen. This cover is mounted using a self-adhesive hinge.

A Female/Female USB extension cable makes it possible for the USB biometric switch to have the female USB port within a 22 mm/0.866 in. diameter hole on the control panel front.

Environment

- Conformity to standards: UL, CSA, GOST, and CE
- Product certifications:
 - CSA C22-2 No. 14
 - UL 508
 - IEC 61000-6-2 and IEC 61000-6-4
- Degree of protection conforming to standard IEC 60529:
 - IP 65
 - NEMA 12
- Ambient air temperature:
 - For storage: -13 to 158°F (-25 to 70° C)
 - For operation: 23 to 122°F (-5 to 50° C)

[100] Compatible with all versions of Harmony XB5SSoft application. The XB5SSoft is a freeware application and can be downloaded from our website www.schneider-electric.com.

[101] The user database cannot be uploaded from USB biometric switch to the PC.

[102] Compatible with Magelis iPC, STU, OT, GXO, GT (except GT1000 series), GK, GH, and GTO models.

[103] Compatible with VijeoDesigner HMI editor software V6.1, Service pack 2.

Description

- The stand-alone biometric switch (XB5S1/XB5S2) consists of a dark gray housing, with the following on its front face:
 - A sensing screen **1** that allows the registration and subsequent recognition of the registered fingerprints,
 - A green LED output state indicator **2** that illuminates when the output is activated (solid-state N.O. contact),
 - An orange LED **3**, indicating an administrator's "Registration" mode,
 - An orange LED **4**, indicating an operator's "Registration" mode,
 - A red "RESET" LED **5** which indicates, in "Delete" mode, that the administrator is deleting all or part of the memory,
 - A red LED **6** which flashes when the reader is presented with an "unrecognized" fingerprint or in the event of incorrect operation.
- The stand-alone USB biometric switch (XB5S3/XB5S4) consists of a dark gray housing with a sensing screen **1** for fingerprints, a green LED **2** for indicating the output state, and a red LED **6** for the unrecognized fingerprint on its front face.
- The USB biometric switch dedicated to Schneider HMI (XB5S5) consists of a dark gray housing with a sensing screen **1** for fingerprints on its front face.

Yellow	Y	Y
White	W	—
Orange	S	S
Gray	E	—

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

[1] When ordering, add prefix 9001 to the catalog number.

[2] The universal push button operators contain one each of the following color inserts: black, red, green, yellow, orange, blue and white.

[3] ■ Choose color code from Table 19.217 Color Codes for Type K Operators, page 19-73.

[4] Knob has the words "Emergency Stop" in raised letters highlighted in white for readability.

		Pull	Ctr	Push
(KA1)	KA3	X	O	O
	KA2	O	O	X
9001 KR8RH25				
KA3		X	O	O
KA5		X	X	O

NOTE: To select contact blocks, light modules, and accessories, see [Type KA Contact Blocks](#), page 19-90.

[5] For 1-3/8 in. or 2-1/4 in. Dia. Knob:

a) Order Type -20 or -21 knob from [Additional Accessories for Type K and SK Operators](#), page 19-99.

b) Order 9001K54 adapter—allows Type -20 or -21 knob to fit on push pull operators. Voids UL and NEMA 6 rating.

c) Can order assembled operator by adding color code to Type -20 or -21. **Example:** 9001KR9R would be 9001KR9R20 or 9001KR9R21.

[6] When ordering, add prefix 9001 to the catalog number.

[7] These operators can be ordered complete with contact blocks. For maximum block usage, see "H" Codes, page 19-93. Add the chosen "H" number to the end of the operator.

[8] For contact sequences, see [Table 19.218 Contact Sequences](#), page 19-73

[9] ▼ Choose one color from the Color Codes table here, and insert the color code in Type number. **Example:** KR9 with a yellow knob = KR9Y

[10] For color codes, see [Color Codes for 30 mm Multifunction Operators](#), page 19-73.

[11] To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute "R05" in place of "R"

[12] ▲ Add the voltage assembly code as chosen from [Table 19.273 Standard Light Modules for Types K, SK, and KX Control Units](#), page 19-91. **Example:** KR8P with a 277 V 50-60 Hz voltage = KR8P8.

[13] The knob must be the same color as the LED light module chosen, for example, for a green LED, use a green knob.

[14] On neon light modules, use clear knobs only.

[15] These colors are not available on illuminated push-pull operators.

NOTE: To select contact blocks, light modules, and accessories, see Type KA Contact Blocks, page 19-90.

Table 19.220: Color Caps

Color	Color Codes ▼		
	K1L, K2L, K3L	1-3/8 in. Mushroom	2-1/4 in. Mushroom
Red	R	R20	R21
Green	G	G20	G21
Blue	L	L20	L21
Yellow	Y	Y20	Y21
White	W	W20	W21
Clear	C	C20	C21
Amber	A	A20	A21

NOTE: UL Types 4, 13/NEMA 4, 13 For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

[16] When ordering, add prefix 9001 to the catalog number.

[17] These operators can be ordered complete with contact blocks. For maximum block usage, refer to bullets to the right of "H" Codes, page 19-93. Add the "H" number to the end of the operator type number. Additional "H" numbers are available.

[18] Add the color code as chosen from the color cap table. Example: K2L25 with a blue 1-3/8 in. mushroom button = K2L25L20.

[19] ■ Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. Example: K2L with 240 Vac/Vdc = K2L25.

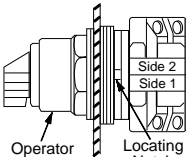

[20] On neon light modules, use clear color caps only.

[21] The cap must be the same color as the LED light module chosen, e.g., for red LED, use red color cap.

[22] The only difference between a no guard (K2L_) operator and mushroom button operator is the color cap.

Table 19.226: Key Withdrawal Codes [34]

Code	Position
4	Left Only
5	Center Only
6	Right Only
7	Left and Center
8	Left and Right
9	Center and Right
10	Left, Center, and Right

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

[28] When ordering, add prefix 9001 to the catalog number.

[29] These operators can be ordered complete with contact blocks. Add the "H" code from "H" Codes, page 19-93 as needed for your application.

[30] ♦ Add the knob color code from Table 19.225 Selector Switch Assembly Code, page 19-76. For LED, knob color must match LED.

[31] ▼ Add the key withdrawal code from Key Withdrawal Codes table. Example: KS43K with key withdrawal in the right position only = KS43K6.

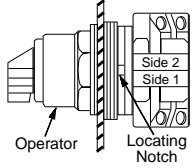

[32] For other color knobs replace the B with knob color code from the Selector Switch Assembly Code table.

[33] ■ Add the voltage assembly code as chosen from page 19-86.

[34] Add the key withdrawal code from Key Withdrawal Codes table. Example: KS43K with key withdrawal in the right position only = KS43K6.

9001K 4-Position Selector Switches

Table 19.227: 4-Position Selector Switches

Contact Block Required					
Contact Block Position	Quantity and Type KA1 or KA2 or KA3		Mount on Side KA1 or KA2 or KA3		1—Contact Closed 0—Contact Open

Code	Position
11	1 and 4
12	4 only
13	1 only
14	1, 2, 3 and 4
15	2, 3, and 4

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

Potentiometers with Dial Plate

Table 19.230: Potentiometers with Dial Plate (not UL listed)—Maximum Voltage 300 Vac

Power	Description	Ratings	Type
2 W	Operator Only, for Single Potentiometer	NEMA 4, 13	K20
	Operator with Single Potentiometer		K21

Table 19.231: Potentiometer Suffixes

Single Potentiometer			
Suffix [41]	Resistance	Suffix [41]	Resistance
01	50 Ω	07	5 kΩ
02	100 Ω	08	10 kΩ
04	500 Ω	09	25 kΩ
05	1 kΩ	13	500 kΩ
39	2 kΩ	37	750 kΩ
06	2.5 kΩ	14	1 MΩ
Tandem Potentiometer			
Suffix [41]		Resistance	
		Front	Rear
82		1 kW	1 kW

NOTE: Any potentiometer with a shaft 7/8" long and 1/4" diameter may be used with these operators.

[35] When ordering, add prefix 9001 to the catalog number.

[36] These operators can be ordered complete with contact blocks. Add the "H" code from "H" Codes, page 19-93 as needed for your application.

[37] ♦ Add the knob color code from the Selector Switch Assembly Code table. For LED, knob color must match LED.

[38] Add the key withdrawal code from the Key Withdrawl Codes table.

[39] ■ Add the key withdrawal code from Key Withdrawl Codes table. **Example:** KS43K with key withdrawal in the right position only = KS43K6.

[40] Add the knob color code from the Selector Switch Assembly Code table. For LED, knob color must match LED.

[41] For the complete part number, add the suffix from Table 19.231 Potentiometer Suffixes, page 19-77 to the catalog number. Example: 9001K2105.

Selection

Shown below is a simplified method of selecting a selector switch to meet almost any combination of contact sequences.

Step No. 1

Determine the contact sequence(s) required. Set up a target table like the one shown for the example below.

Contact Sequence 0—contact open 1— contact closed			
A	1	0	0
B	0	1	0
C	0	0	1

Step No. 2

Look for a cam type common to all sequences in:

Table 19.232 2 Position Selector Switch, page 19-78,
Table 19.233 3 Position Selector Switch, page 19-78, or
Table 19.234 4 Position Selector Switch, page 19-78.
For the example above, Table 19.233 3 Position Selector Switch, page 19-78 would be used.

For the contact sequences A (1 0 0), B (0 1 0) and C (0 0 1) of the example above, cam types F and L are common to all three sequences.

Step No. 3

Next, use the cam type common to all the sequences (if several cam types are common, choose one) to find the operator type number. Go to the proper reference topic as indicated in the table below:

Number of Positions	Push Button Line	Reference topics
2	Type K, Type SK, Type KX	Type K, page 19-75 Type SK, page 19-85 "H" Numbers, page 19-93 Type KX with Contacts, page 19-102 Type KX without Contacts, page 19-104
3	Type K, Type SK, Type KX	Type K, page 19-76 Type SK, page 19-86 "H" Numbers, page 19-93 Type KX with Contacts, page 19-102 Type KX without Contacts, page 19-104
4	Type K, Type SK, Type KX	Type K, page 19-77 Type SK, page 19-87 Type KX, page 19-102

If for the example above a manual return operator with a standard black knob is required and:

The F cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS46B, page 19-76
- Type SK—Class 9001 Type SKS46B, page 19-86
- Type KX—Class 9001 Type KXSDFB, page 19-104

The L cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS401B, page 19-76
- Type SK—Class 9001 Type SKS401B, page 19-86
- Type KX—Class 9001 Type KXSDLB, page 19-104

Step No. 4:

Determine the contact blocks required by using the same table in Step No. 2.

If, for the example above, the F cam type is chosen:

- Use a 9001KA3 mounted on side no. 2 for sequence A (1 0 0).
- Use a 9001KA3 mounted on side no. 1 for sequence B (0 1 0).
- Use a 9001KA2 mounted on side no. 1 or 2 for sequence C (0 0 1).

If, for the example above, the L cam type is chosen:

- Use a 9001KA2 mounted on side no. 2 for sequence A (1 0 0).
 - Use a 9001KA2 mounted on side no. 1 or a 9001KA3 mounted on side no. 2 for sequence B (0 1 0).
 - Use a 9001KA3 mounted on side no. 1 for sequence C (0 0 1).
- One Type KA1 double circuit block can be used in place of one Type KA2 single circuit block plus one Type KA3 single circuit block mounted on the same side.

1	0	1	1	H	KA5 [43]	1

NOTE: For Outline Dimensions see Catalog 9001CT1103

NOTE: When ordering, add prefix 9001 to the catalog number.

When ordering, please specify:

- Quantity
- Class Number
- Type or Catalog Number

For "H" Numbers, see Type K, SK, and KX Contact Block "H" Numbers, page 19-93

[42] See Type K, SK, and KX Contact Block "H" Numbers, page 19-93

[43] Type KA5 must be the last block on either side. If more than one KA5 is required on either side—contact your local Square D sales office.

Type K Heavy Duty Pilot Lights

When ordering, add prefix 9001 to the catalog number.

Table 19.235: Pilot Lights—UL Types 4, 13/NEMA 4 & 13^{[44][45]}

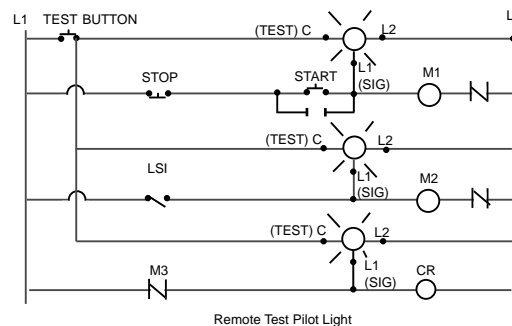

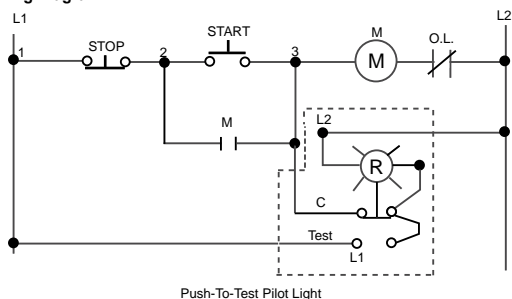

Description	Voltage	Style	With Red Fresnel Color Cap ^[46]	With Green Fresnel Color Cap ^[46]	With Other Color Cap ^[46] ^[47]	Without Color Cap ^[46]

Typical Wiring Diagram

For Contact Blocks, see [Type KA Contact Blocks](#), page 19-90
 For Light Modules, see [Standard and Shallow Depth Light Modules](#), page 19-91
 For Accessories, see [Type K and SK Accessories](#), page 19-94

[44] For use in hazardous locations, see [Square D Offering According to Class, Division, and Group](#), page 19-92

[45] Legend plates not included.

[46] When ordering, add prefix 9001 to the catalog number.

[47] ■ Add the color code as chosen from [Table 19.236 Color Caps, page 19-79](#). **EXAMPLE:** KP1 with a blue fresnel cap = KP1L31

[48] The cap must be the same color as the LED light module chosen, e.g., for green LED, use green color cap.

[49] On neon light modules, use clear color caps only.

[50] On remote test pilot lights use only full voltage or resistor voltage assembly codes. Do not choose LED (exception - these LED codes are allowed: 38LG, 38LL, 38LR, 38LW, 38LY), neon or transformer codes. For AC use only.

Without Latch

With Latch

The joy stick operator is ideal for applications where only one circuit is to be energized at one time. The three position joy stick closes one circuit in each Up-Down or Right-Left position with all circuits open in center position. The five position operator closes one circuit in each Up, Down, Left and Right position with all circuits open in center position.

Momentary contact operators are spring return to the center position. Maintained operators remain in position and must be returned manually. Operators with latch cannot be operated until the latch button in center of handle is pressed.

Type K Heavy Duty Specialty Operators

Order Contact Blocks From Type KA Contact Blocks, page 19-90

Selector Push Button
9001KQ

Inserts are field convertible. For colors not listed, order operator without insert, plus separate color insert from [Additional Accessories for Type K and SK Operators](#), page 19-99. Up to two Type KA contact blocks can be mounted in tandem (total of four blocks). Selector push buttons cannot be illuminated.

Key Operated Push Button
9001KR

Key operated push buttons are used wherever unauthorized use of a push button is discouraged. Examples are locking a Start push button in the extended position or locking a Stop push button in the depressed position. The operator can also be locked in the flush position—holding all contacts open. Up to two Type KA contact blocks can be mounted in tandem (total of four blocks). ("X" = locked position) [57]

Table 19.240: Key Operated Push Button – UL Types 4, 13/NEMA 4, 13 [51] [52]

Description	Lockable Positions			Type [53]
	Extended	Flush	De-pressed	
Push button operable only with key in lock. Key is removable in locked position only.	X — — X	— X — X	— — X X	KR131 KR132 KR133 KR137
Push button operable with or without key in lock. Push button can be locked with key only. Key removable in both locked or unlocked position.	X — — X	— X — X	— — X X	KR141 KR142 KR143 KR147
To lock the unit, rotate the key with the button in the extended position. Then, push the button to lock it in the position indicated at right. Key is removable only in this position.	— — — —	— X — —	— — X —	KR152 KR153

[51] For use in hazardous locations—See [Square D Offering According to Class, Division, and Group](#), page 19-92.

[52] Legend plate and contact block not included unless otherwise noted.

[53] When ordering, add prefix 9001 to the catalog number.

[54] These operators can be ordered complete with contact blocks—a total of four (4) contact blocks can be used. Add the "H" number chosen from "H" Codes, page 19-93 to the operator type number and add the cost of the "H" number to the operator cost.

[55] Cams are not interchangeable.

[56] Order color inserts from [Additional Accessories for Type K and SK Operators](#), page 19-99.

[57] All key operated push buttons are furnished as standard with Square D no. E10 key change. See catalog 9001CT0001 for other key changes.

Table 19.242: Emergency Break-Glass Operator—UL 4, 13/NEMA 4, 13 [66]

Description	Type [61]
Operator is held in a depressed position by a glass disc. When the glass disc is broken with the hammer, button returns to a normal extended position. Package of 5 discs included with operator.	K15

Table 19.243: 9001K15 Replacement Parts

Description	Part Number
Yellow bumper	3105211101
Hammer and chain	3105206750
Lower ring nut	6512232801
Top ring nut	9001K40
Package of 5 replacement discs	9001K57
Clip to hold hammer	2540902240

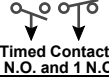

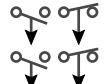

Table 19.244: Rocker Arm Operating Lever

Description	Type [61]
Allows two standard push buttons to be operated independently of each other. Price does not include push buttons or legend plates. Order push buttons and legend plates from Table 19.214 Non-Illuminated Momentary Push Button Operators, page 19-72, and Legend Plates, page 19-94—specify which marking is to be inverted.	K50

Table 19.245: Alternate Action—Push-on, Push-off Module

Description	Type [61]
This module can be added to standard 9001 Type K, KX, SK or T momentary push button operators. Contact blocks mounted behind this module (maximum of 2) are held in the depressed position when the operator is pressed once, and released to their normal position when the operator is pressed again. For a N.C. circuit, use a 9001KA3 or the N.C. contact of either a 9001KA1 or 9001KA4. For a N.O. circuit, use the N.O. contact of either a 9001KA4 or 9001KA6.	K85

Table 19.246: Off Delay Push Button—UL Types 4, 13/NEMA 4, 13

Description	Type (All Colors)		
	Full Guard [61]	Extended Guard [61]	No Guard [61]
 Timed Contact 1 N.O. and 1 N.C.	KRD1UH1	KRD2UH1	KRD3UH1
 Timed Contact 2 N.O. and 2 N.C.	KRD1UH2	KRD2UH2	KRD3UH2

Time Delay Push Button
9001KRD

Timing period is adjustable from 0.1 second to 60 seconds and begins after button has been released. Devices include a pack of seven color inserts for color coding the push button. See Accessories, page 19-99 for Universal color insert. Contacts are quick make-quick break.

[58] Meets UL Type 13/NEMA 13 and UL Type 6/NEMA 6, which UL and NEMA consider an equivalent to UL Type 4/NEMA 4.

[59] For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92.

[60] Legend plate and contact block not included unless otherwise noted.

[61] When ordering, add prefix 9001 to the catalog number.

[62] ■ Choose one color for each button. R = red, G = green, B = Black. Example: 9001KR6 with left red and right black = 9001KR6RB. See Color Codes for 30 mm Multifunction Operators, page 19-72.

[63] Universal for KR6, KR67, KR7 includes 2 inserts each of black, red and green.

[64] Universal for KR11, KR12 includes 2 each of black, red, green, yellow, orange, blue, white.

[65] ▲ Choose one color for each button. R = red, G = green, B = Black. Example: 9001KR6 with left red and right black = 9001KR6RB. See Color Codes, page 19-72.

[66] For enclosed versions see 9001KY and 9001SKY Control Stations, page 19-112.

		9001SKR8H25		
		PULL	CTR	PUSH
KA3		X	O	O
	KA5	X	X	O
	KA2	O	O	X

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see [Type KA Contact Blocks, page 19-90](#) through [Hermetically Sealed Power Reed Contact Blocks, page 19-92](#).

[73] When ordering, add prefix 9001 to the catalog number.

[74] These operators can be ordered complete with contact blocks. For maximum block usage, see "H" Codes, [page 19-93](#). Add the chosen "H" number to the end of the operator.

[75] On neon light modules, use clear knobs only.

[76] ▲ See [Table 19.252 Color Codes, page 19-83](#) and insert the color code in the Type number. Example: SKR9() with a yellow knob = SKR9Y

[77] To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute "R05" in place of "R"

[78] ♦ Add the voltage assembly code as chosen from [Standard and Shallow Depth Light Modules, page 19-91](#). Example: SKR8P♦ with 277 V 50–60 Hz = SKR8P8

[79] For positions, refer to [Table 19.253 Positions for 9001SKR8RH1 or H13, page 19-83](#) and [Table 19.254 Positions for 9001SKR8H25, page 19-83](#).

[80] The knob must be the same color as the LED light module chosen, for example, for a green LED, use a green knob.

[81] These colors are not available on illuminated push-pull operators.

Amber	A	A20	A21

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

[82] When ordering, add prefix 9001 to the catalog number.

[83] These operators can be ordered complete with contact blocks. For maximum block usage, see "H" Codes, page 19-93. Add the "H" number to the end of the operator type number.

[84] ■ Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. **EXAMPLE:** SK2L_ with 240 Vac/Vdc = SK2L25.

[85] On neon light modules, use clear color caps only.

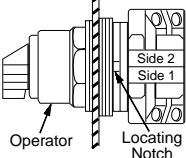

[86] Add the color code as chosen from the color cap table below. **EXAMPLE:** SK2L25 with a blue 1-3/8 in. mushroom button = SK2L25L20.

[87] The cap must be the same color as the LED light module chosen, e.g., for green LED, use green color cap.

[88] The only difference between a no guard (SK2L) operator and mushroom button operator is the color cap.

Hermetically Sealed Power Reed Contact Blocks, page 19-92
Light Modules: Standard Light Modules, page 19-91
Knobs and Accessories: Additional Accessories for Type K and SK Operators, page 19-99

[93] When ordering, add prefix 9001 to the catalog number.

[94] These operators can be ordered complete with contact blocks. Add the "H" code from "H" Codes, page 19-93 as needed for your application.

[95] ♦ Add the knob color code chosen from the Selector Switch Assembly Code table. For LED, knob color must match LED.

[96] For other color knobs replace the B with knob color code. See Table 19.260 Selector Switch Assembly Code and Knob Cat. No., page 19-86.

[97] ■ Add the voltage assembly code as chosen from Standard Light Modules, page 19-91. Example: K25J with 208Vac = K25J3

[98] Add the knob color code. For LED, knob color must match LED.

Potentiometers with Dial Plate

Table 19.263: Potentiometers with Dial Plate (not UL listed)—Maximum Voltage 300 Vac

Power	Description	Ratings	Type
2 W	Operator Only, for Single Potentiometer	NEMA 4, 13	SK20
	Operator with Single Potentiometer		SK21
	Operator Only, for Tandem Potentiometer		SK22
	Operator with Tandem Potentiometer		SK23

When ordering, add prefix 9001 to the catalog number.

Table 19.264: Potentiometer Suffixes

Single Potentiometer			
Suffix [104]	Resistance	Suffix [104]	Resistance
01	50 Ω	07	5 kΩ
02	100 Ω	08	10 kΩ
04	500 Ω	09	25 kΩ
05	1 kΩ	13	500 kΩ
39	2 kΩ	37	750 kΩ
06	2.5 kΩ	14	1 MΩ
Tandem Potentiometer			
Suffix [104]	Resistance		
	Front		Rear
82	1 kΩ		1 kΩ

NOTE: Any potentiometer with a shaft 7/8 in. long and 1/4 in. diameter may be used with these operators.

[99] When ordering, add prefix 9001 to the catalog number.

[100] These operators can be ordered complete with contact blocks. Add the "H" code from "H" Codes, page 19-93 as needed for your application.

[101] ♦ Add the knob color code chosen from the Selector Switch Assembly Code table. For LED, knob color must match LED.

[102] ■ Add the voltage assembly code as chosen from [Standard Light Modules](#), page 19-91. Example: K25J with 208Vac = K25J3

[103] Add the knob color code from Table 19.237. For LED, knob color must match LED

[104] For the complete part number, add the suffix from this table to the catalog number from Table 19.263 Potentiometers with Dial Plate, page 19-87. Example: 9001K2105.

Type SK Corrosion Resistant Pilot Lights

Typical Wiring Diagram

Push-To-Test Pilot Light

Remote Test Pilot Light

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

[105] When ordering, add prefix 9001 to the catalog number.

[106] ▲ Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. **EXAMPLE:** SKT***R31 with 208 Vac red LED voltage = SKT37LRR31.

[107] ■ Add the color code as chosen from the color cap table below. **EXAMPLE:** SKP1 with a blue fresnel cap = SKP1L31.

[108] The cap must be the same color as the LED light module chosen, e.g., for a green LED, use a green color cap.

[109] On neon light modules, use clear color caps only.

[110] Use only full voltage or resistor voltage assembly codes on remote test pilot lights. Do not choose LED, neon or transformer codes. For AC use only.

[111] Use only full voltage or resistor voltage assembly codes on remote test pilot lights. Do not choose LED (exception — these LED codes are allowed: 38LG, 38LL, 38LR, 38LW, 38LY), neon or transformer codes. For AC use only.

[112] Add the color code as chosen from the color cap table below. **EXAMPLE:** SKP1 with a blue fresnel cap = SKP1L31.

Type SK Corrosion Resistant Multifunction Operators

Table 19.267: Multifunction Operators—UL Types 4, 4X, 13/NEMA 4, 4X, 13 [113][114]

Interlocked Assembly		Description	Color	Contacts [115]	Without Contacts [115]
	9001SKR11U	Interlocked Assembly Both Buttons Maintained	Universal [116]	SKR11UH1	SKR11U
			Other [117]	SKR11▼H1	SKR11▼
		Interlocked Assembly One Button Momentary	Universal [116]	SKR12UH1H1	SKR12U
		Interlocked Assembly One Button Maintained	Other [117]	SKR12▼H1H1	SKR12▼

[113] For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92.

[114] Legend plate and contact block not included unless otherwise noted.

[115] When ordering, add prefix 9001 to the catalog number.

[116] Universal for SKR11,12 includes 2 each of black, red, green, yellow, orange, blue, white.

[117] ▼ Choose one color for each button. R = red, G = green, B = Black. **Example: 9001SKR11 with top button gray and bottom button orange = 9001SKR11ES.** See Table 19.252 Color Codes, page 19-83

Table 19.268: Standard Contact Blocks

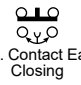

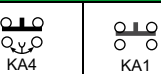

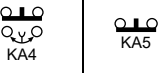

Description	Symbol	Type

Overlapping [118] N.O. Contact of KA4 closes before N.C. Contact of KA5 Opens	 KA4 KA5	Order One Type KA4 and One Type KA5

Type KA Contact Blocks

The Class 9001 Type KA contact blocks are Fingersafe® contact blocks (meeting VDE 0106 Part 100). They have one screw mounting and captive (backed out) plus/minus terminal screws. These contact blocks are double-break, direct-acting contacts. Because of the wiping action of these contacts, they are suitable for use with programmable controllers. All contact blocks listed below accept up to 2 #12–#24 AWG solid or stranded wires. Recommended tightening torque for screw terminals is 7 lb-in.

Symbol	Contact Blocks with Binder Head Screws (not Fingersafe)		Gold Flashed Contacts with Standard Pressure Wire Terminals
	Type [119]	Quantity [120]	Type [119]
	KA21	25–Up	KA31
	KA22	25–Up	KA32
	KA23	25–Up	KA33
 N.O. Early Closing	KA24	25–Up	KA34
 N.C. Contact Late Opening	KA25	25–Up	KA35

Contact blocks listed below are not Fingersafe, but provide:

- Terminals that accept ring tongue/fork tongue connectors
- Short single circuit contact blocks (0.75" deep vs. 0.97" deep on the Fingersafe)
- Same as old style Series G product available prior to March, 1989.
- For assembled operators, use form Y238 (add to catalog number as suffix, for example: 9001KRU1H13Y238)

Table 19.270: Contact blocks (not Fingersafe)

Symbol	Type [119]	Symbol	Type [119]
	KA1G	 N.O. Contact Early Closing	KA4G
	KA2G	 N.C. Contact Late Opening	KA5G
	KA3G	 N.O. Contact Early Closing	KA6G

600	12		1.2										

[118] For push buttons or two-position selector switches only. For sequencing or overlapping contacts on other operators, refer to catalog 9001CT0001.

[119] When ordering, add prefix 9001 to the catalog number.

[120] Minimum order quantity is 25.

Standard and Shallow Depth Light Modules

	550–600 V, 50–60 Hz	Transformer	KM6	6	2.5 VA	T6	2550101020

NOTE: Light modules are available in other voltages. For additional information, refer to Catalog 9001CT0001.

The products in Table 19.273 have been assigned Temperature Classifications (T-Codes) in accordance with UL 121201 (2017) — Nonincendive Electrical Equipment for Use in Class I and II, Division 2 and Class III, Divisions 1 and 2 Hazardous (Classified) Locations. These codes can aid the user in proper application of these products in accordance with ISO/ISA/IEC 60079-0 (2017–12) Explosive Atmospheres — Part 0: Equipment — General Requirements and the National Electric Code NFPA 70 — Article 500.

NOTE: Light modules shown in Table 19.274 are not UL Certified for use in hazardous locations.

Table 19.274: Shallow Depth Light Modules For Types K and SK Control Units [121] [123] [127] [122]

	Voltage	Description	Light Module	Voltage Assembly Code	Rating	Temperature Code T-Code	Replacement Lamp

Class: 3211 03

marked

[121] For use with all operators except KX and remote test pilot.

[122] For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92.

[123] With LED light modules, use either a clear color cap or a cap the same color as the LED.

[124] With neon type light modules, use a clear color cap only.

[125] When ordering, add prefix 9001 to the catalog number.

[126] Not for use on KX operators.

[127] Reduces the depth of illuminated push buttons with contact blocks by over 33%.

Hazardous locations do not always require the use of explosion-proof equipment like the Class 9001 Type BR control stations. Selecting the most appropriate device for the location can save you money. For more information on the types of hazardous locations, contact your local electrical inspector.

Volts	Make		Break		Continuous
	A	VA	A	VA	
AC NEMA C300 [135]					
120	10.00	1200	1.000	120	3.0
240	5.00		.500		
DC NEMA Q150 [136]					
115	.50	58	.50	58	3.0

[128] Any Class 9001 Type K, SK or KX operator can be used in an area classified as Class I, Division 2 hazardous locations, if:

- Only logic (KA40 series) or power (KA50 series) reed contact blocks are used.
- All Type K and SK illuminated operators are UL approved for use in Class I Division 2 areas. (Add Form Y243 to single lamp Push-To-Test pilot lights.)
- Type KX illuminated operators do not use 4 lamp light modules, or 2 lamp light modules other than the transformer type. (Add Form Y243 to single lamp Push-To-Test pilot lights.)
- The operators are mounted in any NEMA 4 & 13 enclosures.

[129] UL Listed: File E10054(N), CCN NOIV.

[130] Any Class 9001 Type K, SK, or KX operator mounted in a Class 9001 Type KY, KYSS, KYAF, SKY enclosure may be used, except potentiometer operators.

[131] Not for use in pendant stations.

[132] When ordering, add prefix 9001 to the catalog number.

[133] All contact blocks listed below accept #12–18 solid or stranded wire.

[134] The power reed contact blocks can be used with standard industrial relays and starters through NEMA Size 4. Minimum voltage is 5 V and the minimum current is 1 mA.

[135] Inductive Rating—35% Power Factor.

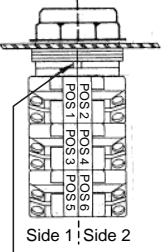

[136] Inductive and Resistive Ratings

Type K, SK, and KX Contact Block “H” Numbers

The design of Class 9001 Type KA contact blocks allows them to be mounted side by side and/or in tandem. This enables you to specify an operator and a specific arrangement of contact blocks (shipped fully assembled) with a single Type number.

Table 19.279: “H” Codes

	Suffix No. (Add to Operator Type)	Positions					
		1	2	3	4	5	6
Example: A Type KR1B push button with 2 Type KA1 contact blocks would be Class 9001 Type KR1BH2. 	H1	KA1					
	H2	KA1	KA1				
	H3	KA1	KA1	KA1			
	H4	KA1	KA1	KA1	KA1		
	H5	KA2					
	H6	KA2	KA2				
	H7	KA2	KA2	KA2			
	H8	KA2	KA2	KA2	KA2		
	H9	KA4	KA1				
	H10	KA4	KA5				
	H11	KA1	KA1		KA1		
	H12	KA2	KA3	KA2	KA3		
	H13		KA1				
	H14		KA3				
	H15	KA2	KA3	KA2			
	H16	KA2	KA3	KA2	KA3		
	H17	KA1	KA1	KA2			
	H18	KA3	KA1	KA2			
	H19	KA1	KA1	KA3		KA3	
	H21	KA2	KA3	KA1	KA1	KA1	
	H23	KA1	KA1	KA1	KA1	KA1	KA1
	H24	KA1	KA2				
	H25	KA5	KA3				

NOTE: For “H” Codes not in this table, contact your local Schneider Electric Customer Care Center.

Table 19.280: Dimensions When Using Contact Blocks

Table 19.281: Basic Operators (Without Color Caps, Mushroom Buttons, Knobs, Selector Switch Cams, Contact Blocks, Light Modules, or Legend Plates)

Description	For UL Types/NEMA

Illuminated Push Button and Push-To-Test (No Guard)	K2L [140] [141]	SK2L [140] [141]
Illuminated Push Button (Full Guard—Metal Top)	K3L [140]	—
Standard Pilot Light	KP	SKP
3 Position Maintained Selector Switch	KS4 [138]	SKS4 [138]
3 Position Spring Return Both Sides To Center—Selector Switch	KS5 [138]	SKS5 [138]
3 Position Spring Return Left To Center—Selector Switch	KS6 [138]	SKS6 [138]
3 Position Spring Return Right To Center—Selector Switch	KS7 [138]	SKS7 [138]

Mounting Hole for All Types K, SK, and KX Control Units

Hole Punch: Use Greenlee Tool #60242 to punch mounting hole and notch.

Maximum Contact Block Usage (Includes Types K, SK and KX)

- **2 blocks mounted side by side only:** Any 2, 3 or 4 position **spring return** selector switch (non-illuminated, illuminated or keyed).
- **2 blocks mounted in tandem 1 side only:** Any 2 operator interlocked push button.
- **2 blocks mounted in tandem (total of four blocks):** Any selector push button, keyed push button, 2, 3, or 4 position **maintained** selector switch (non-illuminated, illuminated or keyed), push-pull operators (non-illuminated or illuminated), joy stick, dual push button.
- **3 blocks mounted in tandem (total of six blocks):** Single momentary push buttons (non-illuminated or illuminated).

[137] When ordering, add prefix 9001 to the catalog number.

[138] Operator can be converted to an illuminated operator by removing the liner (6512240601) and adding a light module.

[139] These operators can be supplied with 1-3/8 in. or 2-1/4 in. dia. mushroom buttons. For 1-3/8 in.: add () 20 to type number. For 2-1/4 in.: Add () 21 to type number. The () refers to the color chosen—see **Additional Accessories for Type K and SK Operators**, page 19-99. Voids UL and NEMA 6 Rating.

[140] Operator can be converted to a non-illuminated operator by adding liner (6512240601).

[141] Operator includes jumper wires for push-to-test conversion.

Legend Plates for Types K and SK Operators

Padlock Attachments for Type K and SK Operators

Table 19.290: Padlock Attachments

Used On	Description	Type [148]
Type K non-illuminated push button — Standard or mushroom (KR4, KR5 mushroom buttons only).	Holds button in depressed position and can be padlocked.	K4
Types K and SK non-illuminated push buttons with or without protective boots.	Holds button in depressed position when padlocked.	K5 K97
Types K and SK non-illuminated push buttons, cover type attachment. KR, SKR	Attachment can be padlocked. Does not hold button in depressed position.	K6
Types K and SK push buttons, cover type attachment.	Spring loaded cover cannot be padlocked. Does not hold button in depressed position.	K60
Types K and SK push-pull operator and illuminated push buttons. KR8, KR9	Holds button in depressed position and can be padlocked.	K62
KR11U and KR12U Interlocked Assembly	Holds maintained button in depressed position and can be padlocked.	K96
Type KR9 & SKR9 Push-Pull operators—Non-Illuminated and Illuminated	Holds button in depressed position. Can be padlocked.	K162

Table 19.291: Padlock Attachments

Used On	Description	Type [148]
Types K and SK selector switches and potentiometers (will not work with gloved-hand knob).	Cover type attachment that can be padlocked to keep unauthorized personnel from tampering with the operator.	K7
Types K and SK selector switches and potentiometers (will not work with gloved-hand knob).	Same as 9001K7 but with spring loaded lockout cover.	K107
Types K and SK illuminated push buttons (with or without guard) and key operated push buttons.	Cover type attachment that can be padlocked to keep unauthorized personnel from tampering with the operator.	K108
Types K and SK illuminated push buttons (with or without guard) and key operated push buttons.	Same as 9001K108 but with spring loaded lockout cover.	K109
Types K and SK maintained push-pull operators using 1.375 in. dia. mushroom buttons (-20 series, see Additional Accessories for Type K and SK Operators , page 19-99).	Cover type attachment that holds mushroom button in depressed position and can be padlocked.	K110

Mushroom Button Guards for Type K and SK Operators

Table 19.292: Mushroom Button Guards

Description	Used On	Type [149] [150] [151]
Aluminum Mushroom Guard for 1.375 in. Mushroom Button Operator (KR4, KR24)	KR4, KR24	K48
Yellow Plastic Extended Mushroom Guard for 1.375 in. and 1.625 in. Mushroom Button Operators	KR4, SKR4 KR8, KR9, KR16, SKR8, SKR9, SKR16	K56■ K56■M▲
Aluminum Mushroom Guard for 2.25 in. Mushroom Button Operator	KR5 KR25	K68 K685

[148] When ordering, add prefix 9001 to the catalog number.

[149] ■ B=Black G=Green R=Red Y=Yellow

[150] ◆ R=Red Y=Yellow

[151] ▲ The mushroom guard has finger holes for push-pull and turn-to-release KR16 and SKR16 operators.

Potective Boots for Type K and SK Operators

Table 19.293: Protective Boots

For Non-Illuminated Push Buttons [152]		Clear Color for	Type [153]
Color	Type [153]		
Black	KU1	Standard knob selector switch	KU17
Red	KU2		
Blue	KU3		
Brown	KU4		
Green	KU5	Gloved-hand cap for use on standard knob selector switch	KU18
Yellow	KU6		
Clear	KU7		
Clear	KU8	Standard pilot light and maintained contact push buttons	KU27
(Provides Full Guard)		Push-to-test and illuminated push button without guard	KU37
		Illuminated push button with guard	KU47

NOTE: These Type KU protective boots are recommended for very dirty environments or severe hose down, but they are not required for UL Type 4 rating on the Type K operators or UL Type 4 or 4X rating on the Type SK operators. The K1 wrench (see Wrenches for Type K and SK Operators, page 19-101) is required for installation of these boots.

Closing Plates for Type K and SK Operators

Table 19.294: Closing Plates

 Round (1-1/2 in. Dia.)	Description	Type
	Gray	K51 [154]
	Black	K52 [154]

For Dimensions, see catalog 9001CT0001

[152] Use KU27 for maintained contact push buttons.
[153] When ordering, add prefix 9001 to the catalog number.
[154] Meets UL and NEMA 1, 2, 3, 4, 4X, 6, 12 and 13.

[155] When ordering, add prefix 9001 to the catalog number.

[156] Includes one each of the following color inserts: Black, Red, Green, Yellow, Orange, Blue, and White.

[157] The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR4 or SKR4.

[158] "EMERGENCY STOP" is in raised letters and hot stamped white across the front of the mushroom button.

[159] The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR5 or SKR5.

[160] The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR24 or SKR20 to form a 9001SKR24.

[161] The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR25 or a SKR20 to form a 9001SKR25.

[162] These color caps are opaque and are for use on non-illuminated operators only.

[163] Red knob with "Push Emergency Stop" marked on top of knob.

[164] Includes two of each of the following color inserts: Black, Red, and Green.

[165] May be used on KR8 and KR9 operators. Order mushroom button and K54 adapter. Using the K54 adapter voids Type 6 rating.

Ring Nuts for Type K and SK Operators

Knob for SK Potentiometer	3105404408
Fingersafe™ Cover for 9001KM	6508804101

Table 19.300: KU Replacement Ring Nuts (Threaded Inside and Out)

Used On	Part Number
KU1 through KU8, KU27, KU37, KU47	3105204101
KU17, KU18	3105205901

[166] When ordering, add prefix 9001 to the catalog number.

[167] Secondary ring nut (holds knob on selector switch or potentiometer).

[168] Maintained button of two button operator.

[169] Momentary button of two button operator.

[170] GE44 and GE755 are interchangeable (GE755 gives longer life). If a GE44 lamp is ordered, a GE755 (2550101020) will be substituted. For a replacement lamp in a current series light module, see *Standard and Shallow Depth Light Modules*, page 19-91.

[171] Allows Type -20 and -21 mushroom color caps to be used on push-pull operators. Use of 9001K54 voids Type 6 rating.

K3

K69

K95

K1

Interlock for Type K and SK Operators

For mechanically interlocking two push buttons so that only one button can be depressed at a time. A Type K3 attachment is furnished with the **9001 KR11, KR12, SKR11, SKR12, SKRU1 and SKRU11** operators. However, these are maintained operators and the **K3** interlock serves to release one of the buttons when the other is depressed. When used with momentary contact buttons, the **K3** interlock **does not** hold the buttons in the depressed position. It simply prevents pushing both buttons at the same time.

Table 19.301: Interlock

Description	Type
The Type K3 interlock is mounted behind the operators. Operators not included.	K3

NOTE: When ordering, add prefix 9001 to the catalog number.

Screwdriver for Type K and SK Operators

Table 19.302: Screwdriver

Description	Type
Used to tighten mounting screws on contact blocks and light modules.	K69

NOTE: When ordering, add prefix 9001 to the catalog number.

Wrenches for Type K and SK Operators

Table 19.303: Wrenches

Where Used	Type
For tightening ring nuts on 22 and 30 mm control units	K95
For tightening threaded protective caps	K1

NOTE: When ordering, add prefix 9001 to the catalog number.

Table 19.318: Maximum Number of Lines and Characters For Type KXN Legend Inserts

Letter Height		Number of ...	KXN199	KXN299 Horizontal	KXN299 Vertical	KXN399	KXN499	KXN599
in.	mm							
1/4	6	Characters per Line	7	7	3	7	7	3
		Lines per Legend Insert	4	2	4	1	1	1
3/16	4.75	Characters per Line	9	9	4	9	9	4
		Lines per Legend Insert	5	2	6	2	1	2
1/8	3	Characters per Line	14	14	5	14	14	6
		Lines per Legend Insert	8	4	9	3	2	3

All Type KX push buttons and pilot lights have a blank insert as standard. These blank inserts can be custom marked using a marking pen, a mechanical lettering set, press letters, or a tape lettering machine that marks a tape which can then be transferred to the blank insert.

To have legend inserts installed into the operators, order the operator as normal and then indicate where to install the legend inserts using the numbered positions shown on the operator ordered.

Example: 9001KXRL1GRGRH2 with a
9001KXN 401 in position 1
9001KXN 503 in position 2
9001KXN 504 in position 3
9001KXN 402 in position 4

[9] When ordering, add prefix 9001 to the catalog number.
[10] These legend inserts have vertical printing.
[11] These legend inserts are for the pilot lights in the center of the operator.
[12] These legend inserts are for the push button portion of the operator.

[13] Each KXAC28 includes a clear cover and 1 each of all colors. If the same color is required for position #1 and #2 of the KXPB operator, order 2 of Type KXAC28.

[14] When specifying color codes—the first will be installed in #1 and the second in #2.

[15] Each KXAC48 includes a clear cover and 1 each of all colors. If the same color is required for position #1 and #2 of the KXPC operator, order 2 of Type KXAC48.

[16] When specifying color codes—the first will be installed in #1, the second in #2, the third in #3 and the fourth in #4.

[17] Two required per operator. When ordering an assembled operator—specify two code numbers. The first code will be assembled into #1 and the second code will be assembled into #2.

1	1 Hole flush plate, cover screws, insulating liners	K25
2	2 Hole flush plate, cover screws, insulating liners	K26
3	3 Hole flush plate, cover screws, insulating liners	K27
4	4 Hole flush plate, cover screws, insulating liners	K28

[1] When ordering, add prefix 9001 to the catalog number.

[2] Only KN200 series legend plates will fit upright on these enclosures with their long axis vertical.

[3] Includes 1" NPT threaded conduit opening.

[4] To be used with a standard 2 x 3 in. general purpose switch box. A 2.5 in. deep switch box should be used if two Type KA contact blocks are mounted side by side. If two Type KA contact blocks are mounted in tandem, a 3.5 in. deep box should be used.

[5] Uses 9001K metal operators and metal legend plates.

[6] Control Station consists of components that are UL listed for use in Class 1, Division 2, Groups A, B, C, or D.

[7] Uses 9001K metal operators and plastic legend plates.

[8] Uses 9001SK plastic operators and plastic legend plates.

[9] Includes 1" NPT threaded conduit opening.

Point of Purchase—PoP Products

Schneider Electric has recently expanded its line of Point of Purchase Blister Packs, comprised of 36 popular products, including: push buttons, pendants, signaling and relay devices. These blister packs are conveniently packaged with all the associated components and accessories that you'll need to complete your installation. Point-of-Purchase packaging makes it easy for you, so you can just grab what you need and go!

Tower Lights For Customer Assembly (up to 5 units)

Tower Lights

The XVU tower lights are customer assembled products comprising:

1	Top cover (black or silver)
2	Buzzer unit (black or silver) ^[12]
3	Illuminated units: ^[13]
3.1	LED illuminated units with steady or blinking light signaling (colors: green, red, orange, blue, white, or yellow)
3.2	Multi-color LED unit (colors: green, red, orange, blue, white, or yellow. Patterns: steady, blinking, flashing, or rotating)
3.3	Pulse signal multi-color LED unit (colors: green, red, orange, or blue. Patterns: steady, blinking, flashing, or rotating) ^{[14][15]}
4	Sound units
4.1	Sound unit
4.2	Sound unit, plus signal ^[15]
5	Extender unit (black or silver)
6	Base unit, DC (black or silver)
7	Base unit, AC (black or silver)
8	Flexible mounting unit
9	Direct mounting plate (black or silver)
10	100 mm/3.927 in., 400 mm/15.748 in., or 800 mm/31.496 in. pole with integrated mounting plate (black or silver for 100 mm pole, and black for 400 mm and 800 mm pole)
11	Adjustable height pole from 210 to 385 mm/8.268 to 15.157 in. ^[16] with integrated mounting plate
12	100 mm/3.927 in., 250 mm/9.842 in., or 400 mm/15.748 in. pole with metal bracket (black)
13	Mounting plate for use on vertical support (black) ^[17]
14	1/2" NPT conduit adapter for customer supplied tubing

Composition

- XVU tower lights are customer assembled signaling units that are mounted vertically or horizontally with the support of a mounting accessory.
- Maximum of 5 illuminated units or 4 illuminated units with 1 audible unit can be assembled. The illuminated or audible unit^[18], stack vertically.
- With the indicator marks on these units they can be easily assembled.
- Electrical connections between each unit are made automatically as they are mechanically assembled.
- The signaling units are identical in size and their positioning is unrestricted.

Mounting

- Horizontal mounting: Fixed into support panel with direct mounting plate, poles or adjustable height pole with integrated mounting plate
- Vertical mounting: Fixed into support panel with mounting plate using pole with metal bracket or mounting plate for use on vertical support
- Horizontal or vertical mounting: Fixed into support panel with mounting plate using flexible mounting unit
- Mounting plate with aluminium 1/2" NPT adapter.

Cabling

By means of spring cage connection terminal block incorporated in mounting unit (Direct mounting plate, pole with plate, adjustment pole)

- [12] Always mounted on the top .
 [13] Up to 5 LED illuminated units without sound unit; Up to 4 LED illuminated units with sound unit .
 [14] Pulse signal multi-color LED unit cannot be combined with standard sound unit (XVUC9V).
 [15] Up to 4 illuminated and sound units when pulse signal technology is used.
 [16] Only for DC body unit.
 [17] Compatible with XVUZ02, XVUZ02Q, XVUZ03, XVUZ400, XVUZ800, and XVUZ05.
 [18] Sound unit cannot be combined with buzzer unit at the same time.

Magelis HMIs [28]

XVGU Multi-color USB Tower Lights

The monolithic USB tower lights of the Harmony® XVGU range supports Magelis HMIs [28]. These tower lights with multi-color LEDs are unique and simple-to use as the states and patterns are directly set and modified in the HMI application.

The XVGU tower lights provide long distance indication of the operating status or sequences of a machine or installation, both visually by illuminated signaling units with 360° visibility, and audibly by a buzzer.

- The tower light comes with a pre-assembled USB cable for simple wiring and easy integration with the Magelis HMIs [28] [29]
- The tower light settings are selected from the Set screen of the HMI application at the time of integration.
 - The multi-color LEDs on the three levels can be set to numerous color combinations (red, orange, green or blue) for sophisticated signaling.
 - The 2-tone buzzer volume and alarm type (4 pre-recorded types) can be set easily.
- The tower lights allow to optimize your equipment: many customized configurations can be made from a sole product.
- The range involves Ø 60 mm/2.36 in. products and is therefore ideal for use in many activity sectors (textiles, packaging, baggage handling). It is also ideal for use with metal tools, plastic extrusion machines and assembly lines. This range is only for indoor applications

NOTE: Signaling colors correspond to a combination of 4 colors (red, orange, green, and blue) which can be set easily in the HMI application.

Table 19.371: Pre-assembled tower lights — 5 V, 60 mm/2.36 in. Dia.

Harmony eXLhoist

Presentation

The Harmony eXLhoist range of wireless remote control systems provides complete innovative crane operator control solutions to help improve machine and crane operator efficiency, protect people and equipment, and reduce installation and maintenance downtime.

The XARS remote control system is a combination of remote control device (or transmitter: XART) and base station (or receiver: XARB), which transmits commands and information from the operator to the machine and vice versa by wireless transmission.

The XARS system offers movement in 3 directions (for example: hoist, bridge, and trolley) at 2 speeds (low and high) for each movement.

The 2 modes available in the system are:

- Single mode: The remote control device controls one base station.
- MBC mode^[1]: The remote control device controls 2 base stations simultaneously.

Radio Communication

Each base station has a unique identification code^[2] managed by Schneider Electric. The radio communication frequency is 2.4 GHz and automatic frequency hopping allows up to 50 systems to run at the same time in a 100 x 100 m/328 x 328 ft area.

eXLhoist Configuration Software

Free software with a graphic user interface can be downloaded by the customer to configure the remote control station. This software has a standard Windows® interface. The configuration file is password protected and can be used to configure the following parameters:

- Base station pairing to the remote control device
- Relay-pushbutton assignment and interlocking
- Access and restart sequence
- Standby time-out duration
- Machine number assignment

Environment

Degree of protection:

- IP 65 for the base station
- IP 65 and NEMA 4 for the wireless control device

Product certification:

- For the base station: UL/CSA, CE, EAC
- For the wireless control device: UL/CSA, CE, EAC

Front label cover for ZART8LS push buttons	120 x 60 mm / 4.724 x 2.362 in.	ZARC705	0.005/0.011
Rubber protection cover for ZART8LS	Rubber material, black	ZARC706	0.107/0.24
Shoulder belt to support ZART8LS	Nylon material, black	ZARC707	0.130/0.29
Added features card ^[7]	Analog input modbus serial line card (Field bus communication analog card)	ZARCFBA01	0.144/0.317
Network communication card ^[7]	Sigfox connectivity (Preventive maintenance data gateway)	ZARCIOT01	0.05/0.110

^[6] This accessory can be used to increase the radio range in severe environment conditions.

^[7] Compatible only with XARS12D18W, XARSK8D18W, ZARB12W, ZARB18W, ZARB18WM, ZARB12WR, ZARB18WR, ZARB18WRM base stations are not compatible with ZART8L remote control device.

Type BW Pendant Stations and Accessories

This pre-assembled, two-button station now comes complete with internal and external strain relief. Oversized finger grips on the rear of the enclosure make it easy to grip and operate.

- Well suited for standard hoist applications
- Push button legend inserts
- Field-installable mushroom button
- Full cover gasket, to exclude harmful contaminants

[9] Maintained Contact

[10] Order must specify a quantity of 10 or multiples of 10.

[11] OSHA Regulation, Section 1910.70, Overhead and Gantry Cranes, limits the voltage of pendant push buttons to 150 Vac or 300 Vdc.

XAC Pistol Grip Stations and General Purpose Pendants

XAC pendant stations are designed for standard- or medium-duty control circuit applications.

- Single- or two-speed versions
- Double insulated
- Shock and corrosion resistant
- 2, 4, 6, 8, 12 element versions
- Ease of operation

Use this worksheet to assist in component selection. Custom orders for XACA pendant stations must be placed through the Product Selector in Quote to Cash. There is a 10% charge for assembly.

XACA Order Guide Instructions

Custom built pendant stations

1. Determine the number of operators needed, then choose an enclosure with a corresponding number of holes.
2. Select the type of operator, contact block, and appropriate nameplate for each function required.
3. Check for special functions that may be required. These items could include mechanical interlocks, adapters for self-supporting cable, lower support rings, protective guards, etc.

Pendant Station Application and Ordering Information

This line of pendant stations consists of polymeric enclosures (2 through 10 units), push button units (1 through 5 speed) and laminated legend plates. All enclosures have an extra single unit space near the top which permits the installation of a toggle switch, a Type SK operator or pilot light, or a warning label. All enclosures come with a stainless steel hanger bracket and internal strain relief post. Enclosures are yellow and have a threaded opening in the top.

	Off-On	SKN144
	Specify Marking	SKN199 ③
	Specify Marking (Red Background)	SKN199R ③

① Available as 9001SKSTS1

② Includes legend plate, gasket and ground plate to be used with toggle switch.

③ Tri-laminated legend plate having a yellow or red background on a black core.

④ 19 characters each side.

▲ Class 9001 Type SK Push-To-Test Pilot lights and Remote Test Pilot lights will not fit in these enclosures.

Space for toggle switch ①, a Type SK operator or pilot light, or a warning label. Use SKN-5 or SKN-1 legend plates.

Type SKRU1 through SKRU11 operators or Type SK operators and Type SKN-2 legend plate.

Heavy Duty Industrial Foot Switches—Oiltight, Watertight, Dusttight and Driptight Enclosure, NEMA 2, 4 and 13

⚠ DANGER

HAZARDOUS APPLICATIONS

Do not use foot switches on machines without point-of-operation protection.

Failure to follow these instructions will result in death, serious injury, or equipment damage.

AW2
Type AW Foot Switch with
Top Pedal Shield and Side
Shields

AW132
Type AW with Oversized
Pedal Shield and Side Shields

AW117
Type AW with Oversized Pedal
Shield, Side Shields and Safety Door

AW1
Type AW Foot Switch
without Pedal Shield

AW124

Type AW Fully Shielded Foot Switch with Oversized Pedal Shield, Side Shields and Safety Door. The Safety Door is interlocked with the pedal to prevent operation due to shock or vibration. It prevents accidental pedal operation by requiring a simple but intentional motion to lift the door before inserting the foot.

Operating Temperature:
-30 to +60 °C (-22 to +140 °F)

Foot Switch Selection

Foot switches are used to control many industrial processes, while leaving the operator's hands free to perform other functions. The type or model of foot switch suitable for each application will vary depending on factors such as the control function required, degree of protection required, production methods, unusual conditions, government regulations, etc. In some applications more than one foot switch may be required, as when two or more persons are operating a machine. In these cases, safe practice and regulations require that the foot switches be wired in series making it necessary that each operator's foot switch be actuated before the machine will cycle.

Only the user can be aware of all the conditions and factors present during setup, operation and maintenance of the machine; therefore, only the user can determine which foot switch(es) can be properly used. When selecting a foot switch for a particular application, the user should refer to the applicable ANSI standards and OSHA regulations. The National Safety Council's Accident Prevention Manual also provides much useful information.

In some applications, such as power presses, additional operator protection such as point-of-operation guarding must be provided when a foot switch is used as an actuator. This is necessary since the operator's hands and other parts of the body are free to enter the pinch point area and serious injury can occur. The shielding provided on foot switches cannot protect an operator from injury. For this reason the foot switch cannot be substituted for or take the place of point-of-operation protection.

A Trilingual Danger Sign regarding the need for point-of-operation protection is supplied with each foot switch. The sign incorporates three languages: English, Spanish and French. Additional copies of the sign are available by contacting your Square D sales office.

Table 19.404: Foot Switch Catalog Numbers [1]

Description	Features	Fully Shielded with Oversized Pedal Shield, Side Shields and Safety Door	With Oversized Pedal Shield and Side Shields	With Pedal Shield and Side Shields	UNSHIELDED (See Warning note(2))

Class: 3211-03

For **replacement parts** for Class 9002 Type AW: See instruction bulletin 65013-010-31.
Also see Table 19.406 Contact Symbol—Two Stage, page 19-140 and Table 19.407 Contact Symbol—Four Stage, page 19-140.

- [1] When ordering, add prefix "9002" to the catalog number.
- [2] **WARNING:** These foot switches must not be used to operate machines or equipment where the possibility of operator injury exists. Typical uses include Emergency Stop functions, "Dead Man" controls, signal functions (lights, bells, etc.).
- [3] A single pole snap switch that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity. A double pole snap switch contains two electrically separated sets of contact elements allowing use on circuits of opposite polarity. Each set that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity.
- [4] 2 N.O. and 2 N.C. isolated, direct acting contacts.
- [5] For replacement cover drilled to accept latch. For Series C foot switches order AC9. No replacement cover available for Series A or B devices drilled to accept latch. AC8 is spring return only.

Instructions for 9003K2 Key Sheet

The Key Sheet for ordering a 9003K2 cam switch is on [page 19-143](#), and an example of a completed key sheet is on [page 19-144](#). The instructions below are for filling out the key sheet on [page 19-143](#).

1. Select the box for K2 (20 A).
2. Identify the Product quantity in the box provided.
3. Verify front mounting by selecting the box: Front Mounting.
4. If ordering a base/contact block only, select 22 mm plastic or 22 mm metal mounting. Then complete the following:
 - a. ③ Switching Angle (positions)
 - b. ④ Contact scheme and jumpers (pre-wired)
5. If ordering a complete switch (base/contact block, head, legend), check the box. Then complete the following:
 - a. ① Operating head preference
 - b. ② Legend preference
 - c. ③ Switching angle (positions)
 - d. ④ Contact scheme and jumpers (pre-wired)
6. Operating head preference ① (identify the operating head preferred)
7. Legend preference ② (identify the legend preference)
8. Switching angle (positions) ③ and special legend marking
 - a. Identify whether the switch need is 30° or 60°, or 45° or 90° switching angle.
 - b. Fill in the legend markings desired at the positions indicated. Zero degrees is always straight up.
9. The rotation of the operator stops clockwise at the top or 0° position. If full rotation through 360° is desired, the Full rotation through 360° box must be checked.
10. Contact scheme and jumpers (pre-wired) ④
 - a. If jumpers are desired to be pre-wired, draw a horizontal line between the terminals to be jumpered per the example on [page 19-144](#).
 - b. Refer to the Legend at the bottom of [page 19-143](#) for contact sequences, i.e.: X indicates contact closure. See [page 19-144](#) for examples of filling in this portion of the key sheet.

	M12 (4-pin)	XZCP1965L2	XZCP1865L2
		XZCP1965L2	XZCP1865L2

[1] For a 5 m cable, change L2 to L5. For example, XUMB5APANL2 becomes XUMB5APANL5.

[2] For version with NPN output, change "P" to "N". For example: XUB1APANL2 would become XUB1ANANL2.

[3] These sensors do not incorporate overload or short-circuit protection. A 0.4 A fast-acting fuse should be connected in series with the load.

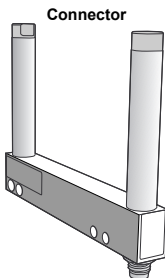

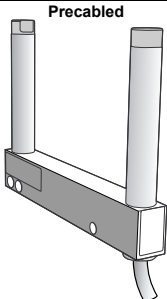

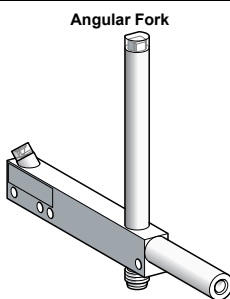

[4] A 50 x 50 mm reflector XUZC50 is included with a polarized retroreflective system.

[5] Includes a thru-beam transmitter and receiver.

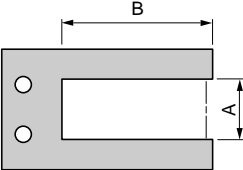

[6] For 5 or 10 meter lengths, replace 2 in the cable catalog number with 5 or 10.

Table 21.2: Ambient Temperature Ranges

Type	Low Temperature	High Temperature at Full Rated Load
9007 C		
Lever Type	-20 °F (-28.9 °C)	+185 °F (+85 °C)
Plunger & Wobble Stick Type	0 °F (-17.8 °C)	+185 °F (+85 °C)
9007 FT [3], T	-10 °F (-23 °C)	+185 °F (+85 °C)
HL100/HL300	0 °F (-17.8 °C)	+350 °F (+177 °C)
L100/L300	0 °F (-17.8 °C)	+200 °F (+93 °C)
9007 MS/ML	-4 °F (-20 °C)	+221 °F (+105 °C)
XCKJ, XCKL, XCKP, XCKT	-13 °F (-25 °C)	+158 °F (+70 °C)
XCMN, XCKN, XCNR	-13 °F (-25 °C)	+158 °F (+70 °C)
XCKS	-13 °F (-25 °C)	+158 °F (+70 °C)
XCMD	-13 °F (-25 °C)	+158 °F (+70 °C)

Some switches are available with higher or lower temperature limits, by selecting special versions or special options. Refer to the respective product sections for further information.
(Ex.: 9007MS/ML, see page 21-9.)

Table 21.3: Sealing

Type	Material
Standard shaft seals on lever types	Fluorocarbon rubber (FKM)
Plunger and wobble stick boots	Neoprene; Fluorocarbon optional
All other seals	Nitrile (Buna N); Fluorocarbon optional
R.B.Denison™ L	PVC
Shaft seal	Nitrile (Buna N)
Cover gasket	Nitrile (Buna N)
Base plate gasket	Cellulose fiber laminate
XCKJ, XCKL, XCKS	Nitrile (Buna N)
XCMD, XCKD, XCKP, XCKT, XCKN, XCNR	Nitrile (Buna N) and silicon

Table 21.4: Electrical Contact Ratings

AC—NEMA A600						DC		
V	Max. Current—35% Power Factor					Maximum Current		
	Make	Break	Continuous Carrying Amperes			Make or Break	Continuous Carrying Amperes	
A	VA	A	VA			A	VA	
120	60	7200	6	720	10	125	1.1/0.55 [4]	138/69 [4]
240	30	7200	3	720	10	—	—	—
480	15	7200	1.5	720	10	250	0.27	67.5
600	12	7200	1.2	720	10	600	0.10	60
								2.5

Table 21.5: Contact Function Diagrams

A=Maximum travel of the operator in mm or degrees.
B=Tripping travel of the contact.
C=Reset travel.
D=B-C-Differential travel.
P=Point from which positive opening is assured

**Make-before-break (overlapping) SPDT**

The normally open contact closes before the normally closed contact opens.

Break-before-make (offset) SPDT

The normally closed contact opens before the normally open contact closes.

Simultaneous make and break—SPDT

The normally closed contact opens at the same time as the normally open contact closes.

Table 21.6: Wiring Diagrams

												
Form A	Form B	Form C	Form AA	Form BB	Form CC	Form X	Form Y	Form Zb	Form Z	Form XX	Form YY	Form ZZ
SPST-NO	SPST-NC	SPDT	DPST-NO	DPST-NC	DPDT	SPST-NO-DB	SPST-NC-DB	SPDT-DB Isolated Contacts	SPDT-DB	DPST-NO-DB	DPST-NC-DB	DPDT-DB

[1] Enclosure ratings are NEMA 1, 2, 3, 4, 6, 6P, 12, and 13 except for option 21 (low force) which is NEMA 1 only. The 9007 MS/ML05 (omni-directional operation) enclosure ratings are NEMA 1, 2, 12, and 13

[2] For indoor use only—not UV protected.

[3] The Type FT will withstand hot falling sand up to +300°F (+149 °C); however, ambient temperature for the FT switch is the same as the Type T above (+185 °F, +85 °C). **Do not use in higher temperature ambients.**

[4] Type C52 compact unit ratings at 125 Vdc—same ratings as C54, CF53 and CR53 at other voltages.

Contact Configurations

Contact Configurations—Direct opening contacts meet IEC 60947-5-1 requirements.

For contacts used in safety applications (end of travel, emergency stop device, etc.) the assurance of direct opening is required (see IEC 204, EN 60204, or NF C 79–130) after each test. The opening of the contact must be verified by testing with an impulse voltage (2500 V).

Table 21.7: Maximum Current Ratings for Control Circuit Contacts—All Types

Symbols for Direct Opening	 Simplified Version	 Complete symbol

NOTE: Alternate Current Ratings—Several product lines offer special versions or options with alternate contact configurations or contact materials, which may result in current ratings that differ from those listed above. Refer to the respective product sections for further information.

Industrial Snap Switches Without Enclosures

Type AO2

Type AB21

Type AP222 with 2358C22G6 mushroom button

Industrial snap switches have been incorporated in many Square D products such as timers, specialty push buttons, foot switches, operating mechanisms, door interlocks, motor control centers, limit switches, and many other control products.

Recommended Actuator: An adjustable actuator is recommended. If nonadjustable actuator is used, a resilient type or a mechanical stop should be used to prevent "bottoming" of button mechanism.

Adjustable Actuator Overtravel: Minimum recommended overtravel in both trip and reset directions is 0.015 in.

Adjustable Actuator Total Travel: Maximum differential limit plus 0.030 in. (Example: 0.076 in. for Type AO2.)

Nonadjustable Actuator Total Travel: Fully retracted—at least 0.139 in. for Type AO1 and 0.160 in. for Types AO2 and CO3 from mounting surface. Fully engaged—at least 0.061 in. but not closer than 0.045 in. from mounting surface.

Contact Configurations: Single-pole snap switches that contain two double-break contact elements (1 N.O. and 1 N.C.) must be used on circuits of the same polarity. Double-pole snap switches contain two electrically separated sets of contact elements allowing use on circuits of opposite polarity. Each set contains two double-break contact elements (1 N.O. and 1 N.C.) that must be used on circuits of the same polarity.

Miniature MS Limit Switch

9007MS

The heavy-duty, miniature MS limit switch is completely encapsulated and intended for difficult applications such as machine tools, earth moving equipment, and general transportation. 9007MS04S0084

The switch has 40 mm mtg hole centers.

Lever

Table 21.14: Style 7 Levers—0.75 in. (19 mm) diameter, nylon or steel roller (9007 prefix is not required on lever catalog numbers)

Length		Catalog Number 1/4 in. (6 mm) Wide		Catalog Number 1/2 in. (13 mm) Wide		Catalog Number 3/4 in. (19 mm) Wide	Catalog Number 1 in. (25 mm) Wide
inch	(mm)	Nylon	Steel	Nylon	Steel	Nylon	Nylon
0.875	(22.23)	7A2N	7A2	7B2N	7B2	—	—
1.375	(34.93)	7A3N	—	7B3N	—	7F3N	—
1.5	(38.10)	7A1N	7A1	7B1N	—	7F1N	7J1N
1.75	(44.45)	7A7N	—	—	—	—	—
2.00	(50.8)	7A4N	—	7B4N	—	7F4N	7J4N

NOTE: Lever tightening torque for mounting the lever on the shaft: minimum **17 lb-in.**
Other levers available. See catalog 9006CT1007. For inside (reverse) roller option at no charge, replace 7 with 7X (for example: 7A2N changes to 7XA2N).

Table 21.15: Specialty Arms (9007 prefix is not required on lever catalog numbers)

Description	Catalog Number
Style 7D adjustable length 1-3/8" to 3-3/8"—0.75" diameter, 1/4" wide, metal roller	7D
Style 7DN adjustable length 1-3/8" to 3-3/8"—0.75" diameter, 1/4" wide, nylon roller	7DN
Style 7S spring nylon, 6" rod, 0.3" diameter	7S
Style 7N nylon rod, 5" long, 0.3" diameter	7N

NOTE: Lever tightening torque for mounting the lever on the shaft: minimum **17 lb-in.**

Male plug (face) pin-outs

Option 54 (MS only)—DC

Option 55 (ML only)—DC

Option 12 (MS only)—AC or DC (3 Amps)

Option 82 (MS only)—AC

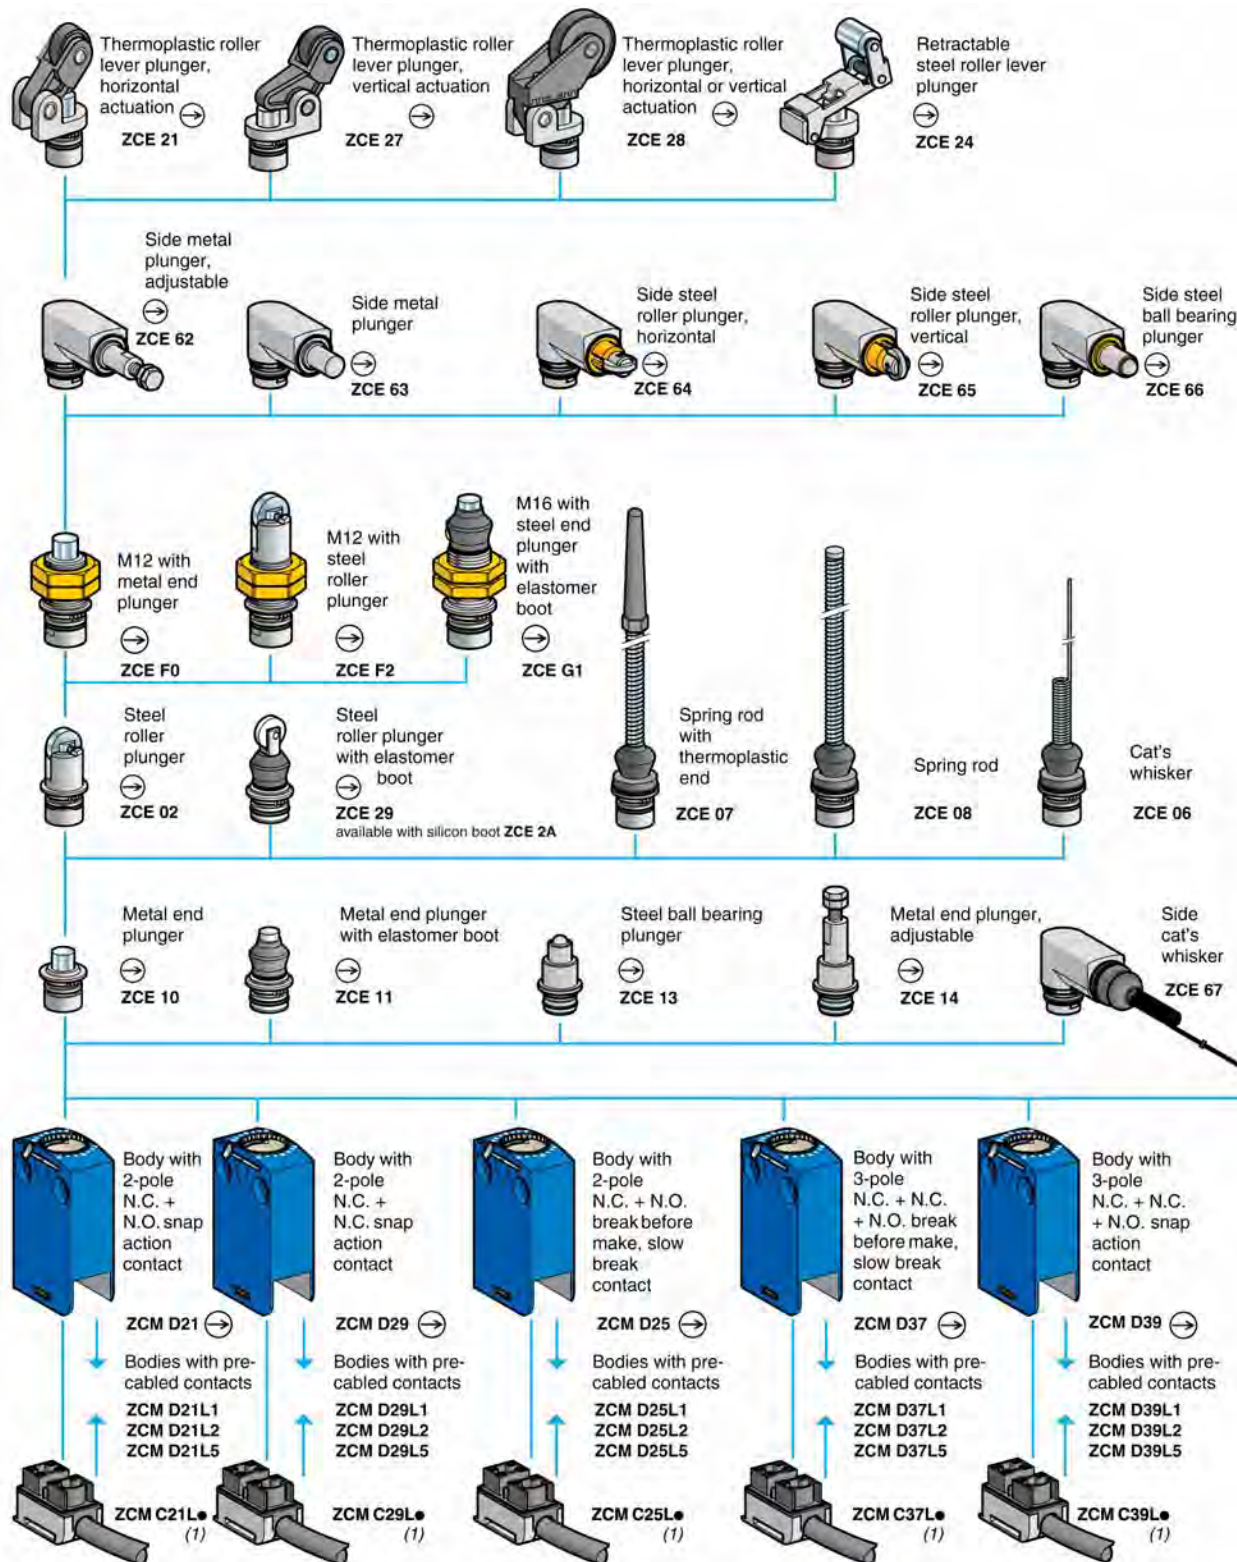

Option 84 (MS only)—AC

NOTE: DC connectors are rated 3 A, 250 Vac/Vdc.

[3] See available options below. Add to the end of the catalog number. Up to three options may be added, if applicable.
[4] This catalog number is for devices with a standard cable and no options. See page for other cable length selections and general options.
[5] See available options below. Add to the end of the catalog number. Up to three options may be added, if applicable.
[6] Use with options 54, 55, and 82.

Overview — Metal

1. Pre-cabled connection components: replace the bullet (•) in the catalog number with the required cable length in meters, either 1, 2, 3, 5, 7 or 10.
Example: ZCMC21L• becomes ZCMC21L7 for a 7 m (23.0 ft) cable.

Note: only cable lengths of 1, 2 and 5 m (3.3, 6.6, and 16.4 ft) are available for pre-cabled connection components ZCMC37L• and ZCMC39L•.

Dimensions: mm (in.)

Overview — Metal and Plastic

1. For further details, see catalog 9006CT1007.

Dimensions: mm (in.)

1. For further details, see catalog 9006CT1007.

Approvals		UL, CSA, CCC
Ambient air temperature	For operation	-25 to +70 °C (-13 to +158 °F)
	For storage	-40 to +70 °C (-40 to +158 °F)
Vibration resistance	Conforming to IEC 60068-2-6	25 gn (10–500 Hz)
Shock resistance	Conforming to IEC 60068-2-27	50 gn (11 ms)
Electric shock protection		Class II conforming to IEC 61140 and NF C 20-030
Degree of protection		IP65 conforming to IEC 60529 ; IK03 conforming to EN 50102
Repeat accuracy		0.05 mm on the tripping points, with 1 million operating cycles for head with end plunger
Cable entry	Depending on model	Tapped entry for PG 13 conduit thread. To convert to 1/2" NPT, use adapter DE9RA1212 . For ISO M20 x 1.5, add H29 to the end of the catalog number. Example: XCKS101 becomes XCKS101H29 .
Materials		Plastic (body and head)

Overview — Metal, Variable Composition

- ⊕ Head assuring positive opening operation when used with a conforming lever.
 (1) Adjustable throughout 360° in 5° steps, or in 90° steps by reversing the notched washer.
 (2) Adjustable throughout 360° in 5° steps, or in 45° steps by reversing the lever mounting.

XCKL Limit Switch

XCKL is a compact, general-duty limit switch for applications such as machine tools and material handling.

XCKL110H7

Table 21.43: Specifications

Rated Power (conforms to IEC 947-5-1, duty categories AC15 and DC13)	
Temperature range	-13 to +158 °F (-25 to +70 °C) The minimum temperatures listed are based on the absence of freezing moisture or water.
Enclosure rating	NEMA Type 1, 2, 3, 4, 12 IP66
Vibration resistance	25 G (10–500 Hz), conforming to IEC 68-2-6
Shock resistance	50 G, conforming to IEC 68-2-27
Repeatability	0.002 in. (0.05 mm)
Cable entry	Standard: Pg 11 with DE9RA1012 adapter for 1/2" NPT conduit entry
Contact Characteristics	
Rated thermal current	10 A
Rated insulation voltage	300 Vac and dc (A300 and Q300)
Contact resistance (max.)	25 mW
Cable (max.)	2 x #16 AWG (1.5 mm ²) per terminal
Short circuit protection (customer supplied)	10 A fuse type SC. Outside U.S. use gl or N.

Complete Switches

Table 21.52: Levers (for use with ZCKG00 heads only—will not fit ZCKD heads)

Description	Size	Adjustment [5] Increments	Catalog Number
Delrin roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY11
Steel roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY13
Ball bearing roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY14
Adjustable length Delrin roller [6]	0.74 in. diameter, 0.2 in. wide, 4.2 in. long (max.)	5° or 90°	ZCKY41
Steel roller	0.74 in. diameter, 0.2 in. wide, 4.2 in. long (max.)	5° or 90°	ZCKY43
Steel rod, square [6]	1/8 in. side, 5.4 in. long (max.)	5° or 45°	ZCKY51
Fiberglass rod, round [6]	1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY52
Steel rod, round [6]	1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY53
Plastic rod, round [6]	1/4 in. diameter, 8.4 in. long (max.)	5° or 45°	ZCKY59
Fork, 2 track Delrin roller	0.9 in. diameter, 0.2 in. wide for ZCKE092	5° or 45°	ZCKY71
Coil spring lever [6]	4.41 in. (112 mm)	5° or 45°	ZCKY81
Spring rod lever [6]	7.05 in. (179 mm)	5° or 45°	ZCKY91

Acceptable Wire Sizes: 14–24 AWG

Recommended Terminal Clamp Torque: 13 lb-in

ZCKG00 Programming

The ZCKG00 head is field convertible to CW, CCW, or CW/CCW.

Reverse Lever Mounting

File:
78403
CCN:
NKCR

File:
LR25490
Class:
3211 03

[2] See page 21-28

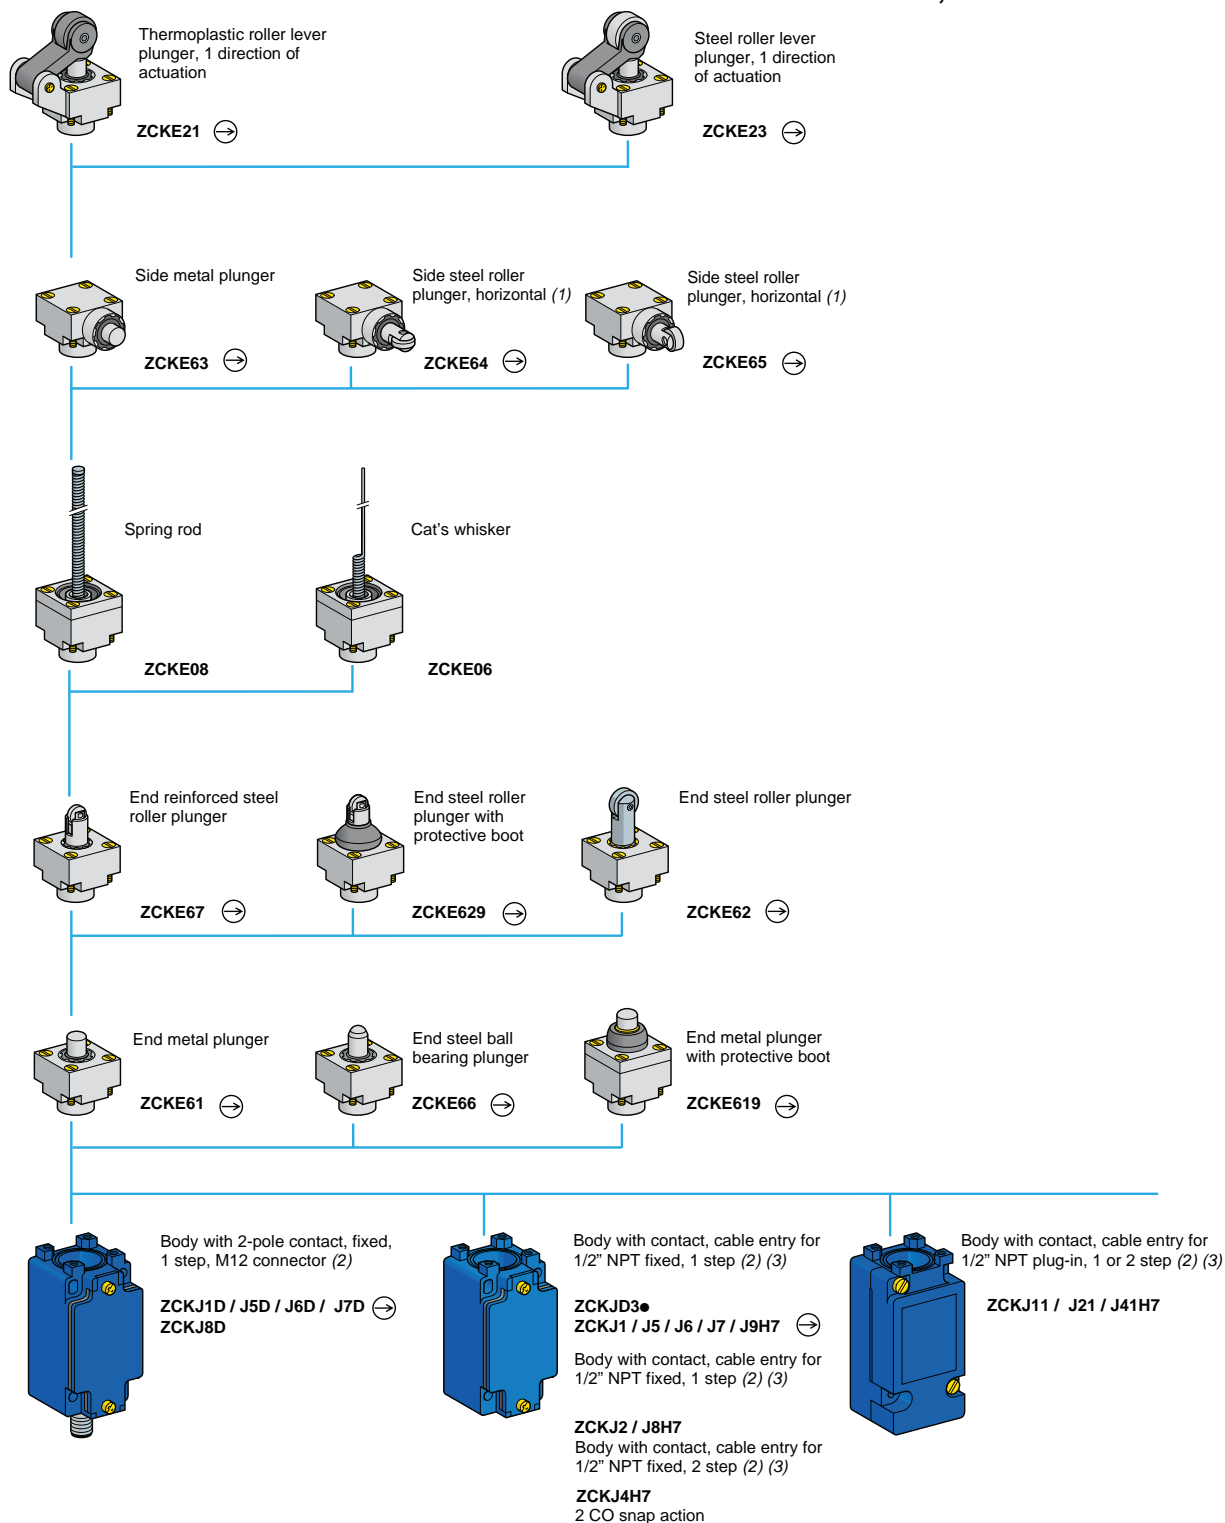

[3] Replacement arms are not available separately. Order complete head as a replacement.

[4] Replacement cat whiskers and wobble extensions are not available separately. Order complete head as a replacement.

[5] Reverse mounting (for ZCKG00 head)—The higher increment (45° or 90°) is a positive opening contact feature which ensures no loss of mechanical effort between the actuation point and the moving contact bridge of the N.C. contact even if the lever is loosely mounted on the head shaft.

[6] Flexible operators do not guarantee direct (positive) opening operation.

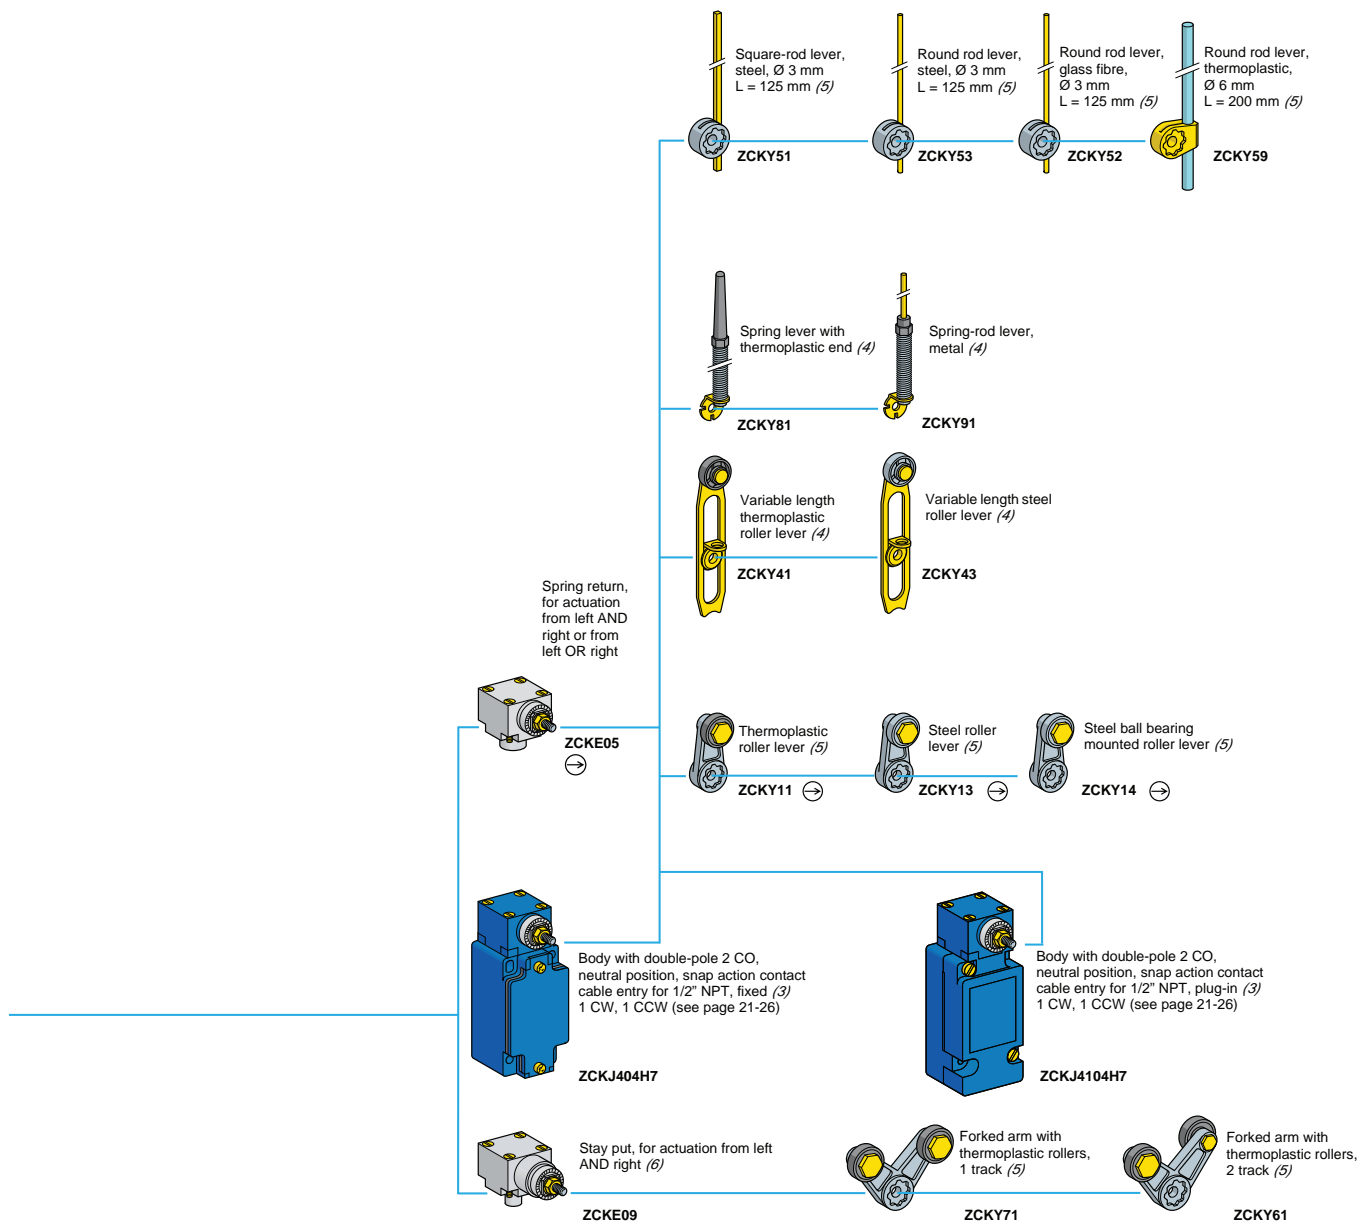

Overview — Standard Industrial, Metal

(1) Cannot be used with bodies ZCKJ4H7 and ZCKJ41H7.

(2) For further information, see page 21-27.

(3) For a cable entry tapped ISO M20 x 1.5, change H7 to H29. Example: ZCKJ1H7 becomes ZCKJ1H29.
For a cable entry tapped Pg 13.5, delete H7 from the catalog number. Example: JCKJ1H7 becomes ZCKJ1.

- ⊕ Head assuring positive opening operation when used with a conforming lever.
 (4) Adjustable throughout 360° in 5° steps, or in 90° steps by reversing the notched washer.
 (5) Adjustable throughout 360° in 5° steps, or in 45° steps by reversing the lever mounting.
 (6) Suitable for bodies with contacts ZCKJ1 / J2 / J31 / J39H7.

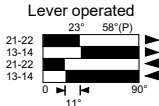

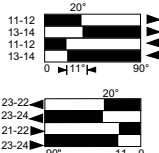

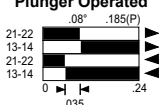

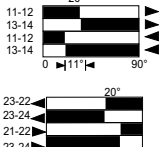

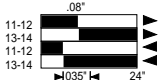

XCKJ Switches

XCKJ fixed body type precision switches with an SPDT configuration have direct opening contacts to meet most international standards.

Table 21.53: Specifications

Rated Power (conforms to IEC 947-5-1, duty categories AC15 and DC13)	
Temperature range	-13 to +158 °F (-25 to +70 °C); optional -40 to +248 °F (-40 to +120 °C). The minimum temperatures listed are based on the absence of freezing moisture or water.
Enclosure rating	NEMA 1, 2, 3, 4, 12; IEC Type IP66
Vibration resistance	25 G (10–500 Hz), conforming to IEC 68-2-6
Shock resistance	50 G, conforming to IEC 68-2-27
Repeatability (max.)	0.0004 in. (0.01 mm)
Cable entry	1/2" NPT standard
Contact Characteristics	
Rated thermal current	10 A, conforming to UL 508, CSA C22-2 No. 14, IEC 337-1, NFC 63-140, VDE 0660-200
Rated insulation voltage	Non-plug-in: 300 Vac (A300) and DC (Q300) Plug-in: 600 Vac (A600) and DC (Q600)
Contact resistance (max)	Non-plug-in: 25 m Ω Plug-in: 45 m Ω
Cable (max.)	2 x 16 AWG (1.5 mm ²) per terminal—1 x #16 AWG for 2 SPDT (2 N.O., 2 N.C.)
Short circuit protection	10 A fuse type SC; Form I Class J or equivalent. Outside US use type gl or N.

NOTE: CW = clockwise; CCW = counter-clockwise

Acceptable Wire Sizes: 12–22 AWG.

Recommended Terminal Clamp Torque: 7 lb-in (0.80 N•m)

Mode Change—Lever Arm Type

Mode of operation is easily convertible to clockwise, counterclockwise, or both. Simply point the arrow to the letters representing the desired direction—CW, CCW, or CW/CCW. All parts are captive.

Exploded view [page 21-36](#), Rotary Head Lever Arms, [page 21-37](#)Lever arms [page 21-9](#), [page 21-40](#), [page 21-41](#)Electrical ratings [page 21-5](#)Special features [page 21-41](#), [page 21-42](#)

[1] Can be converted to horizontal roller type in the field. To order horizontal roller version add the letter "H" at the end of the equivalent vertical roller version type number (Example: C54F would become C54FH).

[2] To lock the nut in the desired position, crimp the slot near the bottom of the nut.

[3] These devices are factory set to operate the contacts in both the CW and CCW directions. Mode of operation is field convertible to CW only or CCW only. To order factory converted devices—for CCW only operation, change the "2" at the end of the type number to "1" (Example: C54B2 becomes C54B1); for CW only operation, delete the "2" at the end of the type number (Example: C54B2 becomes C54B).

- 2 x 0.20/5 x 0.22/6 HLS.
- 2 x 10-24 Tapped HLS Back Mtg 0.29/7 DP.
- 1/2 14 NPT.

[10] Recommended in place of Types HA3 and HA7 lever arms with steel rollers. If necessary these arms can be furnished at an additional cost.

[11] Dimensions: 0.22 x 2.94 x 1.54 in.

Factory Modifications

Table 21.79: Special Features (do not apply to Type CR unless noted)—Not Field Installable, Except Where Noted

Special Features		Form
Hub	Optional Shaft Equipped With 9007T / 9007FT Hub: Any lever arm Type C, CF, or CR switch can be furnished with an optional shaft and hub combination which will accept the lever arms normally used with Type T and FT limit (position) switches. To order, add S9 as suffix to the device type number. For example, to order a 9007C54B2 with this modification, order as 9007C54B2S9. For details about the switches and lever arms that can be furnished with this modification, see catalog 9007CT1007.	 Add S9 as a suffix to the catalog number
	Hub Only: Can be field installed on any Type C lever type switch.	Cat. No. 9007S9
LED Pilot Light, 24–120 Vac or Vdc on Plug-In Type Switch (Type C52, C54, C62, C64, C66, or C68):		
	Addition of LED pilot light in parallel with N.O. contact (light normally on)	P5
	Addition of LED pilot light in parallel with N.C. contact (light normally off)	P6
	Addition of one isolated LED pilot light (light on when load is energized) (Type C54 only. Not available with Y1901.)	P10
	Pre-Wired Receptacle Single Pole Plug-in limit (position) switch with pre-wired mini 5 pin male receptacle. For use with Brad Harrison female portable plug No. 41306, 41307, or 41308 (or equal). (Not available with P10 or for hazardous locations.)	Y1901
Same as Y1901 but with different wire color coding		Y1905
Other versions with different wiring diagrams per automotive requirements are available. Contact your local Schneider Electric field office.		
Wiring Diagrams Form Y190__		
Mating plug and cables available.	Forms Y1901 Orange- 3 ● 4 -Red White- 1 ● 2 -Black Green-	 Form Y1905 White- 3 ● 4 -Black Orange- 1 ● 2 -Red Green-
Potted Limit (Position) Switch or Plug-In Receptacle Only: With Individual Wires <ul style="list-style-type: none"> Single pole plug-in limit (position) switch or receptacle pre-wired with five #16 wires 5 ft long and wire entry completely sealed with epoxy resin 		Y1841
With STOWA Cord <ul style="list-style-type: none"> Single pole plug-in limit (position) switch or receptacle pre-wired with five conductor #16 STOWA cord 8 ft long and wire entry completely sealed with epoxy resin Double pole plug-in limit (position) switch or receptacle pre-wired with nine conductor #16 STOWA cord 8 ft long and wire entry completely sealed with epoxy resin 		Y1851 Y1852

Low Temperature—Lever Types Only: Limit (Position) switch will operate in an ambient temperature range of -40 to +185 °F (standard limit switch ambient temperature range is -20 to +185 °F). Minimum temperature is based on the absence of freezing moisture or water.		Y128
Fluorocarbon Rubber (FKM) Gaskets And Seals Substitute fluorocarbon rubber gaskets and seals on: <ul style="list-style-type: none"> Lever arm type, standard box (shaft seals on lever arm types are fluorocarbon rubber as standard) Lever arm type, compact box (shaft seals on lever arm types are fluorocarbon rubber as standard) Plunger type, standard box Plunger type, compact box NOTE: Fluorocarbon rubber has been shown to resist sunlight aging problems.		Y140
Direct Acting Contacts [12] Substitution of direct acting contact unit for snap switch of single-pole switch: One pole, normally closed, slow-make slow-break, direct acting contact mechanism substituted for standard snap switch on Types C52, C54, CF53, and CR53 devices. This mechanism was designed for use in emergency overtravel applications. The movable contact of this basic switch unit is acted upon directly by the actuating mechanism of the limit switch—it does not depend on the force exerted by a snap-switch blade or a spring to open the circuit. Because these contacts are slow-make slow-break, they are best suited for applications where they are not actuated during normal operation, but only if abnormal overtravel is encountered.		 Direct Acting Contact Mechanism (shown without cover)

[12] The direct acting contacts described above come standard on the 9007CLS1 hoist overtravel switch.

Table 21.83: General Specifications

Temperature range	0 to +200 °F (-17 to +93 °C) standard. For high and low temperature options, see page 21-45 . Minimum temperatures are based on the absence of freezing moisture or water.
Enclosure rating	NEMA 1, 4, and 13; IP 65, 66
Vibration resistance	30G max. (10–55Hz)
Repeatability	0.03°
Cable entry	1/2" NPT standard double circuit, 3/4" NPT triple circuit
Contact Characteristics	
Rated thermal current	20 A
Rated insulation voltage	600 Vac and Vdc
Wire (max.)	1 x 12 AWG or 2 x 14 AWG per screw terminal

Table 21.84: Switching Ratings: A600 (AC), P600 (DC)

Contact Rating Designation (M=Make, B=Break)	Maximum current (A)												Maximum VA

[5] The lever must not be allowed to snap freely from any overtravel position.

Interpreting the Catalog Numbers

Use the table below to interpret the catalog numbers of the L100/L300 switches. Do **not** generate new catalog numbers from the table. If the required contact sequence is not listed, contact your local field office.

The only modifications to the existing catalog numbers are:

- Mounting Plates—Style 1, 2, 3 or 4
- Front Covers—Metal, transparent plastic, or transparent plastic with a neon light.
- Special Features—Select from catalog 9006CT1007 and add to the type number.

Style	Housing			Function		Mounting Plate	Front Cover		Contact Arrangement	
L	1	0	0	W	S	2	P	F		
Standard (mill)	100					1			See catalog	
Extra heavy duty (foundry)	300					2			9006CT1007	
Two circuit single operation				WS		3	M		Standard metal	
Two circuit dual operation				WD		4	PF		Transparent plastic	
Triple circuit				WT			GF		Transparent plastic with neon light	
Neutral				WN						

Table 21.86: Steel Roller Lever Arms (0.25 in. wide, 0.75 in. dia.)

Length (L)		Lever Number
in.	mm	
1.50	(38.1)	AA
2.00	(50.8)	AH
2.50	(63.5)	AO
2.75	(69.8)	AK
3.00	(76.2)	AB
4.00	(101.6)	AM
6.00	(152.4)	AR

**XMLG Pressure Transmitters**

XMLG pressure transmitters are characterized by their ceramic pressure-measuring cell. The deformation caused by the pressure is transmitted to the resistors of a Wheatstone bridge silk-screened on the ceramic. The change in resistance is then processed by the integrated electronics, providing an analog output signal.

Table 22.1: Specifications

Enclosure Rating	IP66, IP67 conforming to IEC/EN 60529, NEMA 4
Ambient Temperature (Operation)	-15 to +85 °C (+5 to +185 °F)
Media Temperature	-15 to +125 °C (+5 to +257 °F)
Precision (Linearity, Repeat Accuracy, Hysteresis)	Transmitters: <0.3%
Repeat Accuracy (PNP/NPN output)	0.1% of the measuring range
Current Consumption	Transmitters: < 20 mA
Maximum Load Current	Transmitters: < 20mA
Rated Voltage	12/24 V for transmitters
Voltage Limits	24 V for transmitters
Fluids Controlled	Hydraulic oils, air, fresh/sea water, corrosive fluids from -15 to +125 °C (+5 to +257 °F)
Materials in Contact with Fluid	Ceramic Al ₂ O ₃ , stainless steel type AISI 303, Viton® FPM, PPS (leakage protection for P> 40 bar)
Output Response Time	< 2 ms

Table 22.2: Interpretation of the Catalog Number (example: XMLG100D23TQ)

XMLG	100			D	2	3	TQ
Units without Display, 22.8 mm diameter	Rated Pressure Range			Electrical Connection	Output	Fluid Connection	Bulk Pack
	Code	psi	bar				
	M01	−14.5 to 0	−1 to 0	D: M12 Q: Integrated quick connect	1: DC Analog, 4–20 mA, shunt calibration 2: Analog, 4–20 mA 7: Analog, 0–10 V (bulk packs only) 11: DC Analog, 0–10 V shunt calibration	1: G 1/4 A (BSP male) 3: 1/4" NPT male 7: 7/16-20 UNF male	
	001	0 to 14.5	0 to 1				
	006	0 to 87.0	0 to 6				
	010	0 to 145	0 to 10				
	016	0 to 232.1	0 to 16				
	025	0 to 362.5	0 to 25				
	100	0 to 1450	0 to 100				
	160	0 to 2329.6	0 to 160				
	250	0 to 3625	0 to 250				
	400	0 to 5800	0 to 400				

NOTE: Use this table only to interpret the catalog number. Some combinations are not available.

Table 22.3: Selection

Rated Pressure Range		Fluid Connection	Electrical Connection	Catalog Number ^{[1][2]}	
				Analog Output, 4–20 mA	Analog Output, 0–10 Vdc
-14.5 to 0 psi	-1 to 0 bar	1/4" NPT Male	M12	XMLGM01D23	XMLGM01D73
0 to 14.5 psi	0 to 1 bar			XMLG001D23	XMLG001D73
0 to 87 psi	0 to 6 bar			XMLG006D23	XMLG006D73
0 to 145 psi	0 to 10 bar			XMLG010D23	XMLG010D73
0 to 232 psi	0 to 16 bar			XMLG016D23	XMLG016D73
0 to 362.5 psi	0 to 25 bar			XMLG025D23	XMLG025D73
0 to 1450 psi	0 to 100 bar			XMLG100D23	XMLG100D73
0 to 2320 psi	0 to 160 bar			XMLG160D23	XMLG160D73
0 to 3625 psi	0 to 250 bar			XMLG250D23	XMLG250D73
0 to 5800 psi	0 to 400 bar			XMLG400D23	XMLG400D73

NOTE: For units with a solid-state output, the settings must be specified for each order.

Table 22.4: Wiring Configurations (M12)

Output	Pin 1	Pin 3	Pin 4
Analog, 4–20 mA	+ Power supply	Output	—
Analog, 0–10 Vdc	+ Power supply	Output	Ground
Solid State, NPN	+ Power supply	Ground	Output
Solid State, PNP	+ Power supply	Ground	Output

UL E164865
CCN NKPZLR 44087
Class 3211-03

For wiring diagrams, refer to [page 22-5](#).

^[1] For devices with a switch output or 0–10 Vdc analog output, contact the Sensor Competency Center at 1-800-435-2121.

^[2] For a bulk package (25 units), add TQ to the end of the catalog number. The minimum order quantity is 50 units (two bulk packs). When ordering, specify the individual number of units, NOT the number of bulk packs. Minimum order quantity for factory ordered individual items (non-stock) is 50 pieces.

XMLK Pressure Transmitters

Type XMLK pressure transmitters are characterized by their ceramic pressure-measuring cell. The deformation caused by the pressure is transmitted to the resistors of a Wheatstone bridge silk-screened on the ceramic. The change in resistance is then processed by the integrated electronics to provide an analog output signal.

Table 22.26: Environmental Specifications

Enclosure Rating	IP65 conforming to IEC/EN 60529, NEMA 4
Ambient Air Temperature	For Operation 0 to +80 °C (32 to 176 °F) For Storage -25 to +85 °C (13 to 185 °F)
Precision (Resolution)	Combined sum of linearity, hysteresis, and repeat accuracy <± 0.5% of the measuring range Setting tolerance of zero point and measuring range limit < ± 1% of the measuring range
Repeat Accuracy	± 0.3% of the measuring range
Current Consumption	4–20 mA: < 20 mA 0–10 V: < 6 mA
Rated Supply Voltage	24 Vdc
Voltage Limits	4–20 mA: 8–33 Vdc 0–10 V: 16.2–33 Vdc
Fluids or Products Controlled	Air, fresh water (0 to +80 °C / 32 to 176 °F)
Materials in Contact with Fluid	Steel, type AISI 303 (stainless steel) nitrile (NBR)
Output Response Time	< 2 ms

Table 22.29: Wiring Configurations (M12)

Output	Pin 1	Pin 3	Pin 4
Analog, 4–20 mA	+ Power supply	Output	—
Analog, 0–10 Vdc	+ Power supply	Output	Ground
Solid State, NPN	+ Power supply	Ground	Output
Solid State, PNP	+ Power supply	Ground	Output

For wiring diagrams, refer to page 22-5.

[9] For a bulk package (25 units), add TQ to the end of the catalog number. The minimum order quantity is 50 units (two bulk packs). When ordering, specify the individual number of units, not the number of bulk packs. Minimum order quantity for factory ordered individual items (non-stock) is 50 pieces.

XMLK Dimensions

For connectors and cables, see [XMLF Accessories](#), [Wiring Configurations](#), and [Electrical Connections](#), page 22-12.

XMLR and ZMLP Pressure Switches

XMLR and ZMLP are user-friendly electronic pressure switches with an easy-to-read four digit display and finger-operated adjustment buttons for scrolling up and down through the menu functions. Burst pressure is six times the nominal pressure (up to 1,800 bar or 26,100 psi).

Configurable functions:

Display

- Pressure unit of measurement (bar, psi, kPa, or MPa).
- Display refresh time: fast (50 ms), normal (200 ms), slow (600 ms).
- 180° reversed display function.

Analog output (4–20 mA or 0–10 V):

- Offset compensation in the range of $\pm 5\%$ of the nominal pressure.
- Adjustment of analog end point between 75 and 125% of the nominal pressure.

Solid-state output

- NO or NC contact.
- Switching mode of outputs: Hysteresis (pumping) or Window (control).
- Time delay both on trip and on reset (adjustable from 0 to 50 s, in steps of 1 s).

Diagnostic functions

- Illumination of all the segments of the display on each power-up, enabling checking of their operation.
- Diagnostic function for checking correct operation of the sensor.
- Saving of min. and max. pressures measured by the sensor and their subsequent display.

Outputs change state when the pressure ranges outside the window settings.

Table 22.33: Specifications

Enclosure Rating	IP67 NEMA 4, 6, 12, 13
Ambient Air Temperature for Operation	DC Models: –25 to +80 °C (–13 to +176 °F) AC Models: –25 to +80 °C (–13 to +176 °F)
Media Temperature	–15 to +80 °C (+5 to +176 °F)
Precision	Analog Output $\leq 0.6\%$ of the measurement range, output offset <200 mV Digital Output $\leq 0.6\%$ of the measurement range
Repeat Accuracy (PNP/NPN output)	$\leq 0.5\%$ of the measurement range
Maximum Load Current	DC: 200 mA for 17–33 Vdc; AC: 2.5A AC15 C300

XMLD

XML Industrial Pressure Switches

XML industrial pressure switches meet IEC, Cenelec, UL, and CSA standards. They are CE marked.

- Fixed differential (XMLA), adjustable differential single-pole (XMLB) or double-pole (XMLC), and dual stage (XMLD)
- Range listed is on increasing pressure (psi, bar, kPa)
- External pressure setting window available
- 1 N.O.–1 N.C. snap acting contacts standard
- Temperature range: –13 to +158 °F (–25 to +70 °C)
- Enclosure rating: IP65 with plug-in connector, IP66 with terminal connections
- Operating rate: up to 120 operations / min. for diaphragm and 60 / min. for piston
- Media connection: 1/4" NPT
- Conduit connection: 1/2" NPT

Table 22.39: Specifications

Enclosure Rating	Operation	Screw terminal models: IP66 conforming to IEC/EN 60529; Connector models: IP65 conforming to IEC/EN 60529
Ambient Temperature	Storage	–25 to +70 °C (–13 to +158 °F)
Repeat Accuracy		< 2%
Fluids Controlled		Hydraulic oils, air, fresh water, 32 to 320 °F (0 to +160 °C), depending on the model Steam, corrosive fluids, viscous products, 32 to 320 °F (0 to +160 °C), depending on the model
Operating Rate (operating cycles/minute)		Piston version switches: up to 60 cycles/minute for temperatures above 32 °F (0 °C) Diaphragm version switches: up to 120 cycles/minute for temperatures above 32 °F (0 °C)
Operational Characteristics		AC-15; B300 (Ue = 240 V, Ie = 1.5 A; Ue = 120 V, Ie = 3 A) DC-13; R300 (Ue = 250 V, Ie = 0.1) conforming to IEC 947-5-1 Appendix A, EN 60 947-5-1
Type of Contacts		Silver tipped contacts XMLA & XMLB: 1 C/O single-pole contact (4 terminal), snap action XMLC: 2 C/O single-pole contacts (8 terminals), simultaneous snap action XMLD: 2 C/O single-pole contacts (8 terminals), staggered snap action
Resistance Across Terminals		< 25 mW conforming to NF C 93-050 method A or IEC 255-7 category 3
Terminal Referencing		Conforming to CENELEC EN 50013
Short-Circuit Protections		10 A cartridge fuse type gG (gl) recommended
Connection		Screw clamp terminals; Clamping capacity, min: 1 x 0.2 mm ² , max: 2 x 2.5 mm ²

Control Circuit Rated Type G Pressure Switches

Class 9012 single stage pressure switches are control circuit rated devices used in pneumatic or hydraulic systems on a wide variety of machine and process applications to protect the equipment and control or monitor the system pressure.

- Type G machine tool switches are available with NEMA Type 4, 4X, and 13 (IEC IP66) enclosure ratings.
- The NEMA 7 and 9 devices are UL listed for use in the following hazardous locations: Class I, Divisions 1 and 2, Groups C and D; and Class II, Divisions 1 and 2, Groups E, F, and G.
- Enclosure materials are cast aluminum.
- To ensure repeatability and minimize setting drift, pressure settings should fall within the middle 80 percent of the pressure range.

File: LR25490 Class 3211-03 G•W, G•O, G•G
File: LR26817 Class 3218-02 G•R

Complies with IEC 60957.5.1, 5C8.3.4 when protected with a Bussmann CCKTK-R-10 fuse.

[5] For metric threads, add **M** after the **W** on all types (offered at an additional cost).
To order a Pg13.5 electrical conduit entry and a 1/4"-19 BSP pressure connection, add M12 to the end of the catalog number, as well as adding "M" after "W" for metric threads. For example:
9012GAW1 = 1/2" NPT electrical conduit entry
9012GAWM1 = 20 x 1.5 mm electrical conduit entry
9012GAWM1M12 = Pg13.5 electrical conduit entry and 1/4"-19 BSP pressure connection.

[6] The differential adds to the range setting and determines the operating point on rising pressure.

9012GGW1

Differential/Dual Stage, Type G

Differential-Pressure Operation

Pressure switches for differential-pressure operation monitor the change in the difference between two pressures. Type G differential-pressure switches are used in applications to signal that a predetermined pressure difference has been reached as a result of a widening or increasing difference between the two pressures. They can also signal that a predetermined pressure difference has been reached as a result of a narrowing or decreasing difference between the two pressures.

Dual-Stage Operation

Type G dual stage pressure switches are designed for use in applications where two separate pressure operations must be controlled by a single pressure monitoring device. These controls are most commonly used where dual functions are required or in sequencing applications such as alarm, followed by shutdown.

9012GKW1

Ordering Dual-Stage Pressure Switches

- Specify Class 9012 Type..., and indicate the high or low operating point for each stage within the limits shown in the above table.

Example:

Class 9012 Type GKW4

Set: Stage 1 at 30 psi decreasing pressure

Stage 2 at 50 psi decreasing pressure

(20 psi spread)

Differential of each stage will be approximately as shown in the table above.

- For available modifications see page 22-21. If one or more of these modifications are desired, add the appropriate Form to the Class and Type. Arrange form letters in alphabetical order when ordering more than one modification.

24 Vdc only LED	For pilot light conversion kits: See 9998 PC-306–308. Complete Class and Type information required	G23
24 Vdc LED pilot light with green lens	Class 9012 GAW–GMW and GAWM–GFWM, or Class 9016 GAW and Class 9025G	H3
SPDT snap switch rated 1.1 A at 125 Vdc (minimum differential doubles)	Available on GAR–GFR, GAW–GJW, GAWM–GFWM	H10 or H11
Prewired 5-pin Brad Harrison male receptacle #41310 or interchangeable Crouse-Hinds receptacle. For use with Brad Harrison female portable plug #41306, 41307, 41308, or equivalent.	Available on GAW–GJW single pole devices only	H17
Micro connector, 4-pin, for 24 Vdc pilot light	G•W (single pole only), except GAW2 and Form B2.	K
External range adjustment (includes knob and range scale window)	GAW–GFW, GAWM–GFWM, GKW–GMW	K1
External range adjustment slotted for screwdriver (includes range scale window)	GAW–GFW, GAWM–GFWM, GKW–GMW	M12
Pg 13.5 conduit thread and 1/4–19 BSP pressure connection	G•WM only	Q1
Standard Nitrile (Buna-N) diaphragm in #316 stainless steel flange	Not available on Types 1 and 21. Available on all other GAR, GAW, GBR, GBW, GDR, GDW, GER, GEW, GAWM, GBWM, GDWM, GEWM, GGW, GHW, GKW, and GLW switches.	Q4
Viton® fluorocarbon diaphragm in #316 stainless steel flange	Not available on Types 1 and 21. Available on all other GAR, GAW, GBR, GBW, GDR, GDW, GER, GEW, GAWM, GBWM, GDWM, GEWM, GGW, GHW, GKW, and GLW switches.	V1
Range scale window (standard with Forms K and K1)	GAW–GMW, GAWM–GFWM	Y1
Special setting specified (If indicating only a fixed differential setting, specify whether this setting is on increasing or decreasing pressure.)	All 9012G	Z
1/4"-18 NPT external thread pressure connection	GAR, GAW, GDR, GDW, GGW, GKW Not available in combination with Forms Q1, Q3, Q4.	Z16
1/2"-14 NPT external thread, 1/4"-18 NPTF internal thread pressure connection	GAR, GAW, GDR, GDW, GGW, GKW Not available in combination with Forms Q1, Q3, Q4.	Z18
7/16"-20 UNF-2B internal thread pressure connection	GAR–GFR; GAW–GMW Not available in combination with Forms Q1, Q3, Q4.	

Table 22.62: Factory Modifications for Renewal Parts Kits for Class 9012 Pressure Switches

Suffixes for renewal parts kits, see page 22-34

Modification	Applies to Parts Kit Type	Form
SPDT snap switch rated 1.1 A at 125 Vdc (minimum differential doubles)	9998PC313	H3
Standard Nitrile (Buna-N) diaphragm in #316 stainless steel flange	9998PC177–179, 268, 269 9998PC265–267	Q1
Viton® fluorocarbon diaphragm in #316 stainless steel flange	9998PC177–178, 268, 269 9998PC265–267	Q4
1/4"-18 NPT external thread pressure connection	9998PC265–269	Z
1/2"-14 NPT external thread, 1/4"-18 NPTF internal thread pressure connection	9998PC265–269	Z16
7/16"-20 UNF-2B internal thread pressure connection	9998PC177, 178, 265–273	Z18

Table 22.63: Class 9049 Accessories for Class 9012 Pressure Switches

Description	Applies to Class	Type
Stainless steel surge reducer for use on oils, coolants, and hydraulic fluids (not recommended for air or water)	9012G	9049A26S

Type GAW—Sensitive Control Applications

9016GAW vacuum switches are provided with double throw contacts; normally open and normally closed circuits allow these controls to be used for standard or reverse action applications.

Standard devices can be mounted from the front with the bracket provided. Two mounting screws are required for a firm attachment to any smooth, flat surface. Allowance must be made for flange projection. Controls with Form F modification include two mounting feet with 9/32" mounting holes on 3-3/4" centers. Range and Differential adjustments are internal and exposed by removal of the front cover.

Maximum allowable positive pressure: 100 psig.

Diaphragms are oil resistant, nitrile butadiene (Buna N) rubber.

Electrical Ratings and Temperature Limitations—See page 22-17 for Type G machine tool.

Dimensions—See page 22-20.

FHG Pressure Switch Selection and Features

Class 9013 Type FHG pressure switches are designed for the control of small electrically driven air compressors.

- Contacts open on pressure rise.
- Diaphragm actuated.
- For application data, see [page 22-19](#).
- For repair parts kits, see [page 22-34](#).

Ordering Information

- Specify Class 9013 Type FHG.
- Select pressure code from the table entitled Pressure Code (fixed differential) on the left side of the page, and add the code designation to end of the Type number. Ensure that the pressure rating of the code falls within the limits of the device as shown in [Table 22.72](#), [page 22-23](#).
- To order special features as shown in [Table 22.71](#), add the appropriate Form designation to the Class and Type. Arrange Forms in alphabetical order when specifying more than one feature or modification. Accessories: [page 22-26](#)

[1] Some product configurations are not available—contact your Schneider Electric representative for details.
[2] For bulk package quantities and Form numbers, see on [page 22-24](#). If a Form is not specified, devices will be shipped individually packaged.
[3] Can be field installed. Nameplate should then be marked with the Form letter and maintenance and ordering records corrected.
[4] See 1993 NEC Article 430-84
[5] DC rating does not apply to Form M4.
[6] 1/4 hp with Form M1.

Type F Pressure Switch Selection and Features

- Designed for the control of electrically driven water pumps. Diaphragm actuated.
- Type FSG is the standard water pump switch, suitable for all types of pumps: jets, submersible, reciprocating, etc.
- Type FYG is designed to meet higher horsepower and pressure requirements.
- Type FRG is reverse acting: contacts open on falling pressure.

Ordering Information

- Specify Class 9013 Type F.
- Select the pressure code from Table 22.75, and add the code designation to the end of the Type number. Ensure that the pressure rating of the code falls within the limits of the device as shown in Table 22.76 and Table 22.79.
- To order special features from Table 22.80, add the appropriate Form letter to the Class and Type. Arrange the Form letters in alphabetical order when ordering more than one special feature.

See also:

- Electrical Ratings For All 9013 Switches, page 22-23
- Dimensions, Type F, page 22-23
- Renewal Parts for Class 9012–9038 Devices, page 22-34

[7] Existence of a code does not imply that the code is available for any or all devices.

[8] Minimum order quantity is 4 pieces.

[9] Must be mounted in vertical position to maintain enclosure rating.

Type G Pressure Switch Selection and Features

Class 9013 Type G Pumtrol pressure switches are designed to control electrically driven water pumps and air compressors. These devices cover higher electrical ratings for directly controlling motors in pump and compressor applications.

- Contacts open on pressure rise.
 - Diaphragm actuated.
 - For electrical ratings, see [Table 22.74](#).
- For repair parts kits, see [page 22-34](#).

NOTE: Some product configurations are not available. Contact your Schneider Electric representative for details.

Ordering Information

- Specify Class 9013 Type G.
- Select the pressure code from [Table 22.82](#), and add the code to the end of the Type number. Ensure that the pressure rating of the code falls within the limits of the device. See [Table 22.84](#).
- To order special features, add the appropriate Form letter to the Class and Type. Arrange Form letters in alphabetical order when ordering more than one special feature.

[13] Must be mounted in vertical position to maintain enclosure rating.

Note: The mounting bracket shown is available as kit 9049A52.

Table 22.89: Class 9049 Float Accessory Specifications (oz)

Item	Type A6	Type A6S	Type A6C	Type A6CS	Type A6A	Type A6CA
Net buoyancy ^[2] (in water) 7" float	60 ^[3]	60 ^[3]	70 ^[3]	70 ^[3]	60 ^[3]	70 ^[3]
Weight of 5 ft rod	18.5	16.9	18.5	16.9	6	6
Weight of extra ft of rod (per ft)	3.7	3.4	3.7	3.4	1.2	1.2
Total weight of stops	3 (2 stops)	3 (2 stops)	6 (4 stops)	6 (4 stops)	3 (2 stops)	6 (4 stops)

^[1] Some product configurations are not available—contact your Schneider Electric representative for details.^[2] Buoyancy data is calculated for use in water. Consult factory for buoyancy data in media with a different specific gravity than water.**When ordering float accessories**, first specify the desired float accessory package, such as 9049A6 or 9049A6CS, then as a second item give the number of additional rod kits required.

For example, for a 9049A6 with 15 ft of rod, order as follows:

Item A = 9049A6, quantity = 1; Item B = 9049T1, quantity = 4.

^[3] Net buoyancy of float has been calculated with float 80% submerged, thus allowing 20% factor of safety.

Open Tank or Sump Applications, Float Switch, Class 9036 Type FG

The Class 9036 Type FG30 pedestal style float switch is designed for liquid level control with electric motor operated pumps either directly or through a magnetic starter. It can also be used to activate alarms in liquid level control systems. The upward or downward movement of the lever arm of the Class 9036 Type FG30 float switch controls the On and Off positions corresponding to the water level changes required to turn the pump or alarm on and off.

Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

Table 22.92: Type FG Float Switch and Accessories

Description	Catalog Number
2-pole, NEMA 1, contacts close on liquid rise	9036FG30

9036FG, 9049A60, and 9049A61

[4] Compensating spring not effective in combination with Short lever length position.

[5] See 1993 NEC Article 430-84

Closed Tank, Class 9037 Type E

Type E switches are flange mounted and float movement is transmitted through a Quad-Ring® seal.

Build up the switch to meet your exact requirements from the **basic switch**, **float rod**, and **float** groups below. Switch may be assembled in the field to give contacts that open on liquid rise or close on liquid rise. Consult Schneider Electric for use in media with a different specific gravity than water.

Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

Type H Switches

Type H switches are attached to the tank by means of a 2-1/2 in. screw-in bushing. An external pointer indicates the float position within the tank when the unit is mounted. Switches come complete with stainless steel float and rod. A Buna N Quad-Ring® seal is used between the float rod and sealing connector. Normal application is at atmospheric pressure, but where higher pressures are encountered, the switch will withstand tank pressures up to 50 psi at temperatures up to +220 °F. Occasional replacement of the Quad-Ring seal may be necessary. Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

Table 22.104: Available Modifications for All Mechanical Alternators [13]

Description	Form
Compensating spring (Type AG)	C
Omit 2-1/2 in. connecting bushing (Type CG, CR, CW)	F3
Omit float (Type CG, CR, CW)	L
Two-level non-alternating unit	N4
Addition of a third, high-water alarm circuit (Type AG, AR, AW, CG, DG only)	N5
High-water alarm circuit, 2-pole (Type CG only)	N25
Reverse action (contacts open on Rise)	R
Viton® packing, 5 oz. float (diesel fuel) (Type CG)	Z19
Viton packing (Type CG, CR, CW)	Z20
#316 stainless steel float and Viton packing (Type CG, CR, CW)	Z21

Type DG Dimensions, in. (mm)

Note: Floats shown are Type EF, 4.5 (114) long.
The recommended size of the hole in the tank for the entry of the float and the mounting of the control is 4.19 (106).
Add 2.5 (64) to "H" if using Type HF Floats, which are 7.0 (178) long.

Table 22.105: Temperature Ratings for Class 9038

Description	Rating
Ambient Temperature	-22 to 200 °F (-30 to 93 °C)
Media	Buna-N Seal Up to 215 °F (102 °C)
	Viton® Seal Up to 250 °F (121 °C)

[13] Some product configurations are not available—contact your Schneider Electric representative for details.

Renewal Parts for Class 9012–9038 Devices

Renewal parts are generally available for Pump Control Products with a numerical date code—for example, 172 (first quarter, 1972)—or a current date code. Parts are no longer available for devices manufactured before 1965.

Table 22.107: Class 9998 Renewal Parts Kits for Class 9012–9038 Devices

Description / Equipment To Be Serviced ^{9thl}			Catalog Number

Zelio™ RSL Interface Relays

Zelio RSL slim interface relays save valuable panel space with a 6 mm width and have a 6 A general purpose load rating. Features include:

- Pre-assembled option: relay and socket are combined into one catalog number.
- Universal AC/DC sockets have built-in protection from transients and reverse polarity voltages (see catalog DIA3ED2090304EN-US for more detailed information).
- Accessories, which include isolators, ID tags, and bus jumper save valuable installation time.
- SPDT (1 C/O) design

Refer to [Online EZ Selector](#).

Zelio™ RSB Interface Relays

Zelio RSB interface relays and sockets provide the optimum combination of robust performance and space saving for the most demanding applications. Relays are rated at 8 A, 12 A, and 16 A (250 Vac / 28 Vdc). Features include:

- Optional protection modules for protection against electrical transients
- Optional plastic hold-down ejector clips
- Socket or printed circuit board installation options

Refer to [Online EZ Selector](#).

Zelio™ RXG Interface Relays

The Zelio RXG interface relay range is comprised of 10 A relays with 1 C/O contact and 5 A relays with 2 C/O contacts all in the same optimal foot print. The mating sockets feature separate contact terminals with reliable screw connections that attach either to a convenient 35 mm DIN rail or flexible panel mounting. The entire offer is a complete system solution with protection modules (diode, diode + LED, RC circuit, or varistor + LED), plastic ejector/maintaining clip and ID Tags to identify relays.

- Standard hold-down ejector clip integrated with socket
- Optional protection modules for protection against electrical transients
- Industry standard footprint for seamless compatibility with competitive sockets
- UL Listed combination (Relay + Socket) for expedited system certification

Zelio™ RXM Plug-In Relays

Zelio RXM miniature plug-in relays and sockets provide a complete system solution in response to the most demanding applications ranging from 3 to 12 A. Some of the features include:

- Test button with removable lock-down door for testing the contacts (depending on model)
- Green LED indication of relay status (depending on model)
- Mechanical indication of relay status (standard)
- Optional protection modules to protect against electrical spikes
- Bus jumpers for connecting multiple terminals reduce installation time

Zelio™ RPF Power Relays

Zelio RPF power relays respond to the most demanding applications up to 30 A. Features include:

- UL Listed
- Sealed construction
- Motor load ratings: 1 hp @ 120 Vac / 3 hp @ 240 Vac (N/O contacts only)
- DIN rail and panel mounting capability
- Short circuit rating of 5,000 A rms @ 3 hp, 240 Vac (N/O contacts only)

792 Ice Cube Relays

DPDT 12 A; 4PDT 6 A and 3 A

Description

The 792 plug-in control relays offer clear or full-feature covers with multiple mounting options and accessories. The 4PDT models save valuable space while adding increased functionality.

792 Clear Cover

792 Full-Feature Cover

Feature	Benefit
12 A / 6 A / 3 A switching current	Ideal choice for various automation panels and controls
Clear or full-feature cover options	Full-feature covers include an LED indicator and a locking test button to facilitate maintenance and speed up commissioning
DPDT and 4PDT contact options	Simultaneous control of 2 or 4 separate circuits
Socket-mounting option	Simplified installation and maintenance; use of protection modules, hold-down clips, and other accessories
Gold-flashed contacts	Reduced contact oxidation and increased shelf life
Mechanical flag indicator (standard)	Display of the status of an unpowered relay during testing or operation

7	LED Indicator	Providing coil status at a glance		24 Vac/Vdc	10	70-BSMLG-24
	MOV Suppressor	Protection from damaging electrical spikes		120 Vac/Vdc	10	70-BSMM-120
				24 Vac/Vdc	10	70-BSMM-24
				240 Vac/Vdc	10	70-BSMM-240

NOTE: Using an LED socket module can increase the coil power draw by up to 10%.

781R / 782 / 783 / 784 Plug-in Relays

781R Series—SPDT 15A

Description

The 781R Series plug-in relays offer clear or full-feature covers with multiple mounting options and accessories.

Feature	Benefit
15 A max. switching current	Ideal choice for automation control panels
14 mm width	Slim design to save valuable space
Clear or full-feature cover options	Full-feature covers include an LED indicator and a locking test button
Socket-mounting option	Simplified installation and maintenance; use of protection modules, hold-down clips, and other accessories
Gold-flashed contacts	Reduced contact oxidation and increased shelf life
Mechanical flag indicator (standard)	Display of the relay status during testing or operation

UL Listed when used with corresponding sockets

750R Series Universal Relays

DPDT and 3PDT, 10 A

Description

The 750R series octal base, plug-in relays offer clear or full-feature covers with multiple mounting options and accessories.

750R Clear Cover

750R Full-Feature Cover

Feature	Benefit
Octal style mounting	Robust and historically proven mounting platform that provides excellent structural support
10 A max. switching current	Ideal choice for automation panels and controls
Clear or full-feature cover options	Full-feature covers include an LED indicator and a locking test button
DPDT and 3PDT contact configurations	Simultaneous control of separate circuits
Socket-mounting option	Simplified installation and maintenance; use of protection modules, hold-down clips, and other accessories
Gold-flashed contacts	Reduced contact oxidation and increased shelf life
Mechanical flag indicator (standard)	Display of the relay status during testing or operation

Part Numbers	199AX, 199X, 199ABX [25], 199BX [25]	199ADX, 199DX, 199DYX, 199DBX [25]
Contact Characteristics		
Contact Configuration	SPST, SPDT, DPST, DPDT	SPST-DM, SPST-DB
Contact Material	Silver alloy	
Thermal (Carrying) Current	40 A	
Maximum Switching Voltage	600 V(rms)	
Rated Switching Current at Voltage	Resistive: 40 A at 300 Vac 50/60 Hz; 5 A at 480 Vac 50/60 Hz; 5 A at 600 Vac 50/60 Hz; 40 A at 28 Vdc	
	Resistive: 40 A at 300 Vac 50/60 Hz; 12 A at 480 Vac 50/60 Hz; 10 A at 600 Vac 50/60 Hz; 40 A at 28 Vdc	
	Motor: 2 hp at 120–600 Vac 50/60 Hz	
	Tungsten: 15 A at 120 Vac 50/60 Hz	
	Pilot Duty: A600	
Minimum Switching Requirement	1 A at 5 Vac/Vdc	
Coil Characteristics		
Coil Voltage Range[26]	6–600 Vac 50/60 Hz; 6–250 Vdc2	
Operating Range (% of Nominal)	85%–110% (AC); 80%–110% (DC)	
Average Consumption (Maximum)	10 VA (AC); 4 W (DC)	
Drop-Out Voltage Threshold	10% (AC/DC)	

Table 23.41: Additional DC Ratings with Blowout Magnet

Load Voltage	Contact Rating
110 Vdc	20 A
220 Vdc	8 A
325 Vdc	4 A
500 Vdc	2 A

Table 23.42: Auxiliary Switch Ratings (Non-Standard Option)

Load Type	Contact Rating
Resistive Load 120/250 Vac (50/60 Hz)	10 A
Motor Load 125/250 Vac (50/60 Hz)	0.25 hp
Tungsten Load 125 Vac (50/60 Hz)	3 A

^[24] 50 A versions and additional options available. Call Customer Service for more information (847-441-2540).

^[25] For ratings with blowout magnet, refer to Table 23.41 Additional DC Ratings with Blowout Magnet, page 23-48

^[26] For available standard coil voltages, refer to Standard Part Numbers, page 23-48

Table 23.43: Contact Ratings and Electrical Endurance (per IEC 60947-1, 60947-4)

Contact Ratings	Load Voltage	Frequency	Load Type	Estimated Electrical Endurance	See Note(s)
AC Load					
40 A	300 V	50/60 Hz	Resistive	50,000 cycles	[27][28]
2 hp	120–600 V		Motor	50,000 cycles	[29][28]
15 A	120 V		Tungsten	20,000 cycles	[28][30]
A600	—	—	Pilot Duty	100,000 cycles	[28]
DC Load					
40 A	28 V	DC	Resistive	100,000 cycles	[28]
20 A	110 V				
8 A	220 V				
4 A	325 V				
2 A	500 V				

Dimensions, in. (mm)

[27] Resistive AC load ratings are based on a power factor of 0.85–1.0.

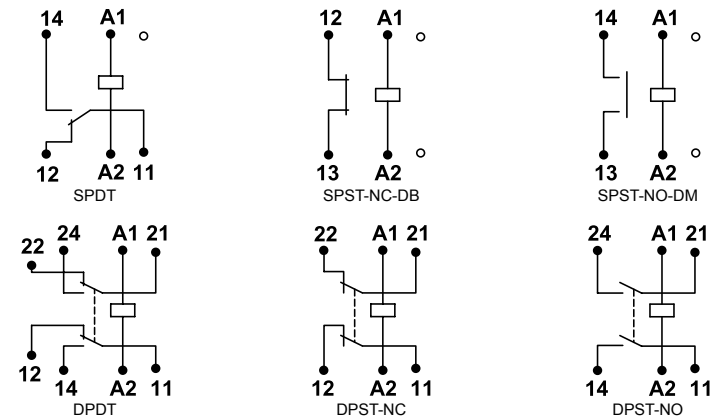

[28] All ratings are based on applying the rated nominal power to the relay coil so as to provide a “clean” make and break that does not result in any contact chatter or multiple actuation of the contacts.

[29] Motor horsepower ratings are based on a power factor of 0.4–0.5, and an initial inrush current not exceeding

[30] The tungsten rating is based on cold-filament inrush current not exceeding 15 times the rated steady-state lamp current.

Square D™ Universal Relays

8501K relays are designed for multipole switching applications at 240 Vac or lower. These relays have industry standard wiring and pin terminal arrangements which allow for their use as replacements for many competitive relays without wiring or hardware modifications.

- 10 A relays
- DPDT or 3PDT
- Green pilot light option
- Motor load (hp) ratings
- DPDT latching models available
- AC or DC operation
- RoHS Compliant

Square D™ Miniature Control Relays

8501R relays are suited for use as logic elements and power switching output devices. The short stroke motion of the armature provides long mechanical life required for high speed operation of control systems. Different contact compositions allow these relays to be used in a variety of applications. Bifurcated crossbar (gold overlay silver) is suitable for high contact reliability and low level switching requirements. Silver alloy is best suited for inductive loads. Class I Division II sealed relays can be used in specified hazardous locations.

Zelio™ SSL Relays

Zelio SSL solid state relays offer the advantages of several input and output configurations for both AC and DC switching applications. Their compact size and modular design reduces space and allows easy mounting on the socket. Key features include:

- Available with zero voltage switching for resistive load and random switching for inductive load applications.
- Socket with reverse polarity protection circuit and LED indicator for easy identification of control status.

Refer to [Online EZ Selector](#).

Zelio™ SSM Relays

Zelio SSM solid state relays are ready-to-use modular relays with SCR/MOSFET outputs for greater switching density. The unique IP20 housing design and integrated heat sink with no exposed metal surface offers compactness and enhances operating conditions of the relay. SSM relays are DIN rail mounted and available with zero voltage switching for resistive load and random switching for inductive load applications. The SSM relay range comprises:

- SSM1: Single channel, single-phase relays with 6 A and 12 A ratings
- SSM2: Dual channel, single-phase relays with 6 A rating

Refer to [Online EZ Selector](#).

Zelio™ SSL, SSM and SSP

Zelio SSL, SSM and SSP relays do not have any moving parts to wear out. Combined with vibration resistance, arc-less switching and the lack of acoustical noise, solid state relays are the ideal product for switching applications that demand reliable execution. For added reliability, the Zelio SSL, SSM and SSP solid state relays use Direct Copper Bonding (DCB) technology to decrease internal temperatures and improve the overall quality of the product. The SSR solid state relay range comprises:

- Relays for DIN rail mounting: SSRD
- Relays for panel mounting: SSRP

Key features include:

- Input voltage range 3–32 Vdc, 90–280 Vac
- Breaking capacities up to 125 A
- Zero voltage turn on, low EMI/RFI
- No moving parts
- Shock and vibration resistant
- No acoustical noise
- Fast response
- Arc-less switching
- Long life (>10⁹ operations typical)

Refer to [Online EZ Selector](#).

SSP3A225P7

Zelio™ SSP Relays

Zelio SSP solid state relays are three-phase panel mounted relays with IP20 housing. The SCR outputs allow them to be used in various power switching applications. These power relays with 25 A and 50 A current rating are EMC compliant. SSP relays are integrated with an R-C snubber circuit and TVS (Transient Voltage Suppression). They are available with zero voltage switching for resistive load and random switching for inductive load applications.

Refer to [Online EZ Selector](#).

TeSys™ D IEC Style Instantaneous Control Relays

These 600 V relays are approved for use around the world. TeSys D relays are usually mounted on 35 mm DIN track, but can also be mounted directly to a panel. The contacts have NEMA A600 and Q600 ratings, in addition to the standard IEC ratings, making them suitable for use in most any control circuit. Low consumption versions are available for use with low level DC control signals from a computer or a PLC. Adder decks can be added to a basic five pole relay to make it up to an 11 pole relay. The serrated silver-nickel contacts with wiping action provide excellent reliability in 12 or 24 V control circuits. Special auxiliary contacts are available for switching low power down to 5 V at 10 mA. Timer and mechanical latch attachments are available.

Table 23.84: Instantaneous Control Relays

Terminal Type	Number of Contacts	Contact Composition		Catalog Number ^[1]
		Normally Open	Normally Closed	
Screw Clamp	5	5	0	CAD50

File: LR43364
Class: 3211 03

- For replacement AC coils, see [TeSys™ D and F Overload Relay Accessories](#), page . DC coils are not replaceable.

[1] Add the proper voltage code from [Table 23.85](#) or [Table 23.86](#) to the end of the catalog number. For example, CAD50B7.

[2] Add the proper voltage code to the end of catalog number.

[3] Auxiliary contact blocks with four contacts cannot be used on relays with low consumption coils.

[4] Includes 1 N.O. and 1 N.C. overlapping contact.

[5] Grounding terminal points (2 terminals jumpered together; see diagram on page 8 of Catalog [8501CT0101](#)).

TeSys™ D IEC Style Contact Blocks and Accessories

Table 23.89: Time Delay Auxiliary Contact Blocks

Number and Type of Contacts	Maximum Number per Device	Time Delay Type	Termination Type	Range	Catalog Number

Unlatching Control	Maximum Number per Device	Catalog Number [9]
	Front Mounting	
Manual or electrical	1	LAD6K10

Table 23.91: Coil Suppressor Modules

These modules clip onto the right hand side of the control relay and the electrical connection is instantly made. Adding an input module is still possible.

RC Circuits (Resistor-Capacitor)

- Effective protection for circuits highly sensitive to "high frequency" interference.
- Voltage limited to 3 Uc maximum and oscillating frequency limited to 400 Hz maximum.
- Slight increase in drop-out time (1.2 to 2 times the normal time).

For Mounting On:	Operational Voltage	Catalog Number
CAD (Vac)	24 to 48 Vac	LAD4RCE
	110 to 240 Vac	LAD4RCU

Varistors (Peak Limiting)

- Protection provided by limiting the transient voltage value to 2 Uc maximum.
- Maximum reduction of transient voltage peaks.
- Slight increase in drop-out time (1.1 to 1.5 times the normal time).

CAD (Vac)	24 to 48 Vac	LAD4VE
	50 to 127 Vac	LAD4VG
	110 to 250 Vac	LAD4VU

Bidirectional Peak Limiting Diode

- Protection provided by limiting the transient voltage value to 2 Uc maximum.
- Maximum reduction of transient voltage peaks.

CAD (Vac)	24 Vac	LAD4TB
	72 Vac	LAD4TS

Transient Suppressor Module dampens the voltage spike that may occur when the relay coil is de-energized. The spike may adversely affect solid state equipment near the relay. The transient suppressor module snaps into a cavity located in the side of the relay. These modules can be used with CA2SK and CA3SK relays.

IEC Style Alternating Relays are used to alternate the use of 2 motor circuits. When the coil is energized the first time, one contact closes and will open when the coil is de-energized. When the coil is energized again, the other contact will close and will open when the coil is de-energized. The contacts from these alternators are to be used in the control circuit of the starters that are controlling pump or compressor motors.

Square D™ NEMA Style AC Relays

Class 8501 Type X relays combine a rugged, heavy-duty design with modular construction for greater flexibility. They are ideal for applications where long life, high reliability, and ease of maintenance are important. The Type X family offers a complete line of relays and accessories for most control applications. The 8501X relay consists of a standard 4 pole base to which it is possible to add additional contacts, timer, and latch functionality. Instantaneous and Master contacts are converted from N.O. to N.C. by flipping the contact cartridge within the base. The 8501X relay can either be built from individual part numbers or ordered pre-assembled.

AC Control Relays

- Straight-through wiring
- Plug-in contact cartridges for easy contact conversion and replacement
- Contact conversion without removing terminal screws or wires
- Self-lifting pressure wire connectors
- Replaceable coil

Table 23.117: AC Control Relays (lots of 1)

8501XO40XTE1V02 AC Timing Relay

[1] A maximum of 8 N.C. contacts is allowed on 9-12 pole relays.

[2] Voltage code must be specified to order these products. Refer to Table 23.124 and insert the code as shown in Table 23.125.

[3] Maximum of six 8501 Type XC4 master cartridges may be used on only 7 and 8 pole AC devices.

[4] Attachments not permitted on this relay.

8501XO40XLV02 Latching Relay

AC Latching Relays

- Mechanical latch holds all contacts switched even after removal of power from replaceable latching coil.
- Provides sequence memory in the event of power loss. Ideal for press control, process control, and punch presses.
- Replaceable unlatch coil to switch contacts back to original state.

8501XDO40V53 Control Relay

8501XDO40XTE2V53 Timing Relay

Square D™ NEMA Style DC Relays

DC Control Relays

- Replaceable, highly reliable pure DC power plant: no economizing resistors, overlapping contacts or dual-wound coil.
- Uses the same Type XB adder decks and attachments as the AC version.
- Offers all the features of the AC relay.
- Available in up to 8 poles.
- All contact poles are usable since no overlapping contacts are needed.

6-8	8.98	228	4.2

DC Utility Relays

Ideal for utility plant applications where reliable performance and a pure DC power plant is required. In addition to the Type XDO relay features, the Type XUDO provides:

- Up to 12 poles N.O. or N.C.
- Nominal 125 Vdc coil, capable of handling 140 Vdc continuously and picking up at 105 Vdc after having been operated at 140 Vdc continuously. Other voltages with comparable operating characteristics are available.
- Enclosed device capable of operating in 145°F ambient.

Attachments and Accessories for Square D™ NEMA Style Relays

Table 23.135: Type X™ Relays

	Description	Type
	Mechanical Latch Attachment —Mounts on any 2 through 8-pole relay (except XMO master relay). The Type XL and XDL latch attachments are identical in size and mounting provisions. The Type XLAC latch attachment has a continuous-duty-rated coil which is replaceable. The Type XDLDC latch attachment has an intermittent-rated coil (replaceable) and should be connected through a N.O. contact of the basic relay if the input signal is maintained to the unlatch coil. AC Latch Attachment DC Latch Attachment	XL ^[9] XDL ^[9]
	Pneumatic Timer Attachment —Mounts only on any 0 through 4-pole AC or DC relays (except XMO master relay). It provides 1 N.O. and 1 N.C. convertible timed contacts, which are the same Type XC1 cartridges used on the basic relay. Two timing ranges are available, and conversion from On Delay to Off Delay or vice versa is easy. Off Delay 0.2–60 seconds 5–180 seconds On Delay 0.2–60 seconds 5–180 seconds	XTD1 XTD2 XTE1 XTE2
	Timer Lockout Cover —Fits over the time delay adjustment knob of any Type XT timing attachment. The Lockout Cover is designed to protect the time setting against accidental adjustment. It mounts directly to the timing attachment with two included screws.	XJ1
	Adder Decks —Adder decks are used to expand the number of poles on a relay. The basic 4-pole relay can be easily converted to an 8-pole or 12-pole relay by installing one or two adder decks. The Class 8501 Type XB20 comes with 2 convertible contact cartridges and will accept 2 additional convertible contact cartridges. The Class 8501 Type XB40 comes with 4 convertible contact cartridges. The same Type XB adder deck is used for both the middle and upper decks of the AC or DC relay.	
	With 2 N.O. contact cartridges	XB20
	With 4 N.O. contact cartridges	XB40
	Contact Cartridges —The Type X relay offers 4 Types of contact cartridges. All are color-coded for visual identification of each Type.	
	Standard Cartridge —The standard cartridge, used for most applications, has a black case.	XC1
	Overlapping Cartridge —Same NEMA Type A600 AC rating as standard cartridge and a NEMA Type P150 DC rating. When it is used in the N.O. mode it will close early and when used in the N.C. mode it will open late. If two or more are used together, the N.O. contacts will close before the N.C. contacts open as the relay picks up. Overlap also occurs during dropout. Overlapping cartridge has a red case.	XC2
	May be ordered factory installed: <ul style="list-style-type: none"> Substitute 1 N.O. and 1 N.C. overlapping cartridges for 2 standard cartridges. Substitute 2 N.O. and 2 N.C. overlapping cartridges for 4 standard cartridges. Substitute 3 N.O. and 3 N.C. overlapping cartridges for 6 standard cartridges. Substitute 4 N.O. and 4 N.C. overlapping cartridges for 8 standard cartridges. 	Form Y1591 Y1592 Y1593 Y1594
	Master Cartridge —Features the same contact ratings as the Type XC1 standard cartridge except it has a 20 ampere continuous current rating instead of 10 amperes. It can be used in circuits where a master relay is required. Master cartridge has a blue case. Maximum of 6 master cartridges may be used on any 7 and 8-pole AC relays. Do not use any master cartridges on 9-12-pole AC or any DC-operated devices. Note: If master cartridges are added to a standard relay, attachments (latch mechanism, timers, etc.) cannot be used.	XC4
	Mounting Track —The mounting track has pre-punched mounting holes to simplify mounting the track on the control panel. The relay mounting screws are factory installed on the track so that the relays can be hung prior to tightening the screws. 9 in. long for 4 relays 18 in. long for 8 relays 27 in. long for 12 relays 36 in. long for 16 relays	XM4 XM8 XM12 XM16
	Manual Test Tool —Provides a means of manually switching the contacts of a basic relay or timing relay and holding all contacts in their switched state until the tool is removed. This simplifies the checking of control circuits without power on the coil or contacts.	XA1
	Transient Suppressor —Consists of an R-C circuit designed to suppress coil generated transients to approximately 200 percent of peak voltage. It is particularly useful when switching the Type X relay near solid state equipment. It is designed for use on coils up to 120 Vac.	XS1
	NEMA 1 Enclosure —Formed from sheet steel to provide strength and rigidity. Two conduit knockouts are located in both the top and bottom of the enclosure. The enclosure is furnished with self tapping screws for mounting the relay inside the enclosure. Accommodates a single 4 or 8-pole AC or DC relay, 12-pole AC relay, 4-pole AC latching relay, and 4-pole AC timing relay. NOTE: The 4-pole DC latching relay, 4-pole DC timing relay, 8-pole AC and DC latching relays and 12-pole utility auxiliary relay will not fit.	Class 9991 Type UE7

[10] 125 Vdc only

[11] Not dual rated—250 Vdc only

[12] To order an unlatch coil, add the letter L to the type number and the letter B to the suffix number. Example: for a 120 V 60 Hz unlatch coil, order a Class 9998 Type XL44B.

RE17LAMW

RE17LMBM

RE17RLMU

Zelio™ RE17, E22 and RENF22 Modular Timers

The Zelio RE17, RE22 and RENF22 modular timer range is comprised of both 8 A relay and 0.7 A solid state outputs. Thanks to its space saving 17.5 mm design, this relay is ideal for applications that require a lot of control in a small foot print. The RE17 series is designed to attach to a 35 mm DIN rail.

- Multifunction, dual function, or single function
- Multi-range (7 selectable ranges)
- Multivoltage
- Solid state or relay output options

Zelio™ RE48 Panel Mount Timers

The Zelio RE48 panel mount timer range is comprised of 5 A relay outputs. The unit can be mounted either on a panel or on a DIN rail with the optional octal socket. Thanks to the large selector knob, the user can quickly and easily see the current value selected and change it if needed.

- Time unit selector knob
- Multifunction, single function, or dual function
- 1.2 second to 300 hour timing range
- Wide input voltage range
- 5 A relay outputs
- Panel-mounted or plug-in
- LED indication

Zelio™ REXL Miniature Plug-In Timers

The Zelio REXL miniature plug-in timer range is comprised of DPDT and 4PDT single On-delay function timers. The unit is designed to be mounted in a socket in a panel. Thanks to the large selector knob, the user can quickly and easily see the current value selected and change it if needed. Features include:

- Miniature and plug-in (21 x 27 mm / 0.827 x 1.062 in.)
- Single function: function A = delay on energization
- Rated current at 5 A
- 7 timing ranges (0.1 s to 100 h)
- Multivoltage
- Excellent immunity to interference
- Power on and relay energized indication by 2 LEDs

9050JCK46V20

Square D™ JCK General Purpose Plug-In Timers

Square D 9050JCK timing relays are designed to provide low-cost timing in a plug-in housing. The Types JCK11 through 59 provide $\pm 1\%$ repeat accuracy. The Types JCK60 and 70 offer $\pm 0.1\%$ repeat accuracy. These timers are directly interchangeable with many other 8 and 11 pin octal base timers.

- Up to $\pm 0.1\%$ repeat accuracy
- Timing from 0.05 seconds to 999 hours
- Available in 7 timing modes
- DPDT contacts (2 N.O. and 2 N.C.)
- 10 A contact rating
- Transient protected
- Hold down spring available
- Variable or fixed time delay
- Horsepower rated
- RoHS compliant

Table 23.151: How to Order

To Order Specify:	Catalog Number		
• Class Number	Class	Type	Voltage Code
• Type Number	9050	JCK11	V20
• Voltage Code			

[1] Voltage code must be specified to order this product. Refer to the standard voltage codes listed in Table 23.150 and insert as shown in Table 23.151.

[2] Initiating contact can be up to 50 feet from the timer.

[3] Two dials are provided for independently adjustable repeat cycle timing ranges.

[4] (XXXX) denotes the timing period in seconds.

Example: Class 9050 Type JCK1F60 is an On Delay timer fixed at 60 seconds.

[5] Fixed repeat cycle timers can be supplied with the same or different On-Time and Off-Time.

8501NR52

8501NH7

Type JCK60 and JCK70 Timers

NOTE: Type JCK60 and JCK70 Timers are rated for AC supply voltage only. They are not rated for DC coil.

Type JCK60

This On-Delay timer uses four push button thumbwheels to set the time delay. One switch is used for the range. The remaining three are used for the time setting.

Table 23.152: Selection

Timing Modes	Timing Ranges		Type
On Delay	0.01s	0.05–9.99 seconds	JCK60 ^[6]
	0.1s	00.1–99.9 seconds	
	S	001–999 seconds

^[6] Voltage code must be specified to order this product. Refer to the standard voltage codes listed in Table 23.150 and insert as shown in Table 23.151.

^[7] The repeat cycle mode uses the same on-time and off-time.

^[8] Please note that the B suffix only designates quantities of 10 and is not printed on the socket.

^[9] The inputs and outputs are mixed on both sides.

^[10] The inputs and outputs are on separate sides.

^[11] When used with the appropriate 8501NR socket.

Zelio™ Current Measurement Relays

Zelio Current Measurement Relays are designed to measure under and overcurrent conditions, without external sensors. Current measurement relays enable continuous monitoring of the operation of electrical and mechanical loads such as motors and heaters. They are DIN rail mountable and the control status is indicated by an LED.

RM17JC Current Control Relay

- Monitors AC currents
- Designed to monitor overcurrent
- Equipped with an integrated current transformer

RM35JA Current Control Relays

- Selection between overcurrent or undercurrent
- Automatic DC or AC recognition
- Selectable memory function

Zelio™ Level Control Relays and Zelio™ Pump Control Relays

Zelio level control relays control one or two levels with fill or empty function. The settings are protected by a sealable cover, control status is indicated by an LED, and they are DIN rail mountable. RM35LM is designed to control levels of conductive liquid, and RM35LV is designed to control levels of other materials.

Application examples for RM35LM:

- Detecting pump seal failures
- Spring, town, industrial and sea water
- Metallic salt, acid or base solutions
- Liquid fertilizers
- Non-concentrated alcohol (<40%)

Application examples for RM35LV:

- Liquids in the food-processing industry: milk, beer, coffee, etc.
- Chemically pure water
- Fuels, liquid gasses (flammable)
- Oil, concentrated alcohol (>40%)
- Ethylene, glycol, paraffin, varnish and paints

Pump Control Relay

Zelio pump control relay RM35BA10 can operate on a single-phase or 3-phase supply. It incorporates three functions in a signal unit:

- Over and under current measurement
- Phase presence control
- Single or three phase

It has two operating modes which are designed to control a pump via two external signal inputs (Y1 Y2). These two signals are controlled by volt-free contacts. Control inputs Y1 and Y2 can be connected to:

- Level sensor
- Level relay
- Pressure sensor
- Push button

Refer to Catalog [DIA5ED2160501EN](#)**Zelio™ Speed, Frequency, & Temp. Control Relays**

Zelio speed control relay RM35SOMW monitors underspeed and overspeed conditions, with or without memory, with inhibition by an external contact. It operates with either N.O. or N.C. sensors. Adjustable time between impulses is 0.05 s to 10 min. Power-on inhibition time is adjustable from 0.6 to 60 s. Inhibition is controlled by an external contact. Settings are protected by a sealable cover, control status is indicated by an LED, and it is DIN rail mountable.

Table 23.172: Speed Control Relay

Function	Time Delay	Measurement Input	Supply	Output	Catalog Number
Under-speed	0.05 s to 10 min	3-wire PNP or NPN proximity sensor	24–240 Vac/ Vdc	1 C/O 5 A	RM35S0MW
Over-speed		Namur type proximity sensor 0–30 V voltage Volt-free contact			

Zelio frequency control relay RM35HZ monitors its own supply voltage. Settings are protected by a sealable cover, control status is indicated by an LED, and it is DIN rail mountable.

Table 23.173: Frequency Control Relay

Function	Controlled	Supply Voltage	Output	Catalog Number
Over frequency and under frequency (50 or 60 Hz)	40–60 Hz (50 Hz) / 50–70 Hz (60 Hz)	120–277 Vac	1 C/O + 1 C/O 5 A	RM35HZ21FM

Zelio temperature control relays are designed for monitoring the temperature in elevator (lift) rooms, in compliance with directive EN81. For use with PT100 input (customer supplied). Features adjustable control, control status indicated by an LED, and is DIN rail mountable.

Table 23.174: Temperature Control Relays

Function	Supply Voltage	Vac	Output	Catalog Number

Phaseo™ DC Power Supply

Phaseo switch mode power supplies are totally electronic and their output voltage is regulated. They offer:

- Compact size
- High degree of output voltage stability

For use with Universal power supplies, see optional function modules in catalog DIA3ED207041EN-US, which offer a set of solutions to meet the needs for continuity of service such as:

- Immunity to microbreaks
- Voltage holding during power outages
- Voltage holding during power supply equipment failure

Table 23.175: Modular, Single Phase

Meets all the needs of simple automation systems with power ratings from 7 to 60 W and an output voltage of 5 Vdc, 12 Vdc, or 24 Vdc.

Input Voltage (Vac)	Output Voltage (Vdc)	Nominal Current (I)	Protection Reset	Catalog Number

	48	2.5		ABL7RP4803

Table 23.177: Universal, Single Phase

Adapts to the majority of power distribution systems with power ratings from 72 to 480 W at 24 Vdc. The same power supply can be connected phase-to-neutral (N-L1) or phase-to-phase (L1-L2) for line supplies ranging from 100 to 500 Vac. Energy reserve, diagnostics, and choice of manual or auto reset are integrated into these units.

Zelio™ Analog Interface Modules

The Zelio Analog range of converters is designed to convert signals emitted by sensors or electrical measurement devices into standard electrical signals that are compatible with automation platforms and controllers. They also allow the connection distance between a sensor and a measurement device to be increased, for example, between a thermocouple and a programmable controller

Table 23.180: Converters for Type J and K thermocouples—supply voltage 24 Vdc \pm 20%, non-isolated

[5] These maximum current values assume the use of insulated copper conductors with 167 °F (75 °C) temperature rating and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of the wire which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the size, insulation class, and other characteristics of the wire used. The UL ratings are shown. The CSA rating may be higher or lower. Refer to the catalog for CSA ratings.

[6] One end-barrier is required for each assembly of like blocks.

[7] Orders must specify the standard package quantity (Std. Pack) or multiples of that quantity.

[24] These maximum current values assume the use of insulated copper conductors with 167 °F (75 °C) temperature rating and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of the wire which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the size, insulation class, and other characteristics of the wire used. The UL ratings are shown. The CSA rating may be higher or lower. Refer to the catalog for CSA ratings.

[25] One end-barrier is required for each assembly of like blocks.

[26] Orders must specify the standard package quantity (Std. Pack) or multiples of that quantity.

Passthrough and Grounding

Push-in technology terminal blocks feature simple handling and direct, tool-free connections. When pushing in solid wires or wires with ferrules, the contact spring is automatically opened and ensures the required pressure force against the current bar.

NSYTRAPLOT

Linergy Labeling System

This high-speed plotting device enables custom marking of Linergy IEC terminal block labels.

- A flexible plotter that labels marking elements quickly and easily
- Rugged construction in stylish aluminum
- Easy-to-change fixtures to suit a variety of marking elements
- Auto calibration, no adjustment necessary
- Includes NSYTRA BMP1/ BMP2 adapter plates, 0.25 and 0.35 black pens, Spatial print software, power supply, connecting cable, and user manual.

• Class Number	Class	Type
• Type Number	9080	GR6

[1] These maximum current values assume the use of insulated copper conductors with 75 °C (167 °F) temperature rating, temperature rating, and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of that wire or combination of wires (as listed in the above table) which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the number, size, insulation class, and other characteristics of the wires used. The lower of the UL and CSA ratings are shown.

[2] One end-barrier is required for each assembly of like blocks.

[3] Orders must specify standard package quantity or multiples of that quantity.

[4] Terminals are tin plated, making them suitable for use with either copper or aluminum wire.

Selection Guide

Table 24.35: Type G Selection Guide

Description	Maximum Voltage	Maximum Current [5]	Blocks		End Barriers [6]		Blocks per ft	Maximum Wire Combinations	
			Type	Std. Pack [7]	Type	Std. Pack [7]		Copper Wire (stranded or solid)	
 Self-Lifting Pressure Wire Connector for #18 to #12 AWG wire. Mounts on standard 9080GH track or 35 mm DIN 3 track.	600 V	40 A	GP6	50	GP6B	10	32	1 or 2 1 or 2 1 or 2 1 or 2	#12 #14 #16 #18
 Flat Terminal Connector for #22 to #12 AWG wire. Screws are #6-32 x 5/16 in. for ring or spade lugs, 5/16 in. wide maximum. Mounts on standard 9080GH track or 35 mm DIN 3 track. Fingersafe per DIN 60529.	600 V	40 A	GA6	50	GP6B	10	32	1 or 2 Conductors Per Screw #12–22	
 Circuit Isolating Switch [8] with self-lifting pressure connectors for #18 to #10 AWG wire. Mounts on standard 9080GH track or 35 mm DIN 3 track.	600 V	30 A	GG6	10	GF6B	10	16	1 1 1 1–4 1–4	#10 #12 #14 #16 #18
 Slip-on Connectors for #22 to #12 AWG wire. Tabs accept 0.250 x 0.032 in. slip-on connectors. Mounts on standard 9080GH track or 35 mm DIN 3 track.	600 V	20 A	GS6	10	GF6B	10	16	1–2 1–2 1–2 1–2 1–2 1–2	#12 #14 #16 #18 #20 #22
 Transient Voltage Suppressors [9] with box lug connectors for #18 to #10 AWG wire. Mounts on standard 9080GH track or 35 mm DIN 3 track. See the figure below.	120 V	—	GT6	5	GT6B	10	24	1 1 1 1–2 1–4	#10 #12 #14 #16 #18
 Fuse Block for 13/32 in. Dia. x 1-1/2 in. ferrule fuse with self-lifting pressure connectors. Fuse puller is included as standard. Fuses are not included. Mounts on standard 9080GH track or 35 mm DIN 3 track. Fingersafe per DIN 60529.	600 V	30 A	GF6	10	GF6B	10	16	1 1 1 1–4 1–4	#10 #12 #14 #16 #18
 Fuse Puller [10]	—	—	GH63	50	N/A		N/A	N/A	
 Blown Fuse Indicator/ Pullers are neon pilot lights which plug on to the fuse in a standard Type GF6 fuse block.	120–240 V	—	GLP3	10	N/A		N/A	N/A	
	277–600 V	—	GLP6	10	N/A		N/A

[5] These maximum current values assume the use of insulated copper conductors with 75 °C (167 °F) temperature rating, and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of that wire or combination of wires (as listed in the above table) which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the number, size, insulation class, and other characteristics of the wires used. The lower of the UL and CSA ratings are shown.

[6] One end-barrier is required for each assembly of like sections.

[7] Orders must specify standard package quantity or multiples of that quantity.

[8] Not intended to make or break a live circuit. Power must be disconnected from the circuit before operation of the switch.

[9] Modules have RC circuitry for suppressing transient voltage, generated when opening a coil circuit, to approximately 200% of the peak line voltage, when used with 120 V coils. Type GT6 is suitable for use with Square D Class 8501 Type X, K, R and C relays or Square D Type S starters and contactors, Sizes 00-2.

[10] Fuse puller is supplied as standard with Class 9080 Type GF6 fuse block. The 9080GH63 is a replacement fuse puller.

Terminal Block Assemblies

Custom Terminal Block Assemblies

Order an assembly built as required for the application. As standard, custom assemblies use 9080GH mounting track with screw on end clamps. Other options are available from the table below.

One terminal block type: The number of blocks in the assembly is added to the end of the catalog number of the desired block. Example: an assembly of **25 9080GR6** blocks would be **9080GR625**.

More than one terminal block type in an assembly: A detailed drawing or sketch of the desired assembly must accompany the order.

Table 24.37: Custom Terminal Block Assembly Options

Option	Suffix	Example
Substitute slip-in end clamps	C	9080GR625C
Substitute snap-off channel	B	9080GR625BC ^[11]
For direct mount assembly of 9080GK6 blocks	D	9080GK67D
Add a blank vinyl marking strip	M	9080GR625M
Add pre-marked (1–25 only) marking strip	MPO	9080GR625MPO
Mount on 35 mm DIN 3 track instead of 9080GH track	T	9080GR625T

Table 24.38: How to Order

To Order Specify	Catalog Number	
<ul style="list-style-type: none"> Class Number Type Number 	Class	Type
	9080	GA612

[11] The 9080GH10 screw-on end clamp is **not** recommended for use with snap-off channel. It is recommended that the 9080GH11 slip-in end clamp be used. Therefore, when the suffix **B** is used, it should be followed by the suffix **C**.

Mounting Track, End Clamps, Jumpers, Fanning Strips

Table 24.39: 3/4 in. Mounting Track

	Style	Length (in.)	Type	Std. Pack [12]

Table 24.44: Inrush Ratio Correction Table

NOTE: For resistive loads, use inrush correction factor of 1.0.

Inrush Ratio	1:1 to 1:4	1:5	1:6	1:7	1:8
Factor	1.3	1.4	1.5	1.6	1.7

Table 24.45: Ambient Temperature Correction Table

Ambient Temperature	70°F (21.1°C)	100°F (37.8°C)	120°F (48.9°C)	140°F (60°C)	160°F (71.1°C)	180°F (82.2°C)	200°F (93.3°C)
Factor	1.0	1.1	1.2	1.3	1.4	1.5	1.6

Table 24.46: Tripping Times in Seconds at 70 °F (21.1 °C)

NOTE: When several protectors are channel mounted adjacent to each other, the "no trip" current will be 80% of rated current at 70 °F.

Percent Rated Current	100%	200%	300%	400%	500%	600%	1000%	2000% and greater
Tripping Time (s)	no trip	10–40	38	1.5–9	0.8–6	0.003–4	0.003–2	Max. 0.02

Selection

To properly select a Class 9080 Type GCB circuit protector, follow these steps:

- Determine the inrush correction factor from [Table 24.44](#).
- Determine the temperature correction factor from [Table 24.45](#).
- Determine the sealed current of the load that is being protected.
- Multiply the sealed current by the two correction factors and choose the closest circuit protector.

NOTE: Choosing a circuit protector with a value lower than the calculated value might cause nuisance tripping, while choosing the larger might provide a protector that will not properly protect the load.

File: E233026
CCN: QVNU2

File: 025490
Class: 3211-07

Example: Solenoid with sealed current of 0.75 A, an inrush ratio of 1:6, and in an ambient temperature of 85°F: $0.75 \times 1.5 \times 1.05 = 1.18$. Choose the 1.2 A protector.

Tripping Time: Tripping time of the circuit protector is determined from [Table 24.46](#). Divide the circuit protector value by the temperature correction factor from [Table 24.45](#) to determine actual rated current referenced in [Table 24.46](#).

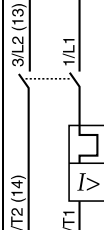

Table 24.47: How to Order

To Order Specify	Catalog Number	
• Class Number	Class	Type

[1] These maximum current values assume the use of insulated copper conductors with 167 °F (75 °C) temperature rating and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of the wire which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the size, insulation class, and other characteristics of the wire used. The UL ratings are shown. The CSA rating may be higher or lower. Refer to the catalog for CSA ratings.

[1] Must order in multiples of 6.

- Finger safe from the front, for isolation of live parts
- Up to 760 A, to meet a wide range of application needs
- Short-Circuit Current Rating up to 100 kA with fuses, not limited by the 10 kA default
- Panel or 35 mm DIN rail mount, for application flexibility
- Gangable to create multipole configurations
- Flexible stranded wire compliant, expands usability
- The UL Listed blocks meet feeder circuit spacing requirements.
- For the short-circuit current ratings, wire classes, tightening torques, dimensions, and more, see catalog 9080CT9603.

Application Information

Voltage Rating-Class B and C-600 V

Blocks are rated based on NEC Table 310-16 using 167 °F (75 °C) wire

Aluminum blocks are tin-plated high conductive aluminum. Copper blocks are tin-plated high conductive copper.

Housing material:

- Miniature Blocks are made from high impact thermoplastic rated at 257 °F (125 °C) max. and -40 °F (-40 °C) min.
- Full Size Blocks are made from general purpose phenolic rated at 302 °F (150 °C) max. and -40 °F (-40 °C) min.

All blocks have a flammability rating of UL 94V-0.

For the short-circuit current ratings and dimensions, see catalog **9080CT9603**.

[1] Lugs suitable for use with 75 °C (167 °F) conductors.

[2] Aluminum blocks will accept either aluminum or copper conductors.

[3] Copper blocks will accept copper conductors only.

[4] These covers must be ordered in multiples of 5. Each cover comes with two self-tapping screws.

[5] Will not work on a 9080LBA362106 block.

FB2221

FB3221R

Application Information

Clip material:

- All 30 and 60 A fuse clips are copper alloy tin plated.
- All 100 and 200 A fuse clips are one piece aluminum with copper spring tin plated.
- All Class H, R and J fuses are standard with reinforced fuse clips.

Lug termination:

- All 30 A blocks have pressure wire connectors.
- All 60, 100 and 200 A blocks have box lug connectors.

TELEFAST™ 2 Prewired Connection System

The TELEFAST 2 system is a set of products for the rapid connection of I/O modules (24 Vdc discrete, analog and counters) to Various control circuit components. These components act as a substitute for screw terminal blocks, remotely locating and partly eliminating the single wire connections. The system connects only to channels with HE10 and SUB-D connectors, or to standard terminal blocks with a cabled connector.

Variations within the listing of modules include those with and without relays (electromechanical and solid state), analog and counter modules, and special function modules.

Pre-wired cables available allow you to connect directly to:

- Schneider Electric (Modicon™ family)
 - Premium PAC
 - TSX Micro PLC
 - TSX Series 7
 - Twido PLC
 - Quantum PAC
 - Compact
 - April S5000/7000
 - NUM1020/1060-M340 PAC-M580 PAC-M221 PLC
- Siemens
 - S7 – 200/300/400
 - S5 – 95U to 155U
- Allen-Bradley
 - SLC500

In addition, other accessories include:

- I/O simulators
- Continuity blocks
- Label marking software
- Splitter bases (16, 23, and 32 channels)
- Mounting kits
- Detachable terminal strips
- Wiring pass-through connectors
- Fuses

Advantys Telefast 2 Product Features

NOTE: Not all features are available on all modules.

Introduction

Many different architectures for safety related solutions are available in Schneider Electric's product offering, from safety relays to safety PLCs. The architecture can determine what SIL level or performance level can be achieved with the safety related solution. Various architectures may have inherent benefits such as simple selection or increased levels of diagnostics, but their cost effectiveness can depend on the size and complexity of the safety related system and the features and functions required.

Safety Relays—XPS

To tie the whole safety system together, XPS safety relays are used to monitor the safety inputs, outputs, and feedback from the system to determine when the system is safe to start and when the system should be shut down.

Modular Safety Controllers—XPSMCM

Modular safety controllers are used in applications where multiple safety relays would be required to control the safety-related system, or where the interaction between the individual safety relays would require significant inter-wiring. Ethernet based communication allows you to provide status to the control system without additional I/O wiring. The simple-to-use software allows you to easily develop the safety-related control system, providing a cost effective solution.

Light Curtains—XUSL

Some machine operations may not allow gates or guards to be used, and other applications require high visibility of the process or easy accessibility. For these applications, XUSL light curtains may be the best choice and are available in many protected heights, minimum object sensitivities, and configurations.

Safety Interlock Switches—XCS

To protect operators, maintenance, and other personnel, safety systems may require the interlocking of mechanical gates or guards. We provide both locking and non-locking mechanical XCS safety interlock switches in many body styles and contact arrangements.

Non-Contact Safety Interlock Switches—XCSDM

For certain applications, such as food and beverage, no contact between the safety interlock switch and its actuating key is desired, so we provide several different types of XCSDM non-contact safety interlock switches.

Safety Limit Switches—XCS

In some applications, the position of components is important to the safety of the machine. Devices such as safety interlocks or light curtains are impractical. These applications are ideal for safety limit switches. They can also be used on gates and guards to verify a closed position or a fully open or overtravel position.

Cable Pull Switches—XY2

In most applications, emergency stopping is required to shut the machine down in case an emergency or problem arises. Where an individual emergency stop is required, the XB4/XB5 emergency stop push buttons are available in various types, sizes, and nameplates. On large machines or conveyors, a high number of emergency stop operators may need to be installed. As more individual e-stop buttons are required, using an XY2 cable pull switch becomes a more economical solution based on ease of use, installation time, and cost effectiveness.

Other products for use in safety-related systems

We offer many other products that are suitable for use in safety-related circuits, such as:

- XB4/XB5 emergency stop push buttons—See Section 19, [XB4–XB5 Common Operators](#), page 19-8
- XV tower lights—See Section 19, [XVC Tower Lights and Accessories](#), page 19-118
- TeSys contactors and relays—See Section 18, [Contactors and Relays](#), page 18-2
- Limit switches with positive/direct opening N.C. contacts—See Section 21, [Limit Switches](#), page 21-2

All of the machine safety products in this section are designed to work together to allow you to meet your various safety requirements. When properly applied, these products will allow you to meet SIL 3 per IEC 61508, Category 4 per ISO 13849-1, and performance level “e” per ISO 13849-1, and help you meet domestic and international safety requirements, standards, and codes.

The following pages give an overview of our wide offering of machine safety products. [MKTED208051EN-US](#) gives a detailed description of our offering, including safety PLCs, safety controllers, safety relays, safety interlocks, light curtains, safety interlocks, non contact safety interlocks, and cable pull switches. This catalog also provides additional information on domestic and international safety standards and codes, and additional information to help you develop safety systems for the protection of personnel.

Guard Monitoring with Safety Module, Limit Switch, and Contactor

XPS Safety Relay

Safety Chain Solutions and Functions

Machine builders are looking to improve machine safety without compromising production targets in dynamic industrial environments. Safety has a direct impact on user productivity and company reputation. However, building the right level of safety on your machine can be difficult due to regulations, a large portfolio of offers, and being sure you have the right safety application knowledge.

Schneider Electric is a complete safety chain provider. Schneider Electric's safety chains cover all the safety functionality and scalability you need to improve efficiency and profitability. The Preventa range offers an extensive selection of safety products, compliant with international standards, to provide the most comprehensive protection for personnel and equipment.

Learn more about our complete machine safety chain solutions in catalog [DIA3ED2140902EN](#), available at www.schneider-electric.com. This catalog contains a list of machine safety solutions, including sensors, operators, and logic devices designed to meet a variety of specific needs and performance levels for typical machine safety applications.

XPS Safety Relays

XPS safety relays monitor various safety inputs, start sequences, and feedback from starters and relays to allow machinery operation only when all safety controls are in their appropriate state and are functioning properly. Inputs can be from emergency stop push buttons, cable pull switches, limit switches, light curtains, safety interlock switches, or two hand control stations.

XPS safety relays give users increased functionality and flexibility when designing equipment to meet safety requirements and standards in the U.S., for the European Safety Directive, IEC safety requirements and meet Category 4 of EN/ISO 13849-1. Most devices can be configured for single or dual channel inputs, and for either monitored start, non-monitored start, or automatic start. Removable wiring terminals or non-removable wiring terminals are available on most module types.

The XPS product family complements our broad safety product offering with modules for many specific safety functions and applications, as well as devices for use in general types of applications. There are even devices whose safety functions can be configured at the time of installation.

Preventa XPS Includes the Following Types of Safety Relay Modules:

- Specific purpose modules such as limit switch monitoring, zero speed, timing, two-hand control, press control, and others
- Multifunctional configurable devices with multiple sets of inputs whose functions can be configured from 15 pre-defined functions, allowing greater flexibility and functionality
- Broad range of devices for emergency stop applications
- Expansion modules to increase the number of safety outputs
- Many devices compatible with light curtains

Features and Benefits

- LEDs are provided to indicate power, input, output, and feedback loop status.
- Solid state outputs provide compatibility with system controllers for diagnostics, troubleshooting, and correct system operation.
- Most devices are available with either removable or non-removable terminals.
- Most devices are available with a monitored start function to detect welded contacts or incorrect status in the start function and also to detect tampering with the start circuit.
- Dual voltage devices are available for use with either 120 V or 24 V power to reduce your inventory and increase flexibility.

XPSMCM Modular Safety Controllers

XPSMCM Modular Safety Controllers are designed to monitor multiple safety functions on and around a machine to minimize the risk of people accessing dangerous moving parts. This modular safety controller is designed for monitoring safety functions such as:

- Emergency stop
- Guard monitoring
- Perimeter guarding
- Position monitoring
- Speed monitoring
- Enabling movement

This is achieved with input devices such as:

- Emergency stop push buttons
- Safety guard and limit switches
- Safety foot switches
- Safety light curtains and laser scanners
- Safety mats
- Safety encoders and proximity sensors
- Two-hand control stations
- Enabling switches

XPSMCM Safety Modular Controller

XPSMCM System Applications

XPSMCM systems offer numerous advantages compared to traditional safety modules, such as:

- The ability to design expansion module hardware architecture and layout according to the machine specification. This reduces the number of components, the footprint, and wiring.
- Simplification of input and output wiring by software configuration combining multiple functions
- Machine scalability from 8 inputs and 2 outputs up to 128 inputs, 16 outputs, and 32 diagnostic status outputs with the expansion modules connected directly to the controller or distributed among 6 islands
- A wide range of communication expansion modules
- Intuitive software for logical configuration, offline simulation, and online visualization, testing, and commissioning
- Simplification of machine maintenance through a removable memory card, which can be used to transfer the configuration to a new controller without software

XPSMCM System Components

An XPSMCM system is composed of:

- A safety controller CPU, which can be used as standalone or together with expansion modules
- Safe expansion modules: digital input modules, solid state and relay output modules, or mixed input/output modules
- Safe speed monitoring modules for proximity sensors and safety encoders: Sin/Cos, HTL, TTL
- Safe communication expansion modules for safe island creation
- Non-safe communication modules: interfaces to machine network (Modbus TCP and Ethernet IP)
- A memory card, available for saving configuration data for ease of maintenance and controller setup
- Backplane expansion connectors for connecting the modules to the safety controller CPU

Configuration Software

The XPSMCM modular safety controller is supported by [SoSafe Configurable](https://www.schneider-electric.com) software. This software is available as a free download at: <https://www.schneider-electric.com>. The software uses a simple drag and drop function block approach to configuration and has a library of configurable safety and logical functions, as well as easy to use tools for:

- Online configuration monitoring
- Offline simulation
- Configuration validation
- Hardware device scanner
- Printable schematics and documentation

SoSafe Configurable software supports quick and easy setup of the machine.

XUSL4M Light Curtains

XUSL Light Curtain

New!

XUSL Light Curtains

XUSLM4 Light Curtains

The XUSLM4 Type 4 Safety Light Curtains with integrated muting provide efficient protection of machine operators with uninterrupted automation processes.

The XUSLM4 Safety Light Curtains come in basic or advanced models and can be fitted with a range of available muting arm options to fit your specific application. This optimized range of light curtains has embedded safety functions such as Automatic or Manual start/restart and External Device Monitoring (EDM) allowing a standalone operation without a safety interface.

The XUSLM4 Safety Light Curtains from Telemecanique Sensors are available in Body and Hand detection models in different protected heights

XUSL Type 2 and 4 Light Curtains

XUSL Type 2 and 4 light curtains provide point of operation protection for large areas without the need for gates or guards. They allow excellent visibility of the machine or process and free access to the machine while providing protection for personnel. Light curtains are made up of an array of infrared light beams to form a protected area. Whenever one or more of the light beams is broken, the light curtain sends a stop signal to the machine safety control circuit.

XUSL2E and XUSL4E Light Curtains

XUSL2E and XUSL4E light curtains for point of operation safeguarding are available in either single or multiple segment configurations. Choose the one that best meets your application requirements. These versions are available in either 14 mm or 30 mm minimum object sensitivity (MOS).

Slim and rugged design results in an esthetically pleasing small mounting footprint suitable for aggressive environments.

Two box light curtains are ideal for installations where it is desirable to mount and wire only two components, transmitter and receiver. These devices are self-contained and the receiver provides the safety outputs.

Features and Benefits

- 14 and 30 mm minimum object sensitivity (MOS)
- 14 mm MOS protection heights: 160 - 1810 mm (6.3 - 71.3 in.)
- 14 mm MOS sensing range: 6.0 m (19.68 ft.)
- 30 mm MOS protection heights: 160 - 1810 mm (6.3 - 71.3 in.)
- 30 mm MOS sensing range: 8 m or 20 m (26.2 or 65.6 ft.)
- 29 x 31.5 mm housing size (1.1 x 1.2 in.)
- 24 Vdc supply voltage
- Female connector cables sold separately (5 m, 10 m, 15 m, and 30 m)
- Cascadable devices available - up to 3 segments

XCS Safety Interlock Switches

For Gate or Guard Interlocking

XCSA Safety Interlock Switch

XCSMP

XCS safety interlock switches verify that the doors, gates, or guards are closed before a process which could be harmful to personnel can start up. The hazards to personnel can be mechanical, electrical, hydraulic, pneumatic, chemical, or thermal. The various sizes and shapes of safety interlock switches are designed for a wide variety of applications. These mechanical devices have two components: a switch and an actuating key. When the gate or guard is closed, the actuating key attached to the gate or guard is inserted into the switch, closing the safety contacts, allowing the machine to be started. When the gate or guard is opened, the actuating key is removed from the switch, and the safety interlock switch contacts open.

XCS safety interlock switches are designed to meet demanding requirements in the US and Europe, as well as the rest of the world. The flexibility of the XCS line allows one XCS device to perform the same functions as several competitor's devices. This means that fewer XCS devices may be required to cover your needs.

Specifically designed for the protection of machine operators, maintenance and other personnel, the XCS switches can be used in a wide range of applications where a gate, door or guard is a part of the safety related system.

Features and Benefits

- Simple, rapid installation saves time and labor
- Device flexibility reduces stock requirements
- Wide variety of body styles, contact arrangement, and operators meet a variety of application requirements
- Bodies available in metal or plastic
- Switches are interchangeable between new and older devices, as well as with competitor's devices
- A variety of actuating keys are suitable for all applications
- Pre-wired devices and many connector options available to make wiring and installation easier

The Following Types of Safety Interlocks are Available:

- Non-locking
- Locking with push button or key release
- Locking by electrical solenoid
- Rotary shaft operation, for use on hinges of doors
- Rotary lever for hinged guards
- Pre-wired compact body

XCSDM Non-Contact Safety Interlock Switches

For Non-Contact Gate or Guard Interlocking

XCSDM non-contact safety interlock switches are designed for the same functions as mechanical safety interlock switches. The difference is that the non-contact safety interlock switches are magnetically coded devices and require no contact between the switch and coded magnet. This is a benefit where door or guard mis-alignment is an issue, or where the machine designer does not want to use a mechanical device.

Benefits of Non-contact Devices:

- Food, beverage and pharmaceutical applications require that no contaminants be trapped in or around devices.
- Non-contact devices have no inherent operating force and are well-suited for applications such as lightweight or plexiglass doors, where cracking or breakage is prevalent with standard mechanical safety interlock switches.
- Wash down applications where a standard mechanical safety interlock switch would be more difficult to clean, especially in the actuating key receptacle.
- Where small size is critical or a slim profile is desired

Features and Benefits of XCSDMC, XCSDMP, and XCSDMR

- Tolerates gate or guard alignment problems
- Wider temperature range for a plastic bodied device than any competitor's products
- Multiple coded-magnet approach directions allow for maximum flexibility of mounting options
- Suitable for Category 4 safety circuits when used with a safety relay or safety controller.
- Available with or without LEDs

Features and Benefits of XCSDM3 and XCSDM4

- Meets SIL 2 and 3 per IEC 61508, Category 3 and 4 per EN 954-1 and EN/ISO 13849-1 and performance level "e" per EN/ISO 13849-1 without the need for a safety relay or safety controller
- Connector and cabled versions available
- Multicolor LEDs for diagnostics and status
- Multiple coded-magnet approach directions allow for maximum flexibility of mounting options

XCSDMP

XCSDM4

New!

XCSR Contactless RFID Safety Sensors

The XCSR contactless RFID safety sensor from Telemecanique Sensors provides industrial companies with the highest level of safety-certified sensor protection, allowing employers to effectively seal off areas in the work zone that are dangerous. The design of the new XCSR safety sensor safeguards employees against tampering with the protection system.

The XCSR contactless RFID safety sensor is TÜV certified with a Cat4/PLe – SIL3 rating.

The XCSR contactless RFID safety sensor is virtually tamper-proof. The ready-to-use transponder and reader are factory-paired and sold together with a unique, high-level coding which is virtually impossible to bypass or disrupt. Once this highly effective safety system is in place, its functionality can't be altered.

The XCSR contactless RFID safety sensor offers three different connection types to fit virtually any type of industrial environment. All three connection types are configured with unique codes and provide a PLe/Cat4 – SIL3 level of protection. The three connection types offered are as follows:

- **Standalone:** The standalone model of the new XCSR contactless RFID safety sensor allows direct connection to contactors. It has integrated safety functions, such as monitoring of the contactors and manual or automatic start and restart functions.
- **Series:** The series model of the new XCSR RFID safety sensor allows direct connection to a simple safety relay and series diagnosis through a diagnostic module. There is no programming software needed. The series model comes with integrated M12 series connectors and eliminates the need of T or Y connectors.
- **Single:** The single model of the new XCSR RFID safety sensor allows point-to-point connections to a safety controller.

XCSR RFID Safety Sensor

Safety Limit Switches

XCS Safety Limit Switches

Preventa XCS safety limit switches are used in machine safety systems for a wide variety of safety related functions, including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards. They are often used in conjunction with safety interlock switches for mechanical and electrical redundancy on doors and guards.

Features and Benefits

- Meet US and European safety standards requiring that switches used in safety related applications have positive opening contacts
- Tamper resistant covers over mounting screw and head adjustment to reduce potential for tampering
- Red color allows easy visibility and identification of safety related limit switches
- Two body styles available:
 - Compact, pre-wired with cable
 - Compact, with conduit entry

XCS Safety Limit Switch

XCSP/XCSD Safety Limit Switches

The XCSP (plastic body) and XCSD (metal body) safety limit switches are identical in size and features. The only difference is the enclosure and conduit entry. XCSP and XCSD safety limit switches are for use in safety related applications including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards.

Features and Benefits

- Positive opening contacts standard in all devices
- Snap acting contacts
- Slow make/slow break contacts
- Several head types available
- Metal and Plastic body styles available
- Several conduit types available
- Tamper resistant cover

XCSM Safety Limit Switches

The XCSM safety limit switches come pre-wired in multiple lengths of electrical cable for simplified installation. The XCSM safety limit switches are for use in safety related applications including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards.

Features and Benefits

- Positive opening contacts standard in all devices
- Snap acting contacts
- Slow make/slow break contacts
- Several head types available
- Metal body
- Pre-wired in various cable lengths
- Tamper resistant cover

New!

XY2 Cable Pull Switches for Emergency Stop Operation

XY2 cable pull switches provide emergency stop signaling at any point along a cable up to 656 feet in length. This is preferable to installing many individual emergency stop push button stations along a conveyor or around the machine, providing a more cost effective solution. Typical applications include conveyor systems, packaging, textiles, transfer machines, presses, woodworking equipment and paint lines.

Operation is based on the taut cable principle. The cable must be tight and have appropriate tension applied to set or reset the switch. Once cable tension has been set, the device will open the N.C. control contacts if either the cable is pulled or if it becomes slack due to stretching or breakage of the cable.

Normal stop versions are used where a momentary, non-emergency signal is required at any point along a cable.

Features and Benefits

- Cable lengths: XY2CED: 656 ft.; XY2CE 230 ft.; XY2CH and XY2CJ 98 ft.
- Emergency stop versions (available in XY2CED, XY2CE, XY2CH, and XY2CJ)
 - The N.C. contact opens the control circuit and mechanically latches, and will remain latched in the open position until an operator manually resets it
 - Emergency stop versions have positive/direct opening contacts as standard
 - Device will not reset if out of adjustment
- Normal stop versions (available in XY2CE and XY2CH)
 - Normal stop versions are used where a momentary, non-emergency signal is required
 - Normal stop versions do not latch contacts open or include positive opening contacts
 - Normal stop versions are provided with snap action contacts for momentary stop
- Adjustable tripping force (XY2CE and XY2CED)
- Available with 2 N.O. and 2 N.C. contacts (XY2CE and XY2CED) or
- Available with 2 N.C. and 1 N.O. contacts (XY2CH and XY2CJ)
- Two viewing windows to aid in adjusting the switch (XY2CH)
- Manual tripping force adjustment (XY2CE and XY2CED)
- Adjustment indicator (XY2CE, XY2CH, and XY2CED)
- Traction force indicator (XY2CE, XY2CH, and XY2CED)
- Left, right, and straight cable mount, depending on unit
- UL NSID certified for emergency stop
- Protection level IP65 and IP66 (XY2CED)
- Compliant up to PLe/Cat4–SiI3 safety levels (XY2CED)

XY2CED Features

- Operating temperature range: -13 °F to 158 °F (-25°C to +70°C)
- Suitable for protected outdoor use
- Silicon bellows (extreme temperatures) or nitril as standard bellows
- Different types of reset button (booted, flush, key)
- With or without pilot light
- Cable entries: Compatible ISO M20 and Pg 13.5 cable glands or threaded ½ in. NPT
- Contact blocks : 2 blocks [N.C. + N.O.]
- Protection level: IP65 and IP66
- Certifications
 - CE
 - UL-NISD
 - CSA
 - CCC
- Compliant up to PLe/Cat 4 – SIL3 safety levels (with appropriate safety interface)

	Altivar 680/980 Process Drives <i>New!</i>	Altivar 660/960 Process Drives	Altivar 1260 Medium Voltage Drive												
															
Brief Description	<p>The world's first three-level low harmonic drive, Altivar 680/980 drive solutions are designed for pumping or mechanical movement applications where harmonic mitigation and overall size is a priority. The ATV680/980 has embedded, industry-leading harmonic mitigation technology, which results in THDi levels of 2.3%. With its small footprint and capability to be customized, the ATV680/980 is a very flexible low harmonic solution.</p> <p>The ATV680/980 is a more efficient, more compact, and higher performing active rectification drive than any of our competitors by the integration of a common mode suppressing filter, and unique active filter resonance control. The ATV680 is capable of 120% regeneration, while the ATV980 is capable of 180% of nameplate current.</p>	<p>The Altivar 660 Process System provides a wide range of fully tested and ready to connect drive solution. Starting from a compact pre engineered system to a fully engineered complex solution.</p>	<p>The Altivar 1260 combines the latest vector control strategies with the control of 3-level inverters using proven semiconductor technologies commanded via fiber optic cables. Engineered from the inside-out to reduce harmful grid harmonics and put less stress on motor bearings and insulation.</p>												
Special Features	<p>Industry Leading Harmonic Mitigation: 2.3% THDi</p> <p>Common Mode Voltage Suppression</p> <p>Reduction of Bearing Currents</p> <p>Generator Supply Capability</p>	<p>Compact design to save space</p> <p>Dynamic QR Codes</p> <p>50° C option available</p> <p>Pump curves embedded</p> <p>Multiple options available</p> <p>Process control embedded</p> <p>Embedded web server</p>	<p>Low component count 24/36 pulse rectifier (AFE option available) with 3-level NPC inverter using medium voltage IGBTs.</p> <p>Standard output sine wave filter delivers a motor friendly waveform, which allows long cable lengths and use with standard duty motors.</p> <p>Close-coupled or separately-located rectifier transformer</p> <p>Easy to navigate local human machine interface (HMI) plus a web application for remote monitoring and control</p> <p>Front access with easy to maintain slide out power modules</p> <p>Integrated UPS for control backup</p> <p>Powerful central processor (CPU) with imbedded programmable controller (PLC)</p> <p>Modular and scalable architecture</p>

Altivar™ 212 Drives

The AHRI (Air-Conditioning, Heating, & Refrigeration Institute) certified Altivar 212 drive is for use with three-phase asynchronous and permanent magnet motors for variable torque pump, fan, and scroll compressor applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and 1 NO/NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks™ is available in an option card.

SoMove	This software enables the user to configure, set, debug and organize maintenance task for the complete Altivar product line and the Altistart 22 and Altistart 48 soft starters. It can also be used to customize the integrated display terminal menus. It can be used with a direct connection or a Bluetooth® wireless connection. Free download www.schneider-electric.us		
USB/RS485 cable: equipped with USB connector and RJ45 connector		Altivar and Altistart	TCSMCNAM3M002P [6]
Communication Option			
LonWorks Communication Card Option	Provides a four-screw terminal block for connection to LonWorks network. Install in place of standard control board that comes mounted in the Altivar 212 drive. The I/O count is reduced to 3LI, 1 AI and 1 NO/NC relay	Altivar 212	VW3A21212
Mounting Kit			
DIN Rail Mounting Kit	For installation on 35 mm wide DIN rail	Altivar 212H075M3X–U22M3X Altivar 212H075N4–U22N4	VW3A31852

[4] IP20 Altivar 212 drives can be installed as UL Type 1 with an optional conduit box by following the instructions in the installation manual.
[5] Not required if using VW3A1102.
[6] For ATV212W... drives with Class B EMC filter, add the letter "C" to the end of the standard catalog number.

Altivar™ 12 Drives

Big function in a small footprint. The Altivar 12 variable frequency drive combines flexibility, reliability, and the most advanced sensorless flux vector technology into very small space. This drive features an integrated communications port, user-friendly navigation wheel on the faceplate, and an optional multi-loader that streamlines set-up by making programming quick and easy. All of this comes with the versatility to handle applications from simple to complex, across industries, and harsh environments.

Table 26.5: Altivar 12 Configuration Tools

Description	Part Number	For Use on Drives
Simple Loader: to transfer configuration between like drives. For use with the Altivar product line.	VW3A8120	ATV12, ATV312, ATV61, and ATV71
Multi-loader: to transfer a configuration from a drive or from SoMove via an SD card, and transferring to another drive or to a PC	VW3A8121	ATV12, ATV312, ATV61, and ATV71
Cable: for connection between the MultiLoader and an ATV12 that is in its packaging	VW3A8126	All
USB to RJ45 adaptor: for use in connecting to a PC with a USB port	TCSMCNAM3M002P	Compatible device families: Advantys™ OTB, Altistart™ soft starters, Altivar series including HMI, Altivar controller

Altivar™ 312 Drives

The Altivar 312 mid-featured AC drive is designed to make industrial and commercial machines more energy efficient while simplifying its integration into a single control system architecture.

With the highest overtorque and the only drive with a remote graphic keypad in its class, the Altivar 312 mini-drive is ideally suited to the needs of material handling, packaging, food and beverage, and other OEM machines. It also comes standard with integrated communications port for Modbus and CANopen networks, optional cards available for CANopen Daisy Chain, DeviceNet, and Profibus DP, and gateways can be used for Modbus TCP/IP and FIPIO.

^[7] These horsepower, wattage, and continuous ampere ratings apply to 4 kHz switching frequency and maximum 50 °C ambient. Refer to the installation manual for derating curves as a function of switching frequency, ambient temperature, and mounting conditions.

^[8] Open type Altivar 312 Drives can be installed as UL Type 1 with optional conduit box when following instructions in the installation manual.

^[9] A minimum 3% line reactor is required on all 575 V drive installations.

Altivar™ 320 Machine

The new benchmark in machine performance. Altivar 320, part of the new Altivar™ Machine range, is a powerful combination of safety, reliability, and simplicity which makes it a versatile choice that reduces costs both during installation and throughout the machine's life cycle. Altivar 320 has a number of out-of-the-box features for building more effective machines.

Altivar 340 Machine Drives

Altivar™ 340 Machine

Stay on top of the Smart Machine Era! Altivar Machine ATV340 is engineered for high performance application requirements by maximizing the machine performance thanks to real time variable speed drive operation, more connectivity, flexibility, and scalable safety. The ATV340 is available from 1 to 100 hp with the ability to control any kind of motor in open and closed loop.

Altivar™ 340 Accessories

Table 26.13: Altivar 340 Accessories

Catalog Number	Description
VW3A1111	Advanced graphic display
VW3A1112	Remote mounting kit for use with VW3A1111
VW3A1113	Plain text display terminal
VW3A8120	Simple Loader configuration tool
VW3A8121	Multi-Loader configuration tool
VW3A8126	Cord set for Multi-Loader tool
VW3A3608	CANopen daisy chain communication module, two RJ45 ports
VW3A3618	CANopen daisy chain communication module, 9-pin male SUB-D connector
VW3A3628	CANopen daisy chain communication module, removable 5-position screw connector
VW3CANCARR03	CANopen cable with 2 RJ45 connectors, 0.3 m
VW3CANCARR1	CANopen cable with 2 RJ45 connectors, 1 m
TCSCAR013M120	CANopen end-of-line terminator with RJ45 connector
VW3CANTAP2	IP20 CANopen junction boxes
VW3A3616	Modbus TCP and EtherNet/IP network module
VW3A3607	PROFIBUS DP V1 communication module
VW3A3609	DeviceNet communication module
VW3A3601	EtherCAT communication module
VW3A3619	Ethernet POWERLINK communication module
VW3A3627	ProfiNet communication module
VW3A3620	Speed monitoring module
VW3M7101R01	Daisy chain DC bus cord with two connectors for use with ATV320***M2B, ATV320U04N4B–ATV320U40N4B
VW3M7102R150	Daisy chain DC bus cord with one connector and flying leads at one end; Shielded cable for use with ATV320***N4B
VW3M2207	Daisy chain DC bus cord with two connectors Connection kit for VW3M7102R150 Cable for use with ATV320***N4B

[12] Conformal coating is standard.

[13] Product does not contain EMC filter.

[14] An AC 5% line reactor is mandatory.

[15] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.

Altivar™ 71 Single-Phase

In an application where it is necessary to use a 240 V single-phase input for a 3-phase motor, the drive must be derated; therefore, the power listed on the drive nameplate will be higher than the power rating on the motor nameplate.

For more information on wire and line reactor sizing, refer to Altivar 61 and 71 Supplementary Ratings (30072-451-38).

[16] These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the partnumber to receive a BACnet option card.

[17] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 5 hp at 230 Vac single phase, add "S337" to the end of the catalog number. On 7.5 hp to 25 hp at 230 Vac single phase, add "337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils.

[18] Product does not contain an EMC filter.

[19] Also possible for use with a synchronous motor. Add "383" to the end of the catalog number.

[20] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V, add "S337" to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add "337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on 55 kW/75 hp @ 230 Vac 3 phase and higher & 90 kW/125 hp @ 460 Vac and higher.

[21] Product does not contain an EMC filter.

[22] Product ships with a DC choke that must be field mounted. A 5% line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive.

[23] Conformal coating is standard.

ATV IMC drive controller card [31]	—		VW3A3521	
IMC Option Card	ATV IMC drive controller card [31]			
Controller Inside Option Card	Programmable option card, conforms with IEC61131–3 programming standard.	any ATV61 any ATV71	VW3A3501 [32]	
Water Solutions Control Card	This option card contains a variety of pre-programmed functions and features to manage multi-pump installations.	any ATV61 any ATV71	VW3A3503 [32]	
Simple Loader	Using RJ45 port connections, the configurations of a drive can be downloaded then uploaded to compatible drive.	ATV31, ATV61, and ATV71	VW3A8120	

[30] For use with the ATV71H...383 drive ONLY.

[31] SoMachine is required to use this product.

[32] The drive cannot support the VW3A3503 water solutions card and the VW3A3501 controller inside option card simultaneously.

[34] Normal duty applications requiring an overload up to 110% for 60 seconds. Typical for variable torque loads.

[35] Heavy duty applications requiring an overload up to 150% for 60 seconds. Typical for constant torque loads.

[36] These values are given for a nominal switching frequency of 4 kHz up to ATV630D45N4, or 2.5 kHz for ATV630D55N4...D90N4 for use in continuous operation. The switching frequency is adjustable from 1...16 kHz for all ratings. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves on our website www.schneider-electric.com).

[37] Typical value for the indicated motor power and for the maximum prospective line Isc.

S-Flex™ Variable Torque AC Drive—208 V, 230 V, and 460 V Ratings

The AHRI certified S-Flex enclosed drive features the Altivar 212 drive and provides 100 KAIC rating for commercial pump, fan, and scroll compressor applications.

The S-Flex is an economical package that includes a circuit breaker disconnect and option bypass contactors, drive input disconnect switch or line contactor.

The S-Flex is rated as a UL Type 1, 12, and 3R enclosure an ideal for use in residential high rise and mixed-use buildings, commercial office buildings, schools and campus environments.

All S-Flex 212 Enclosed Drives are supplied with:

- Altivar™ 212 power converter
- Square D™ circuit breaker disconnect (Power Fuses for 460 V version only)
- Coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode
- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication port
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

[3] For UL Type 12 and 3R only.

Altistart™ 22 Soft Starters

The Altistart 22 is designed for commercial and normal duty industrial applications, it uses both voltage and torque control to provide a soft start and soft stop for three-phase asynchronous motors between 17 A and 590 A. The conformal-coated, printed circuit boards provide enhanced resistance to harsh environments, increasing the service life of installations and lowering maintenance costs.

Select the Altistart 22 soft starter using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

The ATS22C21S6,S6U..C59S6,S6U units come with an integrated fan. The ATS22D17S6,S6U..C17S6,S6U units are ventilated by means of natural ventilation. For more demanding applications, such as those with a greater number of starts, the Altistart 22 range offers fans as an option. The fans are powered by the Altistart 22 unit and attach to the back of the device. The fan's noise level is less than 60 dBA.

[1] Motor full load amperate (FLA) must not exceed the ampere ratings of the soft starter.

[2] S6 = 208–600 line voltage, 220 V control voltage

[3] S6U = 208–600 line voltage, 110 V control voltage

[4] Value not indicated when there is no corresponding standardized motor.

[5] A remote keypad cord set is required.

Altistart™ 48 Soft Starters

The Altistart 48 soft starter combines ease of selection with simple installation and high motor control performance. With its exclusive motor Torque Control System, the Altistart 48 helps eliminate uncontrolled motor acceleration and deceleration, a problem inherent with standard voltage—ramp soft starters. The Altistart 48 includes features to help with motor and machine protection and is available for motors ranging from 208 to 575 volts. In addition to a built-in display and programming terminal, a remote keypad option and programming software is available to ease integration and commissioning. The Altistart 48 has a built-in Modbus™ port and is offered with serial communication gateways to such popular networks as Ethernet and DeviceNet™.

Open Style Soft Starters 50–60 Hz, Three-Phase, 690 V Maximum

The Altistart 48 soft starter must be selected using the table below, based on nameplate full load ampere rating of the motor. The horsepower ratings shown in table are for reference only.

[6] Motor full load amperage (FLA) must not exceed the ampere rating of the soft starter.

[7] Low Inertia—Connected motor load inertia equal or less than 10 times motor rotor inertia.

High Inertia—Connected motor load inertia greater than 10 times motor rotor inertia.

Enclosed Altistart™ 22 Motor Controllers

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a pre-engineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 400 hp at 460 V.

- 3–150 hp, 208 V
- 5–200 hp, 230 V
- 10–400 hp, 460 V
- 15–500 hp, 575V

[1] This option is not selectable with power circuit option B05.

[2] Select only one option.

[3] To omit, do not include a selection in the catalog number.

[4] This option is available only for enclosure size D.

[5] This option is not selectable with power circuit option B05.

[6] This option is not selectable with power circuit option B05. This option is valid only with the following control options: C06, D06, or E06.

[7] Options E10 and Z10 cannot be used together.

[8] This option is not selectable with power circuit option B05. The contacts are available only when power circuit option Y05 is selected.

[9] The contacts are not available when power circuit option R05 is selected. This option is valid only with the following control options: C06, D06, or E06.

[10] If you select option U10, you must separately order the remote keypad (VW3G22101) and cable (VW3A1104R30) to commission the softstarter. Refer to the *ATS22 User Manual*, BBV51330, for serial communication programming and control capabilities.

[11] Options E10 and Z10 cannot be ordered together.

Enclosed Altistart 22 Control Options (pick one)

Mod A06	Start/Stop push buttons Provides black start and red stop push buttons (3-wire control scheme).
Mod B06	Forward-Off-Reverse selector switch Provides three-position selector switch to select between forward, off and reverse. Uses 2-wire control.
Mod C06	Hand-Off-Auto selector switch Provides a three-position selector switch, 2-wire control scheme.
Mod D06	Stop-Run selector switch Provides a two-position selector switch.
Mod E06	Hand-Auto selector switch and Start/Stop push buttons Provides a two-position selector switch and start/stop push buttons (3-wire control).

Enclosed Altistart 22 Pilot Light Cluster Options (pick one)

Mod A07	Pilot light cluster #1 Consists of red "RUN" and green "OFF" pilot lights. Provides standard red "RUN (ON)" and green "OFF" pilot lights for status annunciation.
Mod B07	Pilot light cluster #2 Consists of red "RUN" (push-to-test) and green "OFF" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)" and standard green "OFF" pilot lights for status annunciation.
Mod C07	Pilot light cluster #3 Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)", green "OFF" and yellow "FAULT" pilot lights for status annunciation.
Mod D07	Pilot light cluster #4 Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)", standard green "OFF", and push-to-test type yellow "FAULT" for status annunciation.

Enclosed Altistart 22 Meter Display Options (pick one)

Mod B08	Elapsed time meter Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R Enclosures
---------	---

Enclosed Altistart 22 Miscellaneous Options (multiple compatible options may be selected)

Mod A10	Floor mounting kit Only available for size D enclosures.
Rules: Available for power options S05, N05, R05, Y05.	
Mod B10	150 VA additional control power capacity Provides 150 VA additional control VA capacity for customer use.

Information and Selection of AC Drives

For information and selection, contact your nearest Schneider Electric sales office or visit our website:

Technical Support for AC Drives

Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 8:00 pm Eastern time to assist with diagnosis of product problems. For support with applications or product selection, please contact a drive specialist at your local authorized Schneider Electric Distributor. Click here to locate an Automation and Control distributor near you: [Find Electrical, Automation and Control Distributors](#).

EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

Toll Free: 888-778-2733
E-mail: drive.products.support@schneider-electric.com
Fax: 919-217-6508

Services (On-Site)

Square D Services is your single source of service expertise for all major brands of electrical equipment. With our national network of service locations and qualified experts, Square D Services is capable of providing customer-based solutions anywhere in the United States. Services responds to your requests, seven day a week, 24 hours a day.

Toll Free: (888-778-2733)

Customer Training for AC Drives

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft starter training with dates, locations, and pricing, please call:

Fax: 978-975-2821

Packaged Product Documentation for AC Drives

Standard Documentation

Each adjustable frequency drive or soft starter shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start-up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

Approval and Record Drawings

All factory orders for enclosed drives and soft starters come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.

Modicon™ Zelio™ Logic Controller

For applications that require more flexibility than a simple relay, timer or counter, but are too simple for the smallest Nano PLC, Zelio Logic smart relays are available. Designed to accept and control outputs just like a relay, Zelio Logic features logic programming with Function Block Diagram (FBD) or Ladder Logic Programming using either the front panel or by utilizing ZelioSoft software. For more information, refer to www.schneider-electric.us [Zelio Logic](#) or catalog [DIA3ED211202EN](#).

Modicon™ M221 PLC

Providing “Best in Class” performance for compact machine automation, the Modicon M221 PLC features intuitive machine programming using [SoMachine Basic software](#), ready-to-use applications and standard function blocks. Its flexible and scalable machine control allows you to easily upgrade to higher performance platforms when necessary. With Ethernet, USB and serial ports, the Modicon M221 PLC provides optimum connectivity for simplified machine integration and maintenance. See catalog [DIA3ED2140110EN](#).

Modicon™ M241 PLC

Designed for high-performance compact machines, incorporating speed and position control functions—the Modicon M241 PLC features a dual core processor—that provides tremendous processing power and memory size for complex applications. Machine programming is highly intuitive using SoMachine software, function blocks and ready-to-use applications. And, the M241 PLC’s simplified motor control integration and wiring allow for quick start-up and commissioning.

Catalog Number	Communication	Inputs	Outputs	Supply Volts
TM241CE24R	Modbus TCP, EthernetIP, Modbus Serial, Ascii [1]	14 Digital	4 PNP, 6 Relay	24 dc
TM241CE24T		14 Digital	10 PNP	
TM241CE40R		24 Digital	4 PNP, 12 Relay

Additional versions available, please see [Modicon M241 Micro PLC](#) or catalog [DIA3ED2140107EN](#) for additional information.

TM241CE40T

[1] NOTE: Profibus DB is available via TM4 expansion module.

TM251MESE

TM251MESD

Modicon™ M251 PLC

The Modicon M251 PLC provides innovative, high-performance solutions for modular machines and distributed architectures with line control. Its intuitive SoMachine software, ready-to-use applications and function blocks allow you to optimize your programming time. And, its flexible and scalable machine control allows you to change the PLC hardware type to fit the application, using the same programming across the range. The M251 PLC allows you to stay connected everywhere via Ethernet, wireless access, web servers and remote visualization... simplifying machine integration and maintenance. Its integrated Ethernet switch - on a separate channel from the machine control network - allows data exchange with other machines and system networks, while keeping the machine control on a dedicated high-performance local network.

Catalog Number	Description	Com 1	Com 2	Supply Volts
The M251 can be further enhanced using the TM3 (I/O & Safety), TM4 (communication), and TMC (I/O) expansion modules.				
TM251MESE	Dual Channel Ethernet PLC	Dual Port Ethernet	Ethernet as Master	24 dc
TM251MESD	Ethernet and CANopen PLC	Dual Port Ethernet	CANopen as Master	24 dc

Additional versions available, please see our [website](#) and catalog [DIA3ED2140108EN](#) for additional information.

Catalog Number	Description
TM3 I/O Expansion Modules for M221, M241, M251 PLCs. Up to 7 modules per PLC. Add TM3XTRA1 + TM3XREC1 to add 8-14 TM3 modules. Additional TM3 modules are available.	
TM3AI4	I/O Module 4 Analog Inputs
TM3AI8	I/O Module 8 Analog Inputs
TM3AO4	I/O Module 4 Analog Outputs
TM3AQ2	I/O Module 2 Analog Outputs
TM3Q4	I/O Module 4 Analog Outputs
TM3DI16	I/O Module 16 Inputs
TM3DI8	I/O Module 8 Inputs
TM3DI8A	I/O Module 8 Inputs 120 Vac
TM3DM8R	I/O Module 8 IO Relays
TM3DQ16R	I/O Module 16 Outputs Relays
TM3DQ16T	I/O Module Outputs Transistor PNP
TM3DQ8R	I/O Module 8 Outputs Relays
TM3DQ8T	I/O Module Outputs Transistor PNP
TM3TI4	I/O Module 4 Inputs Temperature
TM3TI8T	I/O Module 8 Inputs Temperature
TM3XTRA1	I/O Expansion Transmitter for 8-14 TM3 Modules
TM3XREC1	I/O Expansion Receiver for 8-14 TM3 Modules

Modicon™ M258 PLC

The Modicon M258 logic controller is a compact, high-performance and fully expandable PLC. It forms a part of Flexible Machine Control approach, a key component of Machine Struxure, which brings you maximum flexibility and ensures the most optimized control solution. This PLC is designed for machine manufacturers (OEMs) focusing on applications such as packaging, conveying and storage, textiles and woodworking, etc. It offers high-performance solutions for speed control, counting, axis control, and communication functions. The Modicon M258 logic controller's dual-core processor provides extremely high performance. Core 1 is dedicated exclusively to managing program tasks and offers the maximum resources for real-time execution of the application code. Core 2 is dedicated to executing communication tasks, which have no impact on the application performance. More information is available at [www.schneider-electric.us](#) [Modicon M258 PLC](#) and in catalog [DIA6ED2100402EN](#).

EcoStruxure™ Machine Expert

EcoStruxure™ Machine Expert (formerly known as SoMachine) is the OEM solution software for developing, configuring and commissioning the entire machine in a single software environment, including logic, motion control, HMI and related network automation functions. EcoStruxure™ Machine Expert allows you to program and commission all the elements in Schneider Electric's Flexible and Scalable Control platform, the comprehensive solution-oriented offer for OEMs, which helps you achieve the most optimized control solution for each machine's requirements. Flexible and Scalable Control platforms include:

Match your controller to the available software package:

MachineStruxure Product Range	Schneider Electric Software	Software Distribution
Zelio Logic: Smart Relays 10 to 40 I/O	Zelio Soft: Zelio Logic configuration software	Free to Download
Modicon M171 / M172: HVAC Logic Controller	SoMachine HVAC	Available to order
Modicon M221 Nano PLC	SoMachine Basic	Free to Download
Modicon Motion: M221, M241, M251, M258, LMC058, and LMC078	SoMachine NOTE: Vijeo Designer and SoMachine Basic are included	Available to order
Magelis HMI: SCU and XBTGC		
PacDrive Motion Controller	SoMachine Motion	Available to order

SoMachine is a professional, efficient, and open software solution for integrating Vijeo™ Designer. It also integrates the configuring and commissioning tool for motion control devices. It features all six IEC 61131-3 languages, integrated field bus configurators, expert diagnostics and debugging, as well as outstanding capabilities for maintenance and visualization.

More information is available at www.schneider-electric.us **EcoStruxure™ Machine Expert** and catalog **DIA3ED2140110EN**.

Modicon™ TSX Micro™ PLC

Compact and cost-efficient, this mid-range PLC boasts the power and flexibility OEMs find most desirable. Optional integrated safety relays, half-size I/O and web-enabled modules provide seamless connection to supervisory maintenance systems plus minimize real estate. PCMCIA memory cards preserve your investment when expanding. Communication options include Ethernet and ASi for global access using Open standards. More details are available at www.schneider-electric.us **Modicon TSX Micro PLC** and catalog **MKTED204012EN**.

PL7™ Application Software

PL7 application software complies with the IEC 61131 standard for programming software. PL7 can be programmed in four IEC languages including two text-based editors (Structured Text and Instruction List), and two graphic-based editors (Sequential Function Chart and Ladder Diagram). PL7 software promotes productivity by using structured programming, which increases reusability, while reducing maintenance costs, and can be used to program both the Micro PLC and the Premium PAC. More information is available at www.schneider-electric.us **PL7 Programming Software** and catalog **MKTED208054EN-US**.

Modicon™ Unity Momentum PLC

The small footprint and open architecture of the Momentum PLC product line make it extremely versatile for a variety of automation applications. The Unity Momentum PLC is ideal for PC-based control, distributed control, distributed I/O, and traditional, standalone PLC control. The Momentum PLC product line includes I/O bases and communication adapters that are interchangeable and snap together to deliver optimal flexibility throughout the control system life cycle. Using Ethernet as its communications backbone, the Modicon Unity Momentum CPU delivers all the performance benefits of real-time control. The open architecture of the Unity Momentum CPU makes it a universal controller for distributed I/O, compatible with many of the major fieldbus and control network environments. An integral Ethernet port in the Unity Momentum CPU allows users to perform a wide range of functions over Ethernet, including data acquisition, peer-to-peer communications, and I/O scanning. Embedded web pages enable the use of a standard web browser to read status and diagnostic information from the processor. The Unity Momentum CPU not only seamlessly connects I/O and other control devices via open standards; it delivers the performance of a full function, realtime controller for stand-alone and distributed system configurations in one moneysaving unit. Additional information can be found at www.schneider-electric.com.

Modicon M340™ PAC

Our latest midrange PAC is the most integrated ever! Highly requested by industrial OEMs and end users, the all-power-inside concept boasts high-performance processing and small size to create a system that provides flexibility beyond any before. With up to three built-in CPU communication ports, large memory options, sixty-four channel high-density modules, and embedded web servers, the Modicon M340 is a powerful solution for industrial OEMs and end users demanding more productivity in their PACs. The Modicon M340 PAC supports advanced communications such as enhanced Ethernet/IP which support Ethernet/IP, Modbus TCP/IP, and daisy chain loop communications on the same four-port, rack mounted switch module. It will also support DNP3.0 in serial or Ethernet in a rack-mounted RTU module. The Modicon M340 PAC is programmed with Unity Pro software, which allows users to dramatically reduce setup time and effort with features like drag 'n drop CANopen bus setup and standard IEC 61131-3 language selection. Designers gain fast, easy and efficient startups. More details are found on our website or in the latest Modicon M340 catalogs and brochures. More details are available at www.schneider-electric.us **Modicon M340 PAC** and catalog **DIA6ED2061001EN-US**.

Modicon M580™ ePAC

The Modicon M580 ePAC (Ethernet Programmable Automation Controllers) features openness, flexibility, robustness and sustainability. The M580 ePAC is designed with an Ethernet backbone to optimize connectivity and communications. The microprocessor has three native Ethernet ports on the chip. Schneider Electric collaborated with the supplier to design the microprocessor, and in 2013 the supplier agreed to provide the microprocessor for 20 years, helping to protect customers' long-term investments. The powerful processors offer high levels of computation for complex networked communication, display and control applications. The M580 ePAC is designed for cybersecurity. It has an Achilles Level 2 certification. Achilles Level 2 certification by Würldtech is considered to be the best cybersecurity certification available for PACs. The M580 has other advanced embedded cyber security features that are defined by IEC 62443. This includes, but is not limited to the ability to disable unused services, control of remote access to the PAC and integrity checks of Unity Pro executable files. The M580 ePAC supports X80 common I/O modules which can be easily integrated into its architecture. More details are available at www.schneider-electric.us **Modicon M580 PAC Controller**.

Modicon Premium™ PAC

Ideally suited for discrete manufacturing, complex OEM applications as well as municipality and infrastructure applications, this cost-effective PAC line features integrated functions such as weighing, interpolated motion control, and process loops. Using the built-in Ethernet port, user-customized web page capabilities, and a range of popular open-standard fieldbus connections, the Modicon Premium enables seamless communication with enterprise systems providing low-cost remote maintenance diagnostics. More details are available at www.schneider-electric.us [Modicon Premium PAC](#).

Modicon Quantum™ PAC

The Modicon Quantum PAC is our high-end, full function PLC designed for high I/O count industrial applications that require high performance such as Pharmaceutical, Petrochemical, Food and Beverage, Automotive, and others. Quantum also offers true bumpless hot standby. Quantum processors can be programmed with Unity Pro software, and can also support legacy 984 ladder logic programs in the LL984 Unity Pro editor by simply importing the legacy application program. Concept™ application software and ProWORX™ 32 application software are also supported on the Quantum platform. The Unity Quantum's onboard memory can exceed 3 Mbytes, and can have more than 7 Mbytes of extended memory on a PCMCIA card for data and application storage combined. It can also provide over 8 Mbytes of data storage alone. The Quantum PLC also offers Safety PAC versions certified for use in up to SIL3 applications. This includes both standard and hot standby capability as well as redundant I/O. It programs with Unity Pro XLS. The SIL3 offer stresses both high reliability as well as high availability. More details are available at www.schneider-electric.us [Modicon Quantum PAC](#) and catalog [DIA6ED2110705EN-US](#).

Unity™ Pro Application Software

Unity Pro software for application development is compliant with IEC 61131-3. It includes the five IEC editors and an LL984 editor to support imported 984 ladder logic from legacy hardware. Unity Pro is compatible with all Industrial midrange and high-end controllers including Modicon Momentum, M340, Premium, M580 and Quantum PACs. Unity Pro provides a collaborative automation environment that enables individuals and teams to work together more effectively, reducing the cost of developing and managing automation solutions. Unity Pro XLS software is used to program the SIL3 Quantum as well as all other Unity-based platforms. Since one software package can program all the platforms, it greatly simplifies development and support issues. It integrates commercial IT technologies like Ethernet, VBA, XML and hyperlinks within the traditional control framework to enable customers to reduce the cost of automating both discrete and batch control applications. More details are available at www.schneider-electric.us [Unity Pro](#) and catalog [MKTED2140504EN](#).

Magelis™ Small Panels HMI Products

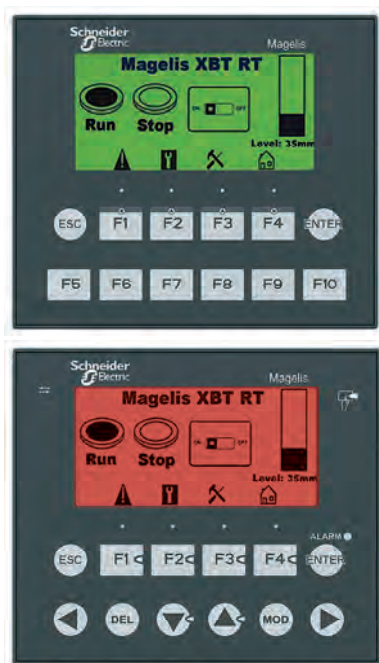

The Magelis XBTN, XBTR, XBTRT, STO and STU Small Panels have been specifically designed to satisfy the requirement for panels that are compact and easy to use. These terminals are easy to configure, and they work seamlessly with other Schneider Electric equipment to provide a complete automation solution, dedicated to simple or compact machines.

Magelis XBT N/R/RT

The Magelis XBTN/R/RT small HMI are an ideal solution for simple machines. The XBTN and XBTR models can accommodate up to four lines of twenty characters and are available with a tri-color backlight (green/orange/red). The XBTRT models have a semi-graphical display with resistive touch screen. All models have customizable function keys.

Key features of the Magelis XBTN/R/RT:

- Monochrome alphanumeric display
- Tri-color backlight available on some models (green/orange/red)
- Semi-graphical display and touch screen on the XBTRT models
- Serial communication port for PLC connection
- Powered by 5 Vdc from PLC terminal port or 24 Vdc externally
- Operating temperature: 32—151 °F (0—55 °C)
- Configured by Vijeo Designer Lite
- IP65, NEMA 4X (outdoor use), XBTN/R only
- Certifications include CE, cULus, Class 1 Div 2

Catalog Number	Screen Type	Keys	Touch Screen	Supply Voltage	Com Port
XBTN200	2x20 Alphanumeric LCD with Green Backlight	4 fixed + 4 customizable	—	5 Vdc (PLC Port)	RS232C/RS485 (RJ45)

[1] Preloaded with application for connection to Tesys model U motor starter.

Magelis STO

The Magelis STO is a compact, panel-mounted HMI that bring a cost-effective solution to machine builders. With its touch screen, 3.4 inch monochrome display, and multi-color backlight options, it is a great fit for small, compact or simple machines.

Key features of the Magelis STO:

- 3.4 inch monochrome (200x80 pixel) STN LCD display with multi-color backlight
- Resistive touch screen
- One USB v2.0 host type A port + one USB v2.0 mini-B port
- Serial or Ethernet communication port
- Powered by 24 Vdc
- Operating temperature: 32—151 °F (0—55 °C)
- Configured by Vijeo Designer
- IP65, NEMA 4X (indoor use)
- Certifications include CE, cULus, Class 1 Div 2

Catalog Number	Backlight Colors	Com Port	Ethernet
HMISTO501	White, Pink, Red	RS232C for Zelio [2] (removable terminal block)	—
HMISTO511	Green, Orange, Red	RS232C/RS485 (RJ45)	—
HMISTO512	White, Pink, Red	—	Ethernet (RJ45)
HMISTO531	White, Pink, Red	RS232C/RS485 (RJ45)	—
HMISTO532	White, Pink, Red	—	Ethernet (RJ45)

Magelis STU

The Magelis STU is a compact HMI that is mounted using a 22 mm diameter hole - similar to a push button. This helps reduce overall cost by minimizing the labor for installing the HMI. The STU is a cost-effective solution for machine builders.

Key features of the Magelis STU:

- 3.5 or 5.7 inch TFT color display, QVGA (320 x 240)
- Resistive touch screen
- One USB v2.0 host-type A port + one USB v2.0 mini-B port
- Serial and Ethernet communication ports
- Powered by 24 Vdc
- Operating temperature: 32—122°F (0—50°C)
- Configured by Vijeo Designer
- IP65, NEMA 4X (indoor use)
- Certifications include CE, cULus, Class 1 Div. 2, Marine

Catalog Number	Screen Size	Com Port	Ethernet
HMISTU655	3.5 in. TFT Color (320x240)	RS232C/RS485 (RJ45)	Ethernet (RJ45)
HMISTU855	5.7 in. TFT Color (320x240)	RS232C/RS485 (RJ45)	Ethernet (RJ45)

[2] Enables direct communication with the Zelio Logic SR2/SR3 range of controllers.

Magelis SCU Small HMI Controllers

The ultra-compact range of Magelis SCU small HMI controllers is part of Schneider Electric's Flexible Machine Control concept, a key element in MachineStruxure™. The Magelis SCU HMI Controllers product offer brings together Human Machine Interface and control functions within a single product. This reduces the amount of equipment required and the associated costs throughout the life cycle of the machine. It is mounted using a 22 mm diameter hole, which considerably simplifies installation.

Key features of the Magelis SCU:

- 3.5 or 5.7 inch TFT color display, QVGA (320 x 240)
- Resistive touch screen
- One USB v2.0 host type A port + one USB v2.0 mini-B port
- Serial, Ethernet and CANopen communication ports
- Removable terminal blocks for I/O connections
- Powered by 24 V dc
- Operating temperature: 32–122°F (0–50°C)
- Configured by SoMachine
- IP65 NEMA 4X (indoor use)
- Certifications include CE, cULus, Class 1 Div. 2

Magelis™ Advanced Panels HMI Products

The Magelis Advanced Panels are touch screen HMIs that are designed for the most demanding industrial applications. Choose between several platforms and screen sizes for the best cost and performance to suit your needs.

Magelis GTO Optimized Panels

The Magelis GTO Optimized Panels are ideal for OEMs that need a cost-effective solution with enough functionality for demanding applications. The GTO's build-in connectivity includes serial ports, Ethernet, and USB. Via Ethernet, they support a Web server, FTP, e-mail, and remote access from a PC, smart phone, or tablet applications. The panels are designed for industrial environments. A stainless steel version is available that is resistant to high-pressure cleaning (conforming to DIN 40050–9). Key features of the Magelis GTO:

- TFT color LCD display with 50,000 hour backlight
- Resistive analog touch screen
- One USB v2.0 host type A port + one USB v2.0 mini-B port
- Powered by 244 V dc
- Configured by Vijeo Designer
- IP65, NEMA 4X (indoor use), IP66K for Stainless Steel models
- Certifications include CE, cULus, Class 1 Div. 2, Marine

See Catalog [DIA5ED2130616EN](#) for more information.

Magelis™ XBTGH Handheld HMI

The Magelis XBTGH is a handheld HMI that enables operator mobility around a machine. It is ideal for machine setup and troubleshooting as well as normal operation. Key Features of the Magelis XBTGH:

- 5.7 in. color TFT LCD display, VGA (640 x 480), 50,000 hour backlight
- Resistive analog touch screen
- Eleven programmable function keys with customizable labels + one enable button
- Emergency stop button with two NC safety contacts and one NO auxiliary contact
- Key switch for turning the HMI on/off
- Three-position grip switch to signal that the operator is ready
- Designed to be held by one hand
- Integrated stylus for touch screen operation
- Connectivity includes one serial port, one Ethernet port, and one USB Type A port

Catalog Number	Description
XBTGTH2460	Handheld HMI with E-stop button
XBTGTH2460B	Handheld HMI without E-stop button
XBTZGJBOX	Junction box for handheld HMI
XBTZGHL3	3 meter cable for handheld HMI
XBTZGHL10	10 meter cable for handheld HMI
XBTZGHL20	20 meter cable for handheld HMI

New!

Magelis GTU Universal Panels

The Magelis GTU Universal Panels are a high performance HMI product range designed with the uniqueness of modularity that allows you to select and assemble the best combination of display unit and CPU module for the application requirements. Magelis GTU features operator efficiency, simplified installation and flexibility that fits almost any system. This product range includes: display modules (Advanced and Smart) and CPU box modules (Premium and Open).

Key features of the Magelis GTU:

Premium Box CPU Module:

- Magelis proprietary OS
- SD Card for OS and application
- Second SD Card socket for user data
- 2x USB 2.0 (Type A) and 1x USB 2.0 (mini-B)

Open Box CPU Module:

- Window Embedded 7 OS
- CFast Card for OS and application
- SD and CFast Card sockets for user data
- 3x USB 2.0 (Type A) and 1x USB 2.0 (mini-B)
- DVI-D output for external monitor

CPU Box Type	Catalog Number	Operating System	Video Out	Com Ports	Ethernet	USB 2.0 Ports	Memory Card Socket
Premium Box	HMIG3U	Magellis Proprietary OS	—	2 Ports	2 Ports	2x (Type A) 1x (mini-B)	1x SD for system (included) 1x SD socket for user data
Open Box	HMIG5U	Windows Embedded 7	DVI-D	2 Ports	2 Ports	3x (Type A) 1x (mini-B)	1x CFast for system (included) 1x CFast socket for user data 1x SD socket for user data

Common Features:

- Modular design, any combination of display module and CPU box
- Two serial and two Ethernet ports for communications
- Powered by 12....24 Vdc
- Operating temperature: 32–140°F (0–60°C)
- Configured by Vijeo Designer
- IP66/67, NEMA 4X (indoor use)
- Certifications include: CE, cULus, Class 1 Div. 2, Marine

Smart Display Module:

- 16M color TFT LCD display (4:3 format)
- Resistive analog touch screen, multi-touch capable
- Front panel USB 2.0 ports, 1x (Type A) and 1x (mini-B)
- Sensor for automatic backlight brightness control

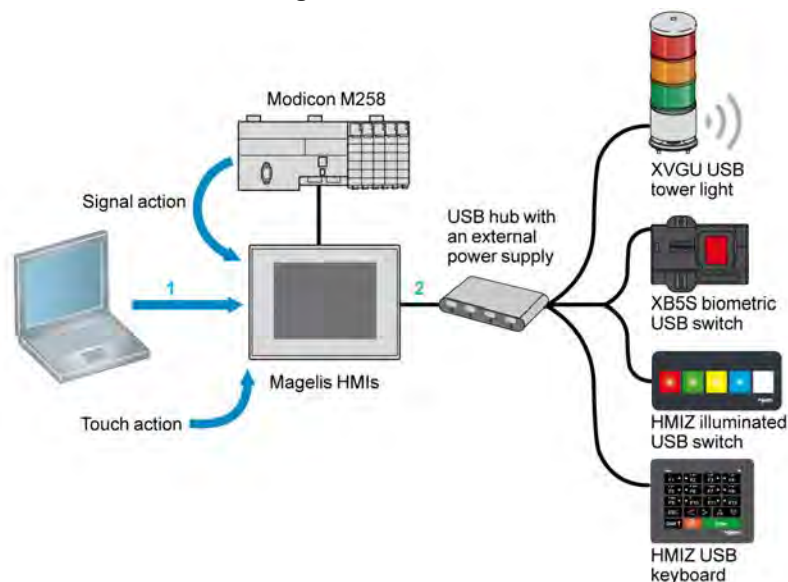

Advanced Display Module:

- 262k color TFT LCD display (16:9 format)
- Resistive analog touch screen, single touch

Display Type	Catalog No.	Screen Size	Front USB Ports	Brightness Sensor	Built-in Wireless LAN	Multi-touch Capable [3]

[3] Projects created in Vijeo Designer do not support multi-touch.

USB Accessories for Magelis HMI Terminals

The USB accessories for Magelis are designed to expand the selection range of user applications by offering value-added/differentiated HMI solutions. These innovative USB accessories can be easily installed and operated with HMI terminals.

Illuminated Switch Panel

The illuminated USB switch is uniquely designed for easy visualization and quick acknowledgement of alarm (wide view angle and brightness). This switch with tactile feedback can also be used as function keys in HMI applications that involve repetitive operations in dirty environments. This keeps the touch panel clean and protected by avoiding continuous finger contact.

Key features of the Illuminated USB Switch:

- Five programmable switches with tactile feedback
 - Programmable six-color LED illumination per switch
 - Connect to the Magelis HMI via USB
 - Mount to the panel through a 22 mm hole
 - Powered by the HMI via the USB cable
 - Configured in Vijeo Designer
 - IP65, NEMA 4X (indoor use)
 - Certifications include CE, cULus, Class 1 Div. 2
- Catalog Number: [HMIZRA1](#)
 See Catalog [DIA5ED2130901EN](#) for more information.

Keyboard Panel

The USB Keyboard is designed for flexible mounting and easy configuration. The tactile keys are suited for HMI applications with repetitive operations or dirty environments (oil, dust). Functionality of the HMI can be extended with external function keys, status indicator LEDs and both numeric and text data entry.

Key features of the USB Keyboard:

- Twenty-key membrane keyboard with tactile feedback
- Includes twelve programmable keys with integrated LEDs
- Connect to the Magelis HMI via USB
- Mount to the panel through a 22 mm hole
- Powered by the HMI via the USB cable
- Configured in Vijeo Designer
- IP65, NEMA 4X (indoor use)
- Certifications include CE, cULus, Class 1 Div. 2

Catalog Number: [HMIZKB1](#)

See Catalog [DIA5ED2130901EN](#) for more information.

Biometric Switch

The XB5S Biometric USB Switch of the Harmony® XB5S product range controls and secures access to systems and machines by checking users' authorization through fingerprint recognition.

Key features of the Harmony XB5S Biometric Switch:

- Register up to 200 users, two fingerprints per user
- Connect to the Magelis HMI via USB
- Mount to the panel through a 22 mm hole
- Powered by external 24 V dc source
- IP65
- Certifications include CE, cULus

Catalog Number: [XB5S5B2L2](#)

See Catalog [DIA5ED2130901EN](#) for more information.

Tower Light

The monolithic USB tower lights of the Harmony XVGU product range have multi-color LEDs that are unique and simple-to-use. The states and patterns are directly set and modified in the HMI application. The XVGU tower lights provide long distance indication of the operating status or sequences of a machine or installation, both visually by illuminated signaling units with 360° visibility, and audibly by a buzzer.

Key features of the Harmony XVGU USB Tower Light:

- Unique one-piece LED tower design, 60 mm
- Three transparent signaling layers
- Two-tone buzzer with three level volume control and four colors
- Variety of signal patterns (flashing/non-flashing lights)
- Power and signaling managed by the HMI
- Installation options (on direct base or tube plate)

Catalog Number: [XVGU3SHAV](#) (100 mm length pole with mounting base)

Catalog Number: [XVGU3SWV](#) (direct base mounting)

See Catalog [DIA5ED2130901EN](#) for more information.

Magelis™ Industrial PC Products

Magelis™ Panel PC

The Magelis Panel PC is a family of panel-mounted all-in-one industrial PCs, certified for automation applications.

Features of the Magelis Panel PCs:

- TFT color LCD display, available in 10.4, 12.1, 15.0, and 19.0 in. screen sizes
- Resistive analog touch screen
- Stainless steel models available
- Variety of CPUs and performance levels
- Options for mass storage (HDD, SSD, memory card, DVD-RW, RAID)
- Variety of Windows operating systems options
- Options for add-in card slots
- Communication options including COM ports, Ethernet, and USB
- Fanless models available
- Supply power, 100...240 V ac or 24 V dc with option for battery back-up
- Vijeo Designer Run-time trial mode pre-installed
- IP65, NEMA 4X (indoor use)
- Certifications include CE, cULus, Class 1 Div. 2

Magelis™ Box PC

The Magelis Box PC is a family of wall-mounted, Industrial PCs certified for automation applications. The Box PC interfaces seamlessly with a Magelis Display Industrial Monitor.

Key features of the Magelis Box PC:

- Variety of CPUs and performance levels
- Options for mass storage (HDD, SDD, memory card, DVD-RW, RAID)
- Variety of Windows operating system options
- Options for add-in card slots
- Communication options including COM ports, Ethernet and USB
- Fanless models available
- Supply power: 24 V dc with option for battery backup

New!

Magelis™ Simple Box PC

The Magelis S-Box PC is a simpler, more basic alternative to the Magelis Box PC. This cost effective, tested, and validated solution is suitable for repetitive machines and infrastructure applications. These low-maintenance PCs provide a high level of connectivity in a compact design. Remote monitoring capability gives you peace of mind that the system is performing as desired.

Key features of the Magelis S-Box PC:

- CPU options, ATOM N270 (single core) or ATOM N2600 (dual core)
- No moving parts (fanless, solid state disks)
- Windows operating systems options
- Mini PCIe slot for option cards
- Communication options including COM ports, Ethernet, and USB
- DC power supply
- Remote system monitor utility included
- Vijeo Designer Run-time trial mode pre-installed
- Certifications include CE, cULus

The Magelis S-Box PCs are available as catalog items, with pre-configured features such as CPU, RAM, storage type, operating system, and other options. For more information and a list of available catalog numbers, please www.schneider-electric.com.

See Catalog [DIA5ED2140501EN](#) for more information.

New!

Magelis™ Rack PC

Magelis Rack PC easily installs into standard 19 inch racks in control room applications. Choose between several platforms for the best cost and performance to suit your needs. The Rack PC can serve as an engineering and SCADA server or an operator station. Supported software includes: Vijeo Designer, Run-time, Vijeo Citect, and PlantStruxure PES Distributed Control System.

Key features of the Magelis Rack PC:

- Available in 2U and 4U form factors
- Variety of CPUs and performance levels
- Options for mass storage (HDD, SDD, memory card, DVD-RW, RAID)
- Hot swap drive trays
- Options for add-in card slots
- Windows operating systems options
- Mini PCIe slot for option cards
- Communication options including COM ports, Ethernet, and USB
- Redundant power supply option
- Remote system monitoring utility included
- Vijeo Designer Run-time trial mode pre-installed
- Certifications include CE, cULus

Magelis Rack PCs are available as catalog items, with pre-configured features such as CPU, RAM, storage type, operating system, and other options. For more information and a list of available catalog numbers, please visit www.schneider-electric.com.

See Catalog [DIA5ED2140501EN](#) for more information.

New!

Magelis™ iDisplay Industrial Multi-Touch Monitor

The next generation of Magelis iDisplays features multi-touch monitors enabling the operator to use common gestures such as swiping and pinching in industrial applications. They also provide updated connectivity to seamlessly connect to a Magelis Box PC, Rack PC (or third party PC) via DVD-D (for video) and USB (for touch screen).

Key features of the Magelis iDisplay:

- TFT LCD display, 16M colors, XGA (1024 x 768), 4:3 format
 - 50,000 hour backlight
 - Resistive analog touch screen, multi-touch supported
 - Panel mount or VESA mount
 - DVI-D video input from host PC
 - USB connection to host PC for touch screen interface
 - Front panel USB v2.0 host type A port for keyboard, mouse, or memory stick, etc.
 - Powered by 12–24 V dc
 - Operating temperature: 32–140°F (0–60°C)
 - IP66/67, NEMA 4X (indoor use)
 - Certifications include CE, cULus, Class 1 Div. 2, Marine
- Catalog Numbers: [HMDID64DTD1](#) (12.1 in. display); [HMDID73DTD1](#) (15.0 in. display)
- See Catalog [DIA5ED2140501EN](#) for more information.

Vijeo™ Designer HMI Software

Vijeo™ Designer

Vijeo Designer is the configuration software for creating operator interface applications for Magelis HMI's and Industrial PCs. It is the ideal design tool for the simplest control application right up to the most complex HMI installations. It offers advanced script functions, recipe management, alarm management, data management, remote access, e-mail and multi-protocol connectivity.

Vijeo Designer features a screen graphics editor, including simple objects, a library of animated objects (bar graphs, meters, charts and tanks), and preconfigured advanced objects (buttons, lamps, numeric and message displays and enumerated lists).

Vijeo Designer has advanced communication support for Schneider Electric products. It also includes drivers for several third-party PLCs and devices.

Catalog Number	Description
VJDSNDTGSV62M	Single license
VJDSUDTGAV62M	Single license, with transfer cable
VJDGNDTGSV63M	Group license, three stations
VJDTNDTGSV62M	Team license, ten stations
VJDFNDTGSV62M	Facility license, unlimited stations for one site
VJDSNRTMPC	Run-time license for a Magelis IPC

For more information, refer to www.schneider-electric.us [Vijeo Designer HMI Software](#) and catalog [DIA5ED2130614EN](#).

Vijeo™ Designer Intelligent Data Services

The Intelligent Data Services (IDS) add-on for Vijeo Designer is a powerful, flexible and innovative software, fully compliant with FDA 21 CFR PART 11. It provides full traceability of the process, enables process variables to be monitored, and allows tracking of all operator actions. IDS software is easily accessible from any Web browser, enabling data collection via Ethernet, providing dashboards and reports generation.

Catalog Number [1]	Description
VJDSNTRCKV62M	IDS run-time license, single station
VJDSNTRPRV62M	IDS report printing add-on
VJDSNTRPKV62M	IDS report printing add-on with run-time license

For more information, refer to www.schneider-electric.us [Vijeo Designer HMI Software](#) and catalog [DIA5ED2130614EN](#).

Vijeo™ Design'Air HMI Application

Vijeo Design'Air is an HMI application for Android and iOS tablets and smartphones. This feature enables you to remotely connect to a Magelis HMI terminal over a WiFi network and have a graphical view of the HMI terminal on your tablet and smartphone.

During the design phase, you have the ability to set the HMI terminal to be detectable by Vijeo Design'Air. You can secure access to the HMI by requiring user authentication during login. You can also configure the HMI's accessibility level to view only or full control. In this configuration, the HMI terminal acts as the server, while the tablet or smartphone acts as the client. The server and client communicate over a WiFi wireless, 3G, 4G, or LTE network.

After a connection is established, you can use some of the functionalities of tablets and smartphones to remotely interact with the HMI terminal. For example, you can perform touch or swipe actions to start or stop a process or to navigate between screens. You can also use pinch action to zoom in and out of a screen for better viewing. Download Vijeo Design'Air from Google Play® or the App Store® in iTunes®. For more information,

[1] 62=current version number.

refer to www.schneider-electric.us [Vijeo Designer HMI Software](#) and catalog [DIA5ED2130614EN](#).

Vijeo™ Design'Air Plus

Vijeo Design'Air Plus is a feature in Vijeo Designer and application for Android and iOS tablets and smartphones. Vijeo Design'Air Plus enables you to create a tablet/smartphone project specifically for the tablet or smartphone display size. At runtime, an operator can access the user application to display data and control automation processes on the tablet or smartphone.

You can use Vijeo Designer's drawing tools to create and edit a visual representation of the automation process. You can draw shapes and parts (such as rectangles, arcs, and pies), Toolchest parts (such as numeric displays, switches, and bar graphs), use the gradient feature to enhance the color of the drawn objects, and set up an Alarm Panel for remote alarm monitoring.

Vijeo Design'Air Plus provides operators with the capability to select a user application, and on successful login, download and launch the tablet/smartphone application. The operator can view and monitor an automation process, and for example, change values in numeric displays and string displays. In the Alarm Panel, the operator can monitor and acknowledge alarms.

Download Vijeo Design'Air Plus from Google Play® or the App Store® in iTunes®.

For more information, refer to www.schneider-electric.us [Vijeo Designer HMI Software](#) and catalog [DIA5ED2130614EN](#).

Vijeo Citect SCADA Software

SCADA Expert Vijeo Citect, is the operating and monitoring component of PlantStruxure™, the new Process Automation system of Schneider Electric. With powerful visualization capabilities and operational features, it delivers actionable insight faster, enabling operators to respond quickly to process disturbances and thereby increase their effectiveness. SCADA Expert Vijeo Citect is now part of StruxureWare, the brand name identifying Schneider Electric's various software applications and suites to drive business performance while conserving enterprise resources. SCADA Expert Vijeo Citect can be tailored to a wide array of industry rigors and demands, and continuously seeks to meet the increasing requirements of emerging industry sectors. Many of the world's leading organizations successfully utilize SCADA Expert Vijeo Citect, as it meets their specific industry needs.

Vijeo™ Historian

Plant Operation Vijeo Historian, is the information management component of PlantStruxure™ architecture. It comprises the historian and portal functionalities of the solution, enabling you to accurately store data while connecting your production and business systems through its active data transfers and simple, easy-to-use reporting. Plant Operation Vijeo Historian is now part of StruxureWare. StruxureWare is the brand name identifying Schneider Electric's various software applications and suites to drive business performance while conserving enterprise resources.

Modicon™ OTB Distributed I/O System

The open and modular new Modicon OTB distributed I/O system offers an ideal solution for IP20 distributed input/output requirements. Users can create I/O islands managed by a master controller, via a fieldbus or communication network. It includes three communication bases for the various types of fieldbus: CANopen™, Ethernet TCP/IP, or Modbus™ RS 485 serial. Discrete or analog I/O is available.

More information is available in catalog [DIA3ED2040801EN-US](#).

Modicon™ STB Distributed I/O Platform

The Modicon STB is a highly modular distributed I/O platform, integrated wiring solution, and power management system that delivers effective and targeted control. With an open network adaptable to most major field buses, a flexible “island” I/O structure, and simple configuration via the STBSUP1000 software, Modicon STB is the right choice. The Modicon STB distributed I/O can also be configured directly from Unity™ Pro application software. More information is available at www.schneider-electric.com.

Modicon™ Telefast™ ABE7 Sub-bases, IP20

The Modicon Telefast ABE7 pre-wired system enables connection and adaptation of control signals of industrial PLC cards that are fitted with HE10 connectors. It rationalizes cabling by replacing PLC terminals and traditional terminal blocks—thus improving simplicity and economy. For more information, refer to [Advantys Telefast ABE7](#) on Schneider-Electric.us and catalog [DIA3ED2160602EN](#).

Modicon™ Telefast™ ABE9 Passive Splitter Boxes, IP67

Modicon Telefast ABE9 splitter boxes eliminate long and difficult cable runs by avoiding the use of intermediate junction boxes. Due to their modularity and size, they are perfect for the requirements of your varying applications. For more information, refer to [Modicon ABE9](#) on Schneider-Electric.us and catalog [DIA3ED2160602EN](#).

Modicon™ TM7 I/O Blocks, IP67

Compact and flexible, the TM7 IP67 I/O Blocks allow connection of sensors and actuators at the heart of processes or machines in severe environments. The wide range of modules provides solutions to match your exact needs. It includes connectivity to CANopen. For more information, refer to [Modicon TM7 Remote I/O for Harsh Environments](#) on Schneider-Electric.us and catalog [DIA3ED2140405EN](#)

Modicon™ Momentum™ Distributed I/O and PLC

The small footprint and open architecture of the Momentum PLC product line make it extremely versatile for a variety of automation applications. The Momentum PLC is ideal for PC-based control, distributed control, distributed I/O, and traditional, standalone PLC control. Momentum PLC options and accessories include: I/O bases, processor adapters, option adapters and communication adapters that are interchangeable and snap together to deliver optimal flexibility throughout the control system lifecycle. Using Ethernet as its communications backbone, the Modicon Momentum M1E Processor delivers all the performance benefits of real-time control. The open architecture of the M1E processor makes it a universal controller for distributed I/O, compatible with many of the major fieldbus and control network environments. An integral Ethernet port in the M1E allows users to perform a wide range of functions over Ethernet, including data acquisition, peer-to-peer communications, and I/O scanning. Five embedded web pages enable the use of a standard web browser to read status and diagnostic information from the processor. The most recent addition to the Momentum product offer is the Momentum M1E ConneXium switch. This model combines the power and functionality of the M1E processor with the communication versatility of four Modbus Ethernet TCP/IP ports. The award winning M1E not only seamlessly connects I/O and other control devices via open standards; it delivers the performance of a full function, real-time controller for stand-alone and distributed system configurations in one money-saving unit. For more information, refer to www.schneider-electric.us [Modicon Momentum](#) and catalog [MKTED205061EN-US](#)

Ethernet TCP/IP Products

The recognition of Ethernet TCP/IP, both in organizations and on the internet, has made it the communication standard of today. Its wide use is leading to a reduction in connection costs, increased performance and the addition of new functions, which all combine to ensure its durability.

Ethernet TCP/IP meets the connection requirements of every application:

- Twisted pair copper cables for simplicity and low cost
- Optical fiber for immunity to interference and for long distances
- Communication redundancy, inherent in the IP (internet protocol)
- Remote point-to-point access via the telephone network or the Internet for the cost of a local call

Ethernet TCP/IP, a truly open technology, supports all types of communication:

- Web pages
- File transfer
- Industrial messaging

With its high speed, the network no longer limits the performance of the application. The architecture can evolve without any difficulty. The products or devices remain compatible, ensuring the long-term durability of the system.

More information on Ethernet and Ethernet Products is available in catalog [MKTED208054EN-US](#).

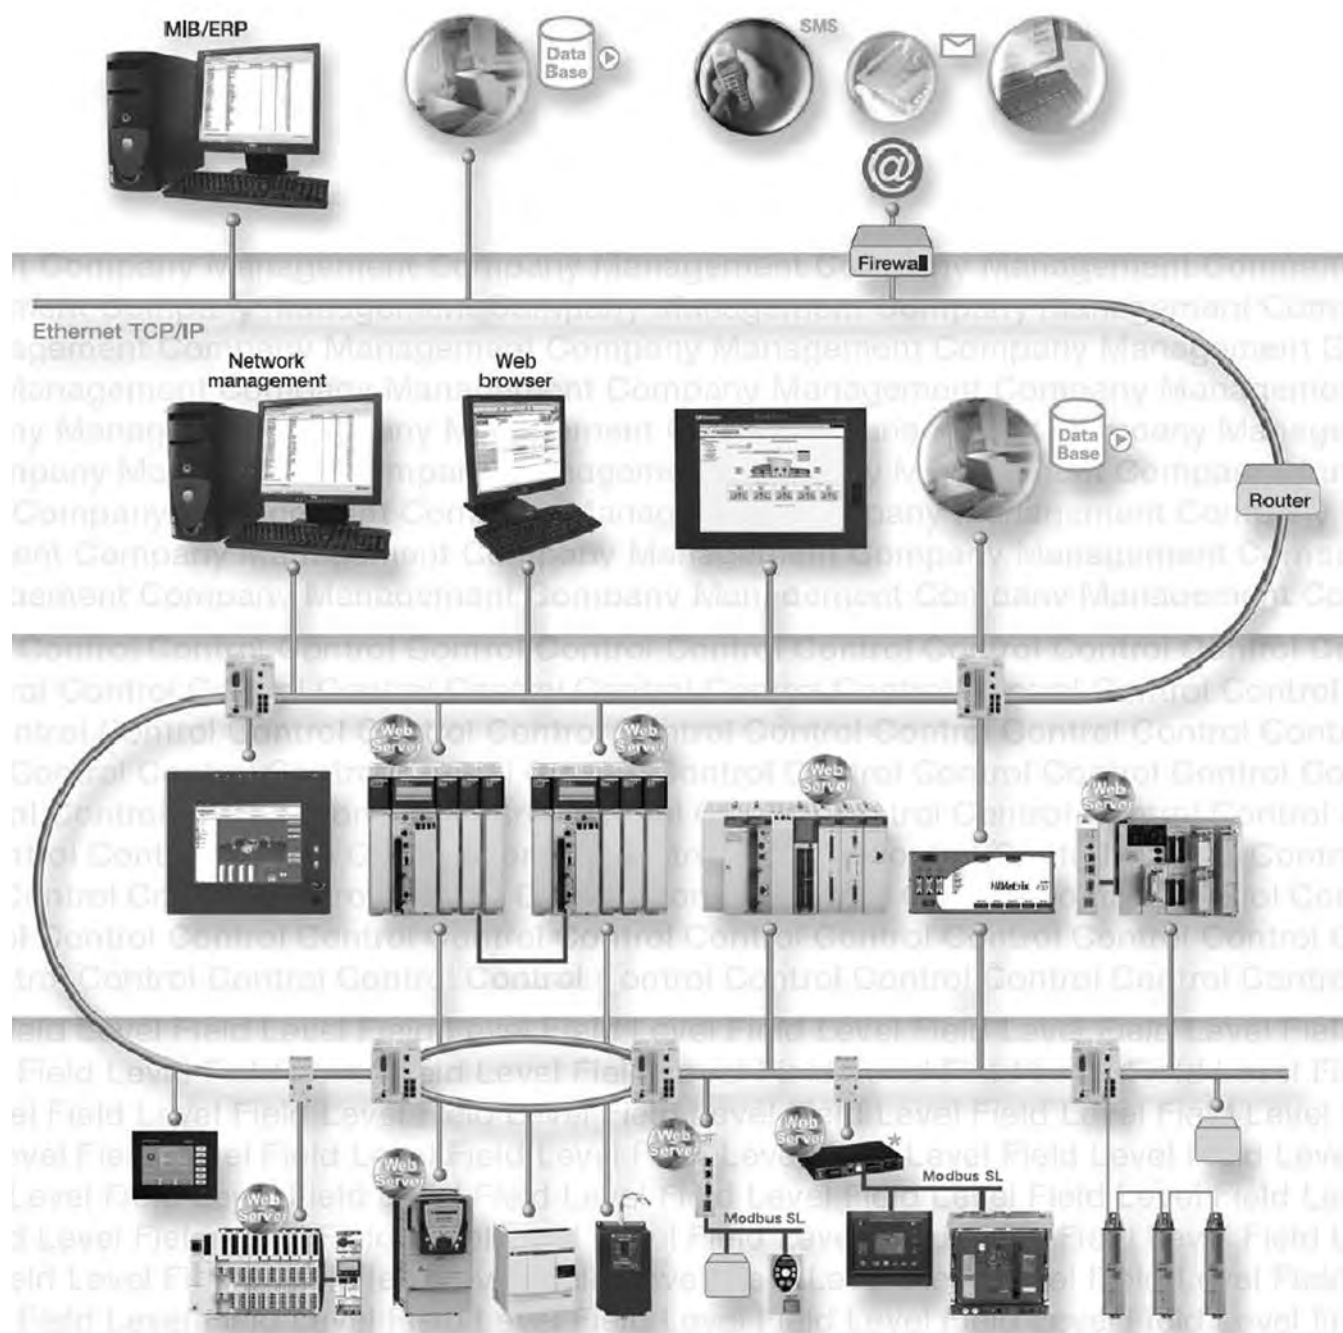

ConneXium™ Ethernet Products

The ConneXium line of networking products offers a complete range of Ethernet switches (managed and unmanaged), hubs, transceivers, gateways, cabling, and diagnostic monitoring software for demanding industrial environments. With fiber and redundant capabilities, along with advanced filtering and security features, ConneXium products improve the performance and security of the network. More details can be found at www.schneider-electric.com.

Transparent Ready™ Solutions

Transparent Ready products cover solutions in Industrial automation to electrical Distribution, and are based on universal Ethernet TCP/IP and Web technologies. They provide seamless communication between plant floor devices, like PLCs, drives, and MCCs, with corporate business systems. Use of the open Modbus TCP/IP and EtherNet/IP protocols that are the leading industrial Ethernet protocols, broadens the scope of dedicated machine diagnostics to remote management. Choosing Transparent Ready means opting for flexible, open automation architectures. More details can be found at www.schneider-electric.com.

CANopen Network Products

CANopen is an open network that is supported by over 400 companies world wide and promoted by CAN in Automation. CANopen is standardized in the EN50325-4 and in ISO15745-2 for its device description.

The main reason for using a network is the performance and the flexibility to adapt the network exactly to the requirements of the application. CANopen provides a unique feature for the adaptation of the data transmission. Based on the producer/consumer model, CANopen allows for a data transmission broadcast, peer-to-peer, change-of-state and cyclic communication. This means it transmits data only when required or on a specified time base. Process data objects can be individually configured. Parameters can be changed at runtime.

CANopen combines ease of installation with inexpensive devices. CANopen provides an integrated equipotential bonding in the cable. Therefore, an additional cable or stranded copper ribbon to achieve the same potential on all network devices is not necessary. Installation costs are heavily reduced.

More information on CANopen and CANopen Products is available in catalog [MKTED208054EN-US](#).

Lexium™ Motion Control Products

Lexium ILx Series

The Lexium ILx is an integrated, or combination, drive and motor series. This series comes in 3 different motor versions (DC brushless, stepper, and servo). Safe Torque Off (STO), highly customizable cable entry and communication options combined with detailed user guides, function blocks, and sample code, make this product ideal for use with both our Modicon and 3rd party controllers.

Table 27.1: Lexium ILx Characteristics

Input Voltage	12–48 Vdc
Motor Size	150–305 W

Lexium 32 Series

The Lexium 32 servo drive offer is designed to simplify the life cycle of machines. SoMove setup software, a backup memory card, side-by-side mounting, and easily accessible color-coded plug-in connectors all help to make installation, setup, and maintenance easier. The compact size of the servo drives and servo motors provides maximum power in the minimum space, which helps to reduce overall machine size and costs. The ability to use 3rd party motors, multiple communication cards, as well as standard encoders, enable adaptation to numerous types of control system architecture for industry. An integrated safety function and access to additional safety functions reduce design times and make it easier to comply with safety standards.

Table 27.3: Lexium 32 Characteristics

Input Voltage	Single phase: 115–240 Vdc 3-phase: 208–480 Vac
Motor Size	150 W–7 kW (up to 11 kW with 3 rd party motors)

Lexium 32i Integrated Servo

Lexium 32i Series

With servo motor and drive integrated in one housing, the Lexium 32i is designed for application areas requiring high precision and advanced motor control. Unlike traditional servo drives that are installed in a cabinet, the Lexium 32i servo drive is installed directly on the machine to help you improve cost, energy, and can reduce cabinet space by up to 60%. Thanks to standard safety functions (STO), communication options, backup memory card, and its modular design the Lexium 32i sets itself apart in the market place to meet the needs of today's machine builders.

PacDrive Family

Lexium P4 DELTA Robot

Lexium STS SCARA Robot

PacDrive 3

PacDrive 3 is based upon proven logic motion technology, which unifies PLC, motion, and robotics control functionality on a single hardware platform. With its centralized system architecture, PacDrive 3 is the ideal solution for controlling a broad range of servo-driven production and packaging machines, as well as material handling equipment and robotics, using fully integrated, IEC 61131-3-compliant program structures. More than 80.000 machines worldwide are controlled by PacDrive to this day.

HVAC/R Controllers

Schneider Electric Modicon M171 Programmable Solution

Modicon M171 logic controller: best-in-class for scalability and energy efficiency, dedicated for HVAC/R and pumping applications. Designed to meet customer's needs by reducing time-to-market, reducing costs, improving machine efficiency, and simplifying integration. Reduce overall time-to-market with our application experts, pre-developed proven architectures, and existing applications (libraries, application function blocks, and baseline examples). Reduce costs through our optimized platforms, embedded webserver, and scalable platforms. Improve overall machine efficiency with integration of variable speed drives, Coefficient of Performance monitoring, and remote interface capabilities. Simplify equipment integration and maintenance through a wide choice of connectivity options scalable to small and large applications, along with an embedded webserver interface.

The M171 programmable platform consists of the **SoMachine™ HVAC** software suite, **M171O**, and **M171P**, a complete range from simple and compact through complex and BMS connected applications.

Key accessories include the plug-in communication modules to facilitate integration with Building Management Systems in residential, commercial, and industrial end-user applications, along with I/O expansion modules, and a variety of remote user interface devices.

SoMachine HVAC

Modicon M171 integrated software development suite allows for intuitive management of every step in the process: developing the application, programming and servicing controllers, configuring communication networks, design of user interface and web pages, and full de-bug and simulation capabilities. Software languages are compliant with IEC 61131-3 programming standards, including Structured Text, Function Block Diagram, Ladder, Instruction List, and Sequential Flow Chart.

M171O

The **Modicon M171** optimized logic controller for simple and compact machines is the smallest programmable controller on the market, offering tremendous versatility. Packaging comes standard in either a 4-DIN or 32x74 mm panel mount option, with or without the user interface. Power input can be specified with either 12–24 V or 100–240 Vac, depending on the model. The controller features up to twenty-two I/O, including three analog outputs and five analog inputs. One I/O expansion module and two remote user interface devices can be added to expand capabilities.

M171P

The **Modicon M171** performance logic controller for complex and BMS connectable machines provides more processing power, I/Os, connectivity, and an embedded webserver. Packaging comes standard 8 DIN rail-mounted configuration with or without the display and in an alternative Panel mount version, ideally for distributed control systems or as a centralized gateway device. Designed with integrated RS-485 and CAN ports, a connectivity module can be added to expand capabilities with Modbus RTU and TCP, BACnet MSTP and IP, HTTP, CAN, and Modbus ASCII. Power input can be specified to operate with 24 Vac/Vdc or 48 Vdc. The controller features up to twenty-seven I/O, including five analog outputs and six analog inputs. Up to twelve I/O expansion modules and two remote user interface terminals can be added to meet almost any application need.

Thalassa Polyester Enclosures

Ventilation Systems with Filters

Spacial™ Steel Enclosures

Metal enclosures and boxes

From our small boxes to large modular floor-standing enclosures, with the Spacial range you can find the optimal fit for your applications. Our extensive range of easy-to-use accessories helps you save time during your projects.

Select between steel or stainless steel to better suit the installation environment. In our stainless-steel offer you can find the optimal solution where cleanliness or protection in highly corrosive environments are required.

Steel: Indoor non-clean industrial environment

The environment in industrial plants can subject electric and electronic components to dust, splashing oil, and impacts. Such environments require a range of enclosures that are suited to harsh conditions yet are easy to install.

- **Universal range**, for industry.
- **EMC (electromagnetic compatibility) range**, against electromagnetic disturbances (treated with Aluzinc).

304L - 316L stainless steel: Demanding industrial environment

Food and beverage, pharmaceutical, petrochemical, and infrastructure industries have particularly demanding hygiene and corrosion resistance requirements. Our Spacial range is available in two grades of stainless steel:

- **304L stainless steel**, for resistance to corrosion and ease of cleaning (often used in food production environments).
- **316L stainless steel, also known as "marine stainless steel,"** for very high resistance to corrosion (used in saline or chlorinated environments).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

Product family names:

Spacial S3DC: *Steel wall-mounting enclosures*

Spacial SM: *Compact metal enclosures*

Spacial SF: *Modular metal enclosures*

Spacial S3X: *Stainless-steel wall-mounting enclosures*

Spacial SMX: *Stainless-steel monobloc floor-standing enclosures*

Spacial SFX: *Stainless-steel modular enclosures*

Thalassa™ Polyester Enclosures

Insulated enclosures and boxes

Without the right protection, harsh environments can expose your installation to chemicals or other substances.

Developed to help protect your equipment in outdoor applications or harsh conditions, our Thalassa offer ranges from boxes to floor-standing enclosures made from fiberglass reinforced polyester.

Our Thalassa industrial boxes in ABS or polycarbonate are strong, easy to install, and designed to be used in highly demanding environments.

Insulating polyester and plastic materials (ABS, polycarbonate): Outdoor infrastructures and severe industrial environments

Outdoor infrastructures and electrical installations are exposed to direct sunlight, rain, saline mist, extreme temperatures, oil splashes, chemical and corrosive agents, and are in contact with the public.

- **Universal range**, for industry.
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

Product family names:

Thalassa PLM: *Polyester wall-mounting enclosures*

Thalassa PLA: *Polyester floor-standing enclosures*

ClimaSys™ Thermal Management System Thermal Management

Preserving and keeping the right temperature inside your enclosure is vital for maximizing the average service life of your installed devices. With our ClimaSys offer you can find the right solution, be it ventilation, cooling or heating, including control units for temperature, humidity and much more.

Product family names:

ClimaSys CV: *Ventilation systems*
ClimaSys CR: *Insulated resistance heaters*
ClimaSys CC: *Thermal control*

Our Software Suite

Spacial.pro

Spacial.pro allows you to make switchboard proposals based on the standard Spacial™ offer. A full project with several sets of switchboards is quoted in minutes, with automatic creation of the bill of material and 2D drawings for front and side views.

ProClima

Calculate the right choice for your thermal management requirements, according to the environment and the electrical/electronic devices installed inside the enclosure.

Spacial.ref and Thalassa.ref

These digital rules assist you in selecting the appropriate components for your application from our extensive product range. The tool automates product and accessory selection to help save you time and money.

[7] See Table 28.2 UL File Numbers for Enclosures, page 28-3.

Ventilation Systems with Filters

Specially recommended for installations in which the ambient temperature is lower than the desired temperature inside the enclosure, a high protection rating is required: IP54 or IP55, and the surrounding environment is relatively clean, allowing air to enter the enclosure.

- 38 to 850 m³/h.
- Five input voltages: AC: 400/440 V, 230 V, 115 V (50/60 Hz), DC: 48 V and 24 V.
- Broad range of accessories (filters, IP55 and EMC covers, anti-vandalism kit).
- **UL Listing:** E80264

Thermal Control

Thermostats control the temperature inside the enclosure and send a signal when maximum or minimum temperature values have been reached.

- Temperature control: adjustable thermostats; single or double.
- Relative humidity control: adjustable humidistat.
- Temperature and relative humidity control: adjustable hygrotherm.

EcoStruxure™: IoT-enabled Architecture and Platform

EcoStruxure™ is Schneider Electric's IoT-enabled, plug-and-play, open, interoperable architecture and platform, in Homes, Buildings, Data Centers, Infrastructure and Industries.

EcoStruxure delivers one architecture, serving four end markets (Building, Data Center, Industry, Infrastructure), with six domains of expertise: ^[1]

- EcoStruxure™ Power
- EcoStruxure™ Building
- EcoStruxure™ IT
- EcoStruxure™ Machine
- EcoStruxure™ Plant
- EcoStruxure™ Grid

Apps, Analytics, and Services ^[1]

Interoperability is imperative to supporting the diverse hardware and systems in building, data center, industry, and grid end markets. EcoStruxure enables a breadth of agnostic applications, analytics & services for seamless enterprise integration.

Edge Control ^[1]

Mission-critical scenarios can be unpredictable, so control of devices at the edge of the IoT network is a must. This essential capability provides real-time solutions that enable local control at the edge, protecting safety and uptime.

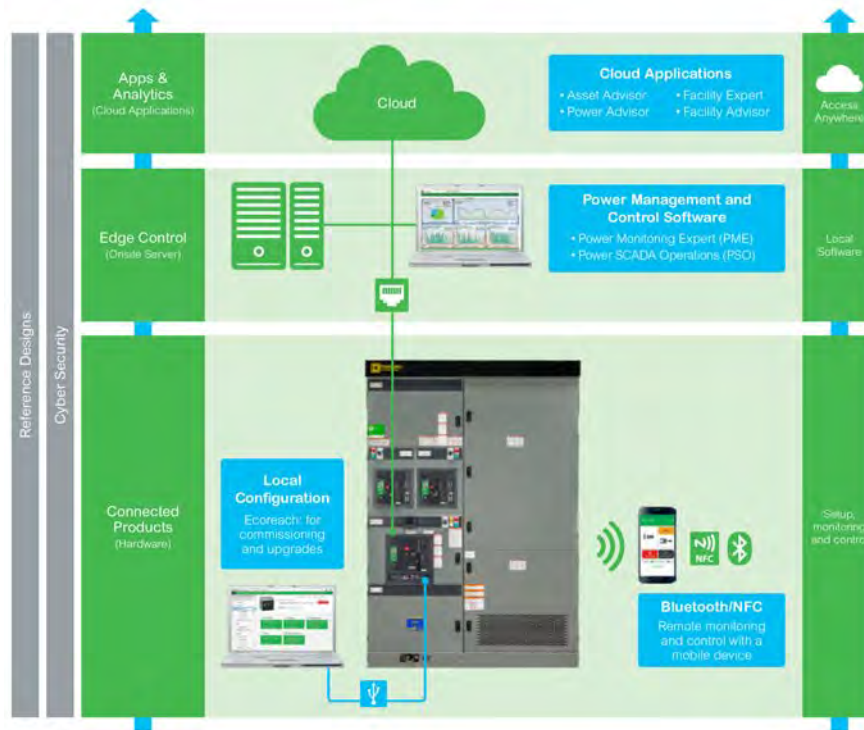

Connected Products ^[1]

The Internet of Things starts with the best things. Our IoT-enabled best-in-class connected products include breakers, drives, UPSs, relays, sensors, and more. Devices with embedded intelligence drive better decision-making throughout operations.

^[1] EcoStruxure™ is continually evolving and expanding. The printed Digest may not reflect all available connected products, apps, analytics, and services. Refer to EcoStruxure™ on www.se.com/us for the latest information.

EcoStruxure™ Power

Schneider Electric's EcoStruxure Power offers advanced power system communication at every level of your operation. Connected products such as Masterpact MTZ circuit breakers are a key component of EcoStruxure Power, providing real-time operations data, smart analytics, and improved safety and security to your facility and processes. Welcome to the future of power distribution. [1]

Visit [EcoStruxure™ Power](http://www.schneider-electric.us) on www.schneider-electric.us for the latest information.

Apps, Analytics & Services [1]

Get actionable predictive maintenance information that protects your customers, safeguard your reputation and minimizing financial impact.

EcoStruxure™ IT

In a connected world, it's now more important than ever to protect critical information and data. Ensure that your data center's physical infrastructure can adapt quickly to support both future demand driven by IoT and growth (in the cloud and at the edge) without ever compromising availability or operational efficiency. [1]

EcoStruxure™ Plant and Machine

Schneider Electric is leading the digital transformation of industrial automation markets. Delivered through our EcoStruxure architecture, our IIoT technologies, including integrated software, are ready for smart manufacturing and can deliver new business opportunities for plants and machine builders — increasing profitability and productivity.

[1]

Apps, Analytics & Software [1]

Our full portfolio of software, apps, and analytics offer tools and information in a format that is easily actionable to turn plant personnel into business decision makers, who can contribute easily to optimizing your system.

EcoStruxure™ Energy and Sustainability Services

Discover our [EcoStruxure™ Energy and Sustainability Services](#) (formerly known as Energy and Sustainability Services), including big data management, to turn this vision into your business reality.

Active Energy Management: an integrated approach for sustainable growth

Organizations are starting to integrate how they use and buy energy with sustainability initiatives to see additional benefits such as increased efficiency, financial savings and more sustainable operations across their global footprint. We call this market convergence Active Energy Management. Find out how you can look at energy and sustainability holistically and start your journey to Active Energy Management.

All Schneider Electric Services

Schneider Electric is dedicated to maintaining and improving your system's reliability, productivity, comfort and efficiency, and providing you with power, automation and control, and building life cycle service solutions.

Our customer support services are designed so that you can select the level of expertise and resources you need to keep your processes and infrastructure at peak operational performance, anywhere in the United States, any time you need us. ^[1]

Visit [Services](#) on [www.schneider-electric.us](#) for more information:

Field Services

Schneider Electric Services safely and consistently delivers expert care across your systems, enabling you to operate at peak performance. From power restoration services to modernization and upgrade solutions, we have the expertise to work on any manufacturer's equipment.

Consulting Services

Our consultants serve as trusted advisers who will provide recommendations to optimize your energy profile to minimize costs, solve complex power system issues to ensure electrical reliability, and provide a strategy to meet future energy requirements.

Partner Managed Services

Featuring our software suite of managed services which help to improve operations, manage assets, and decrease energy costs in your buildings.

Integrated Facility Management

Reduce OpEx, avoid unplanned costs, and increase uptime throughout your data center's life cycle.

EcoStruxure™ Energy and Sustainability Services

We help our clients design a strategy, deliver efficiency in their facilities and sustain results over time through long-term partnerships. As an unbiased, independent consultant, we work with clients in more than 100 countries; from regional companies to the world's largest corporations.

Natural Disasters Support

When disaster strikes, Schneider Electric is committed to helping customers restore power safely and efficiently, 24 hours a day. If you need assistance, call us at 1-888-272-6841 and enter PIN 987833#

* Refer to Section 310.15(B)(2)(a) for the ampacity correction factors where the ambient temperature is other than 30°C (86°F). Refer to 310.15(B)(3)(a) for more than three current-carrying conductors.

** See Section 240.4(D) for conductor overcurrent protection limitations.

120/240 Volt Single Phase Dwelling Services and Feeders [Section 310.15(B)(7)]

For one family dwellings and the individual dwelling units of two family and multifamily dwellings, service and feeder conductors supplied by a single phase, 120/240 volt system shall be permitted to be sized as follows:

- For a service rated 100 through 400 A, the service conductors supplying the entire load associated with a one family dwelling, or the service conductors supplying the entire load associated with an individual dwelling unit in a two family or multifamily dwelling, shall be permitted to have an ampacity not less than 83 percent of the service rating.
- For a feeder rated 100 through 400 A, the feeder conductors supplying the entire load associated with a one family dwelling, or the feeder conductors supplying the entire load associated with an individual dwelling unit in a two-family or multifamily dwelling, shall be permitted to have an ampacity not less than 83 percent of the feeder rating.
- In no case shall a feeder for an individual dwelling unit be required to have an ampacity greater than that specified in (1) or (2).
- Grounded conductors shall be permitted to be sized smaller than the ungrounded conductors, provided that the requirements of Sections 220.61 and 230.42 for service conductors or the requirements of Sections 215.2 and 220.61 for feeder conductors are met.

Where correction or adjustment factors are required by 310.15(B)(2) or (3), they shall be applied to the ampacity associated with the temperature rating of the conductor.

NEC 210.19 Conductors—Min. Ampacity and Size

For branch circuits not more than 600 volts, conductors shall have an ampacity not less than the maximum load to be served. Conductors shall be sized to carry not less than the larger of (a) or (b).

- Where a branch circuit supplies continuous loads or any combination of continuous and noncontinuous loads, the minimum branch-circuit conductor size shall have an allowable ampacity not less than the noncontinuous load plus 125 percent of the continuous load.
- The minimum branch-circuit conductor size shall have an allowable ampacity not less than the maximum load to be served after the application of any adjustment or correction factors.

Exception: If the assembly, including the overcurrent devices protecting the branch circuit(s), is listed for operation at 100 percent of its rating, the allowable ampacity of the branch-circuit conductors shall be permitted to be not less than the sum of the continuous load plus the noncontinuous load.

Correction Factors

Based on NEC Table 310.15(B)(2)(a) Ambient Temperature Correction Factors Based on 30°C (86°F)

Ambient Temperature (°C)	Temperature Rating of Conductor			Ambient Temperature (°F)
	60°C	75°C	90°C	
10 or less	1.29	1.20	1.15	50 or less
11–15	1.22	1.15	1.12	51–59
16–20	1.15	1.11	1.08	60–68
21–25	1.08	1.05	1.04	69–77
26–30	1.00	1.00	1.00	78–86
31–35	0.91	0.94	0.96	87–95
36–40	0.82	0.88	0.91	96–104
41–45	0.71	0.82	0.87	105–113
46–50	0.58	0.75	0.82	114–122
51–55	0.41	0.67	0.76	123–131
56–60	—	0.58	0.71	132–140
61–65	—	0.47	0.65	141–149
66–70	—	0.33	0.58	150–158
71–75	—	—	0.50	159–167
76–80	—	—	0.41	168–176
81–85	—	—	0.29	177–185

Adjustment Factors – See NEC Table 310.15 (B)(3)(a)

Where the number of current-carrying conductors in a raceway or cable exceeds three, the allowable ampacities shall be reduced as shown in the following table:

Number of Conductors***	Percent of Values in Table 310.15(B)(16) through Table 310.15(B)(19) as Adjusted for Ambient Temperature if Necessary
4 through 6	80
7 through 9	70
10 through 20	50
21 through 30	45
31 through 40	40
41 and Above	35

*** Number of conductors is the total number of conductors in the raceway or cable, including spare conductors. The count shall be adjusted in accordance with Section 310.15(B)(5) and (6). The count shall not include conductors that are connected to electrical components but that cannot be simultaneously energized.

NEC 210.20(A) Continuous and Noncontinuous Loads

Where a branch-circuit supplies continuous loads or any combination of continuous and noncontinuous loads, the rating of the overcurrent device shall not be less than the noncontinuous load plus 125 percent of the continuous load.

NEC 240.4 Protection of Conductors

Conductors, other than flexible cords, flexible cables, and fixture wires, shall be protected against overcurrent in accordance with their ampacities specified in 310.15, unless otherwise permitted or required in 240.4(A) through (G).

NEC 240.4 (D) Small Conductors

Unless specifically permitted in 240.4(E) or (G), the overcurrent protection shall not exceed that required by (D)(1) through (D)(7) after any correction factors for ambient temperature and number of conductors have been applied.

NEC 430.22(A) Direct-Current Motor-Rectifier Supplied

For dc motors operating from a rectified power supply, the conductor ampacity on the input of the rectifier shall not be less than 125 percent of the rated input current to the rectifier. For dc motors operating from a rectified single-phase power supply, the conductors between the field wiring output terminals of the rectifier and the motor shall have an ampacity of not less than the following percentages of the motor full-load current rating:

- (1) Where a rectifier bridge of the single-phase, half-wave type is used, 190 percent.
- (2) Where a rectifier bridge of the single-phase, full-wave type is used, 150 percent.

Product Selection made EASY.

Our online Product Selector tools are designed to assist you through the product selection process with the click of a button.

Save Time.

Click-to-answer questions guide you through selecting the right product for your application!

Dive Deeper.

Direct links to detailed product information at your fingertips.

Share your Projects.

Email data sheets directly from the Product Selector.

Manage Large Projects.

Create a Project List online to keep you organized.

Efficient.

Distributors can add product selector results directly to their cart and checkout.

Join the Movement!

See why thousands of customers are using our online Product Selectors today.
